Consolidation of Dao Heng

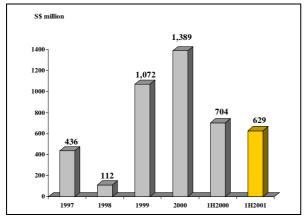

Profit and Loss

Following receipt of Hong Kong Monetary Authority approval on June 27, 2001, DBS Bank began its tender for shares in Dao Heng Bank Group Limited (DHG) on June 29, 2001.

At June 30, 2001, DBS Bank through DBS Diamond Holdings Ltd. (80% owned) had already obtained a 56.9% effective holding in DHG. Consequently, DHG's assets and liabilities were consolidated. Its pro-rata contribution to the DBSH Group's Profit & Loss Statement however, was deemed not material for inclusion in this reporting period.

Exhibit 1

Group Net Profit Attributable to Members

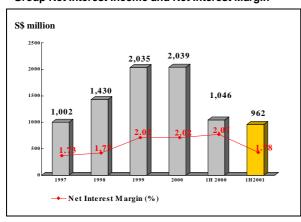

DBSH Group's net profit attributable to members in First Half 2001 decreased 10.6% to \$\$629 million.

Income before operating expenses registered an increase of 2.7% amidst weaker macroeconomic conditions and an increasingly competitive environment. Operating expenses increased by 26.1% to S\$749 million. The increase was due to higher staff cost (S\$108 million), technology-related expenses (S\$24 million) and advertising expenses (S\$13 million).

Exhibit 2

Group Net Interest Income and Net Interest Margin

Net Interest Income and Net Interest Margin

Net interest income declined by 8.1% to S\$962 million in First Half 2001. Net interest margin decreased to 1.78% as compared to 2.07% in First Half 2000. The lower net interest margin was due to the shift from corporate loans to lower-yielding interbank lendings. Intensified market competition also resulted in narrower interest margin for housing loans. To a smaller extent, the temporary deployment of the proceeds from the recent capital issues in the interbank market also contributed to the reduction in net interest income.

Fee and Commission Income

Fee and commission income decreased 3.7% to S\$251 million, due mainly to lower stockbroking fees (S\$23 million) resulting from weak market volumes and the deregulation of brokerage commission. The decrease was partially offset by higher deposit-related fees (S\$20 million). Fee and commission income contributed to 16.4% of the total operating income, down from 17.5% for First Half 2000.

Dividends & Rental Income

Dividends and rental income decreased marginally by 3.7% to S\$41 million.

Profit of \$\$31 million on the disposal of DBS Securities Building was also included in the accounts.

Operating Expenses

DBSH Group continues to invest heavily in human resources. The 26.1% increase in operating expenses to S\$749 million was mainly due to higher staff costs of S\$108 million, of which S\$42 million can be attributed to one-time contractual payments, staff adjustments and signon bonuses. The balance was principally due to the recruitment of additional staff, salary increments including allowances, and higher variable bonus provisions on an enlarged pool of In addition, higher technology-related (S\$24 million) and advertising expenses (S\$13 million) were incurred for various business Cost-to-income ratio increased to initiatives. 49.0% as compared to 39.9% in First Half 2000.

Provisions

Provisions decreased by 27.7% to S\$46 million. For the five regional countries, lower loan provisions of S\$11 million were required following a reduction in DBS' regional non-performing loans in the First Half 2001. In Singapore, there was a one-time transfer of provisions from general to specific in connection with the folding-in of DBS Finance Ltd to DBS Bank. This transfer accounts for part of the increase in specific provisions for Singapore borrowers.

Minority Interests

DBSH Group had a positive minority interest of S\$4 million, due mainly to the loss attributable to minority shareholders of DBS China Square, a single-property holding company. Net losses were recorded in DBS China Square as provisions were made for the decline in market value of the property held by the company.

Exhibit 3 **Group Non-Performing Loans**

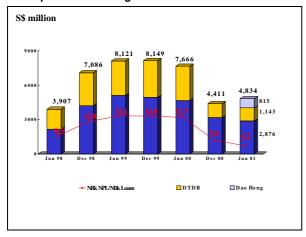

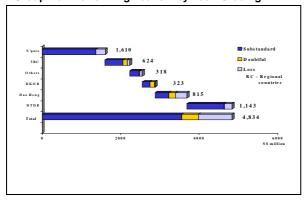

Exhibit 4

Group Non-Performing Loans – by Loan Grading

Asset Quality

Excluding DHG, non-performing loans (NPLs) decreased 8.9% to S\$4,019 million at end-June 2001 as compared to end-December 2000. DHG's NPLs amounted to S\$815 million.

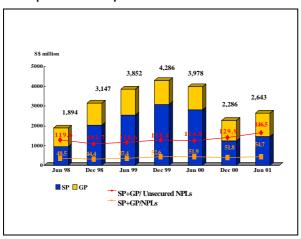

Non-bank NPLs as a percentage of total non-bank loans stood at 6.2%, an improvement compared with 7.6% at end-December 2000, reflecting DBSH's aggressive management of its NPL portfolio across the region. Excluding DHG, non-bank NPLs as a percentage of total non-bank loans would still have declined to 6.5%.

Of the total S\$4,834 million in NPLs, 73% were in the substandard category and 63% were secured by collateral.

Approximately 12% of the NPLs that had been classified as substandard were "performing" NPLs. These loans were classified due to weak financials although debt servicing was still current.

Exhibit 5

Group Cumulative Specific and General Provisions

Cumulative Specific and General Provisions

Total cumulative specific and general provisions at end-June 2001 amounted to 146.5% of unsecured NPLs, and 54.7% of total NPLs (or 59.9% of total NPLs of S\$4,410 million under US SEC guidelines).

Based on MAS guidelines, Group loan loss reserve coverage for DBS Thai Danu's NPLs was 62%.

Balance Sheet

The consolidation of DHG contributed to the increase in DBSH Group assets. Total assets were up 45.5% to S\$156 billion. Customer loans increased by 32.8% to S\$70 billion. Excluding DHG, customer loans increased by S\$1 billion despite a weak loan market. Customer deposits registered 42.8% increase (or S\$34 billion) to S\$115 billion. Excluding DHG, the increase was S\$10 billion. This amount included a one-time placement of S\$5 billion from a customer, which had the effect of bringing down the loan-to-deposit ratio to 60.6%, as compared to 65.2% for First Half 2000.

Capital Adequacy Ratio (CAR)

Combined Tier I and II CAR, measured according to the Bank of International Settlements (BIS) guidelines, remains strong at 17.5%, which is more than twice the minimum BIS requirement of 8%. Of the total, 12.0% is in the form of Tier I capital.

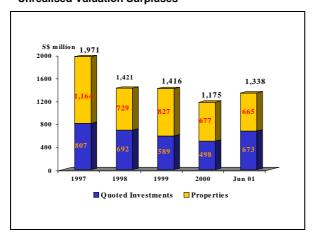

In March 2001, DBS Bank through DBS Capital Funding Corporation (100% owned), issued US\$725 million and S\$100 million subordinated term debts, which qualified for Tier I capital treatment. This was followed by issuance of Tier II US\$850 million subordinated term debt in May 2001.

In May 2001, as part of the capital raising efforts to support the acquisition of DHG, DBS Bank issued S\$1,100 million preference shares. These preference shares qualify for Tier I capital treatment.

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1 Net Interest Income and Margin

DBSH Group's net interest income for 1st Half 2001 was S\$31 million and S\$84 million lower than 2nd Half 2000 and 1st Half 2000, respectively. The net interest margin was 1.78% compared to 1.97% in 2nd Half 2000 and 2.07% in 1st Half 2000. The lower net interest margin was due to the shift from corporate loans to lower-yielding interbank lendings. Intensified market competition also resulted in narrower interest margin for housing loans. To a smaller extent, the temporary deployment of the proceeds from the recent capital issues in the interbank market also contributed to the reduction in net interest income.
