

Liquidity Coverage Ratio ("LCR") For the quarter ended 31 March 2016

DBS Group Holdings Ltd Incorporated in the Republic of Singapore Company Registration Number: 199901152M

The following disclosures for the DBS Bank Group¹ are made pursuant to the Monetary Authority of Singapore ("MAS") Notice to Banks No. 651 "Liquidity Coverage Ratio ("LCR") Disclosure" ("Notice 651").

DBS Bank Group ("Group") has been subjected to the Basel III Liquidity Coverage Ratio ("LCR") standards from 1 January 2015, pursuant to MAS Notice 649. At the all-currency level, the Group is required to maintain daily LCR above 60%, with a 10 percentage point step-up each year to 100% on 1 January 2019. The all-currency LCR minimum for 2016 is 70%. The Group is also required to maintain daily Singapore dollar ("SGD") LCR above 100%.

LCR aims to ensure that a bank has an adequate stock of unencumbered High Quality Liquid Assets ("HQLA") to meet its liquidity needs for a 30-calendar day liquidity stress scenario. Notice 649 stipulates the range of liquid assets that qualify for HQLA, as well as the applicable haircuts for each category of liquid assets. Net cash outflows are computed using the standardized 30-day cash flow rates defined in the same notice. The amounts after application of haircuts or 30-day cash flow rates are reflected in the "weighted amount" column of the tables below.

The Group seeks to ensure that its LCR remains above the specified regulatory minimum requirements. This is achieved by:

- Establishing internal early warning triggers and thresholds based on observed movements in LCR over time:
- 2. Monitoring and managing the LCR closely to ensure it stays within established boundaries; and
- 3. Strategically managing the liquidity risk arising from the balance sheet structure.

_

¹ Pursuant to Sections 36 and 38 of the Banking Act, and as outlined in MAS Notice 649, DBS Bank complies with the LCR requirements on a consolidated ("DBS Bank Group") level, which consolidates the assets and liabilities of its banking subsidiaries.

1. Average All-Currency LCR for the quarter ended 31 March 2016

(Number of data points: 91)

(in S\$ millions)		UNWEIGHTED ²	WEIGHTED VALUE	
HIGH-QUALITY LIQUID ASSETS				
1	Total high-quality liquid assets (HQLA)		66,876	
CASH O	UTFLOWS			
2	Retail deposits and deposits from small business customers, of which	163,677	13,601	
3	Stable deposits	55,337	2,767	
4	Less stable deposits	108,340	10,834	
5	Unsecured wholesale funding, of which	127,549	70,595	
6	Operational deposits (all counterparties) and deposits in institutional networks of cooperative banks	21,936	5,294	
7	Non-operational deposits (all counterparties)	98,245	57,933	
8	Unsecured debt	7,368	7,368	
9	Secured wholesale funding		928	
10	Additional requirements, of which	43,429	9,257	
11	Outflows related to derivatives exposures and other collateral requirements	9,409	6,029	
12	Outflows related to loss of funding on debt products	-	-	
13	Credit and liquidity facilities	34,020	3,228	
14	Other contractual funding obligations	2,007	1,526	
15	Other contingent funding obligations	16,771	502	
16	TOTAL CASH OUTFLOWS		96,409	
CASH IN	FLOWS			
17	Secured lending (e.g. reverse repos)	3,299	281	
18	Inflows from fully performing exposures	52,536	35,499	
19	Other cash inflows	7,350	4,276	
20	TOTAL CASH INFLOWS	63,185	40,056	
	TOTAL ADJUSTED VALUE			
21	TOTAL HQLA		66,876	
22	TOTAL NET CASH OUTFLOWS		56,353	
23	LIQUIDITY COVERAGE RATIO (%) ³		119%	

² The unweighted amounts refer to cash flows due or callable within 30 days, with the exception of items in rows 13 and 15 which

reflect the full notional balances.

3 The LCR is computed as an average of observations of LCR during the quarter. This may not be equal to an LCR computed with the average values of HQLA and Net Cash Outflows disclosed in the table.

2. Average SGD LCR for the quarter ended 31 March 2016

(Number of data points: 91)

(in S\$ millions)		UNWEIGHTED	WEIGHTED VALUE
HIGH-QU	ALITY LIQUID ASSETS		
1	Total high-quality liquid assets (HQLA)		32,156
CASH OL	JTFLOWS		
2	Retail deposits and deposits from small business customers, of which	114,974	9,200
3	Stable deposits	45,950	2,298
4	Less stable deposits	69,024	6,902
5	Unsecured wholesale funding, of which	23,241	9,784
6	Operational deposits (all counterparties) and deposits in institutional networks of cooperative banks	9,749	2,345
7	Non-operational deposits (all counterparties)	13,470	7,417
8	Unsecured debt	22	22
9	Secured wholesale funding		•
10	Additional requirements, of which	20,165	6,333
11	Outflows related to derivatives exposures and other collateral requirements	5,429	5,290
12	Outflows related to loss of funding on debt products	-	-
13	Credit and liquidity facilities	14,736	1,043
14	Other contractual funding obligations	210	175
15	Other contingent funding obligations	2,902	86
16	TOTAL CASH OUTFLOWS		25,578
CASH IN	FLOWS		
17	Secured lending (e.g. reverse repos)	328	1
18	Inflows from fully performing exposures	10,035	5,431
19	Other cash inflows	19,610	19,383
20	TOTAL CASH INFLOWS	29,973	24,815
	TOTAL ADJUSTED VALUE		
21	TOTAL HQLA		32,156
22	TOTAL NET CASH OUTFLOWS ⁴		6,395
23	LIQUIDITY COVERAGE RATIO (%) ⁵		504%

⁴ Total net cash outflows does not equal to the total cash outflows minus total cash inflows as the cap on inflows is binding. Cash

inflows may be netted against cash outflows up to an aggregate cap of 75% of total cash outflows.

The LCR is computed as an average of observations of LCR in the quarter. This may not be equal to an LCR computed with the average values of HQLA and Net Cash Outflows disclosed in the table.

3. Liquidity Coverage Ratio (continued)

In the first quarter of 2016, average all-currency and SGD LCR were 119% and 504% respectively, well above the regulatory minimum requirements of 70% and 100%. DBS maintains a healthy liquidity position by keeping a stable balance sheet structure that is supported by a diversified funding base.

The Group's LCR is sensitive to (i) balance sheet movements resulting from commercial loan/deposit activities and wholesale inter-bank lending/ borrowing; and (ii) movements due to positions falling into or out of the LCR 30-day tenor, for example loan rollovers. LCR is also sensitive to movements in HQLA driven primarily by changes in cash, balances with central banks and collaterals from secured lending and borrowing transactions.

In the first quarter of 2016, intra-period LCR variances were mainly attributable to the movements in short term corporate deposits. Corporate deposits deployed into the wholesale market generally increase the LCR, and outflows would have the opposite effect. SGD LCR remained high throughout the period, and intra-period movements were driven mainly by the volume of central bank reserves admitted as HQLA.

a) Composition of High Quality Liquid Assets ("HQLA")

DBS holds a pool of unencumbered HQLA that are readily available to meet cash flow obligations under stress scenarios, as defined in the LCR rules. These liquid assets consist predominantly of Level 1 HQLA, which comprises cash, balances with central banks and highly rated bonds issued by governments or supranational entities. These may be included, without haircuts or limitations in quantum, in the total pool of HQLA.

DBS' HQLA include Singapore government securities and local government/central bank securities held at the Group's overseas branches and subsidiaries. This is supplemented by bonds issued by highly rated corporate issuers (including public sector entities), as well as covered bonds issued by reputable financial institutions.

b) Concentration of Funding Sources

DBS strives to develop a diversified funding base with access to funding sources across retail and wholesale channels. The Group's core deposit franchise remains its main source of funds, forming a stable base of funding. This is complemented by wholesale funding, including the issuances of commercial papers, negotiable certificates of deposits, medium term notes and covered bonds. For more information on the Group's funding strategy, please refer to Section 7 of the Risk Management disclosures in the Group's annual report for the year ended 31 December 2015.

c) Derivative Exposures and Potential Collateral Calls

DBS actively manages its over-the-counter ("OTC") and exchange-traded financial derivative exposures arising from market making, trading activities, and its commercial business (including structuring and packaging products for investors and clients). Derivative exposures are mainly from, but not limited to, interest rate swaps and futures, foreign exchange forwards and swaps, and currency swaps. These derivative positions are marked-to-market daily, affecting the collateral amounts posted to and received from interbank counterparties and/or exchanges. Cash

flows resulting from potential changes in collateral amounts posted/received are incorporated into LCR net cash outflows.

d) Currency Mismatch

As part of the Group's funding strategy, DBS makes use of the swap markets to support funding needs across currencies. The Group's stable funding base of customer deposits is predominantly denominated in the local currency of its key operating locations. The Group's core SGD deposit funding provides surplus funds that are swapped into other currencies to support loan demand. Matching the deposit funding currency, the main portion of the Group's liquid assets is denominated in SGD and the local currencies of key operating locations.

e) Centralization of Liquidity Management

In managing funding needs across locations, overseas branches and subsidiaries are encouraged but not required to centralise majority of their borrowing and deployment of funds with Head Office, taking into account the relevant regulatory restrictions while maintaining a commensurate level of presence and participation in the local funding markets.

In managing the Group's pool of liquid assets, the Group is able to monetize liquid assets to meet liquidity shortfalls under times of stress.

For more information on the Group's liquidity risk management, please refer to the annual report for the year ended 31 December 2015.
