**Key:**

CET1: Common Equity Tier 1

AT1: Additional Tier 1

T2: Tier 2

\* Not adjusted for subsequent share of losses or impairment losses

**2 Capital Adequacy and Reconciliation of Regulatory Capital to the Balance Sheet**
*Explanatory Notes*

The following disclosure is made according to the template prescribed in MAS Notice 637 Annex 11E. The column "Amount" shows the amounts used in the computation of the capital adequacy ratios. The column "Amount subject to Pre-Basel III Treatment" shows the amount of each regulatory adjustment that is subject to the treatment specified in the previous capital rules (i.e., according to the cancelled MAS Notice 637 dated 14 December 2007) for the duration of the Basel III transition period. Each of these amounts is taken into the computation of the capital adequacy ratios during the transition period under rows 41C and 56C, as the case may be. For example, during the year 2014, 80% of the regulatory adjustment (i.e., capital deduction) for goodwill is to be taken against Additional Tier 1 in the first instance (c.f., row 41C) and 20% is to be taken against Common Equity Tier 1 in the first instance (c.f., row 8). Each 1 January, up to 1 January 2018, the regulatory adjustment to be taken against Common Equity Tier 1 in the first instance (c.f. row 8) increases by 20 percentage points.

The alphabetic cross-references in the column "Cross Reference to Section 1" relate to those in reconciliation of the balance sheet on pages 2 to 3.

MAS Notice 637 specifies which tier of capital against which each regulatory adjustment is to be taken. When regulatory adjustments are required against Additional Tier 1 or Tier 2 capital, there are circumstances when the amount of eligible Additional Tier 1 or Tier 2 capital respectively falls short of the amount of the regulatory adjustment (e.g., when the amount in row 36 falls short of the amount in row 43). Under such circumstances, the shortfall is taken against the preceding tier of capital (i.e., rows 27 and 42).

MAS Notice 637 specifies the computation of the amount of provisions that may be recognised in Tier 2 capital. General allowances in respect of assets under the standardised approach for credit risk are eligible (row 76), subject to a cap of 1.25% of risk-weighted assets under the standardised approach for credit risk (row 77). General and specific allowances in respect of assets under the internal ratings-based approach exceeding expected loss of these assets are eligible (row 78), subject to a cap of 0.6% of risk-weighted assets under the internal ratings-based approach for credit risk (row 79).

<sup>^</sup> For regulatory adjustments, deductions from capital are reported as positive numbers and additions to capital are reported as negative numbers.

Items marked with a hash [#] are elements where a more conservative definition has been applied to MAS Notice 637 relative to those set out under the Basel III capital standards.

Deferred tax assets relating to temporary differences in excess of specified thresholds c.f. row 21 and 25 are to be deducted under Basel III capital standards (paragraph 69). Under MAS Notice 637, they are deducted in total. If Basel III capital standards were to be applied, eligible capital would have been \$0.2 billion higher and risk-weighted assets \$0.6 billion higher.
