Basel III: Pillar 3 Disclosures

as at 30 September 2015

(Currency: Indian rupees in million)

1. Scope of application

Qualitative Disclosures

DBS Bank Ltd., India ('the Bank') operates in India as a branch of DBS Bank Ltd., Singapore a banking entity incorporated in Singapore with limited liability. As at 30 September 2015, the Bank has a presence of 12 branches across 12 cities. The Bank does not have any subsidiaries in India nor any interest in Insurance Entities. Thus, the disclosures contained herein only pertain to the Bank.

a. List of group entities considered for consolidation

Name of the entity / Country of incorpo- ration	Whether the entity is included under accounting scope of consolidation (yes / no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation15 (yes / no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation

	,	0		
Name of the insurance entities / country of incorporation	Principle activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	% of bank's holding in the total equity / proportion of voting power	Quantitative impact on regulatory capital of using risk weighting method versus using the full deduction method
		Not Applicable		

f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group:

There are no restrictions or impediments on transfer of funds or regulatory capital within the banking group.

2. Capital Adequacy

Qualitative disclosures

The CRAR of the Bank is 15.27% as computed under Basel III norms, which is higher than the minimum regulatory CRAR requirement of 9%.

The Bank's capital management framework is guided by the existing capital position, proposed growth and strategic direction. Growth opportunities have resulted in an increasing and continuing need to focus on the effective management of risk, and commensurate capital to bear that risk. The Bank carefully assesses its growth opportunities relative to the capital available to support them, particularly in the light of the economic environment and capital requirements under Basel III. The Bank maintains a strong discipline over capital allocation and ensuring that returns on investment cover capital costs.

Basel III: Pillar 3 Disclosures (Continued)

(Currency: Indian rupees in million)

2. Capital Adequacy (Continued)

Quantitative disclosures

	Particulars	30 Sep 15
А	Capital requirements for Credit Risk (Standardised Approach)	20,806
В	Capital requirements for Market Risk (Standardised Duration Approach) *	
	- Interest rate risk	3,848
	- Foreign exchange risk	360
	- Equity risk	5
С	Capital requirements for Operational risk (Basic Indicator Approach) *	1,613
D	CET1 Capital Ratio (%)	9.36%
E	Tier1 Capital Ratio (%)	9.36%
F	Total Capital Ratio (%)	15.27%

* Capital required is calculated at 8% of Risk Weighted Assets.

3. General Disclosures

As part of overall corporate governance, the Group Board has approved a comprehensive Integrated Risk Framework covering risk governance for all risk types and for all entities within the Group, including India. This framework defines authority levels, oversight responsibilities, policy structures and risk appetite limits to manage the risks that arise in connection with the use of financial instruments. On a day-to-day basis, business units have primary responsibility for managing specific risk exposures while Risk Management Group (RMG) exercises independent risk oversight on the Bank. RMG is the central resource for quantifying and managing the portfolio of risks taken by the Group as a whole.

A) General Disclosures for Credit Risk

Qualitative Disclosures

Credit Risk Management Policy

The credit policies and basic procedures of the Bank relating to its lending activities are contained in the Local Credit / Loan Policy of the Bank, Core Credit Policy at Singapore and the Credit Manual. These are based on the general credit principles, directives / guidelines issued by the RBI from time to time as well as instructions and guidelines of DBS Bank Ltd, Singapore (hereinafter referred to as 'the Head Office'). In the unlikely event of any conflict amongst the RBI guidelines and Head Office Guidelines, the more conservative policy / guideline is followed.

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

3. General Disclosures (*Continued*)

The Core Credit Policy and the Credit / Loan policy outlines the Bank's approach to Credit Risk Management and sets out the rules and guidelines under which the Bank would develop and grows its lending business. These policies provide guidance to the Bank's Corporate Banking, SME Banking and Financial Institutions Group to manage the growth of their portfolio of customer assets in line with the Bank's credit culture and profitability objectives, taking into account the capital needed to support the growth.

Supplementary policies to the main Core Credit Policy and the Credit / Loan policy have also been laid out, for certain types of lending and credit-related operations. These include subject specific policies relating to risk ratings, Default policy, Specialized Lending etc., as well as guidelines for Real Estate lending, NBFC lending, hedging of FX exposures, credit risk mitigation, sectoral and individual / group borrower limits, bridge loans, bill discounting, etc.

Responsibility for monitoring post-approval conditions resides with the Credit Control Unit (CCU), which reports in to Head of CCU in Singapore, with local oversight of the Senior Risk Executive (SRE) in India. The responsibility for risk reporting is with the Credit Risk - COO team which reports to the SRE in India. The Risk Based Supervision (RBS) submission to RBI contains further details on the same.

Advances are classified into performing and non-performing advances (NPAs) as per RBI guidelines. NPA's are further classified into sub-standard, doubtful and loss assets based on the criteria stipulated by RBI, using the more conservative approach wherever there is a difference.

Quantitative Disclosures

Credit Exposure

Particulars	30 Sep 15
Fund Based *	157,927
Non Fund Based **	188,890

* This amount represents Gross Advances and Bank exposures.

** This amount represents trade and unutilized exposures after applying credit conversion factor and Credit equivalent of FX/derivative exposures.

The Bank does not have overseas operations and hence exposures are restricted to the domestic segment.

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

4. Disclosures for Credit Risk: Portfolios subject to Standardised approach

Qualitative Disclosures

Currently based on our clientele, ratings of the following agencies have been used i.e. CARE, CRISIL, India Ratings and Research Private Ltd., ICRA, Brickwork, SME Rating Agency Pvt Ltd (SMERA), Standards & Poors, Moody's and Fitch for all exposures. The Bank assigns Long term credit ratings accorded by the chosen credit rating agencies for assets which have a contractual maturity of more than one year. However, in accordance with RBI guidelines, the Bank classifies all cash credit exposures as long term exposures and accordingly the long term ratings accorded by the chosen credit rating agencies are assigned. Currently the Bank uses issuer ratings. In accordance with RBI guidelines, for risk-weighting purposes, short-term ratings are deemed to be issue-specific.

Quantitative Disclosures

Categorization of Credit Exposures (Fund and Non Fund based) * classified on the basis of Risk Weightage is provided below:

Particulars	30 Sep 15
< 100 % Risk Weight	207,169
100 % Risk Weight	110,055
> 100 % Risk Weight	20,634
Total	337,858

* Credit Exposures are reported net of NPA provisions and provision for diminution in fair value of advances classified as Restructured Standard.

5. Disclosures for Credit Risk Mitigation on Standardised approach

Qualitative Disclosures

This is detailed in our policy on Credit Risk Mitigation techniques and Collateral Management.

Quantitative Disclosures

Currently, eligible financial collateral in the form of fixed deposits under lien, amount accepted under Parallel Deposit and guarantees issued by eligible guarantor as specified in RBI guidelines have been used as credit risk mitigants. In the case of fixed deposits under lien, the Bank reduces its credit exposure to counterparty by the value of the fixed deposits.

The details of exposures (after application of haircut) wherein the bank has used credit risk mitigants (CRM) are as under:

Product	Amount of CRM
Derivatives	3,465
Fund based exposure	4,525
Total	7,990

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

6. Disclosure on Securitisation for Standardised approach

The Bank has not undertaken any securitisation and hence this disclosure is not applicable.

7. Disclosure on Market Risk in Trading book

Qualitative disclosures

Market Risk arises from changes in value from changes in interest rates yields, foreign exchange rates, equity prices, commodity prices, credit spreads and the impact of changes in the correlations and volatilities of these risk factors. The Banks market risk appetite is determined by the Group Board of Directors, with detailed limit frameworks recommended by the appropriate risk committees. The Group Market & Liquidity Risk Committee, which reports into the Group Risk Executive Committee, oversees the market risk management infrastructure, sets market risk control limits and provides enterprise-wide oversight of all market risks and their management.

The Group's market risk framework identifies the types of the market risk to be covered, the risk metrics and methodologies to be used to capture such risk and the standards governing the management of market risk within the Group including the limit setting and independent model validation, monitoring and valuation.

The principal market risk appetite measure is Expected Shortfall. The Expected Shortfall is supplemented by risk control measures, such as sensitivities to risk factors, including their volatilities, as well as P&L loss triggers (Management Action Triggers) for management action.

Expected Shortfall estimates the potential loss on the current portfolio assuming a specified time horizon and level of confidence. The Expected Shortfall methodology uses a historical simulation approach to forecast the Group's market risk. The methodology is also used to compute average tail loss metrics. Expected Shortfall risk factor scenarios are aligned to parameters and market data used for valuation. The Expected Shortfall is calculated for T&M trading, T&M banking and ALCO book (T&M banking and ALCO book constitute banking Expected Shortfall).

On a daily basis, the Bank computes trading Expected Shortfall for each business unit and location, and at the Group level. Banking Expected Shortfall is computed on a weekly basis for each business unit and location. The trading Expected Shortfall forecasts are back-tested against the profit and loss of the trading book to monitor its predictive power.

To complement the Expected Shortfall framework, regular stress testing is carried out to monitor the Banks vulnerability to shocks. Also, monthly and annual P/L stop loss limits is monitored on a daily basis for the Trading book.

The risk control measures such as Interest rate PV01 (IRPV01) and FX delta measures the interest rate and FX rate risk to the current portfolio. The IR PV01 measures the change in the Net present value (NPV) due to an increase of 1 basis point in interest rates. The FX delta measures the change in NPV due to an increase of 1 unit in FX rates. The currency wise IRPV01 and FX Delta is calculated daily for T&M trading, T&M banking and ALCO book.

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

7. Disclosure on Market Risk in Trading book (*Continued*)

The other risk control measures such as Credit spread PV01 (CSPV01) and Jump to default (JTD) measures the change in the NPV due to an increase of 1 basis point in credit spreads and the expected loss due to immediate default respectively. The CSPV01 and JTD are calculated daily for T&M trading book.

Quantitative Disclosures

Capital Requirement for Market Risk *

Particulars	30 Sep 15
Interest rate risk	3,848
Foreign exchange risk (including gold)	360
Equity position risk	5

* Capital required for Market Risk is calculated at 8% of Risk Weighted Assets.

8. Operational Risk

Qualitative Disclosures

Strategy and Process

The Group Operational Risk Management (ORM) framework:

- Defines operational risk and the scope of its application;

- Establishes the dimensions of operational risk;

– Provides a consistent Group wide framework for managing operational risk in a structured, systematic and consistent manner across DBS.

Operational Risk is defined as "the risk of loss resulting from inadequate or failed internal processes, people, or systems, or from external events, including legal risk, but does not include strategic or reputational risk".

DBS adopts a zero tolerance mindset towards major operational risk that can endanger the franchise.

The Group ORM Framework developed by the Head Office in Singapore has been adopted by the branches in India. The framework comprises risk governance, risk policies, risk mitigation programmes, risk and control self-assessments, risk event management and reporting, and key risk indicators.

The ORM framework includes inter-alia:

- a) ORM Governance Structure (Board, Senior Management, Location / Business level)
- b) ORM Governance Principles
- c) Accountability & Responsibility
- d) Operational Risk policies comprising:

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

8. **Operational Risk** (*Continued*)

- Group ORM Framework (Level 1)

- Core Operational Risk Standards (CORS) and Corporate Operational Risk Policies (Level 2); and

- Location / Unit-specific Operational Risk Policies & Standards (Level 3)

- e) Risk Mitigation Programmes comprising:
 - Internal controls
 - Global Insurance Programme; and
 - Business Continuity Management
- f) Risk Tools and Mechanisms comprising:
 - Risk & Control Self Assessment (RCSA) *
 - Operational Risk Event Management & Reporting (OREM&R)
 - Key Risk Indicators (KRI)
 - Issue Management & Action Tracking
 - Risk Analysis, Reporting and Profiling
- g) Risk Quantification & Disclosure

- Loss Provisioning / Capital Allocation

* RCSA implementation on phased approach and will fully replace CSA upon completion of roll out.

Structure and Organisation

The Bank also has in place an India Operational Risk Committee (IORC) which meets on a monthly basis to discuss operational risk issues. This committee is managed by the Head - Operational Risk and reports to the IMC. This ensures appropriate management oversight of operational risks facing the Bank.

The IORC comprises the CEO and the heads of the Institutional Banking Group, Consumer Banking Group, Global Transaction Services, Treasury & Markets, Technology & Operations, Risk Management Group, Finance, Legal & Compliance, Internal Audit and Operational Risk.

As part of the Bank's ORM structure, an independent Operational Risk function is in place led by the local Head of Operational Risk, who reports to the Senior Risk Executive, India and functionally to the Group Head of Operational Risk at the Head Office in Singapore.

Coverage includes identifying, assessing, controlling / mitigating risk, monitoring and reporting risk and also ensuring compliance with DBS Group standards and regulatory requirements relating to Operational Risk.

8. **Operational Risk** (*Continued*)

In addition to the independent Operational Risk resources, Unit Operational Risk Managers (UORM) are appointed within key Business Units (BU) and Support Units (SU) to support operationalisation of the risk management policy & process and to ensure maintenance of adequate controls on an ongoing basis. Regular training / orientations are conducted to keep UORM updated with key developments.

Risk Mitigation Programs

Internal Controls

The day-to-day management of Operational Risk within the Bank is through maintenance of a comprehensive system of internal controls. An effective internal control system is a combination of a strong control environment and appropriate internal control procedures. These internal controls comprise preventive, detective, escalation and corrective controls.

Global Insurance Programme (GIP)

The key objective of the GIP is to reduce financial loss of risk events via transfer of loss to external funding sources (insurers).

The GIP provides cover for low-frequency high-impact loss incidents. In line with DBS ORM philosophy, high frequency low impact operational losses are managed through establishment of strong internal controls.

Business Continuity Management (BCM) is a key Operational Risk programme of DBS to minimize the impact of a business disruption, irrespective of cause, and to provide an acceptable level of business until normal business operations are resumed.

BU/SUs are to comply with the BCM Policies and Standards established by Group Business Continuity Management (GBCM).

BCM includes the following:

- Establishment of ownership, roles and responsibilities
- Risk analysis
- Business impact analysis
- Recovery strategies
- Familiarisation of emergency response and crisis management plans
- Regular review and maintenance
- Regular, complete and meaningful testing

Risk Reporting and Measurement

Operational Risk related MIS is reported through the central ORM system (ROR - Reveleus Operational Risk), as follows:

- Incident Management (IM) Module - for reporting of Risk Events

- Issue and Action Management (IAM) Module - for tracking of Issues and Actions emanating from Risk Events, Audit Issues, Regulatory Issues and other risk related issues

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

8. **Operational Risk** (*Continued*)

- Key Indicator (KI) Module - for reporting of Key Risk Indicators (KRI)

– Risk and Control Self Assessment (RCSA) Module - to facilitate the half-yearly Risk and Control Self Assessment process.

RCSA implementation is on phased approach and will fully replace CSA upon completion of roll out.

The Operational Risk Profile including MIS relating to the above is placed at the monthly meetings of the India Operational Risk Committee (IORC).

Approach for operational risk capital assessment

- The Bank currently adopts the Basic Indicator Approach to calculate capital for operational risk.

9. Interest rate risk in the banking book (IRRBB)

Qualitative Disclosures

The Asset and Liability Committee ("ALCO") oversees the structural interest rate risk and funding liquidity risk in the Bank. The Market & Liquidity Risk Committee (MLRC) ensures that the exposures are within prudent levels. Structural interest rate risk arises from mismatches in the interest rate profile of customer loans and deposits. This interest rate risk has several aspects: basis risk arising from different interest rate benchmarks, interest rate re-pricing risk, yield curve risks and embedded optionality. To monitor the structural interest rate risk, the tools used by DBS include re-pricing gap reports based on traditional as well as duration gap approach, sensitivity analysis and income simulations under various scenarios.

Quantitative Disclosures

The Bank uses the Duration Gap approach to measure the impact of Market Value of Equity (MVE) for upward and downward rate shocks. This measures the potential change in MVE of the Bank for a 200 bps change in interest rates. The change in MVE due to a 200 change in interest rates are (for banking and trading book):-

Change in MVE due to a 200 bps change in interest rates	INR Million
30 September 2015	(5,273.44)

The impact on Earnings is computed as per the definition laid down in the ALM Policy of the Bank. Per the policy, Earnings-at-Risk (EaR) measures the interest rate risk from the earnings perspective. It is computed as an impact (over a 1-year horizon) of a 1% parallel shift in the yield curve on the Bank's earning. This is computed using the net IRS gaps for each bucket up to 1 year and the mark-to-market impact of 1% rise in interest rates on the AFS and HFT portfolio is to this. The aggregate of these approximates the net revenue impact of a 1% parallel shift (increase in interest rates) in the yield curve over a 1 year horizon and acts as a useful tool in the hands of the MLRC to monitor and assess the impact of Interest rate risk exposure of the Bank on its revenue.

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

9. Interest rate risk in the banking book (IRRBB) (Continued)

Quantitative Disclosures (Continued)

EaR is computed at a Bank-wide level. It is not computed individually for the trading and banking books. Hence the impact on Earnings for the Banking book alone cannot be assessed. The EAR (trading and banking) is:

EaR on the INR book (trading and banking)	INR Million
30 September 2015	(3,377.12)

10. General Disclosure for Exposures Related to Counterparty Credit Risk

Qualitative Disclosures

USE OF ECONOMIC CAPITAL (EC) FOR CONCENTRATION RISK MANAGEMENT

While the Group firmly complies with regulatory capital requirements at all times, we recognize the need to have more robust methodologies to measure capital usage. Effective concentration management requires a robust metric that can accurately capture the portfolio risk characteristics including granular portfolio segment profile, risk concentrations and correlation of risks in the portfolio. The metric has to be sensitive to changes made to adjust the portfolio shape and direction of growth.

We have therefore adopted the EC metric as our primary concentration risk management tool and have integrated it into our risk processes. EC is deployed as a core component in our ICAAP and it also serves as a key metric in cascading Risk Appetite and limits setting.

CREDIT RISK MITIGANTS

Collateral

Where possible, the Group takes collateral as a secondary recourse to the borrower. Collateral includes cash, marketable securities, properties, trade receivables, inventory and equipment and other physical and financial collateral. The Group may also take fixed and floating charges on the assets of borrowers. It has put in place policies to determine the eligibility of collateral for credit risk mitigation, which include requiring specific collaterals to meet minimum operational requirements in order to be considered as effective risk mitigants.

When a collateral arrangement is in place for financial market counterparties covered under market standard documentation (such as Master Repurchase Agreements and International Swaps and Derivatives Association (ISDA) agreements), collateral received is marked to market on a frequency mutually agreed with the counterparties.

The Group is required to post additional collateral in the event of a rating downgrade. As at 31 December 2014, for a one notch downgrade of its Standard & Poor's Ratings Services and Moody's Investors Services ratings, the Group would have to post additional collateral amounting to SGD 106 million and SGD 35 million respectively.

10 General Disclosure for Exposures Related to Counterparty Credit Risk

(Continued)

Other Risk Mitigants

The Group manages its credit exposure from derivatives, repo and other repo-style transactions by entering into netting and collateral arrangements with counterparties where it is appropriate and feasible to do so. The credit risk associated with outstanding contracts with positive mark to market is reduced by master netting arrangements to the extent that if an event of default occurs, all amounts with a single counterparty in a netting-eligible jurisdiction are settled on a net basis.

The Group may also enter into agreements which govern the posting of collateral with derivative counterparties for credit risk mitigation (e.g. Credit Support Annexes under ISDA master agreements). These are governed by internal guidelines with respect to the eligibility of collateral types and the frequency of collateral calls.

In addition, the Group also uses guarantees as credit risk mitigants. While the Group may accept guarantees from any counterparty, it sets internal thresholds for considering guarantors to be eligible for credit risk mitigation.

COUNTER PARTY RISK MANAGEMENT

Counterparty risk that may arise from traded products and securities is measured on a loan equivalent basis and included under the Group's overall credit limits to counterparties. Issuer Default Risk that may arise from traded products and securities are generally measured based on jump-to-default computations.

The Group actively monitors and manages its exposure to counterparties in over-thecounter (OTC) derivative trades to protect its balance sheet in the event of counterparty default. Counterparty risk exposures which may be materially and adversely affected by market risk events are identified, reviewed and acted upon by management and highlighted to the appropriate risk committees. In addition, the Group's risk measurement methodology takes into account the higher risks associated with transactions that exhibit a strong relationship between the creditworthiness of a counterparty and the expected future replacement value of a relevant transaction (so called wrong-way risk) as identified during the trade booking process. The current exposure method is used for calculating the Group's net credit exposure and regulatory capital for counterparty exposures, using the mark-tomarket exposures with an appropriate add-on factor for potential future exposures.

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

LEVERAGE RATIO

The Basel III leverage ratio is defined as the capital measure (Tier-1 capital of the risk based capital framework) divided by the exposure measure, with this ratio expressed as a percentage.

As per RBI guidelines, disclosures required for leverage ratio for the Bank at September 30, 2015 are as follows:

-balance	sheet exposures	
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	287,75
2	(Asset amounts deducted in determining Basel III Tier 1 capital)	-11,03
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	276,72
rivative	exposures	
4	Replacement cost associated with all <i>derivatives</i> transactions (i.e. net of eligible cash variation margin)	32,09
5	Add-on amounts for PFE associated with all derivatives transactions	93,21
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	
7	(Deductions of receivables assets for cash variation margin provided in derivatives transactions)	
8	(Exempted CCP leg of client-cleared trade exposures)	
9	Adjusted effective notional amount of written credit derivatives	
10	(Adjusted effective notional offsets and add-on deductions for written credit derivatives)	
11	Total derivative exposures (sum of lines 4 to 10)	125,30
curities fi	inancing transaction exposures	
12	Gross SFT <i>assets</i> (with no recognition of netting), after adjusting for sale accounting transactions	4,70
13	(Netted amounts of cash payables and cash receivables of gross SFT assets)	
14	CCR exposure for SFT assets	53
15	Agent transaction exposures	
16	Total securities financing transaction exposures (sum of lines 12 to 15)	5,23
her off-b	alance sheet exposures	
17	Off-balance sheet exposure at gross notional amount	168,06
18	(Adjustments for conversion to credit equivalent amounts)	-100,41
10		

Basel III: Pillar 3 Disclosures (Continued)

as at 30 September 2015

(Currency: Indian rupees in million)

Capital and total exposures		
20	Tier 1 capital	28,876
21	Total exposures (sum of lines 3, 11, 16 and 19)	474,918
Leverage ratio		
22	Basel III leverage ratio	6.08%

Summary comparison of accounting assets vs. leverage ratio exposure measure

1	Total consolidated assets as per published financial statements	328,836
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	-
4	Adjustments for derivative financial instruments	88,924
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	533
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off- balance sheet exposures)	67,657
7	Other adjustments	(11,032)
8	Leverage ratio exposure	474,918
