## Case Study of Raffles Town Club

Raffles Town Club was looking for a solution that would allow them to process a very large quantity of cheques in early 2006. DBS proposed their corporate internet banking platform, DBS IDEAL™ as the solution.

**“Just as its name suggests, this was really an ideal solution for us. DBS worked hand-in-hand with us and our software vendor to ensure that the set up process went smoothly within a very short period of time.”**

“Just as its name suggests, this was really an ideal solution for us. DBS worked hand-in-hand with us and our software vendor to ensure that the set up process went smoothly within a very short period of time. During implementation, they took the extra effort to go through the process one step at a time. DBS certainly went the extra mile to make sure that nothing went wrong.

I believe it was a very unforgettable experience for all of us. Our heartfelt thanks are extended to DBS for all the support and services rendered during that time; even till this date, you are there for us.”
