Notes to the Financial Statements

for the year ended 31 December 2010

These Notes are integral to the financial statements.

The consolidated financial statements for the year ended 31 December 2010 were authorised for issue by the directors on 10 February 2011.

1 DOMICILE AND ACTIVITIES

The Company, DBS Group Holdings Ltd, is incorporated and domiciled in the Republic of Singapore and has its registered office at 6 Shenton Way, DBS Building Tower One, Singapore 068809.

The Company is listed on the Singapore Exchange.

The principal activity of the Company is that of an investment holding company and the principal activity of its main subsidiary, DBS Bank Ltd (the Bank), is the provision of retail, small and medium-sized enterprise, corporate and investment banking services.

The financial statements relate to the Company and its subsidiaries (the Group) and the Group's interests in associates and joint ventures.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of preparation

The consolidated financial statements of the Group are prepared in accordance with Singapore Financial Reporting Standards (FRS) including related Interpretations promulgated by the Accounting Standards Council (ASC). In accordance with Section 201(19) of the Companies Act (the Act), the requirements of FRS 39 Financial Instruments: Recognition and Measurement in respect of loan loss provisioning are modified by the requirements of Notice to Banks No. 612 "Credit Files, Grading and Provisioning" issued by the Monetary Authority of Singapore.

The financial statements of the Company are prepared in accordance with FRS including related Interpretations to FRS promulgated by the ASC. As permitted by Section 201(4B) of the Act, the Company's income statement has not been included in these financial statements.

The financial statements are presented in Singapore dollars and rounded to the nearest million, unless otherwise stated. They are prepared on the historical cost convention, except for derivative financial instruments, available-for-sale financial assets, and financial assets and liabilities carried at fair value through profit or loss, which have been measured at fair value. In addition, the carrying amounts of assets and liabilities that are designated as hedged items in a fair value hedge are adjusted for fair value changes attributable to the hedged risks.

The preparation of financial statements in conformity with FRS requires management to exercise judgement, use estimates and make assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. Although these estimates are based on management's best knowledge of current events and actions, actual results may differ from these estimates. Critical accounting estimates and assumptions used that are significant to the financial statements, and areas involving a higher degree of judgement and complexity, are disclosed in Note 4.

On 1 January 2010, the Group adopted the new or revised FRS and Interpretations to FRS (INT FRS) that are applicable in the current financial year. The financial statements have been prepared in accordance with the relevant transitional provisions in the respective FRS and INT FRS.

FRS 27: Consolidated and Separate Financial Statements

The standard requires the effects of all transactions with non-controlling interests to be recorded in equity if there is no change in control. Such transactions will have no impact on goodwill, nor will it give rise to a gain or loss. The standard also specifies the accounting when control is lost. Any remaining interest in the entity is re-measured to fair value, and a gain or loss is recognised in profit or loss.

The changes introduced by FRS 27 must be applied prospectively and will affect future transactions with non-controlling interests.

FRS 103: Business Combinations

The revised FRS 103 introduces a number of changes in the accounting for business combinations. For example, there is a choice on an acquisition-by-acquisition basis to measure the non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets. All acquisition-related costs are expensed.

The changes introduced by FRS 103 must be applied prospectively and will affect future business combinations.

The following amendments to FRS and INT FRS are of a technical or clarifying nature and their adoption does not have any material impact on the Group's financial statements.

FRS 39 (Amendments)	Financial Instruments: Recognition and Measurement
FRS 102 (Amendments)	Share-based Payment – Group Cash-settled Share-based Payment Transaction
General amendments	Improvements to FRS (where applicable)
INT FRS 117	Distributions of Non-cash Assets to Owners

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

2.2 Group accounting***Subsidiaries***

Subsidiaries are entities over which the Group has the power to govern the financial and operating policies so as to obtain benefits from their activities. It is generally accompanied by a shareholding of more than 50% of voting rights. Potential voting rights that are currently exercisable or convertible are considered when determining whether an entity is considered a subsidiary.

For business combinations occurring on or after 1 January 2010, the acquisition method is used to account for business combinations by the Group. Subsidiaries are consolidated from the date control is transferred to the Group to the date control ceases. The consideration transferred for an acquisition is measured as the acquisition-date fair values of the assets transferred, the liabilities incurred and the equity interests issued. Acquisition-related costs are expensed as incurred. Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value on the date of acquisition.

For business combinations occurring before 1 January 2010, the purchase method is used to account for the acquisition of subsidiaries. Subsidiaries are consolidated from the date control is transferred to the Group to the date control ceases. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued or liabilities incurred or assumed at the date of exchange, plus cost directly attributable to the acquisition. Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair value on the date of acquisition.

Refer to Note 2.10 for the Group's accounting policy on "Goodwill on consolidation".

Special purpose entities

Entities in which the Group holds little or no equity are consolidated as subsidiaries if the Group is assessed to have control over them. Such control can be demonstrated through predetermination of the entities' activities, exposure to and retention of majority of their residual or ownership risks, and decision-making powers to obtain a majority of benefits of the entities.

Joint ventures

Joint ventures are entities that are jointly controlled by the Group together with one or more parties through contractual arrangements. The Group recognises its interests in joint ventures using the proportionate consolidation method.

Proportionate consolidation involves combining the Group's share of the joint venture's income, expenses, assets and liabilities on a line-by-line basis with similar items in the Group's financial statements.

Associates

Associates are entities over which the Group has significant influence, but not control, and generally holds a shareholding of between and including 20% and 50% of the voting rights. The Group recognises its investments in associates using the equity method of accounting.

Under the equity method of accounting, an investment in associates is initially carried at cost. The initial cost of an acquisition is measured at the fair value of the assets given, equity instruments issued or liabilities assumed at the date of exchange, plus costs directly attributable to the acquisition. The carrying amount is increased or decreased to recognise the Group's share of net assets of the associate, less any impairment in value after the date of acquisition. Where the Group's share of losses in an associate equals or exceeds its interest in the associate, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

The results of the associates are taken from the latest audited accounts or unaudited management accounts of the associates, prepared at dates not more than three months prior to the end of the financial year of the Group.

Investment cost at Company level

Investments in subsidiaries, associates and joint ventures are stated at cost less accumulated impairment losses in the Company's balance sheet. On disposal of investments in subsidiaries, associates and joint ventures, the difference between the net proceeds and the carrying amounts of the investments is taken to the income statement.

Intra-group transactions

All intra-group transactions, balances, income and expenses are eliminated on consolidation. Profits resulting from transactions between the Group and its associates and joint ventures are eliminated to the extent of the Group's interests in these companies. Losses are also eliminated unless the transaction provides evidence of an impairment of an asset transferred.

Alignment of accounting policies

Where necessary, adjustments are made to the financial statements of subsidiaries, associates and joint ventures to ensure consistency with the accounting policies adopted by the Group.

2.3 Foreign currency translation

Functional and presentation currency

Items in the financial statements of the Company and each of the Group's subsidiaries are measured using the entities' functional currency, being the currency of the primary economic environment in which the entity operates. The financial statements are presented in Singapore dollars, which is the Company's functional and the Group's presentation currency.

Foreign currency transactions

Transactions in foreign currencies are measured at the exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into Singapore dollars at the exchange rate ruling at the balance sheet date. Foreign exchange differences arising from this translation are recognised in the income statement. Non-monetary assets and liabilities measured at cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities measured at fair value in foreign currencies are translated into Singapore dollars at the exchange rate ruling at the date the fair value was determined.

Unrealised foreign exchange differences arising from non-monetary financial assets classified as fair value through profit or loss are recognised in the income statement. For non-monetary financial assets classified as available-for-sale, unrealised foreign exchange differences are recorded in other comprehensive income and accumulated in equity until the assets are disposed of or become impaired.

Foreign operations

The results and financial position of the Group's operations whose functional currency is not Singapore dollars are translated into Singapore dollars in the following manner:

- Assets and liabilities are translated at the exchange rate ruling at the balance sheet date;
- Income and expenses in the income statement are translated at an average exchange rate approximating the exchange rates at the dates of the transactions; and
- All resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign operation on or after 1 January 2005 are treated as assets and liabilities of the foreign operation and translated at the closing rate. For acquisitions prior to 1 January 2005, the foreign exchange rates at the dates of acquisition were used.

Consolidation adjustments

On consolidation, foreign exchange differences arising from the translation of net investments in foreign entities, as well as any borrowings and instruments designated as foreign currency hedges of such investments, are recognised in other comprehensive income and accumulated under capital reserves in equity. When a foreign operation is disposed of, such currency translation differences are recognised in the income statement as part of the gain or loss on disposal.

2.4 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to management who is responsible for allocating resources and assessing performance of the operating segments. Segment revenue, segment profits, segment assets and segment liabilities are also measured on a basis that is consistent with internal reporting.

The Group's financial businesses are organised into Consumer/Private Banking, Institutional Banking, Treasury and Others. In total, the Group has four reportable segments.

2.5 Revenue recognition

Net interest income

Net interest income, being interest income less interest expense, is recognised on a time-proportionate basis using the effective interest method. The effective interest rate is the rate that discounts estimated future cash receipts or payments through the expected life of the financial instrument or, when appropriate, a shorter period to its carrying amount. The calculation includes significant fees and transaction costs that are integral to the effective interest rate, as well as premiums or discounts. No interest expense is accrued on the Group's structured investment deposits which are carried at fair value through profit or loss.

When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument. Interest earned on the recoverable amount is recognised as interest income in the income statement.

Fee and commission income

The Group earns fee and commission income from a diverse range of products and services provided to its customers. Fee and commission income is recognised on the completion of a transaction. For a service that is provided over a period of time, fee and commission income is recognised over the period during which the related service is provided or credit risk is undertaken.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

Dividend income

Dividend income is recognised when the right to receive payment is established. Dividend income arising from held for trading financial assets is recognised in "Net trading income", while that arising from available-for-sale financial assets is recognised in "Net income from financial investments".

Rental income

Rental income from operating leases on properties is recognised on a straight-line basis over the lease term.

2.6 Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and non-restricted balances with central banks which are readily convertible into cash.

2.7 Financial assets

Financial assets are classified according to the purpose for which the assets were acquired. Management determines the classification at initial recognition.

The classification of financial assets is as follows:

- (a) Financial assets at fair value through profit or loss** are either acquired for the purpose of short-term selling (held for trading) or designated by management on initial recognition (designated under the fair value option).

Derivatives are classified as held for trading unless they are designated as hedging instruments. The specific Group accounting policy on derivatives is detailed in Note 2.15.

Financial assets designated under the fair value option meet at least one of the following criteria upon designation:

- it eliminates or significantly reduces measurement or recognition inconsistencies that would otherwise arise from measuring financial assets, or recognising gains or losses on them, using different bases; or
- the financial asset contains an embedded derivative that would otherwise need to be separately recorded.

- (b) Financial assets classified as loans and receivables** are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- those that the Group intends to sell immediately or in the short term, which are classified as held for trading, or those that the entity upon initial recognition designates as at fair value through profit or loss; or
- those that the Group upon initial recognition designates as available-for-sale.

- (c) Financial assets classified as available-for-sale** are non-derivatives that are either designated in this category or not classified in any other categories. These financial assets are intended to be held for an indefinite period of time, and may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices.

Recognition and derecognition

Purchases and sales of financial assets are recognised on the date that the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership.

Reclassification of financial assets

Non-derivative financial assets may be reclassified out of the fair value through profit or loss and available-for-sale categories in particular circumstances:

- financial assets that would meet the definition of loans and receivables may be classified out of the fair value through profit or loss and available-for-sale categories if the Group has the intention and ability to hold these financial assets for the foreseeable future or until maturity; and
- financial assets (except financial assets that would have met the definition of loans and receivables) may be reclassified out of the fair value through profit or loss category in rare circumstances.

Reclassifications are made at fair value as of the reclassification date. The fair value becomes the new cost or amortised cost as applicable. Any gain or loss already recognised in the income statement before the reclassification date is not reversed.

Initial measurement

Financial assets are initially recognised at fair value plus transaction costs except for financial assets at fair value through profit or loss, for which transaction costs are expensed off immediately. The fair value of a financial asset on initial recognition is usually the transaction price.

Subsequent measurement

Financial assets at fair value through profit or loss and available-for-sale financial assets are subsequently carried at fair value. Loans and receivables are carried at amortised cost using the effective interest method. Unquoted equity investments classified as available-for-sale for which fair values cannot be reliably determined are carried at cost, less impairment.

Realised or unrealised gains or losses on financial assets held for trading and financial assets designated under the fair value option, except interest income, are taken to “Net trading income” and “Net income from financial instruments designated at fair value” respectively in the income statement in the period they arise. Unrealised gains or losses arising from changes in fair value of financial assets classified as available-for-sale are recognised in other comprehensive income and accumulated in available-for-sale revaluation reserves. When financial assets classified as available-for-sale are sold or impaired, the accumulated fair value adjustments in the available-for-sale revaluation reserves are reclassified to profit or loss.

Determination of fair value

The fair values of financial instruments traded in active markets (such as exchange-traded and over-the-counter securities and derivatives) are based on quoted market prices at the balance sheet date. The quoted market prices used for financial assets held by the Group are the current bid prices. If the market for a financial asset is not active, the Group establishes fair value by using valuation techniques. These include the use of recent arm’s length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and option pricing models. Where applicable, a valuation reserve or pricing adjustment is applied to arrive at the fair value.

2.8 Impairment of financial assets

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired.

(a) Financial assets classified as loans and receivables

The Group carries out regular and systematic reviews of all credit facilities extended to customers.

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- Significant financial difficulty of the issuer or obligor, including breach of covenants and/or financial conditions;
- A breach of contract, such as a default or delinquency in interest or principal payments;
- Granting of a concession to the borrower, for economic or legal reasons relating to the borrower’s financial difficulty, that the Group would not otherwise consider; and
- High probability of bankruptcy or other financial reorganisation of the borrower.

Specific allowances for credit losses

A specific allowance for credit losses is established if there is objective evidence that the Group will be unable to collect all amounts due under a claim according to the original contractual terms or the equivalent value. A “claim” means a loan, debt security or a commitment such as a letter of guarantee and letter of credit.

A specific allowance for credit losses is recorded as a reduction in the carrying value of a claim on the balance sheet. For an off-balance sheet item such as a commitment, a specific allowance for credit loss is recorded as a component within other liabilities.

Specific allowances for credit losses are evaluated either as being counterparty-specific or collectively for a portfolio according to the following principles:

Counterparty-specific: Individual credit exposures are evaluated using the discounted cash flow method and an allowance is made when existing facts, conditions or valuations indicate that the Group is not likely to collect part or all of the principal and interest due contractually on the claim. An allowance is reversed only when there has been an identifiable event that led to an improvement in the collectability of the claim.

When a loan is uncollectible, it is written off against the related allowance for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Recoveries in full or in part of amounts previously written off are credited to the income statement in “Allowances for credit and other losses”.

Homogenous consumer loans, such as housing loans and credit card receivables, are pooled according to their risk characteristics, and assessed and provided for collectively as a group, taking into account the historical loss experience of such loans.

General allowances for credit losses

Apart from specific allowances, the Group also carries general allowances for credit losses. The Group maintains a level of allowances that is deemed sufficient to absorb the estimated credit losses inherent in its loan portfolio (including off-balance sheet credit exposures). In determining the level of general allowances, the Group considers country and portfolio risks, as well as industry practices. The Group maintains general allowances of at least 1% of credit exposures on and off the balance sheet (against which specific allowances have not been made) adjusted for collaterals held. This is in accordance with the transitional arrangements under Notice to Banks No. 612 “Credit Files, Grading and Provisioning” issued by the Monetary Authority of Singapore.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

(b) Financial assets classified as available-for-sale

The Group assesses at each balance sheet date whether there is objective evidence that an available-for-sale financial asset is impaired. In the case of an equity investment, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the asset is impaired. When there is objective evidence of an impairment of an available-for-sale financial asset, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the income statement – is reclassified from the revaluation reserve within equity to profit or loss. Impairment losses recognised in the income statement on equity investments are not reversed through the income statement, until the equity investments are disposed of. A subsequent recovery in the value of an available-for-sale debt instrument whose value has been impaired is reversed through the income statement if there has been an identifiable event that led to the recovery.

2.9 Repurchase agreements

Repurchase agreements (Repos) are treated as collateralised borrowing. The amount borrowed is reflected as a liability either as “Due to non-bank customers”, “Due to banks” or “Financial liabilities at fair value through profit or loss”. The securities sold under repos are treated as pledged assets and remain on the balance sheet at amortised cost or fair value depending on their classification.

Reverse repurchase agreements (Reverse repos) are treated as collateralised lending. The amount lent is reflected as an asset either as “Loans and advances to customers”, “Due from banks” or “Financial assets at fair value through profit or loss”.

Amounts paid and received in excess of the amounts borrowed and lent on the repos and reverse repos are amortised as interest expense and interest income respectively using the effective interest method.

2.10 Goodwill on consolidation

Goodwill arising from business combination on or after 1 January 2010 represents the excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the net identifiable assets acquired. Goodwill in a business acquisition prior to 1 January 2010 represents the excess of acquisition cost over the fair values of the identifiable assets acquired, liabilities and contingent liabilities assumed at the date of exchange. Goodwill is stated at cost less impairment losses and it is tested at least annually for impairment.

Any deficiency of the cost of acquisition below the fair values of the identifiable net assets acquired (i.e. a discount on acquisition) is recognised directly in the income statement in the period of acquisition.

At the acquisition date, any goodwill acquired is allocated to each of the cash-generating units (CGU) expected to benefit from the combination’s synergies for the purpose of impairment testing.

2.11 Properties and other fixed assets

Properties (including investment properties) and other fixed assets are stated at cost less accumulated depreciation and impairment losses. The cost of an item of properties and other fixed assets includes its purchase price and any cost that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

The basis of depreciation is as follows:

Properties

Leasehold land, where the balance of the leasehold period is 100 years or less, is depreciated on a straight-line basis over the remaining period of the lease. Leasehold land where the unexpired lease period is more than 100 years is not depreciated.

Buildings are depreciated on a straight-line basis over their useful lives estimated at 50 years or over the remaining lease period, whichever is shorter.

Other fixed assets

Depreciation is calculated using the straight-line method to write down the cost of other fixed assets to their residual values over their estimated useful lives as follows:

Intangible/Computer software	3 – 5 years
Office equipment	5 – 8 years
Furniture and fittings	5 – 8 years

The estimated useful life and residual values of fixed assets are reviewed on each balance sheet date.

Subsequent expenditure relating to properties and other fixed assets that has already been recognised is added to the carrying amount of the asset only when it is probable that future economic benefit associated with the item can be measured reliably. Other subsequent expenditure is recognised as hire and maintenance expense in the income statement during the financial year in which it is incurred.

On disposal of an item of properties and other fixed assets, the difference between the net disposal proceeds and its carrying amount is taken to the income statement.

2.12 Impairment of non-financial assets

Goodwill

An impairment loss is recognised when the carrying amount of a CGU, including the goodwill, exceeds the recoverable amount of the CGU. Recoverable amount of a CGU is the higher of the CGU's fair value less cost to sell and its value-in-use.

An impairment loss on goodwill recognised in the income statement cannot be reversed in subsequent periods.

Properties and other fixed assets, and investment in subsidiaries, associates and joint ventures

Properties (including investment properties) and other fixed assets, and investment in subsidiaries, associates and joint ventures are reviewed for impairment at each balance sheet date to determine if events or changes in circumstances indicate that the carrying value may not be recoverable. If such an indication exists, the carrying value of the asset is written down to its recoverable amount (being the higher of the fair value less cost to sell and the value-in-use). The impairment loss is charged to the income statement.

2.13 Financial liabilities

The Group classifies its financial liabilities in the following categories: (a) financial liabilities at fair value through profit or loss; and (b) financial liabilities at amortised cost.

Financial liabilities are classified as financial liabilities at fair value through profit or loss if they are incurred for the purpose of short-term repurchasing (held for trading) or designated by management on initial recognition (designated under the fair value option).

Derivatives are classified as held for trading unless they are designated as hedging instruments. The specific Group accounting policy on derivatives is detailed in Note 2.15.

Financial liabilities designated under the fair value option meet at least one of the following criteria upon designation:

- it eliminates or significantly reduces measurement or recognition inconsistencies that would otherwise arise from measuring financial liabilities, or recognising gains or losses on them, using different bases; or
- the financial liability contains an embedded derivative that would otherwise need to be separately recorded.

Financial liabilities are initially recognised at fair value, net of transaction costs incurred, except for financial liabilities at fair value through profit or loss, for which transaction costs are expensed off immediately.

Financial liabilities classified as fair value through profit or loss are subsequently carried at fair value. Realised or unrealised gains or losses on financial liabilities held for trading and financial liabilities designated under the fair value option, except interest expense, are taken to "Net trading income" and "Net income from financial instruments designated at fair value" respectively in the income statement in the period they arise. All other financial liabilities are subsequently carried at amortised cost using the effective interest method.

The fair value of financial liabilities is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments. Where applicable, a valuation reserve or pricing adjustment is applied to arrive at the fair value.

A financial liability is removed or derecognised from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired.

2.14 Provisions and other liabilities

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the balance sheet date.

2.15 Derivative financial instruments and hedge accounting

Derivatives are initially recognised at fair value at the date on which a derivative contract is entered into and are subsequently remeasured at fair value. All derivatives are classified as assets when the fair value is positive (Positive fair values for financial derivatives) and as liabilities when the fair value is negative (Negative fair values for financial derivatives).

Changes in the fair value of derivatives other than those designated as fair value hedges, cash flow hedges or net investments in foreign operations hedges are included in "Net trading income".

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contract and the host contract is not carried at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in "Net trading income".

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

For financial instruments designated as hedging instruments, each entity within the Group documents at the inception the relationship between the hedging instrument and hedged item, including the risk management objective for undertaking various hedge transactions and methods used to assess the effectiveness of the hedge. Each entity within the Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivative is highly effective in offsetting changes in the fair value or cash flows of the hedged item.

Fair value hedge

For a qualifying fair value hedge, the changes in the fair value of the hedging derivatives are recorded in the income statement, together with any changes in the fair value of the hedged item attributable to the hedged risk. Gain or loss arising from hedge ineffectiveness is recognised in the income statement.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item is amortised to the income statement over its remaining maturity, using the effective interest method.

Cash flow hedge

The effective portion of changes in the fair value of a derivative designated and qualifying as a hedge of future cash flows is recognised in other comprehensive income and accumulated under the cash flow hedge reserve in equity, and reclassified to the income statement in the periods when the hedged item affects profit or loss. The ineffective portion of the gain or loss is recognised immediately in the income statement under "Net trading income".

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in the cash flow hedge reserve remains until the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss in the cash flow hedge reserve is reclassified from equity to profit or loss.

Hedge of net investment in a foreign operation

Hedges of net investments in the Group's foreign operations are accounted for in a manner similar to cash flow hedges. The gain or loss from the derivative relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated under the capital reserve in equity. The gain or loss relating to the ineffective portion of the hedge is recognised immediately in the income statement under "Net trading income". On disposal of the foreign operations, the cumulative gain or loss in the capital reserve is reclassified to profit or loss under "Net trading income".

2.16 Employee benefits

Employee benefits, which include base pay, cash bonuses, share-based compensation, contribution to defined contribution plans such as the Central Provident Fund and other staff-related allowances, are recognised in the income statement when incurred. For defined contribution plans, contributions are made to publicly or privately administered funds on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations.

Employee entitlement to annual leave is recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the balance sheet date.

2.17 Share-based compensation

Employee benefits also include share-based compensation, namely, the DBSH Share Ownership Scheme (the Scheme), the DBSH Share Option Plan, the DBSH Share Plan and the DBSH Employee Share Plan (the Plans). The details of the Scheme and Plans are described in Note 41.

Equity instruments granted and ultimately vested under the Plans are recognised in the income statement based on the fair value of the equity instrument at the date of grant. The expense is amortised over the vesting period of each award, with a corresponding adjustment to the share option/plan reserves. Monthly contributions to the Scheme are expensed off when incurred.

For the DBSH Share Plan and the DBSH Employee Share Plan, a trust has been set up for each share plan. The employee trust funds are consolidated and the DBSH shares held by the trust funds are accounted for as "Treasury shares", which are included as a deduction within equity.

2.18 Current and deferred taxes

Current income tax for current and prior periods is recognised at the amount expected to be paid or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred income tax is provided on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Temporary differences are not recognised for goodwill that is not deductible for tax purposes and for the initial recognition of assets or liabilities that neither affects accounting nor taxable profit. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted by the balance sheet date.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

Deferred tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not be reversed in the foreseeable future.

Deferred tax related to fair value re-measurement of available-for-sale investments, which are recognised outside profit or loss, is also recognised outside profit or loss i.e. in other comprehensive income and accumulated in the available-for-sale revaluation reserves.

2.19 Financial guarantees

A financial guarantee is initially recognised in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Group's liability under each guarantee is measured at the higher of the initial measurement less amortisation and the best estimate of the expenditure required to settle any financial obligation arising at the balance sheet date.

The exposure to potential losses associated with a financial guarantee is monitored periodically. When there is objective evidence indicating probability of losses occurring, a provision is recognised for the financial guarantee.

2.20 Share capital and treasury shares

Ordinary shares and preference shares which do not result in the Group having a contractual obligation to deliver cash or another financial asset, or to exchange financial assets or financial liabilities with the holder under conditions that are potentially unfavourable to the Group, are classified as equity. Incremental external costs directly attributable to the issuance of new ordinary shares are deducted against share capital.

When any entity within the Group purchases the Company's ordinary shares ("treasury shares"), the consideration paid including any directly attributable incremental cost is presented as a component within equity, until they are cancelled, sold or reissued.

When treasury shares are subsequently cancelled, the cost of treasury shares is deducted against either the share capital account or retained earnings. When treasury shares are subsequently sold or reissued, any realised gain or loss on sale or reissue, net of any directly attributable incremental transaction costs and related income tax, is recognised in the capital reserve of the Company.

2.21 Dividend payments

Interim dividends are recorded during the financial year in which they are declared payable. Final dividends are recorded during the financial year in which the dividends are approved by the shareholders at the Annual General Meeting.

2.22 Offsetting financial instruments

Certain financial assets and liabilities offset each other and the net amount is reported in the balance sheet when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle them on a net basis, or realise the asset and settle the liability simultaneously.

2.23 Operating leases

Operating leases are charged to the income statement on a straight-line basis over the period of the lease. When an operating lease is terminated before the lease period has expired, any payment that has to be made to the lessor is recognised as an expense in the period the termination takes place.

2.24 Fiduciary activities

Assets and income belonging to a customer for whom the Group acts in a fiduciary capacity as nominee, trustee or agent, are excluded from the financial statements.

3 EFFECTS ON FINANCIAL STATEMENTS ON ADOPTION OF NEW OR REVISED FRS

The Group has not applied the following FRS and INT FRS that have been issued but are not yet effective.

FRS 24 (Amendments): Related Party Disclosures

The revised standard simplifies the definition of a related party. It clarifies its intended meaning and eliminates inconsistencies from the definition.

The amendment also removes the requirement for government-related entities to disclose details of all transactions with the government and other government-related entities and replaces it with a requirement to disclose information which is considered sufficient for the financial statements users to understand the effects of related party transactions. For example, the nature and amount of each individually significant transaction needs to be disclosed.

FRS 32 (Amendments): Financial Instruments: Presentation

The amendment clarifies that rights issues are to be classified as equity if they are issued for a fixed amount of cash regardless of the currency in which the exercise price is denominated, provided they are offered on a pro rata basis to all owners of the same class of equity.

INT FRS 119: Extinguishing Financial Liabilities with Equity Instruments

The Interpretation provides guidance on the accounting when an entity renegotiates the terms of its debt with the result that the liability is extinguished by the debtor issuing its own equity instruments to the creditors.

It requires the gain or loss to be recognised in profit or loss when a liability is settled through the issuance of the entity's own equity instruments. The amount of gain or loss will be the difference between the carrying value of the financial liability and the fair value of the equity instruments issued.

4 CRITICAL ACCOUNTING ESTIMATES

The Group's accounting policies and use of estimates are integral to the reported results. Certain accounting estimates require exercise of management's judgement in determining the appropriate methodology for valuation of assets and liabilities. In addition, procedures are in place to ensure that methodologies are reviewed and revised as appropriate. The Group believes its estimates for determining the valuation of its assets and liabilities are appropriate.

The following is a brief description of the Group's critical accounting estimates involving management's valuation judgement.

4.1 Impairment allowances

It is the Group's policy to establish, through charges against profit, specific and general allowances in respect of estimated and inherent credit losses in its portfolio.

In determining specific allowances, management considers objective evidence of impairment and exercises judgement in estimating cash flows and collateral value. When a loan is impaired, a specific allowance is assessed by using the discounted cash flow method, measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the original effective interest rate. The amount of specific allowance also takes into account the collateral value, which may be discounted to reflect the impact of a forced sale or timely liquidation.

In determining general allowance, management considers country and portfolio risks, as well as industry practices. General allowances of at least 1% of credit exposures on and off-balance sheet (against which specific allowances have not been made) are maintained and adjusted for collaterals held. This is in accordance with the transitional arrangements under Notice to Banks No. 612, "Credit Files, Grading and Provisioning" issued by the Monetary Authority of Singapore.

4.2 Fair value of financial instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction. The majority of the Group's financial instruments reported at fair value are based on quoted and observable market prices or on internally developed models that are based on independently sourced market parameters, such as interest rate yield curves, option volatilities and foreign exchange rates. Valuation reserves or pricing adjustments where applicable will be used to converge to fair value.

The determination of fair value is subject to the Valuation Framework approved by the Board Risk Management Committee and the oversight of senior management committees. The Valuation Framework is implemented by the Group through policies and procedures approved by the committees. These policies and procedures facilitate the exercise of judgement in determining the risk characteristics of various financial instruments, discount rates, estimates of future cash flows, future expected loss experience and other factors used in the valuation process. Sound judgement may also be applied in adjusting prices for less readily observable external parameters such as through the use of valuation reserves. Other factors such as model assumptions and market dislocations leading to market anomalies can also materially affect these estimates. Refer to Note 43 for more details about the fair value hierarchy of the Group's financial instruments measured at fair value.

4.3 Impairment review of goodwill on consolidation

The Group performs an impairment review to ensure that the carrying value of the goodwill does not exceed its recoverable amount from the CGU to which the goodwill is allocated. The recoverable amount represents the present value of the estimated future cash flows expected to arise from continuing operations. Therefore, in arriving at the recoverable amount, management exercises judgement in estimating the future cash flows, growth rate and discount rate. Refer to Note 26 for more details.

4.4 Income taxes

The Group has exposure to income taxes in numerous jurisdictions. Significant judgement is involved in determining the Group-wide provision for income taxes. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises liabilities for expected tax issues based on reasonable estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

4.5 Provisions for customer compensation

Judgement is needed to determine, taking into account the requirements in FRS 37 Provisions, Contingent Liabilities and Contingent Assets, the appropriate level of possible compensation payable to certain customers who had bought structured investment products from the Group. In making this judgement, the Group evaluates the likelihood and estimated amount of outflow of resources which will be required to settle the obligation with reference to advice from legal counsel.

5 NET INTEREST INCOME

In \$ millions	The Group	
	2010	2009

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

14 INCOME TAX EXPENSE

Income tax expense in respect of profit for the financial year is analysed as follows:

In \$ millions	The Group	
	2010	2009
Current tax expense		
– Current year	490	473
– Prior years' provision	(35)	(124)
Deferred tax expense		
– Effect of change in tax rate	–	1
– Origination of temporary differences	(1)	(65)
Total	454	285

The deferred charge/(credit) in the income statement comprises the following temporary differences:

In \$ millions	The Group	
	2010	2009
Accelerated tax depreciation	(9)	(17)
Allowances for loan losses	10	(75)
Other temporary differences	1	28
Available-for-sale investments	(3)	–
Deferred tax credit to income statement	(1)	(64)

The tax on the Group's profit (before share of profits of associates) differs from the theoretical amount that would arise using the Singapore basic tax rate as follows:

In \$ millions	The Group	
	2010	2009
Profit	2,212	2,447
Prima facie tax calculated at a tax rate of 17% (2009: 17%)	376	416
Effect of different tax rates in other countries	35	25
Effect of change in tax rate	–	1
Income not subject to tax	(70)	(47)
Income taxed at concessionary rate	(121)	(97)
Non-tax deductible provisions	–	3
Goodwill charges not deductible for tax purpose	173	–
Others	61	(16)
Income tax expense charged to income statement	454	285

Refer to Note 28 for further information on deferred tax assets/liabilities.

15 EARNINGS PER ORDINARY SHARE

Number of shares (millions)	The Group	
	2010	2009
Weighted average number of ordinary shares in issue	(a) 2,287	2,234
Dilutive effect of share options	1	1
Full conversion of non-voting redeemable CPS	100	98
Full conversion of non-voting convertible preference shares	#	#
Weighted average number of ordinary shares in issue (diluted)	(aa) 2,388	2,333

Amount under 500,000

In \$ millions	The Group	
	2010	2009
Net profit attributable to shareholders (Net Profit)	(b) 1,632	2,041
Net profit (less preference dividends)	(c) 1,602	2,011
Earnings per ordinary share (\$)		
Basic	(c)/(a) 0.70	0.90
Diluted	(b)/(aa) 0.68	0.87

For the purpose of calculating the diluted earnings per ordinary share, the weighted average number of ordinary shares in issue is adjusted to take into account the effect of a full conversion of non-voting convertible preference shares (CPS) and non-voting redeemable CPS. In addition, the calculation takes into account the exercise of all outstanding share options granted to employees when such shares would be issued at a price lower than the average share price during the financial year.

In 2008, the Group reclassified certain financial assets which were no longer held for selling in the near term, out of the held for trading category into the available-for-sale category. If the Group had not reclassified the financial assets, fair value gains recognised for the year in respect of the reclassified assets outstanding at year end would have amounted to \$37 million (2009: gains of \$105 million) in the income statement.

In the previous financial years, the Group also reclassified certain financial assets out of the held for trading and available-for-sale categories into the loans and receivables category. The Group has the intention and ability to hold these reclassified assets for the foreseeable future or until maturity. If the Group had not reclassified the available-for-sale assets, fair value losses recognised for the year in respect of the reclassified assets outstanding at year end would have amounted to \$4 million (2009: gains of \$132 million) in the revaluation reserves. If the Group had not reclassified the held for trading assets, fair value gains or losses recognised for the year in respect of the reclassified assets outstanding at year end would have been insignificant.

The fair values and carrying amounts of the reclassified financial assets are as follows:

In \$ millions	Reclassified from	Reclassified to	The Group		2009	
			2010	2009	Fair values	Carrying amounts
			Fair values	Carrying amounts	Fair values	Carrying amounts
	Reclassified in 2009

Maximum credit exposure	395	604
Credit derivatives/enhancements – protection bought	(395)	(604)
Cumulative change in fair value arising from changes in credit risk	(14)	(16)
Cumulative change in fair value of related credit derivatives /enhancements	14	16

Changes in fair value arising from changes in credit risk are determined as the amount of change in their fair value that is not attributable to changes in market conditions that give rise to market risk. Changes in market conditions that give rise to market risk include changes in a benchmark interest rate, foreign exchange rate or index of prices or rates.

During the year, the amount of change in the fair value of the loans and advances attributable to credit risk was \$2 million (2009: \$39 million).

During the year, the amount of change in the fair value of the related credit derivatives/enhancements was \$2 million (2009: \$39 million).

Refer to Note 49 for details of significant associates.

26 GOODWILL ON CONSOLIDATION

Set out below is the carrying value of the Group's goodwill arising from acquisition of subsidiaries and joint ventures as at 31 December, after an assessment for impairment is performed:

In \$ millions	The Group	
	2010	2009
Balance at 1 January	5,847	5,847
Impairment charge	(1,018)	–
Disposal of joint venture	(27)	–
Balance at 31 December	4,802	5,847

Goodwill arising from acquisition of subsidiaries and joint ventures is allocated to the Group's cash-generating units or groups of cash-generating units as follows:

In \$ millions	2010	2009
DBS Bank (Hong Kong) Limited	4,631	5,649
DBS Vickers Securities Holdings Pte Ltd	154	154
Cholamandalam DBS Finance Limited	–	27
Primefield Company Pte Ltd	17	17
Total	4,802	5,847

Key assumptions used for value-in-use calculations:

	DBS Bank (Hong Kong) Limited	DBS Vickers Securities Holdings Pte Ltd
Growth rate ^(a)	4.5%	4.0%
Discount rate ^(a)	9.5%	9.0%

(a) No change from 2009

The recoverable amounts are determined based on a value-in-use calculation. These calculations use cash flow projections based on financial budgets and forecasts approved by senior management, taking into account projected regulatory capital requirements. The recoverable value is determined by discounting the cash flow projections to their present values. The terminal value reflecting all periods beyond the fifth year is calculated based on the forecast fifth year profit, the cost of equity and the long term growth rate stated above. The growth rates do not exceed the long-term average growth rate for the market in which the businesses operate.

The process of evaluating goodwill impairment requires significant management judgement, the results of which are highly sensitive to the assumptions used. The review of goodwill impairment represents management's best estimate of the various factors, including the future cash flows and the discount and growth rates used.

For the year ended 31 December 2010, an impairment charge of \$1,018 million has been recorded in the income statement for the goodwill arising from the Group's acquisition of DBS Bank (Hong Kong) Limited. This resulted from a decline in the value-in-use of the cash generating unit as cash flow projections were reduced. The decline in cash flow projection for the cash generating unit was driven by the increased likelihood of interest margin compression as a result of heightened deposit competition.

If the estimated long term growth rates for DBS Bank (Hong Kong) Limited and DBS Vickers Securities Holdings Pte Ltd are reduced by 25 basis points or the estimated discount rates increased by 25 basis points, the impact on the recoverable amounts for these entities are not material. On this basis, the Group concluded that goodwill remains recoverable at 31 December 2010. However, if conditions in Hong Kong and the banking industry deteriorate and turn out to be significantly worse than anticipated in the Group's performance forecast, the goodwill may be further impaired in future periods.

27 PROPERTIES AND OTHER FIXED ASSETS

The Group leases out investment properties under operating leases. The leases typically run for an initial period of one to five years, and may contain an option to renew the lease after that date at which time all terms will be renegotiated. None of the leases include contingent rentals.

The minimum lease receivables as at the balance sheet date are as follows:

In \$ millions	The Group	
	2010	2009
Minimum lease receivable		
Not later than 1 year	13	15
Later than 1 year but not later than 5 years	18	18
Total	31	33

27.1 The net book value of PWC Building, being property held both for the purpose of generating rental income and for owner occupancy, was \$416 million as at 31 December 2010 (2009: \$423 million). Its fair value was independently appraised at \$560 million (2009: \$542 million).

28 DEFERRED TAX ASSETS/LIABILITIES

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred income taxes relate to the same tax authority. The deferred tax assets and liabilities are to be recovered and settled after one year and the following amounts, determined after appropriate offsetting, are shown in the balance sheet. The following amounts, determined after appropriate offsetting, are shown in the balance sheet:

In \$ millions	The Group	
	2010	2009
Deferred tax assets	102	144
Deferred tax liabilities	(40)	(54)
Total	62	90

The movement in deferred tax (prior to offsetting of balances within the same tax jurisdiction) is as follows:

(a) Changes in fair value arising from changes in credit risks are determined as the amount of change in fair value that is not attributable to changes in market conditions that give rise to market risk. Changes in market conditions that give rise to market risk include changes in benchmark interest rate, foreign exchange rate or index of prices or rates. Change in fair value arising from change in credit risks is not significant. Net unrealised loss for the fair value designated liabilities amount to \$13 million at 31 December 2010 (2009: \$13 million gain)

34.1 Interest is payable semi-annually on 15 April and 15 October commencing 15 October 2000. The fixed rate funding has been converted to floating rate at six-month LIBOR + 0.96% via interest rate swaps. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital, the eligible amount being dependent on regulatory amortisation rules. The notes expired in 2010.

34.2 Interest is payable semi-annually on 15 May and 15 November commencing 15 November 2001. The fixed rate funding has been converted to floating rate at three-month LIBOR + 1.25% via interest rate swaps. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital, the eligible amount being dependent on regulatory amortisation rules.

34.3 Interest is payable semi-annually on 15 May and 15 November commencing 15 May 2005. Part of the fixed rate funding has been converted to floating rate at three-month LIBOR + 0.61% via interest rate swaps. If the notes are not called at the tenth year, the interest rate steps up and will be reset at six-month LIBOR + 1.61% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.4 Interest is payable quarterly on 15 January, 15 April, 15 July and 15 October commencing 15 October 2006. Interest on the notes will be paid initially at three-month LIBOR + 0.61%. If the notes are not called at the tenth year, the interest rate steps up and will be set at three-month LIBOR + 1.61% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.5 Interest is payable semi-annually on 15 January and 15 July commencing 15 January 2007. If the notes are not called at the tenth year, the interest rate steps up and will be reset at a floating rate per annum equal to six-month Singapore Swap Offer Rate + 1.58% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.6 Interest is payable semi-annually on 16 May and 16 November commencing 16 November 2007. The fixed rate funding has been converted to floating rate at three-month LIBOR + 0.22% via interest rate swaps. If the notes are not called at the fifth year, the interest rate steps up and will be set at three-month LIBOR + 1.22% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

34.7 Interest is payable quarterly on 16 February, 16 May, 16 August and 16 November commencing 16 August 2007. Interest on the notes will be paid initially at three-month LIBOR + 0.22%. If the notes are not called at the fifth year, the interest rate steps up and will be set at three-month LIBOR + 1.22% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

35 SHARE CAPITAL AND TREASURY SHARES

During the financial year, pursuant to the DBSH Share Option Plan, the Company issued 1,362,039 (2009: 1,011,601) ordinary shares, fully paid in cash upon the exercise of the options granted. The newly issued shares rank pari passu in all respects with the previously issued shares. The movements in number of ordinary shares and Convertible Preference Shares (CPS) are as follows:

Number of shares (millions)	The Company	
	2010	2009
Balance at 1 January	2,382	1,587
Issue of shares pursuant to Scrip Dividend Scheme	25	–
Issue of rights shares	–	794
Issue of shares upon exercise of share options	2	1
Balance at 31 December	2,409	2,382
The balance includes the following:		
2,308,790,261 (2009: 2,282,452,288) ordinary shares ^(a)	2,309	2,282
180,654 (2009: 180,654) non-voting CPS	#	#
99,713,061 (2009: 99,713,061) non-voting redeemable CPS	100	100
Total	2,409	2,382

(a) The ordinary shares are fully paid-up and do not have par value

Amount under 500,000

The non-voting CPS and non-voting redeemable CPS enjoy the same dividend rate paid on ordinary shares except that the dividend payable is subject to maximum of \$0.30 per annum (non-cumulative). The CPS do not carry voting rights, except in certain instances e.g. where any relevant dividend due is not paid up in full or where a resolution is proposed varying the rights of the preference shares. Subject to the terms set out in the Company's Articles of Association, each CPS may be converted into one fully paid ordinary share at the option of the holder. The Company may also redeem the non-voting redeemable CPS in accordance with the Articles of Association.

Movements in carrying amount of share capital and treasury shares are as follows:

(a) General reserves are maintained in accordance with the provisions of applicable laws and regulations. These reserves are non distributable unless otherwise approved by the relevant authorities. Under the Banking (Reserve Fund) (Transitional Provision) regulations 2007, which came into effect on 11 June 2007, the Bank may distribute or utilise its statutory reserves provided that the amount distributed or utilised for each financial year does not exceed 20% of the reserves as at 30 March 2007

(b) Capital reserves include net exchange translation adjustments arising from translation differences on net investments in foreign subsidiaries, joint ventures, associates and branches, and the related foreign currency financial instruments designated as a hedge

(c) Other reserves relate to the share premium of the Bank prior to the restructuring of the Bank under a financial services holding company, DBSH, pursuant to a scheme of arrangement under Section 210 of the Singapore Companies Act on 26 June 1999

Other subsidiaries	370	408
Total	6,503	4,126

37.1 \$1,100 million 6% non-cumulative non-convertible perpetual preference shares and a liquidation preference of \$100 each, was issued on 28 May 2001 by the Bank, a subsidiary of the Company, to third parties. They qualify as Tier 1 capital for the calculation of the Group's capital adequacy ratios. Dividends, if declared by the Board of Directors of the Bank, are payable semi-annually on 15 May and 15 November at a fixed rate of 6% of the liquidation preference per annum, ending on or prior to 15 May 2011, and thereafter on 15 February, 15 May, 15 August and 15 November in each year at a floating rate per annum equal to the three-month Singapore Swap Offer Rate + 2.28%.

37.2 \$1,700 million 4.7% non-cumulative non-convertible perpetual preference shares and a liquidation preference of \$250,000 each, was issued on 22 October 2010 by the Bank, a subsidiary of the Company, to third parties. They qualify as Tier

1 capital for the calculation of the Group's capital adequacy ratios. Dividends, if declared by the Board of Directors of the Bank, are payable semi-annually on 22 April and 22 October at a fixed rate of 4.7% of the liquidation preference per annum.

37.3 \$800 million 4.7% non-cumulative non-convertible perpetual preference shares and a liquidation preference of \$100 each, was issued on 22 November 2010 by the Bank, a subsidiary of the Company, to third parties. They qualify as Tier 1 capital for the calculation of the Group's capital adequacy ratios. Dividends, if declared by the Board of Directors of the Bank, are payable semi-annually on 22 May and 22 November at a fixed rate of 4.7% of the liquidation preference per annum.

37.4 US\$725 million 7.66% non-cumulative guaranteed preference shares, Series A, each with a liquidation preference of US\$1,000 and \$100 million 5.35% non-cumulative guaranteed preference shares, Series B, each with a liquidation preference of \$10,000 were issued on 21 March 2001 by DBS Capital Funding Corporation, a subsidiary of the Bank. Dividends, when declared by the Board of Directors of DBS Capital Funding Corporation, are payable in arrears on 15 March and 15 September each year at a fixed rate of 7.66% per annum (Series A) and 5.35% per annum (Series B), up to 15 March 2011. Thereafter, dividends are payable quarterly in arrears on 15 March, 15 June, 15 September and 15 December each year at a floating rate of three-month LIBOR + 3.20% per annum (Series A) and three-month Singapore Swap Offer Rate + 2.52% per annum (Series B). In computing the Group's capital adequacy ratio, these guaranteed preference shares qualify as Tier 1 capital.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

37.5 \$1,500 million 5.75% non-cumulative non-convertible non-voting guaranteed preference shares, with a liquidation preference of \$250,000 was issued on 27 May 2008 by DBS Capital Funding II Corporation, a subsidiary of the Bank. Dividends, when declared by the Board of Directors of DBS Capital Funding II Corporation, are payable in arrears on 15 June and 15 December each year at a fixed rate of 5.75% per annum up to 15 June 2018. Thereafter, dividends are payable quarterly in arrears on 15 March, 15 June, 15 September and 15 December each year at a floating rate of three-month Singapore Swap Offer Rate + 3.415% per annum. In computing the Group's capital adequacy ratio, these guaranteed preference shares qualify as Tier 1 capital.

38 CONTINGENT LIABILITIES AND COMMITMENTS

The Group conducts business involving guarantees, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties.

Guarantees and performance bonds are generally written by the Group to support the performance of a customer to third parties. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amount.

Endorsements are residual liabilities of the Group in respect of bills of exchange, which have been paid and subsequently rediscounted.

In \$ millions	The Group

Total	110,987	97,238

(a) Undrawn loan commitments are recognised at activation stage and include commitments which are unconditionally cancellable by the Group

38.1 The Bank, a wholly-owned subsidiary of the Company, has existing outsourcing agreements for the provision of information technology and related support to the Group's operations. There are various termination clauses in the agreements that could require the Group to pay termination fees on early termination of the contract or part thereof. The termination fees are stipulated in the agreements and are determined based on the year when the agreements or part thereof are terminated.

38.2 Included in "Other contingent items" at 31 December 2010, is an amount of \$35 million (2009: \$35 million), representing the termination fee payable by the Bank should a distribution agreement be terminated prematurely prior to December 2010. Under the terms of the agreement, the termination fee payable reduces by \$7 million each year until the expiry of the agreement in December 2015.

38.3 The Group has existing significant operating lease commitments including the leasing of office premises in DBS Towers One and Two, Changi Business Park and Marina Bay Financial Centre in Singapore; and One Island East in Hong Kong. These include lease commitments for which the payments will be determined in the future based on the prevailing market rates in accordance with the lease agreements, of which the related amounts have not been included. The leases have varying terms, escalation clauses and renewal rights.

39 FINANCIAL DERIVATIVES

Financial derivatives are financial instruments whose characteristics are derived from the underlying assets, or from interest and exchange rates or indices. These include forwards, swaps, futures and options. The following sections outline the nature and terms of the most common types of derivatives used by the Group.

Interest rate contracts

Forward rate agreements give the buyer the ability to determine the underlying rate of interest for a specified period commencing on a specified future date (the settlement date). There is no exchange of principal and settlement is effected on the settlement date. The settlement amount is the difference between the contracted rate and the market rate prevailing on the settlement date.

Interest rate swaps involve the exchange of interest obligations with a counterparty for a specified period without exchanging the underlying (or notional) principal.

Interest rate futures are exchange-traded agreements to buy or sell a standard amount of a specified fixed income security or time deposit at an agreed interest rate on a standard future date.

Interest rate options give the buyer on payment of a premium the right, but not the obligation, to fix the rate of interest on a future deposit or loan, for a specified period and commencing on a specified future date.

Interest rate caps and floors give the buyer the ability to fix the maximum or minimum rate of interest. There is no facility to deposit or draw down funds, instead the writer pays to the buyer the amount by which the market rate exceeds or is less than the cap rate or the floor rate respectively. This category includes combinations of interest rate caps and floors, which are known as interest rate collars.

Exchange rate contracts

Forward foreign exchange contracts are agreements to buy or sell fixed amounts of currency at agreed rates of exchange on a specified future date.

Cross currency swaps are agreements to exchange, and on termination of the swap, re-exchange principal amounts denominated in different currencies. Cross currency swaps may involve the exchange of interest payments in one specified currency for interest payments in another specified currency for a specified period.

Currency options give the buyer, on payment of a premium, the right but not the obligation, to buy or sell specified amounts of currency at agreed rates of exchange on or before a specified future date.

Equity-related contracts

Equity options provide the buyer, on payment of a premium, the right but not the obligation, either to purchase or sell a specified stock or stock index at a specified price or level on or before a specified date.

Equity swaps involve the exchange of a set of payments whereby one of these payments is based on an equity-linked return while the other is typically based on an interest reference rate.

Credit-related contracts

Credit default swaps involve the transfer of credit risk of a reference asset from the protection buyer to the protection seller. The protection buyer makes one or more payments to the seller in exchange for an undertaking by the seller to make a payment to the buyer upon the occurrence of a predefined credit event.

Commodity-related contracts

Commodity contracts are agreements between two parties to exchange cash flows which are dependent on the price of the underlying physical assets.

Commodity options give the buyer the right, but not the obligation, to buy or sell a specific amount of commodity at an agreed contract price on or before a specified date.

39.1 Trading derivatives

Most of the Group's derivatives relate to sales and trading activities. Sales activities include the structuring and marketing of derivatives to customers to enable them to take, transfer, modify or reduce current or expected risks. Trading activities are entered into principally for the purpose of generating a profit from short-term fluctuations in price or dealer's margin. Trading includes mainly market making and warehousing to facilitate customer orders. Market making involves quoting bid and offer prices to other market participants with the intention of generating revenues based on spread and volume. Warehousing involves holding on to positions in order to liquidate in an orderly fashion with timing of unwinding determined by market conditions and traders' views of markets as they evolve.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

39.2 Hedging derivatives

The accounting treatment of the hedge derivative transactions varies according to the nature of the hedge and whether the hedge meets the specified criteria to qualify for hedge accounting. Derivatives transacted as economic hedges but do not qualify for hedge accounting are treated in the same way as derivative instruments used for trading purposes.

Fair value hedges

The Group's fair value hedges consist principally of interest rate swaps used for managing interest rate gaps. For the year ended 31 December 2010, the loss on hedging instruments was \$96 million (2009: loss of \$4 million). The total gain on hedged items attributable to the hedged risk amounted to \$102 million (2009: gain of \$8 million).

Net investment hedges

The Group hedges part of the currency translation risk of net investments in foreign operations through financial derivatives and borrowings. The ineffectiveness arising from hedges of net investments in foreign operations is insignificant.

The following table summarises the contractual or underlying principal amounts of derivative financial instruments held or issued for trading and hedging purposes. The notional or contractual amounts of these instruments reflect the volume of transactions outstanding at balance sheet date, and do not represent amounts at risk.

In the financial statements, trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected as assets (Positive fair values for financial derivatives) or liabilities (Negative fair values for financial derivatives). Derivative assets and liabilities arising from different transactions are only offset if the transactions are done with the same counterparty, a legal right of offset exists, and the parties intend to settle the cash flows on a net basis. There was no offset of derivative assets and liabilities in 2010 and 2009.

The contractual or underlying principal amounts of derivative financial instruments of bank and non-bank counterparties amounted to \$1,142 billion (2009: \$1,024 billion) and \$206 billion (2009: \$373 billion) respectively. These positions are mainly booked in Singapore. For purpose of managing its credit exposures, the Group maintains collateral agreements and enters into master netting agreements with most of these counterparties. For those arrangements that comply with the regulatory requirements as set out in MAS Notice 637, the Group recognises the netting arrangements in the computation of its Capital Adequacy Ratios.

41 SHARE-BASED COMPENSATION PLANS**41.1 DBSH Share Ownership Scheme**

The DBSH Share Ownership Scheme is a fund set up to hold units of the Company's ordinary shares. All employees with at least one year of service and who are not participating in the DBSH Share Option Plan or DBSH Share Plan are eligible.

Under the Scheme, participants and the Group contribute up to 10% and 5% of monthly base salary respectively to buy units of the Company's ordinary shares. Amounts contributed by the Group under the Scheme are recognised as employee benefits when paid.

	Ordinary shares		Market value (In \$ millions)

Balance at 1 January	5,355,157	3,522,570	82	30
Balance at 31 December	5,473,697	5,335,157	78	82

41.2 DBSH Share Option Plan

Under the DBSH Share Option Plan (the Option Plan), options to subscribe for the Company's ordinary shares may be granted to Group executives who hold the rank of Vice President (or equivalent) and above and selected employees below the rank of Vice President (or equivalent).

The exercise price of the granted options is equal to the average of the last dealt prices for the Company's shares, as determined by reference to the daily official list published by the Singapore Exchange Securities Trading Ltd, for the three consecutive trading days immediately preceding the date of the grant.

These share options vest over a period in accordance with a vesting schedule determined by the Compensation and Management Development Committee (Committee), and are exercisable after the first anniversary of the date of the grant up to the date of expiration of the options. The fair value of options granted is determined using the Binomial model.

The DBSH Share Option Plan expired on 19 June 2009 and the Plan was neither extended nor replaced. The termination of this Plan will, however, not affect the rights of holders of any outstanding existing Options.

The following table sets out the movement of the unissued ordinary shares of the Company under outstanding options, the weighted average exercise prices and expiration dates.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

41.3 DBSH Share Plan

Under the DBSH Share Plan (the Share Plan), the Company's ordinary shares may be granted to Group executives who hold such rank as may be determined by the Committee appointed to administer the Share Plan from time to time. The awards could be performance-based and/or time-based.

Where time-based awards are granted, they will only vest after the satisfactory completion of time-based service conditions. Participants are awarded shares of the Company, their equivalent cash value or a combination of both as part of their deferred bonus (at the discretion of the Committee).

A time-based award comprises two elements, namely, the main award and the "kicker" award. The shares comprised in the "kicker" award constitute twenty percent of the shares comprised in the main award. Effective 2010, the deferral period for unvested shares was extended from a 3-year period to a 4-year period showing a more prudent risk management arrangement. Under the new vesting schedule, thirty-three percent of the shares comprised in the main award will vest two years after the date of grant. A further thirty-three percent of the shares comprised in the main award will vest three years after the date of grant. The remainder thirty-four percent of the shares comprised in the main award, together with the shares comprised in the "kicker" award, will vest four years after the date of grant. For time-based awards, the fair value of the shares awarded are computed based on the market price of the ordinary shares at the time of the award and is amortised through the income statement over the vesting period. At each balance sheet date, the Group revises its estimates of the number of shares expected to vest based on non-market vesting conditions and the corresponding adjustments are made to the income statement and Share Plan reserves.

The following table sets out the movement of time-based awards granted in the current and previous financial years pursuant to the Share Plan and their fair values at grant date.

Number of shares	2010 grant	2009 grant
Balance at 1 January 2010	Not applicable	4,115,463
Granted in 2010	4,367,999	Not applicable
Vested in 2010	(31,468)	–
Forfeited in 2010	(204,884)	(170,803)
Balance at 31 December 2010	4,131,647	3,944,660
Weighted average fair value per share at grant date	\$14.28	\$8.18

Since the inception of the Share Plan, no awards have been cash-settled under the Share Plan.

41.4 DBSH Employee Share Plan

The DBSH Employee Share Plan (the ESP) caters to all employees of the Group who are not eligible to participate in the DBSH Share Option Plan, the DBSH Share Plan or other equivalent plans.

Under the ESP, eligible employees are awarded ordinary shares of the Company, their equivalent cash value or a combination of both (at the discretion of the Committee), when time-based conditions are met. The ESP awards are granted at the absolute discretion of the Compensation and Management Development Committee.

Time-based awards were granted in the current and previous financial years. The time-based awards will only vest after the satisfactory completion of time-based service conditions. Similar to the DBSH Share Plan, effective from the 2010 grant, shares will vest at thirty-three percent two years after the date of grant. A further thirty-three percent will vest three years after the date of grant and the remainder thirty-four percent four years after the date of grant. For grants in 2009, the vesting period was over 3-year period with fifty percent of the shares granted vesting two years after the date of grant and the remainder fifty percent of the shares vesting three years after the date of grant. The fair value of the shares awarded are computed based on the market price of the ordinary shares at the time of the award and is amortised through the income statement over the vesting period. At each balance sheet date, the Group revises its estimates of the number of shares expected to vest based on non-market vesting conditions and the corresponding adjustments are made to the income statement and Share Plan reserves.

The following table sets out the movement of time-based awards granted in the current and previous financial years pursuant to the ESP and their fair values at grant date.

Number of shares	2010 grant	2009 grant
Balance at 1 January 2010	Not applicable	177,000
Granted in 2010	389,900	Not applicable
Forfeited in 2010	(47,700)	(21,400)
Balance at 31 December 2010	342,200	155,600
Weighted average fair value per share at grant date	\$14.26	\$8.05

Since the inception of the ESP, no awards have been cash-settled under the ESP.

42 RELATED PARTY TRANSACTIONS

42.1 Transactions between the Company and its subsidiaries, including consolidated special purpose entities, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this Note.

42.2 During the financial year, the Group had banking transactions with related parties, consisting of associates, joint ventures and key management personnel of the Group. These included the taking of deposits and extension of credit card and other loan facilities. These transactions were made in the ordinary course of business and carried out at arms-length commercial terms, and are not material.

In addition, key management personnel received remuneration for services rendered during the financial year. Non-cash benefits including performance shares were also granted.

42.3 Total compensation and fees to key management personnel^(a) are as follows:

In \$ millions	The Group	
	2010	2009
Short-term benefits	37	31

Amount under \$500,000

(a) Includes Company Directors and members of the Management Committee who have authority and responsibility in planning the activities and direction of the Group

(b) Includes cash bonus based on amount accrued during the year, to be paid in the following year

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

43 FAIR VALUE OF FINANCIAL INSTRUMENTS**43.1 Fair value measurements**

The following table presents assets and liabilities measured at fair value and classified by level of the following fair value measurement hierarchy:

- (a) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- (b) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) (Level 2); and
- (c) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

– Other financial liabilities	332	3,880	2,340 ^(d)	6,552
Negative fair values for financial derivatives	12	16,309	85	16,406

(a) Includes other government securities, corporate debt securities, equity securities and other financial assets at fair value through profit or loss

(b) Excludes unquoted equities stated at cost of \$125 million (2009: \$134 million)

(c) Includes debt securities in issue, due to non-bank customers (structured investments) and other financial liabilities at fair value through profit or loss

(d) Comprises deposits with variable returns linked to performance of foreign exchange, equities, interest rates or other market drivers. Principal amounts totalling \$82 million (2009: \$2,317 million) are included within the \$82 million (2009: \$2,340 million) fair value figures for structured investments. Unrealised loss for the structured investments is not significant (2009: \$23 million)

Financial instruments that are valued using quoted prices in active markets are classified as Level 1 of the valuation hierarchy. These would include government and sovereign securities, listed equities and corporate debt securities which are actively traded. Derivatives contracts which are traded in an active exchange market are also classified as Level 1 of the valuation hierarchy.

Where fair value is determined using quoted market prices in less active markets or quoted prices for similar assets and liabilities, such instruments are generally classified as Level 2. In cases where quoted prices are generally not available, the Group then determines fair value based upon valuation techniques that use as inputs, market parameters including but not limited to yield curves, volatilities and foreign exchange rates. The majority of valuation techniques employ only observable market data and so reliability of the fair value measurement is high. These would include corporate debt securities, repurchase, reverse repurchase agreements and most of the Group's OTC derivatives.

The Group classifies financial instruments as Level 3 when there is reliance on unobservable inputs to the valuation model attributing to a significant contribution to the instrument value. Valuation reserves or pricing adjustments where applicable will be used to converge to fair value.

Securities traded over the counter can be valued using broker, dealer quotes or any other approved sources. The Group may also use valuation models or discounted cash flow technique to determine the fair value.

Most of the OTC derivatives are priced using valuation models. Where derivative products have been established in the markets for some time, the Group uses models that are widely accepted by the industry.

The valuation techniques and inputs used generally depend on the contractual terms and the risks inherent in the instrument as well as the availability of pricing information in the market. Principal techniques used include discounted cash flows, and other appropriate valuation models. OTC derivatives which are valued using unobservable inputs that are supported by little or no market activity which are significant to the fair value of the assets or liabilities are classified as Level 3. For private equities or funds, fair value is reviewed utilising available and relevant market information, e.g. financial statements of the underlying company or funds. This often requires significant management judgement or estimation. These instruments are classified as Level 3.

Negative fair values for financial derivatives	359	(157)	–	–	(112)	–	(5)	85

(a) Principal amounts totalling \$82 million (2009: \$2,317 million) are included within the \$82 million (2009: \$2,340 million) fair value figures for structured investments

(b) Principally reflects transfers from Level 1 & 2 within the fair value hierarchy due to reduced price transparency or use of proxy pricing over different asset classes

(c) Principally reflects transfers from Level 2 within the fair value hierarchy for interest rate and credit derivatives due to reduced transparency of correlation inputs and credit spreads having significant impact on overall fair value of instrument

(d) Principally reflects transfers to Level 1 & 2 within the fair value hierarchy as recent improved liquidity conditions provided improved price transparency and/or due to the use of developed in-house models with significant observable inputs

(e) Principally reflects transfers to Level 2 within the fair value hierarchy for interest rate derivatives due to availability of in-house pricing model with significant observable inputs

(f) Principally reflects transfers to Level 2 within the fair value hierarchy for structured deposits with variable returns linked to performance of some asset class(es) due to availability of in-house pricing model with significant observable inputs

Total losses for the year included in profit or loss for Level 3 assets/(liabilities) held at the end of 2010 (51)

Total gains for the year included in profit or loss for Level 3 assets/(liabilities) held at the end of 2009 50

Economic hedges entered into for Level 2 exposures may be classified within a different category (i.e. Level 1) and similarly, hedges entered for Level 3 exposures may also be classified within a different category (i.e. Level 1 and/or Level 2). The effects are presented gross in the table.

Effect of changes in significant unobservable assumptions to reasonably possible alternatives

As at 31 December 2010, financial instruments measured with valuation techniques using significant unobservable inputs (Level 3) mainly include some of the following: private equity investments, corporate debt securities, equity, interest rate and credit derivatives and financial liabilities from structured product issuances.

In estimating its significance, the Group used an approach that is currently based on methodologies used for fair value adjustments. These adjustments reflect the values that the Group estimates are appropriate to adjust from the valuations produced to reflect for uncertainties in the inputs used. The methodologies used can be a statistical or other relevant approved techniques.

For many of the Level 3 financial instruments considered, in particular derivatives, unobservable input parameters represent only a small portion of the total number of parameters required to value a financial instrument. The Group has assessed this as insignificant.

43.2 Financial assets & liabilities not carried at fair value

For financial assets and liabilities not carried at fair value on the financial statements, the Group has ascertained that their fair values were not materially different from their carrying amounts at year-end.

For cash and balances with central banks, placements with banks, loans and advances to non-bank customers, as well as deposits of bank and non-bank customers, the basis of arriving at fair values is by discounting cash flows using the relevant market interest rates for the respective currency.

For investment debt securities and subordinated debt issued, fair values are determined based on independent market quotes, where available. Where market prices are not available, fair values are estimated using discounted cash flow method.

For unquoted equities not carried at fair value, fair values have been estimated by reference to the net tangible asset backing of the investee. Unquoted equities of \$125 million as at 31 December 2010 (2009: \$134 million) were stated at cost less accumulated impairment losses because the fair value cannot be reliably estimated using valuation techniques supported by observable market data. The Group intends to dispose of such instruments through trade sale.

The fair value of variable-interest bearing as well as short term financial instruments accounted for at amortised cost is assumed to be approximated by their carrying amounts.

44 CREDIT RISK

44.1 Maximum exposure to credit risk

The maximum exposure to credit risk at the balance sheet date is the amounts on the balance sheet as well as commitments to extend credit, without taking into account the fair value of any collateral and master netting arrangements. The table below shows the maximum exposure and average gross exposures to credit risk for the components of the balance sheet:

In \$ millions	The Group

(a) The amount of securities that are past due but not impaired is not material

(b) For amounts due from banks, majority of the bank counterparties are accorded "Pass" grade in accordance with the loan grading per MAS Notice to Banks No. 612 "Credit Files, Grading and Provisioning"

Cross-border exposures

At 31 December 2010, the Group had exposures to various countries where net exposure exceeded 1% of the Group's total assets. The exposures are determined based on the location of the credit risk of the customers and counterparties regardless of where the transactions are booked.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

The Group's exposures exceeding 1% of the Group's total assets as at 31 December are as follows:

In \$ millions Assets in	Loans and debt securities				Total exposure

45 MARKET RISK

45.1 Market risk

The following table shows the period-end, average, high and low VaR (at a 99% confidence level over a one-day holding period) for trading book market risk:

In \$ millions	As at 31 Dec 2010	The Group 1 Jan 2010 to 31 Dec 2010		
		Average	High	Low
Total	31	27	39	15
In \$ millions	As at 31 Dec 2009	The Group 1 Jan 2009 to 31 Dec 2009*		
		Average	High	Low
Total	22	33	52	21

* Using a two-year historical observation period up to 31 May 2009, and using a one-year historical observation period from 1 June 2009.

Although VaR provides valuable insights, no single measure can capture all aspects of market risk. Therefore, regular stress testing is carried out to monitor the Group's vulnerability to shocks.

The Group has comprehensive capital-linked risk appetite framework for all types of market risk, including interest rate risk in the banking book, in line with its internal capital adequacy assessment process. The Group level total VaR associated with this framework is tabulated below, showing the period-end, average, high and low VaR (at a 99% confidence level over a one-day holding period).

In \$ millions	As at 31 Dec 2010	The Group 1 Jan 2010 to 31 Dec 2010		
		Average	High	Low
Total	65	56	74	38

In \$ millions	As at 31 Dec 2009	The Group 28 Feb 2009 to 31 Dec 2009*		
		Average	High	Low
Total	81	76	94	58

* Using a two-year historical observation period up to 31 May 2009, and using a one-year historical observation period from 1 June 2009.

The economic value impact of changes in interest rates is simulated under various assumptions for the banking book. Based on a 200 basis point upward parallel shock to all yield curves, the simulated economic value change is negative \$465 million. The corresponding simulated economic value change for a 200 basis point downward shock is positive \$499 million.

45.2 Interest rate repricing gaps

The following tables summarise the Group's assets and liabilities across the banking and trading books at their carrying amounts as at 31 December, categorised by the earlier of contractual repricing or maturity dates. Actual dates may differ from contractual dates owing to prepayments and the exercise of options. It should also be noted that any representation of interest rate risk at a specific date offers only a snapshot of the risks taken by the Group, since the position is actively managed.

(a) Other securities include Singapore Government securities and treasury bills, financial investments and securities pledged

(b) Other assets include investments in associates, goodwill on consolidation, properties and other fixed assets, investment properties, deferred tax assets and other assets

(c) Other liabilities include bills payable, other debt securities in issue, current and deferred tax liabilities and other liabilities

(d) Positive indicates inflow and negative indicates outflow of funds

The balances in the above table will not agree with the balances in the consolidated balance sheet as the table incorporates all cash flows, on an undiscounted basis, related to both principal as well as future interest payments.

Customer assets and liabilities (including non-maturing savings/current deposits) are represented on a contractual basis or in a period when it can legally be withdrawn. On a behavioral basis for liquidity risk analysis, the assets and liabilities cash flows may differ from contractual basis.

46.1 Derivatives settled on a gross basis

The table below shows the Group's derivative financial instruments in the period where they mature based on the remaining period to contractual maturity date as at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows on a gross settlement basis.

In \$ millions	Less than 7 days	1 week to 1 month	1 to 3 months	3 to 12 months	More than 1 year	Total
2010						
Foreign exchange derivatives						
– outflow	37,345	47,079	64,501	98,369	50,635	297,929
– inflow	37,356	47,244	64,632	98,767	50,249	298,248
2009						
Foreign exchange derivatives						
– outflow	47,713	52,740	58,622	96,563	47,510	303,148
– inflow	47,617	52,060	58,806	96,724	47,464	302,671

46.2 Contingent liabilities and commitments

The table below shows the Group's contingent liabilities and commitments in the period where they expire based on the remaining period to contractual maturity date as at the balance sheet date:

In \$ millions	Less than 1 year	1 to 3 years	3 to 5 years	Over 5 years	Total
2010					
Guarantees, endorsements and other contingent items	16,031	–	–	–	16,031
Undrawn loan commitments ^(a) and other facilities	90,044	2,410	1,949	553	94,956
Operating lease commitments	132	312	185	292	921
Capital commitments	40	1	–	–	41
Total	106,247	2,723	2,134	845	111,949
2009					
Guarantees, endorsements and other contingent items	15,711	–	–	–	15,711
Undrawn loan commitments ^(a) and other facilities	75,768	4,785	769	205	81,527
Operating lease commitments	127	218	178	397	920
Capital commitments	41	8	–	–	49
Total	91,647	5,011	947	602	98,207

(a) Undrawn loan commitments are recognised at activation stage and include commitments which are unconditionally cancellable by the Group

The Group expects that not all of the contingent liabilities and undrawn loan commitments will be drawn before expiry.

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

46.3 Behavioural profiling

For the purpose of liquidity risk management, the Group actively monitors and manages its liquidity profile within a 1-year period. A conservative view is adopted in the behavioural profiling of assets, liabilities and off-balance sheet commitments that have exhibited cash flow patterns that differ significantly from the actual contractual maturity profile.

The table below shows the Group's behavioural net and cumulative maturity mismatch between assets and liabilities over a 1-year period under a normal scenario without incorporating growth projections:

In \$ millions ^(a)	Less than 7 days	1 week to 1 month	1 to 3 months	3 to 6 months	6 months to 1 year
2010					
Net liquidity mismatch	15,969	6,844	16,810	(2,297)	3,328
Cumulative mismatch	15,969	22,813	39,623	37,326	40,654
2009					
Net liquidity mismatch	23,111	13,349	9,793	(492)	555
Cumulative mismatch	23,111	36,460	46,253	45,761	46,316

(a) Positive indicates a position of liquidity surplus. Negative indicates a liquidity shortfall that has to be funded

As the behavioural assumptions used to determine the maturity mismatch between assets and liabilities are updated from time to time, the information presented above is not directly comparable across past balance sheet dates.

47 CAPITAL MANAGEMENT

The Group's capital management policies are to diversify its sources of capital, to allocate capital efficiently, guided by the need to maintain a prudent relationship between available capital and the risks of its underlying businesses and to meet the expectations of key constituencies, including investors, regulators and rating agencies. The Group has complied with all capital adequacy ratios prescribed by the regulators.

The capital management process, which is under the oversight of the Capital and Balance Sheet Committee, includes periodic reviews of both the demand for and supply of capital across the Group. Overseas subsidiaries and non-banking subsidiaries of the Group may be required to comply with country-specific and industry-specific capital requirements depending on the applicable jurisdiction and industry they operate in. Available capital is allocated across competing demands, guided by the policies outlined above, and to ensure regulatory compliance. Quarterly updates are provided to the Board of Directors.

The Group has adopted the capital adequacy requirements of Basel II as set out in the revised Monetary Authority of Singapore Notice to Banks No. 637 (Notice on Risk Based Capital Adequacy Requirements for Banks incorporated in Singapore) with effect from 1 January 2008.

The following table sets forth details of capital resources and capital adequacy ratios for the Group. MAS Notice to Banks No. 637 “Notice on Risk Based Capital Adequacy Requirements for Banks incorporated in Singapore” sets out the current requirements relating to the minimum capital adequacy ratios for a bank incorporated in Singapore and the methodology a bank incorporated in Singapore shall use for calculating these ratios.

In \$ millions	2010	2009
Tier 1 Capital		
Share capital	8,780	8,435

Tier 2 ratio	3.3	3.6
Total (Tier 1 and 2) ratio	18.4	16.7

48 SEGMENT REPORTING

48.1 Business segment reporting

The business segment results are prepared based on the Group's internal management reporting which reflects the organisation management structure. As the activities of the Group are highly integrated, internal allocation has been made in preparing the segment information. Amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation.

The presentation of the business segment results in the financial statements has been revised in 2010 to better reflect internal management reporting. In addition, the Group adopted a revised capital benefit and fund transfer policy with effect from 1 January 2010. Comparative figures have been restated to conform to the current presentation.

The various business segments are described below:

Consumer/Private Banking

Consumer/ Private Banking provides individual customers with a diverse range of banking and related financial services. The products and services available to customers include current and savings accounts, fixed deposits, loans and home finance, cards, payments, investment and insurance products.

Institutional Banking

Institutional Banking provides financial services and products to institutional clients including non bank financial institutions, government linked companies, large corporates and small and medium-sized businesses. The business focus is to broaden and deepen the financial relationship with clients. The products and services available to customers include long and short term credit facilities ranging from specialised lending such as asset financing, project financing and real estate financing to overdraft, trade, receivables financing and structured trade; cash management and deposit; treasury and markets; corporate finance and advisory banking services for mergers and acquisitions, capital raising through debt and equity markets, capital restructuring, syndicated finance, securities and fiduciary services and private equity. Institutional Banking also provides equity services through DBS Vickers Securities (DBSV). DBSV offers a wide range of services to retail and corporate customers including research, sales and trading, share placement, nominees and securities custodian services and distribution of primary and secondary issues.

Treasury

Treasury provides treasury services to corporations, institutional and private investors, financial institutions and other market participants. It is primarily involved in sales, structuring, market making and trading across a broad range of financial products including foreign exchange, interest rate, debt, credit, equity and other structured derivatives. Income from these financial products and services offered to the customer of other business segments, such as Consumer/Private Banking and Institutional Banking, is reflected in the respective segments. Treasury is also responsible for facilitating the execution of Group's asset and liability interest rate positions and management of the investment of the Group's excess liquidity and shareholders' funds.

Others

Others encompasses a range of activities from corporate decisions and income and expenses not attributed to the business segments described above.

During the year, no one group of related customers accounted for more than 10% of the Group's revenues.

The following table analyses the results, total assets and total liabilities of the Group by business segments:

In \$ millions	Consumer/ Private Banking	Institutional Banking	Treasury	Others ^(a)	Total
2010					
Net interest income	1,398	1,995	840	85	4,318

Depreciation ^(b)	50	24	7	114	195

(a) 2009 includes one-time impairment charge for a Thailand investment of \$23 million

(b) Amounts for each business segment are shown before allocation of centralised cost

DBS GROUP HOLDINGS LTD & ITS SUBSIDIARIES

48.2 Geographical segment reporting

Income and net profit attributable to shareholders (Net profit) are based on the country in which the transactions are booked. Total assets are shown by geographical area in which the assets are booked. It would not be materially different if total assets shown are based on the country in which the counterparty or assets are located. The total assets, income and net profit are stated after elimination of inter-group assets and revenues.

In \$ millions	Singapore	Hong Kong	The Group			Total
			Rest of Greater China ^(c)	South and Southeast Asia ^(d)	Rest of the World ^(e)

2. Constellation Investment Ltd	Issuance of structured notes	Cayman Islands

50 ASSETS HELD FOR SALE

On 6 December 2010, DBS Bank Ltd (“DBS”) entered into an agreement with The Sumitomo Trust & Banking Co. and Nikko Asset Management Co., Ltd (“Nikko AM”) to combine DBS Asset Management Ltd (“DBSAM”) and Nikko AM.

Nikko AM, through its indirectly held 100% owned subsidiary Nikko Asset Management Singapore Limited, will acquire DBS’ 100% owned subsidiary, DBSAM, for \$137 million (US\$104 million), and DBS will use proceeds to acquire a 7.25% interest in Nikko AM, thus allowing the Group to participate in the future growth of the combined business.

Shares in Changsheng Fund Management Company, an associate 33% owned by DBSAM, will not form part of the transaction and will be transferred to DBS upon regulatory approvals.

As part of the transaction, DBS and Nikko AM will enter into a non-exclusive distribution agreement through which Nikko AM’s portfolio of investment products can be distributed through DBS’ network of core markets in the region.

As at 31 December 2010, the assets, liabilities and reserves of DBSAM were consolidated and not classified as a held for sale as the amounts were not material. The transaction is subject to regulatory approvals and is expected to be completed in the first half of 2011.

51 SUBSEQUENT EVENT

On 15 December 2010, DBS Bank Ltd entered into a business migration agreement with The Royal Bank of Scotland N.V and the Royal Bank of Scotland (China) Co. Ltd (RBS China) to transfer certain RBS China’s retail and commercial banking customers, business portfolios and related employees in Shanghai, Beijing and Shenzhen to DBS Bank (China) Limited. Subject to customers’ consent, up to US\$898 million worth of deposits could be transferred to DBS Bank (China) Limited. The business migration is expected to be completed by the second quarter of 2011.

(a) Adjusted for effects of rights issue in January 2009

(b) Expired in 2010

The DBSH Share Option Plan has expired on 19 June 2009 and it was not extended or replaced. The termination of DBSH Share Option Plan will not affect the rights of holders of any outstanding existing options. Therefore, no further options were granted by the Company during the financial year.

The persons to whom the DBSH Options have been granted do not have any right to participate by virtue of the DBSH Options in any share issue of any other company.

DBSH SHARE PLAN

During the financial year, time-based awards in respect of an aggregate of 4,367,999 ordinary shares were granted pursuant to the DBSH Share Plan, to selected employees of the DBSH Group. This included 227,054 ordinary shares comprised in awards granted to directors Mr Piyush Gupta and Mr Koh Boon Hwee (stepped down as Chairman of DBSH on 1 May 2010).

Information on the DBSH Share Plan is as follows:

- (i) Awards over DBSH's ordinary shares may be granted to DBSH Group executives who hold such rank as may be determined by the Compensation and Management Development Committee of DBSH from time to time. Awards may also be granted to (*inter alia*) executives of associated companies of DBSH who hold such rank as may be determined by the Compensation and Management Development Committee from time to time, and non-executive directors of DBSH.

The participants of the DBSH Share Plan may be eligible to participate in the DBSH Share Option Plan or other equivalent plans, but shall not be eligible to participate in the DBSH Employee Share Plan or other equivalent plans.

- (ii) Where time-based awards are granted, participants are awarded ordinary shares of DBSH, their equivalent cash value or a combination of both as part of their deferred bonus, at the end of the prescribed vesting periods. Awards are granted under the DBSH Share Plan at the absolute discretion of the Compensation and Management Development Committee.
- (iii) The DBSH Share Plan shall continue to be in force at the discretion of the Compensation and Management Development Committee, subject to a maximum period of ten years. At an Extraordinary General Meeting ("the EGM") held on 8 April 2009, DBSH Share Plan was extended for another ten years, from 18 September 2009 to 17 September 2019, provided always that the DBSH Share Plan may continue beyond the above stipulated period with the approval of the shareholders of DBSH by ordinary resolution in general meeting and of any relevant authorities which may then be required.
- (iv) Awards under the DBSH Share Plan may be granted at any time in the course of a financial year, and may lapse by reason of cessation of service of the participant, or the retirement, redundancy, ill health, injury, disability, death, bankruptcy or misconduct of the participant, or by reason of the participant, being a non-executive director, ceasing to be a director, or in the event of a take-over, winding up or reconstruction of DBSH.
- (v) At the EGM held on 8 April 2009, the shareholders of the Company have also approved the reduction of total number of new ordinary shares of DBSH which may be issued pursuant to awards granted under the DBSH Share Plan, when added to the total number of new ordinary shares issued and issuable in respect of all awards granted under the DBSH Share Plan, and all options granted under the DBSH Share Option Plan, from 15% to 7.5% of the total number of issued shares in the capital of DBSH (excluding treasury shares).
- (vi) Subject to the prevailing legislation and SGX-ST guidelines, DBSH will have the flexibility to deliver ordinary shares of DBSH to participants upon vesting of their awards by way of an issue of new ordinary shares and/or the transfer of existing ordinary shares (which may include ordinary shares held by the Company in treasury).
- (vii) The class and/or number of ordinary shares of DBSH comprised in an award to the extent not yet vested, and/or which may be granted to participants, are subject to adjustment by reason of any variation in the ordinary share capital of DBSH (whether by way of a capitalisation of profits or reserves or rights issue, reduction, subdivision, consolidation, or distribution) or if DBSH makes a capital distribution or a declaration of a special dividend (whether in cash or in specie), upon the written confirmation of the auditor of DBSH that such adjustment (other than in the case of a capitalisation issue) is fair and reasonable.

AUDIT COMMITTEE

The Audit Committee comprised non-executive directors Mr Ang Kong Hua (Chairman), Mr Christopher Cheng Wai Chee, Mr Ambat Ravi Shankar Menon, Ms Euleen Goh Yiu Kiang, Mr Peter Seah Lim Huat and Mr Danny Teoh Leong Kay. As part of its functions, it assists the Board in discharging its responsibilities for the Group's financial announcements, internal control issues and regulatory compliance as well as to oversee the objectivity and effectiveness of the internal and external auditors.

In its review of the audited financial statements for the financial year ended 31 December 2010, the Audit Committee has discussed with management and the external auditor the accounting principles that were applied and their judgement on the items that might affect the financials. Based on the review and discussions with management and the external auditor, the Audit Committee is of the view that the financial statements are fairly presented in conformity with generally accepted accounting principles in all material aspects.

The Audit Committee has received the requisite information from PricewaterhouseCoopers LLP (PwC) and has considered the financial, business and professional relationship between PwC and the Group. It is of the view that such relationship is compatible with maintaining PwC's independence.

The Audit Committee recommends to the Board of Directors the re-appointment of PwC as independent external auditor at the forthcoming Annual General Meeting of the Company on 28 April 2011.

INDEPENDENT AUDITOR

PricewaterhouseCoopers LLP has expressed its willingness to accept re-appointment as independent external auditor.

On behalf of the Directors

Peter Seah Lim Huat

Piyush Gupta

Independent Auditor's Report

TO THE MEMBERS OF DBS GROUP HOLDINGS LTD (INCORPORATED IN SINGAPORE)

Report on the Financial Statements

We have audited the accompanying financial statements of DBS Group Holdings Ltd (the "Company") and its subsidiaries (the "Group") set out on pages 80 to 157, which comprise the consolidated balance sheet of the Group and the balance sheet of the Company as at 31 December 2010, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows of the Group for the financial year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Singapore Companies Act (Cap.50) (the "Act") and Singapore Financial Reporting Standards, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition that transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair profit and loss accounts and balance sheets and to maintain accountability of assets.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Singapore Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal controls relevant to the entity's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal controls. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements of the Group and the balance sheet of the Company are properly drawn up in accordance with the provisions of the Act and Singapore Financial Reporting Standards, including the modification of the requirements of FRS 39 financial Instruments: Recognition and Measurement in respect of loan loss provisioning by Notice to Banks No. 612 "Credit Files, Grading and Provisioning" issued by the Monetary Authority of Singapore, so as to give a true and fair view of the state of affairs of the Group and of the Company as at 31 December 2010, and the results, changes in equity and cash flows of the Group for the financial year ended on that date.

Report on other Legal and Regulatory Requirements

In our opinion, the accounting and other records required by the Act to be kept by the Company and by those subsidiaries incorporated in Singapore of which we are the auditors, have been properly kept in accordance with the provisions of the Act.
