Appendix 2: Capital – Singapore non-viability loss absorbency regime

Excerpt from **MAS Notice 637 on Risk Based Capital Adequacy Requirements for Banks Incorporated in Singapore**^{1/}

Annex 6B: Requirements to ensure loss absorbency at the point of non-viability (p. 6-47)

- 1.1 [...] AT1 capital instruments and Tier 2 capital instruments contain provisions which ensure their loss absorbency at the point of non-viability. In this regard, the terms and conditions of all AT1 capital instruments and Tier 2 capital instruments issued by the Reporting Bank shall have a provision that requires such instruments, at the option of the Authority, to either be partially or fully written off ... upon the occurrence of the trigger event⁸⁵.
- 1.4 The trigger event shall be the earlier of:
- a) the Authority notifying the Reporting Bank in writing that the Authority is of the opinion that a write-off or conversion is necessary, without which the Reporting Bank would become non-viable; and
 - b) the Authority's decision to make a public sector injection of capital, or equivalent support, without which the Reporting Bank would have become non-viable, as determined by the Authority.
- 1.5 The Authority may take into account, among other considerations, the following^{85B} in assessing a Reporting Bank's viability-
- a) whether the assets of the Reporting Bank are, in the Authority's opinion, sufficient to provide adequate protection to the Reporting Bank's depositors and creditors;
 - b) whether the Reporting Bank has lost the confidence of depositors, other creditors or the public. This may be characterised by ongoing increased difficulty of the Reporting Bank in obtaining or rolling over short-term funding;
 - c) whether the Reporting Bank's regulatory capital has, in the Authority's opinion, reached a level, or is eroding in a manner, that may detrimentally affect its depositors or creditors;
 - d) whether the Reporting Bank failed to pay any liability that has become due and payable or, in the Authority's opinion, will not be able to pay its liabilities as they become due and payable;
 - e) whether the Reporting Bank failed to comply with an order of the Authority to increase its capital;
 - f) whether in the Authority's opinion, any other state of affairs exists in respect of the Reporting Bank that may be materially prejudicial to the interests of the Reporting Bank's depositors or creditors or the owners of any assets under the Reporting Bank's administration; and
 - g) whether the Reporting Bank is able to recapitalise on its own through the issuance of ordinary shares or other forms of regulatory capital.

Footnotes:

⁸⁵ A write-off or conversion shall not constitute an event of default for the capital instruments.

Appendix 3: Singapore resolution regime

“Resolution of financial institutions (“**FIs**”) in Singapore is governed by the Monetary Authority of Singapore Act. The resolution regime¹ has been strengthened in line with the Financial Stability Board’s *Key Attributes of Effective Resolution Regimes for Financial Institutions*.”

Resolution Authority

- ▶ Monetary Authority of Singapore

In-scope Entities

- ▶ All FIs in Singapore, including branches of foreign banks

Trigger Conditions for Exercise of Resolution Powers

With regards to entry into resolution, MAS would consider the viability of an FI and:

- ▶ The impact of a deterioration in the FI's financial condition on the financial system and/or economy of Singapore, including the effectiveness and impact of recovery measures;
- ▶ The ability of the FI to continue meeting regulatory and licensing requirements; and
- ▶ The public's interest and confidence in the FI

Resolution Tools, Powers and Approach

- ▶ **Tools:** transfer of business or shares to a private sector acquirer, transfer of business to a bridge entity, transfer of assets to an asset management company, bail-in, run-off^{2/}, liquidation
- ▶ **Powers:** statutory bail-in, temporary stays and suspensions of shareholders' and creditors' rights, compulsory transfer of shares, cross-border recognition of resolution actions
- ▶ **Approach:** MAS' resolution approach will be guided primarily by its resolution objectives and other considerations such as preference for private sector solution, systemic importance of the non-viable FI, achieving cooperative solutions with foreign authorities, cost-efficiency, timeliness and expediency of resolution, creditor hierarchy, etc. MAS will, as far as possible, seek private sector solutions before exploring resolution strategies that involve government or public sector support

Appendix 3: Singapore resolution regime (Cont'd)

Bail-in Regime

MAS has been granted statutory powers to bail-in liabilities of a non-viable FI under resolution:

- ▶ **Bail-in liabilities**^{1/} for Singapore-incorporated banks and bank holding companies
 - Equity or other instruments that confer a legal or beneficial ownership, except an ordinary share
 - Unsecured liabilities or debt instruments subordinated to unsecured creditors' claims
 - Contingent convertible instruments and contractual bail-in instruments

Creditor Safeguards in a Resolution

- ▶ **No Creditor Worse Off Than in Liquidation (“NCWOL”) provision** entitling shareholders and creditors to receive under resolution at least what they would have received under liquidation of the FI
 - a. An independent valuation* will be carried out to ascertain if NCWOL principle is adhered to, and to determine the potential amount of compensation payable (if any)
 - b. Rights to appeal* to the High Court and Court of Appeal of Singapore if dissatisfied with eligibility for compensation or compensation amount
- ▶ **Protection of Financial Arrangements.** The integrity of protected financial arrangements will be preserved when MAS exercises its resolution powers
 - a. Secured liabilities:* MAS will ensure that secured creditors' claims are not separated from the assets securing the liabilities
 - b. Set-off and netting arrangements:* In relation to financial contracts, such as derivatives and commodities contracts, MAS will ensure that individual contracts with a particular counterparty that are subject to the same set-off or netting arrangements will be transferred in their entirety (or not transferred at all) to protect the interests of the counterparties
