## PART A : PILLAR 3 DISCLOSURES

### 1 INTRODUCTION

This part contains Pillar 3 disclosures of DBS Group Holdings Ltd and its Subsidiaries (Group) and is made pursuant to the Monetary Authority of Singapore Notice to Designated Financial Holding Companies FHC-N637 "Notice on Risk Based Capital Adequacy Requirements" ("MAS Notice FHC-N637"). MAS Notice FHC-N637 incorporates relevant provisions in MAS Notice 637 on Risk Based Capital Requirements for Banks Incorporated in Singapore ("MAS Notice 637").

The Group views the Basel framework as part of continuing efforts to strengthen its risk management culture and ensure that the Group pursues business growth across segments and markets with the appropriate risk management discipline, practices and processes in place.

For the purpose of calculating its risk-weighted assets, the Group applies the Foundation Internal Ratings-Based Approach to certain wholesale credit exposures, the Advanced Internal Ratings-Based Approach to certain retail credit exposures and the Standardised Approach to all other credit exposures. The Group applies the respective Standardised Approaches for operational and market risks.

The numbers in this document are presented in Singapore dollars and rounded to the nearest million, unless otherwise stated.

### 2 SCOPE OF CONSOLIDATION

The Group's capital requirements are based on the principles of consolidation adopted in the preparation of its financial statements. The Group's regulatory scope of consolidation is identical to its accounting scope of consolidation. Please refer to the financial statements in the latest available annual report for the principles of consolidation.

<sup>(1)</sup> Even though the Group is not a G-SIB, it is required under MAS Notice 637 to disclose the G-SIB indicators. Please refer to <https://www.dbs.com/investors/financials/quarterly-financials> for the Group's G-SIB indicator disclosure.

<sup>(2)</sup> LCR is calculated based on average for the quarter. Please also refer to footnote 1 on Page B-1 of this document.

The Group's Common Equity Tier 1 ratio declined 0.2 percentage points from the previous quarter to 14.4%. The drop was mainly due to higher risk-weighted assets.

Other commentaries for the quarter explaining significant changes in the above metrics, if any, have been included in subsequent sections of this document.

<sup>(1)</sup> Minimum capital requirements in this column correspond to 10% of the RWA in column "(a)" which is 2.0 percentage points higher than the Basel Committee's requirement.

The increase in RWA during the quarter was mainly driven by higher market risk-weighted assets.

**6 CREDIT RISK**
**6.1 IRBA - RWA Flow Statement for Credit Risk Exposures**

The following table explains the change in the Group's credit RWA under IRBA for the quarter.

		<b>31 Mar 2023</b>
		a
\$'m		<b>RWA amounts</b>
<b>1</b>	<b>RWA as at end of previous quarter</b>	<b>232,654</b>

<sup>(1)</sup> This represents movement in RWA resulting from factors (other than exposure movements) such as changes in portfolio mix, tenor, credit risk mitigation, etc.

The decrease in Credit RWA during the quarter was mainly driven by changes in portfolio mix, foreign currency translation offset by loan growth.

**7 COUNTERPARTY CREDIT RISK ("CCR")**
**7.1 RWA Flow Statements under the CCR Internal Models Method**

This disclosure is not applicable as the Group does not adopt the CCR Internal Models method.

**8 MARKET RISK**
**8.1 RWA Flow Statements of Market Risk Exposures under IMA**

This disclosure is not applicable as the Group did not adopt IMA to measure its regulatory capital requirements for market risk.

## PART B: LIQUIDITY COVERAGE RATIO (“LCR”) DISCLOSURES

The following disclosures for the Group<sup>(1)</sup> are made pursuant to the Monetary Authority of Singapore (“MAS”) Notice to Designated Financial Holdings Companies FHC-N651 “Liquidity Coverage Ratio (“LCR”) Disclosure”.

The Group is subject to the Basel III Liquidity Coverage Ratio (“LCR”) standards pursuant to MAS Notice FHC-N649. As at 1 January 2019, the Group is required to maintain daily all-currency and Singapore dollar (“SGD”) LCR above 100%.

The LCR aims to ensure that a bank has an adequate stock of unencumbered High Quality Liquid Assets (“HQLA”) to meet its liquidity needs for a 30-calendar day liquidity stress scenario. MAS Notice FHC-N649 stipulates the range of liquid assets that qualify as HQLA, as well as the applicable haircuts for each category. Net cash outflows are computed using the standardized 30-day cash flow rates defined in the same notice. The amounts after the application of haircuts or 30-day cash flow rates are reflected in the “weighted amount” column of the tables in this part.

The Group seeks to ensure that its LCR remains above the specified regulatory minimum requirements. This is achieved by:

- (i) Establishing internal early warning triggers and thresholds based on observed movements in LCR over time;
- (ii) Monitoring and managing the LCR closely to ensure it stays within established boundaries; and
- (iii) Strategically managing the liquidity risk arising from the balance sheet structure.

<sup>(1)</sup> The LCR incorporates the assets and liabilities of DBS Bank Ltd., its banking subsidiaries and DBS Group Holdings Ltd.

<sup>(2)</sup> HQLA in row 1 and row 21 may not be equal as row 1 is before the application of caps on Level 2 liquid assets.

<sup>(3)</sup> Total net cash outflows may not be equal to the total cash outflows minus total cash inflows as the cap on inflows could be binding. Cash inflows may be netted against cash outflows up to an aggregate cap of 75% of total cash outflows.

<sup>(4)</sup> The LCR is computed as an average of observations of LCR during the quarter. This may not be equal to an LCR computed with the average values of HQLA and net cash outflows disclosed in the table.

## 1.3 Liquidity Coverage Ratio

In the first quarter of 2023, the average all-currency and SGD LCRs were 147% and 371%, respectively. Compared to previous quarter, all-currency LCR remained relatively unchanged from 146% while SGD LCR reduced from 388% due to lower inflow from maturing derivatives.

The LCR remains above the regulatory minimum requirements of 100% for both all-currency and SGD. The Group maintains a healthy liquidity position by keeping a stable balance sheet structure that is supported by a diversified funding base.

The Group's LCR is sensitive to (i) balance sheet movements resulting from commercial loan/deposit activities and wholesale inter-bank lending/ borrowing; and (ii) movements due to positions falling into or out of the LCR 30-day tenor, such as loan rollovers. LCR is also sensitive to movements in HQLA, driven primarily by changes in balances with central banks and collaterals from secured lending and borrowing transactions.

### a) Composition of High Quality Liquid Assets ("HQLA")

The Group holds a pool of unencumbered HQLA that are readily available to meet cash flow obligations under stress scenarios, as defined in the LCR rules. These liquid assets consist predominantly of Level 1 HQLA, which comprises cash, balances with central banks and highly rated bonds issued by governments or supranational entities. These may be included, without haircuts or limitations in quantum, in the total pool of HQLA.

The Group's HQLA include Singapore government securities and local government/central bank securities held at overseas branches and subsidiaries. This is supplemented by bonds issued by highly rated corporate issuers (including public sector entities), as well as covered bonds issued by reputable financial institutions.

### b) Concentration of Funding Sources

The Group strives to develop a diversified funding base with access to funding sources across retail and wholesale channels. The Group's funding strategy is anchored on strengthening the core deposit franchise as the foundation of its long-term funding advantage. Please refer to the risk management disclosures in the latest available annual report for more information on the Group's funding strategy.

### c) Derivative Exposures and Potential Collateral Calls

The Group actively manages its over-the-counter ("OTC") and exchange-traded financial derivative exposures arising from market making, trading activities, and its commercial business (including structuring and packaging products for investors and clients). Derivative exposures are mainly from, but not limited to, interest rate swaps and futures, foreign exchange forwards and swaps, and currency swaps. These derivative positions are marked-to-market daily, affecting the collateral amounts posted to and received from interbank counterparties and/or exchanges. Cash flows resulting from potential changes in collateral amounts posted/received are incorporated into LCR net cash outflows.

### 1.3 Liquidity Coverage Ratio (continued)

#### d) Currency Mismatch

As part of its funding strategy, the Group makes use of the swap markets to support its funding needs across currencies. The Group's stable funding base of customer deposits is predominantly denominated in the local currency of its key operating locations. Matching its deposit currency mix, the main portion of the Group's liquid assets is denominated in SGD and the local currencies of key operating locations.

#### e) Centralization of Liquidity Management

Overseas branches and subsidiaries are encouraged but not required to centralise the majority of their borrowings and deployment of funds with Head Office. They will take into account any relevant regulatory restrictions while maintaining an adequate level of presence and participation in the local funding markets.

By managing the liquid assets as a pool, the Group expects to be able to monetize liquid assets to meet liquidity shortfalls under times of stress.

Please refer to the latest available annual report for more information on the Group's liquidity risk management.
