PART A : PILLAR 3 DISCLOSURES

1 INTRODUCTION

This part contains Pillar 3 disclosures of DBS Group Holdings Ltd and its Subsidiaries (Group) and is made pursuant to the Monetary Authority of Singapore Notice to Designated Financial Holding Companies FHC-N637 "Notice on Risk Based Capital Adequacy Requirements" ("MAS Notice FHC-N637"). MAS Notice FHC-N637 incorporates relevant provisions in MAS Notice 637 on Risk Based Capital Requirements for Banks Incorporated in Singapore ("MAS Notice 637").

The Group views the Basel framework as part of continuing efforts to strengthen its risk management culture and ensure that the Group pursues business growth across segments and markets with the appropriate risk management discipline, practices and processes in place.

For the purpose of calculating its risk-weighted assets, the Group applies the Foundation Internal Ratings-Based Approach to certain wholesale credit exposures, the Advanced Internal Ratings-Based Approach to certain retail credit exposures and the Standardised Approach to all other credit exposures. The Group applies the respective Standardised Approaches for operational and market risks.

The numbers in this document are presented in Singapore dollars and rounded to the nearest million, unless otherwise stated.

2 SCOPE OF CONSOLIDATION

The Group's capital requirements are based on the principles of consolidation adopted in the preparation of its financial statements. The Group's regulatory scope of consolidation is identical to its accounting scope of consolidation. Please refer to the financial statements in the latest available annual report for the principles of consolidation.

3 OVERVIEW OF KEY PRUDENTIAL REGULATORY METRICS

The following table provides an overview of key prudential regulatory metrics for the Group.

[1] Even though the Group is not a G-SIB, it is required under MAS Notice 637 to disclose the G-SIB indicators. Please refer to https://www.dbs.com/investors/financials/quarterly-financials for the Group's G-SIB indicator disclosure.

[2] LCR is calculated based on average for the quarter. Please also refer to footnote 1 on Page B-1 of this document.

The Group's Common Equity Tier 1 ratio reduced 0.7 percentage point from the previous quarter to 15.9%. The decrease was largely driven by higher RWA.

Other commentaries for the quarter explaining significant changes in the above metrics, if any, have been included in subsequent sections of this document.

4 LEVERAGE RATIO

The following tables provide the breakdown of the Group's leverage ratio regulatory elements and a reconciliation of the Group's balance sheet assets with the leverage ratio exposure measure.

Leverage Ratio Common Disclosure Template

31	Leverage ratio incorporating values from row 28	**5.7%**	**5.9%**

Leverage Ratio Common Disclosure Template (continued)

The leverage ratio was 5.7%, significantly above the regulatory minimum of 3%.

The difference between the mean value and the quarter-end value of gross SFT assets is mainly driven by reverse repo transactions.

Leverage Ratio Summary Comparison Table

		Amount
$'m		**30 Sep 2026**
1	Total consolidated assets as per published financial statements	973,988
2	Adjustment for investments in entities that are consolidated for accounting purposes but are outside the regulatory scope of consolidation	-
3	Adjustment for securitised exposures that meet the operational requirements for the recognition of risk transference	-
4	Adjustment for fiduciary assets recognised on the balance sheet in accordance with the Accounting Standards but excluded from the calculation of the leverage ratio exposure measure	-
5	Adjustments for regular-way purchases and sales of financial assets subject to trade date accounting	-
6	Adjustments for eligible cash pooling arrangements	-
7	Adjustment for derivative transactions	45,050
8	Adjustment for SFTs	1,807
9	Adjustment for off-balance sheet items	91,467
10	Adjustments for prudent valuation adjustments and specific and general allowances which have reduced Tier 1 Capital	(3)
11	Other adjustments	(6,352)
12	**Leverage Ratio Exposure measure**	**1,105,957**

The key differences between total consolidated assets and leverage ratio exposure measure are mainly due to adjustments for off-balance sheet items and derivative transactions.

(i) Off-balance sheet items: Off-balance sheet amounts include contingent liabilities and undrawn portions of committed facilities after application of credit conversion factors;

(ii) Differences due to netting and potential future exposures for derivatives: Derivative regulatory exposures are netted (where an enforceable master netting agreement is in place) and also include potential future exposures.

5 OVERVIEW OF RISK-WEIGHTED ASSETS

5.1 Overview of RWA

The following table sets out the Group's RWA and capital requirements.

31	**Total**	**397,771**	**381,940**	**39,777**

Numbers below 0.5.

[1] Minimum capital requirements in this column correspond to 10% of the RWA in column "(a)" which is 2.0 percentage points higher than the Basel Committee's requirement.

The increase in RWA during the quarter was mainly driven by higher Credit risk and Market risk RWA.

5.2 Comparison of Modelled and Standardised RWA at Risk Level

The following table provides the comparison of the RWA calculated using the Group's nominated approaches against the RWA calculated using only standardised approaches.

		30 Sep 2026			
		a	b	c	d
		RWA			
$m		RWA for portfolios where the Reporting Bank uses modelled approaches	RWA for portfolios where the Reporting Bank uses standardised approaches	Total RWA (a + b)	Total RWA calculated using only standardised approaches
1	Credit risk (excluding counterparty credit risk)	244,914	40,865	285,779	495,509
2	Counterparty credit risk	13,653	2,943	16,596	32,089
3	Credit valuation adjustment	-	12,232	12,232	12,225
4	Securitisation exposures in the banking book	211	1,260	1,471	2,480
5	Market risk	-	31,642	31,642	31,642
6	Operational risk		41,672	41,672	41,672

8	**Total**	**258,778**	**138,993**	**397,771**	**623,996**

The difference in Total RWA calculated using nominated approaches and the RWA calculated using only standardised approaches is mainly driven by Credit risk, largely due to lower risk-weights used to compute RWA for the F-IRBA Corporate asset class.

6 CREDIT RISK

6.1 IRBA - RWA Flow Statement for Credit Risk Exposures

The following table explains the change in the Group's credit RWA under IRBA for the quarter.

		30 Sep 2026
		a
$'m		RWA amounts

9	**RWA as at end of quarter**	**244,354**

[(1)] This represents movement in RWA resulting from factors (other than exposure movements) such as changes in portfolio mix, tenor, credit risk mitigation, etc.

The increase in Credit RWA during the quarter was mainly driven by an increase in asset size.

7 COUNTERPARTY CREDIT RISK ("CCR")

7.1 RWA Flow Statements under the CCR Internal Models Method

This disclosure is not applicable as the Group does not adopt the CCR Internal Models method.

8 MARKET RISK

8.1 RWA Flow Statements of Market Risk Exposures under IMA

This disclosure is not applicable as the Group does not adopt IMA to measure its regulatory capital requirements for market risk.

9 CREDIT VALUATION ADJUSTMENT RISK

9.1 RWA Flow Statements of CVA Risk Exposures under SA-CVA

This disclosure is not applicable as the Group does not adopt the SA-CVA method.

PART B: LIQUIDITY COVERAGE RATIO ("LCR") DISCLOSURES

The following disclosures for the Group[1] are made pursuant to the Monetary Authority of Singapore ("MAS") Notice to Designated Financial Holdings Companies FHC-N651 "Liquidity Coverage Ratio ("LCR") Disclosure".

The Group is subject to the Basel III Liquidity Coverage Ratio ("LCR") standards pursuant to MAS Notice FHC-N649. As at 1 January 2019, the Group is required to maintain daily all-currency and Singapore dollar ("SGD") LCR above 100%.

The LCR aims to ensure that a bank has an adequate stock of unencumbered High Quality Liquid Assets ("HQLA") to meet its liquidity needs for a 30-calendar day liquidity stress scenario. MAS Notice FHC-N649 stipulates the range of liquid assets that qualify as HQLA, as well as the applicable haircuts for each category. Net cash outflows are computed using the standardised 30-day cash flow rates defined in the same notice. The amounts after the application of haircuts or 30-day cash flow rates are reflected in the "weighted amount" column of the tables in this part.

The Group seeks to ensure that its LCR remains above the specified regulatory minimum requirements. This is achieved by:

(i) Establishing internal early warning triggers and thresholds based on observed movements in LCR over time;

(ii) Monitoring and managing the LCR closely to ensure it stays within established boundaries; and

(iii) Strategically managing the liquidity risk arising from the balance sheet structure.

[1] The LCR incorporates the assets and liabilities of DBS Bank Ltd., its banking subsidiaries and DBS Group Holdings Ltd.

[3] Total net cash outflows may not be equal to the total cash outflows minus total cash inflows as the cap on inflows could be binding. Cash inflows may be netted against cash outflows up to an aggregate cap of 75% of total cash outflows.

[4] The LCR is computed as an average of observations of LCR during the quarter. This may not be equal to an LCR computed with the average values of HQLA and net cash outflows disclosed in the table.

1.3 Liquidity Coverage Ratio

In the third quarter of 2026, the average all-currency LCR rose to 146% from 142% in the previous quarter, driven by an increase in HQLA, partially offset by higher net cash outflows. The average SGD LCR was 245%, compared with 267% in the previous quarter, mainly reflecting lower HQLA, with net cash outflows broadly stable. Both all-currency and SGD LCRs remained well above the regulatory minimum requirement of 100%. The Group continues to maintain a healthy liquidity position through a stable balance sheet structure supported by a diversified funding base.

The Group's LCR is sensitive to (i) balance sheet movements resulting from commercial loan/deposit activities and wholesale inter-bank lending/ borrowing; and (ii) movements due to positions falling into or out of the LCR 30-day tenor, such as loan rollovers. LCR is also sensitive to movements in HQLA, driven by balances with central banks, liquid asset holdings and collaterals from secured lending and borrowing transactions.

a) Composition of High Quality Liquid Assets ("HQLA")

The Group holds a pool of unencumbered HQLA that are readily available to meet cash flow obligations under stress scenarios, as defined in the LCR rules. These liquid assets consist predominantly of Level 1 HQLA, which comprises cash, balances with central banks and highly rated bonds issued by governments or supranational entities. These may be included, without haircuts or limitations in quantum, in the total pool of HQLA.

The Group's HQLA include Singapore government securities and local government/central bank securities held at overseas branches and subsidiaries. This is supplemented by bonds issued by highly rated corporate issuers (including public sector entities), as well as covered bonds issued by reputable financial institutions.

b) Concentration of Funding Sources

The Group strives to develop a diversified funding base with access to funding sources across retail and wholesale channels. The Group's funding strategy is anchored on strengthening the core deposit franchise as the foundation of its long-term funding advantage. Please refer to the risk management disclosures in the latest available annual report for more information on the Group's funding strategy.

c) Derivative Exposures and Potential Collateral Calls

The Group actively manages its over-the-counter ("OTC") and exchange-traded financial derivative exposures arising from market making, trading activities, and its commercial business (including structuring and packaging products for investors and clients). Derivative exposures are mainly from, but not limited to, interest rate swaps and futures, foreign exchange forwards and swaps, and currency swaps. These derivative positions are marked-to-market daily, affecting the collateral amounts posted to and received from interbank counterparties and/or exchanges. Cash flows resulting from potential changes in collateral amounts posted/received are incorporated into LCR net cash outflows.

d) Currency Mismatch

As part of its funding strategy, the Group makes use of the swap markets to support its funding needs across currencies. The Group's stable funding base of customer deposits is predominantly denominated in the local currency of its key operating locations. Matching its deposit currency mix, the main portion of the Group's liquid assets is denominated in SGD and the local currencies of key operating locations.

e) Centralization of Liquidity Management

Overseas branches and subsidiaries are encouraged but not required to centralise the majority of their borrowings and deployment of funds with Head Office. They will take into account any relevant regulatory restrictions while maintaining an adequate level of presence and participation in the local funding markets.

By managing the liquid assets as a pool, the Group expects to be able to monetize liquid assets to meet liquidity shortfalls under times of stress.

Please refer to the latest available annual report for more information on the Group's liquidity risk management.
