(see notes on pages 6 to 90, which form part of these financial statements)

These Notes are integral to the financial statements.

The consolidated financial statements for the year ended 31 December 2012 were authorised for issue by the directors on 5 February 2013.

1 Domicile and Activities

DBS Bank Ltd (the Bank) is incorporated and domiciled in the Republic of Singapore and has its registered office at 12 Marina Boulevard, Marina Bay Financial Centre Tower Three, Singapore 018982. It is a wholly-owned subsidiary of DBS Group Holdings Ltd (DBSH).

The Bank is principally engaged in the provision of retail, small and medium-sized enterprise, corporate and investment banking services, including the operations of an Asian Currency Unit under terms and conditions specified by the Monetary Authority of Singapore.

The financial statements relate to the Bank and its subsidiaries (the Group) and the Group's interests in associates and joint ventures.

2 Summary of Significant Accounting Policies

2.1 Basis of preparation

Compliance with Singapore Financial Reporting Standards (FRS)
The consolidated financial statements of the Group are prepared in accordance with Singapore Financial Reporting Standards (FRS) and related Interpretations promulgated by the Accounting Standards Council (ASC). In accordance with Section 201(19) of the Companies Act (the Act), the requirements of FRS 39 Financial Instruments: Recognition and Measurement in respect of loan loss provisioning are modified by the requirements of Notice to Banks No. 612 "Credit Files, Grading and Provisioning" issued by the Monetary Authority of Singapore.

The financial statements of the Bank are prepared in accordance with FRS including related Interpretations to FRS (INT FRS) promulgated by the ASC.

The financial statements are presented in Singapore dollars and rounded to the nearest million, unless otherwise stated. They are prepared on the historical cost convention, except as disclosed in the accounting policies below.

Differences between International Financial Reporting Standards (IFRS) and FRS
Beyond the above modification to FRS related to Notice No. 612, there are no significant differences between IFRS and FRS in terms of their application to the Group for periods covered by these financial statements and consequently there would otherwise be no significant differences had the financial statements been prepared in accordance with IFRS. The consolidated financial statements together with the notes thereon as set out on pages 6 to 90 include the aggregate of all disclosures necessary to satisfy IFRS and FRS.

2.2 Significant estimates and judgment

The preparation of financial statements in conformity with FRS requires management to exercise judgment, use estimates and make assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. Although these estimates are based on management's best knowledge of current events and actions, actual results may differ from these estimates. Critical accounting estimates and assumptions used that are significant to the financial statements, and areas involving a higher degree of judgment and complexity, are disclosed in Note 3.

2.3 Adoption of new and revised accounting standards

On 1 January 2012, the Group adopted the new or revised FRS and INT FRS that are applicable in the current financial year. The financial statements have been prepared in accordance with the relevant transitional provisions in the respective FRS and INT FRS. The adoption of these new or revised FRS and INT FRS did not result in substantial changes to the Group's and Bank's accounting policies and had no material effect on the amounts reported for the current or prior financial years.

Conceptual Framework for Financial Reporting 2010 (Chapters 1 and 3)
The revised Framework is based on fundamental economic concepts rather than a collection of arbitrary conventions. The revisions include stipulating existing or potential investors, lenders and other creditors as primary users of financial statements. It also distinguishes between two types of qualitative characteristics that are necessary to provide useful financial information: (1) fundamental qualitative characteristics, comprising relevance and faithful representation and (2) enhancing qualitative characteristics, comprising comparability, timeliness, verifiability and understandability.

There is no impact on the financial statements, as the chapters only provide more clarity about the underlying principles of financial reporting.

Amendments to FRS 107 Financial Instruments: Disclosures
The amendments require additional disclosures for all transferred financial assets that are not derecognised in their entirety, and those that are derecognised in their entirety but for which the transferor retains continuing involvement existing as at the reporting date, irrespective of when the related transfer transaction occurred. The amendments also clarify the conditions

under which an entity is deemed to have transferred a financial asset.

Please refer to Note 21 for the corresponding disclosures.

Standards to be adopted in future reporting periods are outlined in Note 4.

A summary of the most significant group accounting policies are described further below starting with those relating to the entire financial statements followed by those relating to the income statement, the balance sheet and other specific topics. This does not reflect the relative importance of these policies to the Group. A summary of the accounting policies for areas that are not material for the Group's financial statements for the current year are not presented.

A) General Accounting Policies

2.4 Group Accounting

Subsidiaries
Subsidiaries are entities over which the Group has the power to govern the financial and operating policies so as to obtain benefits from their activities. It is generally accompanied by a shareholding of more than 50% of voting rights. Potential voting rights that are currently exercisable or convertible are considered when determining whether an entity is considered a subsidiary.

The acquisition method is used to account for business combinations. Subsidiaries are consolidated from the date control is transferred to the Group to the date control ceases. The consideration transferred for an acquisition is measured as the acquisition-date fair value of the assets transferred, the liabilities incurred and the equity interests issued. Acquisition-related costs are expensed as incurred. Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values on the date of acquisition. Refer to Note 2.12 for the Group's accounting policy on goodwill.

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

Special purpose entities
In the normal course of business, the Group is involved with a number of entities with limited and predetermined activities (special purpose entities or SPEs) in different capacities such as through derivative transactions. While the Group may hold little or no equity in SPEs, it may consolidate such entities under certain circumstances. These include situations where:

- the activities of the SPE are being conducted on behalf of the Group according to its specific business needs so that the Group obtains benefits from the SPE's operation;
- the Group has the decision-making powers to obtain the majority of the benefits of the activities of the SPE or, by setting up an 'autopilot' mechanism, the Group has delegated these decision-making powers;
- the Group has rights to obtain the majority of the benefits of the SPE and therefore may be exposed to risks incidental to the activities of the SPE; or
- the Group retains the majority of the residual or ownership risks related to the SPE or its assets in order to obtain benefits from its activities.

The main SPEs that the Group controls and consolidates are outlined in Note 22. These entities are used for issuance of structured products on behalf of the Group.

Joint ventures
Joint ventures are entities that are jointly controlled by the Group together with one or more parties through contractual arrangements. The Group recognises its interests in joint ventures using the proportionate consolidation method.

Associates
Associates are entities over which the Group has significant influence, but no control, and generally holds a shareholding of between and including 20% and 50% of the voting rights. The Group recognises its investments in associates using the equity method of accounting.

Under the equity method of accounting, an investment is initially carried at cost. The carrying amount is increased or decreased to recognise the Group's share of net assets of the associate, less any impairment in value after the date of acquisition. The results of the associates are taken from the latest audited accounts or unaudited management accounts of the associates and adjusted where required to align with the Group's application of FRS. The accounts are prepared at dates not more than three months prior to the end of the financial year of the Group. Adjustments are made for the effects of significant transactions or events that occur between the two dates.

2.5 Foreign currency treatment

Functional and presentation currency
Items in the financial statements of the Bank and each of the Group's subsidiaries are measured using the entities' functional currency, being the currency of the primary economic environment in which the entity operates. The Bank's financial statements are presented in Singapore dollars, which is its functional currency. It is also the Group's presentation currency because Singapore dollars form the major currency in which the Group transacts, incurs cost and funds its business.

Foreign currency transactions
Transactions in foreign currencies are measured at the exchange rate ruling as at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency of the entity undertaking the transaction at the exchange rate ruling as at the balance sheet date. Foreign exchange differences arising from this translation are recognised in the income statement. Non-monetary assets and liabilities measured at cost in a foreign currency are translated using the exchange rate at the date of the transaction.

Unrealised foreign exchange differences arising from non-monetary financial assets classified as fair value through profit or loss are recognised in the income statement in trading income. For non-monetary financial assets such as equity investments classified as available-for-sale, unrealised foreign exchange differences are recorded in other comprehensive income and accumulated in equity until the assets are disposed of or become impaired.

Foreign currency translation
The results and financial position of the Group's operations whose functional currency is not Singapore dollars are translated into Singapore dollars in the following manner:

- Assets and liabilities are translated at the exchange rates ruling as at the balance sheet date;
- Income and expenses in the income statement are translated at exchange rates prevailing at each month-end, approximating the exchange rates at the dates of the transactions; and
- All resulting exchange differences are recognised in other comprehensive income.

For acquisitions prior to 1 January 2005, comprising mainly DBS Bank (Hong Kong) Limited and DBS Vickers Securities Holdings Pte Ltd, the foreign exchange rates at the respective dates of acquisition were used. Please refer to Note 25 for an overview of goodwill recorded. Goodwill and fair value adjustments arising on the acquisition of a foreign operation on or after 1 January 2005 will be treated as assets and liabilities of the foreign operation and translated at the closing rate.

On consolidation, foreign exchange differences arising from the translation of net investments in foreign entities, as well as any borrowings and instruments designated as foreign currency hedges of such investments, are recognised in other comprehensive income and accumulated under capital reserves in equity. When a foreign operation is disposed of, such currency translation differences are recognised in the income statement as part of the gain or loss on disposal.

2.6 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to management responsible for allocating resources and assessing performance of the operating segments. Segment income, segment profits, segment assets and segment liabilities are also measured on a basis that is consistent with internal reporting.

The Group's operating segments comprise Consumer Banking/Wealth Management, Institutional Banking, Treasury and Others (including activities from corporate decisions, capital and balance sheet management, funding and liquidity). In total, the Group has four reportable segments.

As part of a group that provides integrated financial activities, segments frequently interact with one another including the integrated provision of financial services across its business lines. External client incomes and expenses incurred by internal service providers to reportable segments are allocated on a basis that reflects the relative value generated by each segment. Assets and liabilities of the reportable segments are funded through and invested with the funding management unit within the "Others" segment. Specific and general allowances are generally allocated to the same segment where the corresponding assets to which the provisions pertain to are reported.

The Group also prepares disclosures on its main geographical areas. The segments represent the aggregate financial position of those legal entities that are located in the geographical area (i.e. booking location). The presentation of these segments does not necessarily represent the country to which the Group has exposure due to cross border activities. The credit exposure from customer loans by country of incorporation of borrower is provided in Note 19.

Please refer to Note 49 for further details on business and geographical segment reporting.

B) Income Statement

2.7 Revenue recognition

Interest income and interest expense
Interest income and interest expense as presented in Note 5 represent the income on all assets and liabilities regardless of the classification and measurement of the assets and liabilities on accrual or at fair value. No interest expense is accrued on the Group's structured investment deposits which are carried at fair value through profit or loss.

Interest income and interest expense are recognised on a time-proportionate basis using the effective interest method as prescribed by FRS. The calculation includes significant fees and transaction costs that are integral to the effective interest rate, as well as premiums or discounts.

Fee and commission income
The Group earns fee and commission income from a diverse range of products and services provided to its customers. Fee and commission income is recognised on the completion of a transaction. For a service that is provided over a period of time, fee and commission income is recognised over the period during which the related service is provided or credit risk is undertaken. Specifically:

- Card-related fee and commission income is recognised net of interchange fees paid;

- Income from issued financial guarantees are generally amortised over the duration of the instruments. For loan commitments, revenue is recognised over the period covered by the commitment. Please see Note 2.15 for the accounting policy on such commitments. Loan syndication fee received as payment for arranging a loan is recognised as revenue when the act has been completed, i.e. when the syndication has been finalised and the Group retained no part of the loan package for itself, or retained a part at the same effective interest rate as for the other participants;

- Management and advisory fees are recognised over the period for which the services are provided.

Fees that are recognised upon the completion of a single transaction include underwriting fees, brokerage fees and fees related to completion of corporate finance transactions in general.

Expenses that are required, directly related and incremental to the revenue generation are offset in the net fee and commission. These typically include brokerage fees paid, card-related expenses, sales commissions but do not include expenses for services delivered over a period (service contracts) and other expenses that are not directly related to any specific transaction. Judgment is required in making these determinations.

Dividend income
Dividend income is recognised when the right to receive payment is established. This is generally the ex-dividend date for listed equity securities, and usually the date when shareholders have approved the dividend for unlisted equity securities. Dividend income arising from held for trading financial assets is recognised in “Net trading income”, while that arising from available-for-sale financial assets is recognised in “Net income from financial investments”.

Allowances for credit and other losses
Please refer to Note 2.10 for the accounting policy on impairment on financial assets including loan loss provisions.

C) Balance Sheet

2.8 Financial assets

Initial recognition
Purchases and sales of all financial assets regardless of the subsequent classification and measurement are recognised on the date that the Group enters into the contractual provisions of the arrangements with counterparties. When the Group acts in a capacity as trustee or other fiduciary capacity without the direct control or direct benefit from the assets, these assets and the corresponding income belonging to a customer are excluded from the financial statements.

Financial assets are initially recognised at fair value, which is usually the transaction price.

Classification and subsequent measurement
The Group attempts to classify and measure financial assets based on the business model in which they are applied and how management monitors performance. The classification is consistently applied across segments and where allowed by FRS. FRS mandates the classification and measurement for financial assets based on their nature and purpose, which broadly means:

- Financial assets (other than derivatives) that are managed mainly for longer term holding and collection of payments are classified as **loans and receivables.** These assets have fixed or determinable payments, are not quoted in an active market and are mainly transactions within the segments “Consumer Banking/Wealth Management” and “Institutional Banking”. Loans and receivables are carried at amortised cost using the effective interest method. The majority of these assets are reported on the balance sheet under “Due from banks” and “Loans and advances to customers” but also in other captions. The income from these assets is reported in the income statement mainly as “Interest income”.

- Financial assets that are managed on a fair value basis, mainly in “Treasury” segment, are classified as **financial assets at fair value through profit or loss**. Such assets include instruments held for the purpose of short term selling and market making, or designated under the fair value option if doing so eliminates or significantly reduces measurement or recognition inconsistencies that would otherwise arise, or if the financial asset contains an embedded derivative that would otherwise need to be separately recorded.

  Financial assets at fair value through profit or loss are reported on the balance sheet mainly under “Financial assets at fair value through profit or loss” and “Singapore Government securities and treasury bills” where these are held either for the purpose of market making and trading purposes. Realised or unrealised gains or losses on such financial assets, except interest income, are taken to “Net trading income" and "Net income from financial instruments designated at fair value" in the income statement in the period they arise.

- **Derivatives** are classified as assets when the fair value is positive ("Positive fair values for financial derivatives") and as liabilities when the fair value is negative ("Negative fair values for financial derivatives"). Changes in the fair value of derivatives other than those designated as hedges in accordance with Note 2.18 are included in "Net trading income". Where a derivative is linked to and settled by delivery of an unquoted equity instrument whose fair value cannot be reliably measured, cost may be the best and only approximation of fair value for the derivative. In some cases, derivatives may be embedded in financial contracts otherwise carried at amortised cost. Embedded derivatives may be separated from the host contract and accounted for as a standalone derivative instrument at fair value through profit or loss when required by FRS 39. For such cases, the embedded derivatives are reported on the balance sheet under "Positive/Negative fair values for financial derivatives" and are measured at fair value with changes in fair value recognised in "Net trading income".

- The Group holds financial assets for the purpose of investment or satisfying regulatory liquidity requirements. Such assets are held for an indefinite period and may be sold in response to needs for liquidity or changes in interest rates, credit spreads, exchange rates or equity prices. Financial assets in this catergory are held in all business segments as well as the liquidity management unit in the "Others" segment. These assets are classified as **available-for-sale** and initially and subsequently measured at fair value.

  Unrealised gains or losses arising from changes in fair value are recognised in other comprehensive income and accumulated in available-for-sale revaluation reserves. When sold or impaired, the accumulated fair value adjustments in the available-for-sale revaluation reserves are reclassified to the income statement. Unquoted equity investments classified as available-for-sale for which fair values cannot be reliably determined are carried at cost, less impairment. These assets are presented on the balance sheet under "Singapore Government securities and treasury bills" and "Financial investments".

Where FRS does not allow for a classification and measurement that reflect the management of the financial assets (or financial liabilities), the Group may apply hedge accounting where permissible and relevant to better reflect the management of the financial assets. Please see Note 2.18 for details on hedging and hedge accounting.

Please refer to Note 15 for further details on the types of financial assets classified and measured as above.

Reclassification of financial assets
When the purpose for holding a financial asset changes, or when FRS otherwise requires it, non-derivative financial assets are reclassified accordingly. Financial assets may be classified out of the fair value through profit or loss or available-for-sale categories in particular circumstances as prescribed by FRS 39. The Group made a one-off reclassification in 2008 and 2009 as outlined in Note 15.

Reclassifications are made at fair value as of the reclassification date. The fair value becomes the new cost or amortised cost as applicable. Any gain or loss already recognised in the income statement before the reclassification date is not reversed.

Determination of fair value
The fair value of financial assets is the amount for which they could be exchanged between knowledgeable, willing parties in arm's length transaction. Determining fair value is considered a significant accounting policy for the Group and further details are disclosed in Note 42.1 on fair value measurements.

Offsetting
Financial assets and liabilities are presented net when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle them on a net basis, or realise the asset and settle the liability simultaneously.

Derecognition
Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership.

The Group enters into certain transactions where it transfers financial assets recognised on its balance sheet but retains either all or a portion of the risks and rewards of the transferred financial assets. If all or substantially all risks and rewards are retained, the transferred financial assets are not derecognised from the balance sheet. Transactions where transfers of financial assets result in the Group retaining all or substantially all risks and rewards include repurchase transactions described in Note 2.11. They also include certain transactions where control over the financial asset is retained, for example, by a simultaneous transaction with the same counterparty to which the asset is transferred such as options. They are mainly transacted in the "Treasury" segment. In such cases the Group continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

Please refer to Note 21 for disclosures on transferred financial assets.

2.9 Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand and non-restricted balances with central banks which are readily convertible into cash.

2.10 Impairment of financial assets

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired.

(a) Financial assets classified as loans and receivables
The Group carries out regular and systematic reviews of all credit facilities extended to customers.

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- Significant financial difficulty of the issuer or obligor, including breach of covenants and/or financial conditions;
- A breach of contract, such as a default or delinquency in interest or principal payments;
- Granting of a concession to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, that the Group would not otherwise consider; and
- High probability of bankruptcy or other financial reorganisation of the borrower.

Specific allowances for credit losses
A specific allowance for credit losses is established if there is objective evidence that the Group will be unable to collect all amounts due under a claim according to the original contractual terms or the equivalent value. A "claim" means a loan, debt security or a commitment such as financial guarantees and letters of credit.

A specific allowance for credit losses is recorded as a reduction in the carrying value of a claim on the balance sheet. For an off-balance sheet item such as a commitment, a specific allowance for credit loss is recorded as a component within other liabilities.

Specific allowances for credit losses are evaluated either individually or collectively for a portfolio.

Specific allowance for an individual credit exposure is made when existing facts, conditions or valuations indicate that the Group is not likely to collect the principal and interest due contractually on the claim. An allowance is reversed only when there has been an identifiable event that led to an improvement in the collectability of the claim. The amount of specific allowance also takes into account the collateral value, which may be discounted to reflect the impact of a forced sale or untimely liquidation. Over-due unsecured consumer loans which are homogenous in nature such as credit card receivables are pooled according to their delinquency behaviour and evaluated for impairment collectively as a group, taking into account the historical loss experience of such loans.

When a loan is uncollectible, it is written off against the related allowance for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Recoveries in full or in part of amounts previously written off are credited to the income statement in "Allowances for credit and other losses".

General allowances for credit losses
Apart from specific allowances, the Group also carries general allowances for credit losses. The Group maintains a level of allowances that is deemed sufficient to absorb the estimated credit losses inherent in its loan portfolio (including off-balance sheet credit exposures). The Group maintains general allowances of at least 1% of credit exposures arising from both on and off-balance sheet items (against which specific allowances have not been made) adjusted for collaterals held. This is in accordance with the transitional arrangements under Notice to Banks No. 612 "Credit Files, Grading and Provisioning" issued by the Monetary Authority of Singapore.

Loans which are restructured as determined in Note 44.2 will no longer be presented as past due but remain classified as non-performing. Accordingly such loans will continue to follow the accounting treatment for the relevant classification as outlined above.

(b) Financial assets classified as available-for-sale
The Group assesses at each balance sheet date whether there is objective evidence that an available-for-sale financial asset is impaired. In the case of an equity investment, a significant or prolonged decline in the fair value of the security below its cost is considered in determining whether the asset is impaired. When there is objective evidence of an impairment of an available-for-sale financial asset, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the income statement – is reclassified from the revaluation reserve within equity to the income statement. Impairment losses recognised in the income statement on equity investments are not reversed, until the equity investments are disposed of. A subsequent recovery in the value of an available-for-sale debt instrument whose value has been impaired is reversed through the income statement if there has been an identifiable event that led to the recovery.

2.11 Repurchase agreements

Repurchase agreements (***Repos***) are treated as collateralised borrowing. The amount borrowed is reflected as a liability either as "Due to non-bank customers", "Due to banks" or "Financial liabilities at fair value through profit or loss" when related to trading activities. The securities sold under repos are treated as pledged assets and remain on the balance sheet at amortised cost or fair value depending on their classification.

Reverse repurchase agreements (***Reverse repos***) are treated as collateralised lending. The amount lent is reflected as an asset either as "Loans and advances to customers", "Due from banks" or "Financial assets at fair value through profit or loss".

Amounts paid and received in excess of the amounts borrowed and lent on the repos and reverse repos are amortised as interest expense and interest income respectively using the effective interest method.

2.12 Goodwill on consolidation

Goodwill arising from business combinations on or after 1 January 2010 represents the excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the net identifiable assets acquired. Goodwill in business combinations prior to 1 January 2010 represents the excess of acquisition cost over the fair values of the identifiable assets acquired, liabilities and contingent liabilities assumed at the date of exchange. Goodwill is stated at cost less impairment losses and it is tested at least annually for impairment.

At the acquisition date, any goodwill acquired is allocated to each of the cash-generating units (CGU) or group of CGUs expected to benefit from the combination's synergies for the purpose of impairment testing. The determination of CGUs takes into account how the Group manages and reports its businesses and requires judgment.

An impairment loss is recognised when the carrying amount of a CGU, including the goodwill, exceeds the recoverable amount of the CGU or group of CGUs to which goodwill is allocated. Recoverable amount of a CGU or CGU group is the higher of the CGU's or CGU group's fair value less cost to sell and its value-in-use. An impairment loss on goodwill is recognised in the income statement and cannot be reversed in subsequent periods.

2.13 Properties and other fixed assets

Properties (including investment properties) and other fixed assets are stated at cost less accumulated depreciation and allowances for impairment. The cost of an item of properties and other fixed assets includes its purchase price and any cost that is directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Depreciation is calculated using the straight-line method to write down the cost of properties and other fixed assets to their residual values over their estimated useful lives. Generally the useful lives are as follows:

Buildings	50 years or over the remaining lease period, whichever is shorter
Leasehold land	100 years or remaining lease period, whichever is shorter. Leasehold land where the unexpired lease period is more than 100 years is not depreciated.
Intangible/Computer software	3 - 5 years
Office equipment, furniture and fittings	5 - 10 years

The estimated useful life and residual values of properties and fixed assets are reviewed on each balance sheet date.

Subsequent expenditure relating to properties and other fixed assets that has already been recognised is added to the carrying amount of the asset only when it is probable that future economic benefits associated with the item will flow to the Group and the cost can be measured reliably. Other subsequent expenditure is recognised as hire and maintenance expense in the income statement during the financial year in which it is incurred.

Properties and other fixed assets are subject to an impairment review if there are events or changes in circumstances which indicate that the carrying amount may not be recoverable.

Upon disposal, the difference between the net disposal proceeds and the carrying amount is taken to the income statement.

Please refer to Note 26 for the details of properties and other fixed assets and their movements during the year.

2.14 Financial liabilities

Initial recognition, classification and subsequent measurement
Financial liabilities are initially recognised at fair value. The Group classifies and measures its financial liabilities where allowed by FRS in accordance with the purpose for which the financial liabilities are incurred and managed. Accordingly,

- Financial liabilities are classified as **financial liabilities at fair value through profit or loss** if they are incurred for the purpose of repurchasing in the near term (held for trading) or designated by management on initial recognition (designated under the fair value option). This is mainly the case within the "Treasury" segment and pertains often to short positions in securities for the purpose of ongoing market making, hedging or trading. Such financial liabilities are reported on the balance sheet under "Financial liabilities at fair value through profit or loss".

In addition, some financial liabilities used to fund specific financial assets measured at fair value through profit or loss are designated under the fair value option when doing so eliminates or significantly reduces measurement or recognition inconsistencies that would otherwise arise. Please refer to Note 30 for details on these financial liabilities in the Group's financial statements.

Realised or unrealised gains or losses on financial liabilities held for trading and financial liabilities designated under the fair value option, except interest expense, are taken to "Net trading income" and "Net income from financial instruments designated at fair value" respectively in the income statement in the period they arise.

- Derivative liabilities are treated consistently with derivative assets. Please refer to Note 2.8 for the accounting policy on derivatives.

- Other financial liabilities are carried at **amortised cost** using the effective interest method. These comprise predominantly the Group's deposit portfolio under "Due to non-bank customers" and "Due to banks", and those under "Other liabilities".

Please refer to Note 15 for further details on the types of financial liabilities classified and measured as above.

Determination of fair value
The fair value of financial liabilities is the amount the liability can be settled at. The fair value is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments. Where applicable, a valuation reserve or pricing adjustment is applied to arrive at the fair value.

Please refer also to Note 42.1 for further fair value measurement disclosures.

Derecognition
A financial liability is derecognised from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired.

2.15 Loan Commitments, Letters of Credit and Financial Guarantees

Loan Commitments
Loan commitments are typically not financial instruments and are not recognised on balance sheet but are disclosed off-balance sheet in accordance with FRS 37 Provisions, Contingent Liabilities and Contingent Assets. They form part of the disclosures in Note 38. Upon a loan draw-down by the counterparty, the amount of the loan is generally accounted for under "loans and receivables" as described in Note 2.8.

Letters of Credit
Letters of credit are recorded off-balance sheet as contingent liabilities upon issuance, and the corresponding payables/receivables to/from the beneficiaries/applicants are recorded upon acceptance of the underlying documents.

Financial Guarantees
A financial guarantee is initially recognised in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Group's liability under each guarantee is measured at the higher of the initial measurement less amortisation and the best estimate of the expenditure required to settle any financial obligation arising at the balance sheet date.

The exposure to potential losses associated with a financial guarantee is monitored periodically. When there is objective evidence indicating probable losses, a provision is recognised for the financial guarantee.

2.16 Provisions and other liabilities

Provisions are recognised when:

- the Group has a present legal or constructive obligation as a result of past events,
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and
- a reliable estimate of the amount of the obligation can be made.

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the balance sheet date.

2.17 Share capital

Ordinary shares and preference shares which do not result in the Group having a contractual obligation to deliver cash or another financial asset, or to exchange financial assets or financial liabilities with the holder under conditions that are potentially unfavourable to the Group, are classified as equity. Incremental external costs directly attributable to the issuance of new shares are deducted against share capital.

Dividends are recorded during the financial year in which they are approved by the Board of Directors and declared payable.

D) Other Specific Topics

2.18 Hedging and hedge accounting

The Group uses derivative contracts as part of its hedging strategies for hedging interest rate risk arising from maturity mismatches or for hedging currency risk from currency mismatch and cash flows in foreign currencies.

In some cases these hedges are designated as such for accounting purposes in order to modify the timing of the recognition of the profit or loss from the instruments in accordance with the items they are intended to hedge. Such designation requires the Group to meet strict requirement for documentation and hedge effectiveness as set out in FRS 39. For such hedge accounting relationships each entity within the Group documents at the inception the relationship between the hedging instrument and hedged item, including the risk management objective for undertaking various hedge transactions and methods used to assess the effectiveness of the hedge. Each entity within the Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivative is highly effective in offsetting changes in the fair value or cash flows of the hedged item.

Specifically hedge accounting is applied in the following types of hedge relationships.

Fair value hedge
The Group's fair value hedges consist principally of interest rate swaps used for managing the interest rate gaps that naturally arise from its purchases or issues of debt securities, and where a mismatch in the measurement between the hedging derivative (measured at fair value through profit or loss) and the hedged item (measured at amortised cost) exists. Such hedges are used in the "Treasury" and "Others" segments.

For a qualifying fair value hedge, the changes in the fair value of the hedging derivatives are recorded in the income statement, together with any changes in the fair value of the hedged item attributable to the hedged risk. Gain or loss arising from hedge ineffectiveness is recognised in the income statement.

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item is amortised to the income statement over its remaining maturity, using the effective interest method.

Cash flow hedge
Cash flow hedge accounting is employed principally for hedges against variability in exchange rates from highly probable forecast transactions including interest cash flows expected to occur at various future dates. In addition, cash flow hedge accounting is applied to currency swaps used to hedge foreign currency cash flows of purchased bonds to avoid volatility from the recognition of changes in forward points in the currency swaps that is inconsistent with the management's strategy. Such hedging is performed mainly by funding management unit in "Others" segment.

The effective portion of changes in the fair value of a derivative designated and qualifying as a hedge of future cash flows is recognised in other comprehensive income and accumulated under the cash flow hedge reserve in equity, and reclassified to the income statement in the periods when the hedged forecast cash flows affect the income statement. The ineffective portion of the gain or loss is recognised immediately in the income statement under "Net trading income".

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in the cash flow hedge reserve remains until the forecast transaction is ultimately recognised in the income statement. When a forecast transaction is no longer expected to occur, the cumulative gain or loss in the cash flow hedge reserve is reclassified from equity to the income statement.

Net investment hedge
Net investment hedging is applied to hedge investments which comprise certain subsidiaries, branches, associates and joint ventures with a functional currency different from that of the Group. Under the Group's hedging strategy, the carrying amount of these investments could be fully hedged, partially hedged or fully opened.

Hedges of net investments in the Group's foreign operations are accounted for in a manner similar to cash flow hedges. The gain or loss from the derivative relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated under the capital reserves in equity. The gain or loss relating to the ineffective portion of the hedge is recognised immediately in the income statement under "Net trading income". On disposal of the foreign operations, the cumulative gain or loss in the capital reserves is reclassified to the income statement under "Net trading income".

Economic hedges which do not qualify for hedge accounting
Some hedging instruments serve as fully or partially effective economic hedges but do not qualify for hedge accounting given the exact nature of the derivatives or due to the inability to prove expected effectiveness of the hedging relationship within the strict requirements outlined by FRS 39. This includes entering into swaps and other derivatives (e.g. futures, options) to manage interest rate, foreign exchange and other risks. Such hedges are treated in the same way as derivative instruments used for trading purposes, i.e. realised and unrealised gains and losses are recognised in "Net trading income". Similarly, the hedged exposures are typically recorded at fair value through profit or loss, thereby achieving some measure of offset in the income statement.

Derivatives that do not qualify for hedge accounting include some hedges entered into as part of documented interest rate management strategies. The size and direction of changes in fair value of non-qualifying hedges can be volatile from year to year, but do not alter the cash flows expected as part of the documented management strategies for both the non-qualifying hedge instruments and the assets and liabilities to which the documented interest rate strategies relate. Non-qualifying hedges therefore operate as economic hedges of the related assets and liabilities.

Please refer to Note 39.2 for disclosures on hedging derivatives.

2.19 Employee benefits

Employee benefits, which include base pay, cash bonuses, share-based compensation, contribution to defined contribution plans such as the Central Provident Fund and other staff-related allowances, are recognised in the income statement when incurred. For defined contribution plans, contributions are made to publicly or privately administered funds on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations.

Employee entitlement to annual leave is recognised when they accrue to employees. A provision is made for the estimated liability for annual untaken leave as a result of services rendered by employees up to the balance sheet date.

2.20 Share-based compensation

Employee benefits also include share-based compensation, namely the DBSH Share Ownership Scheme (the Scheme), the DBSH Share Option Plan, the DBSH Share Plan and the DBSH Employee Share Plan (the Plans). The details of the Scheme and Plans are described in Note 40.

Equity instruments granted and ultimately vested under the Plans are recognised in the income statement based on the fair value of the equity instrument at the date of grant. The expense is amortised over the vesting period of each award. Monthly contributions to the Scheme are expensed off when incurred.

2.21 Current and deferred taxes

Current income tax for current and prior periods is recognised at the amount expected to be paid or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. The Group considers uncertain tax positions generally at the level of the total tax liability to each tax authority for each period. The liability is determined based on the total amount of current tax expected to be paid, taking into account all tax uncertainties, using either an expected value approach or a single best estimate of the most likely outcome.

Tax assets and liabilities of the same type (current or deferred) are offset when a legal right of offset exist and settlement in this fashion is intended. This applies generally when they arise from the same tax reporting group and relate to the same tax authority.

Deferred income tax is provided on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Temporary differences are not recognised for goodwill that is not deductible for tax purposes and for the initial recognition of assets or liabilities that neither affects accounting nor taxable profit, other than a business combination. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted by the balance sheet date.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised. Deferred tax is provided on temporary differences arising from investments in subsidiaries, branches, associates and joint ventures, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not be reversed in the foreseeable future.

Deferred tax related to fair value re-measurement of available-for-sale investments, which are recognised outside profit or loss, is also recognised outside profit or loss i.e. in other comprehensive income and accumulated in the available-for-sale revaluation reserves.

3 Critical Accounting Estimates

The Group's accounting policies and use of estimates are integral to the reported results. Certain accounting estimates require exercise of management's judgment in determining the appropriate methodology for valuation of assets and liabilities. In addition, procedures are in place to ensure that methodologies are reviewed and revised as appropriate. The Group believes its estimates for determining the valuation of its assets and liabilities are appropriate.

The following is a brief description of the Group's critical accounting estimates involving management's valuation judgment.

3.1 Impairment allowances

It is the Group's policy to establish, through charges against profit, specific and general allowances in respect of estimated and inherent credit losses in its portfolio as described in Note 2.10.

A significant judgmental area is the calculation of general and other allowances assessed on a collective basis. Such allowances require judgment partly because it is not possible or practical to determine losses on individual loans due to the large number of individual loans and hence a portfolio assessment is required taking into account historical data and combined with professional judgment by management on the current economic and credit environment. In determining such allowances, management considers country and portfolio risks, as well as industry practices. Please refer to the Risk Management section for a further description of the risk management strategies applied.

3.2 Fair value of financial instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction. The majority of the Group's financial instruments reported at fair value are based on quoted and observable market prices or on internally developed models that are based on independently sourced market parameters, such as interest rate yield curves, credit spreads, exchange prices, dividend yields, option volatilities and foreign exchange rates. Valuation reserves or pricing adjustments where applicable will be used to converge to fair value.

The determination of fair value is subject to the Valuation Framework approved by the Board Risk Management Committee (BRMC) and the oversight of senior management committees. The Valuation Framework is implemented by the Group through policies and procedures approved by the committees. These policies and procedures facilitate the exercise of judgment in determining the risk characteristics of various financial instruments, discount rates, estimates of future cash flows and other factors used in the valuation process. Judgment may also be applied in adjusting prices for less readily observable external parameters such as through the use of valuation reserves. Other factors such as model assumptions and market dislocations leading to market anomalies can also materially affect these estimates. Please refer to Note 42 for details about the fair value hierarchy of the Group's financial instruments measured at fair value.

The fair value of financial instruments without an observable market price in liquid market may be determined using valuations models. The choice of model requires significant judgment for complex products especially those in the "Treasury" segment and is governed by the above Valuation Framework and subject to approval by an independent control function. Note 42 provides details of financial instruments that are valued with observable and unobservable parameters (Levels 1 to 3). Instruments designated as Levels 2 and 3 are frequently revalued using a valuation technique employing a relevant model.

3.3 Goodwill on consolidation

The Group performs an impairment review to ensure that the carrying amount of the CGU, to which the goodwill is allocated, does not exceed the recoverable amount of the CGU. Note 25 provides details of goodwill as of the reporting date.

The recoverable amount represents the present value of the estimated future cash flows expected to arise from continuing operations. Therefore, in arriving at the recoverable amount, management exercises judgment in estimating the future cash flows, growth rate and discount rate.

3.4 Income taxes

The Group has exposure to income taxes in numerous jurisdictions. Significant judgment is involved in determining the Group-wide provision for income taxes. The Group recognises liabilities for expected tax issues based on reasonable estimates of whether additional taxes will be due. Where uncertainty exists around the Group's tax position including resolution of any related appeals or litigation processes, appropriate provisions are provided based on technical merits of the positions with the same tax authority . Note 27 provides details of the Group's deferred tax assets/liabilities. In general, determination of the value of assets/liabilities relating to carry forward tax losses requires judgment.

Judgment is also required for other areas of the Group's financial statements including the application of hedge accounting and consolidation of entities.

4 Effects on Financial Statements on Adoption of New or Revised FRS

The Group has not applied the following FRS that have been issued but are not yet effective. These new/revised standards will be adopted by the Group for annual periods commencing on their effective dates as indicated below, and are not expected to have significant impact to the Group's financial statements. The adoption of FRS 107*,* FRS 112 and FRS 113 as outlined below, will mandate additional disclosures for the Group's financial statements.

Amendments to FRS 1 Presentation of Items of Other Comprehensive Income (effective 1 July 2012)
The amendments require entities to group items presented in Other Comprehensive Income on the basis of whether they are potentially recycled to the income statement (reclassification adjustments). Where an entity presents its comprehensive income in two separate statements, the amendments specifically require these statements to be presented consecutively.

FRS 113 Fair Value Measurement (effective 1 January 2013)
FRS 113 defines fair value, establishes a framework for measuring fair value and sets out the disclosure requirements for fair value measurements. It explains how to measure the fair value when it is required by other FRS. It does not introduce new fair value measurements, neither does it eliminate the practicability exceptions to fair value measurements that currently exist in certain standards.

Amendments to FRS 107 Disclosures – Offsetting Financial Assets and Financial Liabilities (effective 1 January 2013)
The amendments require more extensive disclosures than are currently required under FRS. The disclosures focus on quantitative information about recognised financial instruments that are offset on the

balance sheet, as well as those recognised financial instruments that are subject to master netting or similar arrangements irrespective of whether they are offset on the balance sheet.

Annual Improvements 2011 (effective 1 January 2013)
As part of IASB's annual improvements project, there are amendments made to 7 standards this year. These revisions are of a technical or clarifying nature.

FRS 110 Consolidated Financial Statements (effective 1 January 2014)
FRS 110 establishes control as the basis for determining which entities are consolidated. It provides a single model to be applied in the control analysis for all investees, including special purpose entities that are currently within the scope of INT FRS 12 Consolidation – Special Purpose Entities. Control exists under FRS 110 when the investor has power, exposure to variable returns and the ability to use that power to affect its returns from the investee.

FRS 111 Joint Arrangements (effective 1 January 2014)
FRS 111 applies to all parties to a joint arrangement including those who participate in, but do not have joint control of, a joint arrangement. The standard prescribes the accounting for joint operations and joint ventures in both consolidated and separate financial statements.

FRS 112 Disclosure of Interests in Other Entities (effective 1 January 2014)
FRS 112 combines the existing disclosure requirements in a single disclosure standard. It requires the disclosure of summarised financial information about each subsidiary that has material non-controlling interests as well as material associates and joint ventures. It also sets out new disclosure requirements such as financial or other support provided to consolidated and unconsolidated structured entities, and financial information about unconsolidated structured entities that the reporting entity had sponsored.

Amendments to FRS 32 Offsetting Financial Assets and Financial Liabilities (effective 1 January 2014)
The amendments clarify that to qualify for offsetting in the balance sheet, the right of set-off must not be contingent on a future event. It also must be legally enforceable for all counterparties in the normal course of business, as well as in the event of default, insolvency or bankruptcy.

5 Net Interest Income

In $ millions	The Group 2012	The Group 2011	Bank 2012	Bank 2011
Cash and balances with central banks and Due from banks	**496**	532	**394**	381

Others[c]	**43**	71	**37**	48
Fee and commission income	**1,775**	1,766	**1,182**	1,165
Less: fee and commission expense	**196**	224	**97**	97
Net fee and commission income[a]	**1,579**	1,542	**1,085**	1,068

(a) Includes net fee and commission income of $29 million (2011: $42 million) and $17 million (2011: $17 million) for Group and Bank respectively, which is derived from the provision of trust and other fiduciary services during the year
Net fee and commission income earned from financial assets or liabilities not at fair value through profit or loss is $603 million (2011: $607 million) and $497 million (2011: $497 million) during the year for Group and Bank respectively
(b) Cards fees are net of interchange fees paid
(c) 2011 includes fund management fees

7 Net Trading Income

In $ millions	The Group 2012	The Group 2011	Bank 2012	Bank 2011
Foreign exchange	**705**	726	**713**	419
Interest rates, credit and equities[a]	**32**	(28)	**3**	37
Total	**737**	698	**716**	456

(a) Includes dividend income of $11 million (2011: $12 million) for the Group; and $11 million (2011: $12 million) for the Bank

8 Net Loss from Financial Instruments Designated at Fair Value

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**
Financial assets designated at fair value	**(3)**	(42)	**(4)**	(41)
Financial liabilities designated at fair value	**(45)**	24	**(22)**	32
Total	**(48)**	(18)	**(26)**	(9)

Gains or losses from changes in fair value of financial liabilities designated at fair value not attributable to changes in market conditions are not material. Refer to Note 30.

9 Net Income from Financial Investments

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**
Debt securities				
- Available-for-sale	**294**	301	**280**	291
- Loans and receivables	**7**	6	**1**	2
Equity securities[(a) (b)]	**118**	147	**174**	300
Total[(c)]	**419**	454	**455**	593
Comprising net gains transferred from:				
Available-for-sale revaluation reserves	**345**	425	**335**	420

(a) Includes gain on sale of unquoted equity securities which were stated at cost of $3 million (2011: $1 million) for the Group and $3 million (2011: $6 million) for the Bank, their carrying amounts were $40,000 (2011: $1) for the Group and $40,000 (2011: $2) for the Bank at the time of sale
(b) Includes dividend income of $38 million (2011: $24 million) for the Group; and $120 million (2011: $177 million) for the Bank
(c) Includes fair value impact of hedges for the financial investments

10 Other Income

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**
Rental income	**23**	19	**5**	5
Net gain on disposal of properties and other fixed assets	**49**	19	**2**	1
Others [(a)]	**470**	92	**284**	138
Total	**542**	130	**291**	144

(a) 2012 includes a gain from the partial divestment of the Bank of the Philippine Islands investment, amounting to $450 million for the Group and $276 million for the Bank. Refer to Note 24 for details. 2011 includes a gain from the disposal of DBS Asset Management, amounting to $47 million for the Group and $120 million for the Bank

11 Employee Benefits

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**
Salary and bonus	**1,544**	1,434	**930**	922
Contributions to defined contribution plans	**95**	83	**59**	51
Share-based expenses	**68**	54	**53**	46
Others	**181**	141	**98**	102
Total	**1,888**	1,712	**1,140**	1,121

12 Other Expenses

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**
Computerisation expenses[(a)]	**622**	640	**476**	477
Occupancy expenses[(b)]	**330**	291	**175**	171
Revenue-related expenses	**222**	170	**143**	124
Others[(c)]	**546**	484	**322**	302
Total	**1,720**	1,585	**1,116**	1,074

(a) Includes hire and maintenance of computer hardware and software
(b) Includes rental expenses of office and branch premises of $178 million (2011: $148 million) for the Group, and $97 million (2011: $91 million) for the Bank; as well as amounts incurred in the maintenance and service of buildings owned by the Group's subsidiary companies
(c) Includes office administration expenses (e.g. printing and stationary, telecommunications,etc), legal and professional fees

Included in the above table are:

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**
Depreciation expenses	**179**	185	**105**	114
Hire and maintenance of fixed assets, including building-related expenses	**319**	277	**194**	182
Expenses on investment properties	**1**	1	**#**	#
Audit fees payable to external auditors[(a)]				
- Auditors of the Bank	**3**	3	**3**	3
- Associated firms of Auditors of the Bank	**3**	3	**1**	1
Non audit fees payable to external auditors[(a)]				
- Auditors of the Bank	**#**	#	**#**	#
- Associated firms of Auditors of the Bank	**1**	1	**#**	#

\# Amount under $500,000
(a) PricewaterhouseCoopers network firms

13 Allowances for Credit and Other Losses

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**
Loans and advances to customers (Note 19)	**379**	638	**317**	517
Financial investments				
- Available-for-sale	**16**	4	**10**	3
- Loans and receivables	**1**	17	**1**	18
Investment in subsidiaries (Note 22)	**-**	-	**(7)**	(6)
Properties and other fixed assets	**1**	1	**1**	1
Off-balance sheet credit exposures	**5**	26	**7**	22
Others (bank loans and sundry debtors)	**15**	36	**13**	32
Total	**417**	722	**342**	587

14 Income Tax Expense

Income tax expense in respect of profit for the financial year is analysed as follows:

In $ millions	The Group 2012	The Group 2011	Bank 2012	Bank 2011
Current tax expense				
- Current year	**637**	582	**517**	415
- Prior years' provision	**(63)**	(113)	**(56)**	(109)
Deferred tax expense				
- Prior years' provision	**(2)**	-	**-**	-
- Effect of change in tax rate	**-**	1	**-**	1
- Origination of temporary differences	**16**	(27)	**(11)**	18
Total	**588**	443	**450**	325

The deferred tax charge/(credit) in the income statement comprises the following temporary differences:

In $ millions	The Group 2012	The Group 2011	Bank 2012	Bank 2011
Accelerated tax depreciation	**7**	(4)	**10**	4
Allowances for loan losses	**6**	8	**(7)**	22
Other temporary differences	**1**	(30)	**(14)**	(7)
Deferred tax charge/(credit) to income statement	**14**	(26)	**(11)**	19

The tax on the Group's profit (before share of profits of associates) and the Bank's profit differ from the theoretical amount that would arise using the Singapore basic tax rate as follows:

In $ millions	The Group 2012	The Group 2011	Bank 2012	Bank 2011
Profit	**4,489**	3,612	**3,748**	2,973
Prima facie tax calculated at a tax rate of 17% (2011: 17%)	**763**	614	**637**	505
Effect of different tax rates in other countries	**88**	55	**81**	43
Effect of change in tax rate	**-**	1	**-**	1
Net Income not subject to tax	**(96)**	(62)	**(103)**	(84)
Net Income taxed at concessionary rate	**(69)**	(62)	**(68)**	(56)
Others	**(98)**	(103)	**(97)**	(84)
Income tax expense charged to income statement	**588**	443	**450**	325

Refer to Note 27 for further information on deferred tax assets/liabilities.

(b) Includes current tax liabilities, deferred tax liabilities and provision for loss in respect of-balance sheet credit exposures

In 2008 and 2009, the Group had reclassified certain financial assets between categories as a result of its change in holding intention. Had the Group and Bank not reclassified assets out of the available-for-sale category into the loans and receivables category, fair value gains recognised for the year in respect of the reclassified assets outstanding at year end would have amounted to $3 million (2011: losses of $16 million) and $1 million (2011: losses of $7 million) respectively in the revaluation reserves. The impact of other reclassifications would not have had a material impact on the income statement for the current period.

The Group has the intention and ability to hold the reclassified assets in the loans and receivables category for the foreseeable future or until maturity.

The fair values and carrying amounts of the reclassified financial assets are as follows:

The Group					
In $ millions		**2012**		**2011**

Cumulative change in fair value arising from changes in credit risk	**(61)**	(77)	**(61)**	(77)
Cumulative change in fair value of related credit derivatives/enhancements	**61**	77	**61**	77

Changes in fair value arising from changes in credit risk are determined as the amount of change in their fair value that is not attributable to changes in market conditions that give rise to market risk. Changes in market conditions that give rise to market risk include changes in a benchmark interest rate, foreign exchange rate or index of prices or rates.

During the year, the amount of change in the fair value of the loans and advances attributable to credit risk was a gain of $16 million (2011: loss of $63 million) for both Group and Bank. During the year, the amount of change in the fair value of the related credit derivatives/enhancements was a loss of $16 million for both Group and Bank (2011: gain of $63 million).

(b) Based on the country of incorporation of the issuer

21 Securities Pledged and Transferred

The Group enters into transactions in the normal course of business by which it transfers financial assets to third parties or to special purpose entities. These transfers may give rise to full or partial derecognition of those financial assets.

The following table provides information on the financial assets which are sold or transferred under repurchase agreements and securities lending arrangements, which are generally conducted under terms that are in accordance with normal market practice. The Group has determined that it retains substantially all the risks and rewards of these securities and therefore has not derecognised them. In these transactions, the counterparty is typically allowed to sell or repledge those securities lent or transferred, but has an obligation to return the securities at maturity. If the securities decrease in value, the Group may, in certain circumstances, be required, to pay additional cash collateral, and typically the counterparty has recourse only to the securities.

For repurchase agreements, the securities transferred are either classified as “fair value through profit or loss” or “available-for-sale” (See Note 15). The Group recognises a financial liability for cash received. The fair values of the associated liabilities approximate the carrying value and amount to $3,335 million (2011: $2,627 million) for the Group and $1,899 million (2011: $1,233 million) for the Bank.

For securities lending transactions, the securities lent are classified as "available-for-sale" or "loans and receivables" on the balance sheet (see Note 15), and the carrying amount is equal to the fair value. As the Group receives mainly other financial assets in exchange, the associated liabilities recorded are not material.

Corporate debt securities	**1,349**	22	**-**	22
Total securities pledged and transferred[(a)]	**4,397**	2,634	**1,901**	1,236

(a) Securities transferred under securities lending transactions ($1,328 million for the Group and NIL for the Bank) were presented under "Financial investments" in 2011

The Group also enters into structured funding transactions where the Group retains the contractual rights to receive cash flows of loans extended to third parties, but assumes a contractual obligation to pay these cash flows under the issued notes. The carrying amounts and fair values of these financial assets and liabilities both amount to $1,124 million (2011: $445 million) for both the Group and Bank.

Collaterals pledged in connection with derivative transactions under Credit Support Annexes (CSA) agreement are mainly cash.

Transferred financial assets which are subject to partial continuing involvement were not material in 2012 and 2011.

* Audited by PricewaterhouseCoopers network firms outside Singapore
** Audited by other auditors
(a) The Group's effective interest in Bank of the Philippine Islands (BPI) is held via Ayala, in which the Group owns 34.1% (2011: 40.0%). BPI is an associate of Ayala
(b) Shareholding includes 4.15% held through the Bank

24.2 Acquisition and disposal of interests in associates

Acquisition of 30% equity stake in Central Boulevard Development Pte Ltd (CBDPL)

On 31 December 2012, the Group acquired a 30% stake in Marina Bay Financial Centre Tower 3 by buying a 30% interest in CBDPL. The purchase was done via Heedum Pte Ltd (Heedum), a wholly-owned subsidiary, from Choicewide Group Limited (CGL), a joint venture of Cheung Kong (Holdings) Ltd and Hutchison Whampoa Limited. The acquisition is structured as a purchase from CGL of the 30% equity interest it holds in, and its associated shareholder's loan it has advanced to, CBDPL for an aggregate purchase consideration of $1.04 billion.

Both parties also entered into a conditional put option agreement for the Group to take up CGL's remaining 3.33% equity stake in CBDPL and its associated loan, for an estimated aggregate price of $115 million (Put Option). If the Put Option is exercised by CGL, the Group will own a one-third equity stake in CBDPL.

The Group does not equity account for the results of Marina Bay Suites Pte Ltd (MBSPL), a wholly-owned subsidiary of CBDPL as the acquisition of the 30% interest in CBDPL is structured to effectively exclude any significant interest in MBSPL. The Group, through Heedum, has entered into a deed of undertaking with CGL whereby the Group agrees not to participate in the financial and operating policy decisions in MBSPL and that the Group would exercise all voting rights and other rights and powers that it directly or indirectly has or controls in CBDPL and MBSPL in accordance with the written instructions of CGL on all matters arising from, relating to, or otherwise connected with MBSPL and/or CGL's ownership of MBSPL.

Partial Divestment of Bank of the Philippine Islands (BPI)

On 11 October 2012, the Group entered into an agreement to divest 10.4% of its investment in BPI to Ayala Corporation for a total cash consideration of $757 million (PHP 25.6 billion). A $450 million gain was recognised from the transaction (Note 10).

The Group held an effective interest of 20.3% in the BPI prior to the divestment and 9.9% after the divestment. The effective shareholding of 9.9% is held through joint venture company, Ayala DBS Holdings Inc, in which the Group owns 34.1%. The Group continues to have representation on the BPI's board and to equity account for the investment in BPI.

25 Goodwill on Consolidation

The carrying value of the Group's goodwill arising from acquisition of subsidiaries and joint ventures is allocated to the Group's cash-generating units or groups of cash-generating units as follows:

	The Group	
In $ millions	**2012**	**2011**
DBS Bank (Hong Kong) Limited	**4,631**	4,631
DBS Vickers Securities Holdings Pte Ltd	**154**	154

Total	**4,802**	4,802

Key assumptions used for value-in-use calculations:

	DBS Bank (Hong Kong) Limited	**DBS Vickers Securities Holdings Pte Ltd**
Growth rate[(a)]	**4.5%**	**4.0%**
Discount rate[(a)]	**9.5%**	**9.0%**

(a) No change from 2011

The recoverable amounts are determined based on a value-in-use calculation. These calculations use cash flow projections based on financial budgets and forecasts approved by senior management, taking into account projected regulatory capital requirements. The recoverable value is determined by discounting the cash flow projections to their present values. The terminal value reflecting all periods beyond the fifth year is calculated based on the forecast fifth year profit, the cost of equity and the long term growth rate stated above. The growth rates do not exceed the long term average growth rate for the market in which the businesses operate.

The process of evaluating goodwill impairment requires significant management judgment, the results of which are highly sensitive to the assumptions used. The review of goodwill impairment represents management's prudent estimate of the various factors, including the future cash flows and the discount and growth rates used.

If the estimated long term growth rates for DBS Bank (Hong Kong) Limited and DBS Vickers Securities Holdings Pte Ltd are reduced by 25 basis points or the estimated discount rates increased by 25 basis points, the impact on the recoverable amounts for these entities is not material. On this basis, the Group concluded that goodwill remains recoverable at 31 December 2012. However, if conditions in Hong Kong and the banking industry deteriorate and turn out to be significantly worse than anticipated in the Group's performance forecast, the goodwill may be further impaired in future periods.

26 Properties and Other Fixed Assets

The Group leases out investment properties under operating leases. The leases typically run for an initial period of one to five years, and may contain an option to renew the lease after that date at which time all terms will be renegotiated.

The minimum lease receivables as at the balance sheet date are as follows:

(b) 2012 includes additions relating to the Bank's move to Marina Bay Financial Centre

26.1 PWC Building is held as an investment property following the Group's move to Marina Bay Financial Centre in 2012. Its net book value was $404 million as at 31 December 2012 (2011: $410 million) and its fair value was independently appraised at $583 million (2011: $578 million).

27 Deferred Tax Assets/Liabilities

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred income taxes relate to the same tax authority. The deferred tax assets and liabilities are to be recovered and settled after one year and the following amounts, determined after appropriate offsetting, are shown in the balance sheet.

In $ millions	The Group 2012	The Group 2011	Bank 2012	Bank 2011
Deferred tax assets	**91**	149	**28**	60
Deferred tax liabilities	**(30)**	(30)	**-**	-
Total	**61**	119	**28**	60

The movement in deferred tax (prior to offsetting of balances within the same tax jurisdiction) is as follows:

(a) Changes in fair value arising from changes in credit risk are determined as the amount of change in their fair value that is not attributable to changes in market conditions that give rise to market risk. Changes in market conditions that give rise to market risk include changes in benchmark interest rate, foreign exchange rate or index of prices or rates. Change in fair value arising from change in credit risk is not significant. Net unrealised gain or loss for the fair value designated liabilities at 31 December 2012 amount to $10 million loss (2011: $73 million loss) for the Group and $12 million gain (2011: $36 million gain) for the Bank

(b) Certain structured investments issued in 2012 are bifurcated and the host contract amounts are carried at amortised cost

Due to subsidiaries	**5,629**	949
Total	**7,129**	2,449

33.1 The $1,500 million 5.75% subordinated note was issued on 27 May 2008 by the Bank to DBS Capital Funding II Corporation, both wholly-owned subsidiaries of DBSH. Interest is payable in arrears on 15 June and 15 December each year at a fixed rate of 5.75% per annum up to 15 June 2018. Thereafter, interest is payable quarterly in arrears on 15 March, 15 June, 15 September and 15 December each year at a floating rate of three-month Singapore Swap Offer Rate + 3.415% per annum.

34 Subordinated Term Debts

Subordinated term debts issued by subsidiaries of the Group are classified as liabilities in accordance with FRS 32. These are long term debt instruments that have a junior or lower priority claim on the issuing entity's assets in the event of a default or liquidation, and qualify as Tier 2 capital for capital adequacy purposes.

The notes were called in May 2012

34.1 Interest is payable semi-annually on 15 May and 15 November commencing 15 May 2005. Part of the fixed rate funding has been converted to floating rate at three-month LIBOR + 0.61% via interest rate swaps. If the notes are not called at the tenth year, the interest rate steps up and will be reset at six-month LIBOR + 1.61% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.2 Interest is payable quarterly on 15 January, 15 April, 15 July and 15 October commencing 15 October 2006. Interest on the notes will be paid initially at three-month LIBOR + 0.61%. If the notes are not called at the tenth year, the interest rate steps up and will be set at three-month LIBOR + 1.61% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.3 Interest is payable semi-annually on 15 January and 15 July commencing 15 January 2007. If the notes are not called at the tenth year, the interest rate steps up and will be reset at a floating rate per annum equal to six-month Singapore Dollar Swap Offer Rate + 1.58% on the call date. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.4 Interest was payable semi-annually on 16 May and 16 November commencing 16 November 2007. The fixed rate funding was converted to floating rate at three-month LIBOR + 0.22% via interest rate swaps. The notes were called in May 2012. If the notes had not been called, the interest rate will have been reset with a step up to three-month LIBOR + 1.22% on the call date.

34.5 Interest was payable quarterly on 16 February, 16 May, 16 August and 16 November commencing 16 August 2007. Interest on the notes was paid initially at three-month LIBOR + 0.22%. The notes were called in May 2012. If the notes had not been called, the interest rate will have been reset with a step up to three-month LIBOR + 1.22% on the call date.

34.6 Interest is payable semi-annually on 21 August and 21 February commencing 21 August 2012. The fixed rate funding has been converted to floating rate at six-month Singapore Dollar Swap Offer Rate + 2.22% via interest rate swaps. If the notes are not called on 21 February 2017, the interest rate from that date will be reset at a fixed rate per annum of the then-prevailing five-year Swap Offer Rate + 2.147%. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.7 Interest is payable semi-annually on 21 September and 21 March commencing 21 September 2012. The fixed rate funding has been converted to floating rate at three-month LIBOR + 2.21% via interest rate swaps. If the notes are not called on 21 September 2017, the interest rate from that date will be reset at a fixed rate per annum of the then-prevailing five-year US Dollar Swap Rate + 2.229%. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

34.8 Interest is payable semi-annually on 14 February and 14 August commencing 14 February 2013. The fixed rate funding has been converted to floating rate at six-month Singapore Dollar Swap Offer Rate + 2.16% via interest rate swaps. If the notes are not called on 14 February 2018, the interest rate from that date will be reset at a fixed rate per annum of the then-prevailing five-year Swap Offer Rate + 2.085%. In computing the Group's capital adequacy ratio, these notes qualify as Tier 2 capital.

37.1 $1,500 million 5.75% non-cumulative non-convertible non-voting guaranteed preference shares, with a liquidation preference of $250,000 was issued on 27 May 2008 by DBS Capital Funding II Corporation, a subsidiary of the Bank. Dividends, when declared by the Board of Directors of DBS Capital Funding II Corporation, are payable in arrears on 15 June and 15 December each year at a fixed rate of 5.75% per annum up to 15 June 2018. Thereafter, dividends are payable quarterly in arrears on 15 March, 15 June, 15 September and 15 December each year at a floating rate of three-month Singapore Dollar Swap Offer Rate + 3.415% per annum. In computing the Group's capital adequacy ratios, these guaranteed preference shares qualify as Tier 1 capital.

38 Contingent Liabilities and Commitments

The Group issues guarantees, performance bonds and indemnities in the ordinary course of business. The majority of these facilities are offset by corresponding obligations of third parties.

Guarantees and performance bonds are generally written by the Group to support the performance of a customer to third parties. As the Group will only be required to meet these obligations in the event of the customer's default, the cash requirements of these instruments are expected to be considerably below their nominal amount.

Endorsements are residual liabilities of the Group in respect of bills of exchange, which have been paid and subsequently rediscounted.

(a) Undrawn loan commitments are recognised at activation stage and include commitments which are unconditionally cancellable by the Group (2012: $103,666 million, 2011: $90,458 million) and by the Bank (2012: $75,381 million, 2011: $64,175 million)
(b) Based on the country of incorporation of borrower / counterparty

38.1 The Group has existing outsourcing agreements for the provision of information technology and related support to the Group's operations. There are various termination clauses in the agreements that could require the Group to pay termination fees on early termination of the contract or part thereof. The termination fees are stipulated in the agreements and are determined based on the year when the agreements or part thereof are terminated.

38.2 Included in "Other contingent items" at 31 December 2011, was an amount representing the termination fee payable by the Bank should a distribution agreement be terminated prematurely prior to December 2011. Under the terms of the agreement, the termination fee payable reduces upon achieving the sales volume target. The liability was extinguished during the course of 2012.

38.3 The Group has existing significant operating lease commitments including the leasing of office premises in Changi Business Park and Marina Bay Financial Centre in Singapore; and One Island East in Hong Kong. These include lease commitments for which the payments will be determined in the future based on the prevailing market rates in accordance with the lease agreements, of which the related amounts have not been included. The leases have varying terms, escalation clauses and renewal rights.

39 Financial Derivatives

Financial derivatives are financial instruments whose characteristics are derived from the underlying assets, or from interest and exchange rates or indices. These include forwards, swaps, futures and options. The following sections outline the nature and terms of the most common types of derivatives used by the Group.

Interest rate derivatives

Forward rate agreements give the buyer the ability to determine the underlying rate of interest for a specified period commencing on a specified future date (the settlement date). There is no exchange of principal and settlement is effected on the settlement date. The settlement amount is the difference between the contracted rate and the market rate prevailing on the settlement date.

Interest rate swaps involve the exchange of interest obligations with a counterparty for a specified period without exchanging the underlying (or notional) principal.

Interest rate futures are exchange-traded agreements to buy or sell a standard amount of a specified fixed income security or time deposit at an agreed interest rate on a standard future date.

Interest rate options give the buyer on payment of a premium the right, but not the obligation, to fix the rate of interest on a future deposit or loan, for a specified period and commencing on a specified future date.

Interest rate caps and floors give the buyer the ability to fix the maximum or minimum rate of interest. There is no facility to deposit or draw down funds; instead the writer pays to the buyer the amount by which the market rate exceeds or is less than the cap rate or the floor rate respectively. This category includes combinations of interest rate caps and floors, which are known as interest rate collars.

Foreign exchange derivatives

Forward foreign exchange contracts are agreements to buy or sell fixed amounts of currency at agreed rates of exchange on a specified future date.

Cross currency swaps are agreements to exchange, and on termination of the swap, re-exchange principal amounts denominated in different currencies. Cross currency swaps may involve the exchange of interest payments in one specified currency for interest payments in another specified currency for a specified period.

Currency options give the buyer, on payment of a premium, the right but not the obligation, to buy or sell specified amounts of currency at agreed rates of exchange on or before a specified future date.

Equity derivatives

Equity options provide the buyer, on payment of a premium, the right but not the obligation, either to purchase or sell a specified stock or stock index at a specified price or level on or before a specified date.

Equity swaps involve the exchange of a set of payments whereby one of these payments is based on an equity-linked return while the other is typically based on an interest reference rate.

Credit derivatives

Credit default swaps involve the transfer of credit risk of a reference asset from the protection buyer to the protection seller. The protection buyer makes one or more payments to the seller in exchange for an undertaking by the seller to make a payment to the buyer upon the occurrence of a predefined credit event.

Commodity derivatives

Commodity contracts are agreements between two parties to exchange cash flows which are dependent on the price of the underlying physical assets.

Commodity futures are exchange-traded agreements to buy or sell a standard amount of a commodity at an agreed price on a standard future date.

Commodity options give the buyer the right, but not the obligation, to buy or sell a specific amount of commodity at an agreed contract price on or before a specified date.

39.1 Trading derivatives

Most of the Group's derivatives relate to sales and trading activities. Sales activities include the structuring and marketing of derivatives to customers to enable them to take, transfer, modify or reduce current or expected risks. Trading activities are entered into principally for dealer's margin or for the purpose of generating a profit from short-term fluctuations in price. Trading includes mainly market making and warehousing to facilitate customer orders. Market making involves quoting bid and offer prices to other market participants with the intention of generating revenues based on spread and volume. Warehousing involves holding on to positions in order to liquidate in an orderly fashion with timing of unwinding determined by market conditions and traders' views of markets as they evolve.

39.2 Hedging derivatives

The accounting treatment of the hedge derivative transactions varies according to the nature of the hedge and whether the hedge meets the specified criteria to qualify for hedge accounting. Derivatives transacted as economic hedges but do not qualify for hedge accounting are treated in the same way as derivative instruments used for trading purposes.

Fair value hedges

The Group's fair value hedges consist principally of interest rate swaps used for managing interest rate gaps.

At the Group, for the year ended 31 December 2012, the gain on hedging instruments was $144 million (2011: $44 million). The total loss on hedged items attributable to the hedged risk amounted to $143 million (2011: $43 million).

At the Bank, for the year ended 31 December 2012, the gain on hedging instruments was $178 million (2011: loss of $32 million). The total loss on hedged items attributable to the hedged risk amounted to $178 million (2011: gain of $32 million).

Cash flow hedges

The Group's cash flow hedges consist principally of currency forwards and currency swaps transacted to hedge highly probable forecast transactions expected to occur at various future dates against variability in exchange rates. The currency forwards and currency swaps have maturity dates that coincide within the expected occurrence of these transactions. The hedged cash flows are expected to occur over next 5 years following the balance sheet date, and are expected to affect profit or loss in the same period these cash flows occur. The ineffectiveness arising from these hedges is insignificant.

Net investment hedges

The Group hedges part of the currency translation risk of investments through financial derivatives and borrowings. The ineffectiveness arising from hedging of investments is insignificant. The Group regularly reviews its hedging strategy and rebalance based on long term outlook of the currency fundamentals.

The tables below analyses the currency exposure of Group by functional currency at 31 December:

	The Group		
In $ millions	**Net investments in foreign operations[(a)]**	**Financial instruments which hedge the net investments[(b)]**	**Remaining unhedged currency exposures**
2012			
Hong Kong dollar	**5,417**	**5,394**	**23**

Total	10,616	9,074	1,542

(a) Refer to net tangible assets of subsidiaries, joint ventures and associates and capital funds/retained earnings of overseas branches operations
(b) Includes forwards, non-deliverable forwards and borrowings used to hedge the investments

The following tables summarise the contractual or underlying principal amounts of derivative financial instruments held or issued for trading and hedging purposes. The notional or contractual amounts of these instruments reflect the volume of transactions outstanding at balance sheet date, and do not represent amounts at risk.

In the financial statements, trading derivative financial instruments are revalued on a gross position basis and the unrealised gains or losses are reflected as assets (Positive fair values for financial derivatives) or liabilities (Negative fair values for financial derivatives). Derivative assets and liabilities arising from different transactions are only offset if the transactions are done with the same counterparty, a legal right of offset exists, and the parties intend to settle the cash flows on a net basis. There was no offset of derivative assets and liabilities in 2012 and 2011.

Total	**17,280**	21,164	**16,982**	21,034

(a) Based on the country in which the counterparty is incorporated

The contractual or underlying principal amounts of derivative financial instruments of bank and non-bank counterparties amounted to $1,025 billion (2011: $1,277 billion) and $401 billion (2011: $335 billion) respectively for the Group and $1,032 billion (2011: $1,301 billion) and $348 billion (2011: $ 275 billion) respectively for the Bank. These positions are mainly booked in Singapore. For purpose of managing its credit exposures, the Group maintains collateral agreements and enters into master netting agreements with most of these counterparties. For those arrangements that comply with the regulatory requirements as set out in MAS Notice 637, the Group recognises the netting arrangements in the computation of its Capital Adequacy Ratios.

The conditional put option agreement for the Bank through Heedum Pte Ltd to take up Choicewide Group Limited's remaining 3.33% equity stake in Central Boulevard Development Pte Ltd for $115 million and its associated loan of $59 million (Refer to Note 24.2) is carried at cost. The fair value cannot be reliably estimated because of the lack of comparable market data points and the associated uncertain parameters in the option valuation model.

40 Share-based Compensation Plans

40.1 DBSH Share Ownership Scheme

The DBSH Share Ownership Scheme is a fund set up to hold units of DBSH's ordinary shares. All employees based in Singapore with at least one year of service and who hold the rank of Assistant Vice President and below are eligible.

Under the Scheme, participants and the Group contribute up to 10% and 5% of monthly base salary respectively to buy units of DBSH's ordinary shares. Amounts contributed by the Group under the Scheme are recognised as employee benefits when paid.

The Group	Ordinary shares			
	Number		Market value ($ millions)	
	2012	2011	2012	2011
Balance at 1 January	**5,933,584**	5,473,697	**68**	78
Balance at 31 December	**6,509,414**	5,933,584	**97**	68

40.2 DBSH Share Option Plan

Under the DBSH Share Option Plan (the Option Plan), options to subscribe for DBSH's ordinary shares may be granted to Group executives who hold the rank of Vice President (or equivalent) and above and selected employees below the rank of Vice President (or equivalent).

The exercise price of the granted options is equal to the average of the last dealt prices for DBSH's shares, as determined by reference to the daily official list published by the Singapore Exchange Securities Trading Ltd, for the three consecutive trading days immediately preceding the date of the grant.

These share options vest over a period in accordance with a vesting schedule determined by the Compensation and Management Development Committee (Committee), and are exercisable after the first anniversary of the date of the grant up to the date of expiration of the options. The fair value of options granted is determined using the Binomial model.

The DBSH Share Option Plan expired on 19 June 2009 and the Plan was neither extended nor replaced. The termination of this Plan will, however, not affect the rights of holders of any outstanding existing options.

The following table sets out the fair value of the outstanding time-based awards and the movement during the year.

The Group	2012 Unissued number of ordinary shares under outstanding options	Weighted average exercise price ($)	2011 Unissued number of ordinary shares under outstanding options	Weighted average exercise price ($)
Balance at 1 January	**5,769,925**	**11.56**	11,417,819	12.58
Movements during the year:

Weighted average remaining contractual life of options outstanding at 31 December	**1.04 years**		1.51 years	
Range of exercise price of options outstanding at 31 December	**$8.84 to $12.81**		$8.84 to $12.81	

In 2012, 2,104,176 options (2011: 1,667,402) were exercised at their contractual exercise prices for the Group. During the year, the corresponding weighted average market price of DBSH's shares was $14.08 (2011: $14.10).

Bank	2012 Unissued number of ordinary shares under outstanding options	2012 Weighted average exercise price ($)	2011 Unissued number of ordinary shares under outstanding options	2011 Weighted average exercise price ($)
Balance at 1 January	**4,810,649**	**11.57**	9,419,150	12.66
Movements during the year:				
- Exercised	**(1,518,839)**	**11.92**	(1,305,541)	11.55
- Forfeited/ Expired	**(866,789)**	**11.87**	(3,302,960)	14.54
Balance at 31 December	**2,425,021**	**11.23**	4,810,649	11.57
Additional information:				
Outstanding options exercisable at 31 December	**2,425,021**	**11.23**	4,810,649	11.57
Weighted average remaining contractual life of options outstanding at 31 December	**1.04 years**		1.44 years	
Range of exercise price of options outstanding at 31 December	**$8.84 to $12.81**		$8.84 to $12.81	

In 2012, 1,518,839 options (2011: 1,305,541) were exercised at their contractual exercise prices for the Bank. During the year, the corresponding weighted average market price of DBSH's shares was $14.06 (2011: $13.94).

40.3 DBSH Share Plan

Under the DBSH Share Plan (the Share Plan), DBSH's ordinary shares may be granted to Group executives who hold such rank as may be determined by the Committee appointed to administer the Share Plan from time to time. The awards could be performance-based and/or time-based.

Where time-based awards are granted, they will only vest after the satisfactory completion of time-based service conditions. Participants are awarded shares of DBSH, their equivalent cash value or a combination of both as part of their deferred bonus (at the discretion of the Committee).

A time-based award comprises two elements, namely, the main award and the "retention" award (previously known as "kicker" award). The shares comprised in the "retention" award constitute twenty percent of the shares comprised in the main award. Effective 2010, the deferral period for unvested shares was extended from a 3-year period to a 4-year period showing a more prudent risk management arrangement. Under the new vesting schedule, thirty-three percent of the shares comprised in the main award will vest two years after the date of grant. A further thirty-three percent of the shares comprised in the main award will vest three years after the date of grant. The remainder thirty-four percent of the shares comprised in the main award, together with the shares comprised in the "retention" award, will vest four years after the date of grant. For time-based awards, the fair value of the shares awarded are computed based on the market price of the ordinary shares at the time of the award and is amortised through the income statement over the vesting period. At each balance sheet date, the Group revises its estimates of the number of shares expected to vest based on non-market vesting conditions and the corresponding adjustments are made to the income statement.

The following table sets out the outstanding awards at the end of each reporting period and the movement during the year:

The Group		
Number of shares	**2012**	**2011**
Balance at 1 January	**11,595,571**	9,444,365
Granted	**6,002,356**	5,319,354
Vested	**(3,500,581)**	(2,932,204)
Forfeited	**(455,221)**	(235,944)
Balance at 31 December	**13,642,125**	11,595,571

The weighted average fair value of the shares granted during the year is $14.09 (2011: $14.40).

Bank		
Number of shares	**2012**	**2011**
Balance at 1 January	**9,974,850**	8,093,410
Granted	**4,663,460**	4,529,238
Vested	**(2,866,767)**	(2,485,174)
Forfeited / Others	**(780,186)**	(162,624)
Balance at 31 December	**10,991,357**	9,974,850

The weighted average fair value of the shares granted during the year is $14.09 (2011: $14.38).

Share based expenses are recognised as employee benefits, with the corresponding amount recharged by the ultimate holding company. Therefore, the share based compensation reserve has a nil balance.

40.4 DBSH Employee Share Plan

The DBSH Employee Share Plan (the ESP) caters to all employees of the Group who are not eligible to participate in the DBSH Share Option Plan, the DBSH Share Plan or other equivalent plans.

Under the ESP, eligible employees are awarded ordinary shares of DBSH, their equivalent cash value or a combination of both (at the discretion of the Committee), when time-based conditions are met. The ESP awards are granted at the absolute discretion of the Compensation and Management Development Committee.

Time-based awards were granted in the current and previous financial years. The time-based awards will only vest after the satisfactory completion of time-based service conditions. Similar to the DBSH Share

Plan, effective from the 2010 grant, shares will vest at thirty-three percent two years after the date of grant. A further thirty-three percent will vest three years after the date of grant and the remainder thirty-four percent four years after the date of grant. In specific cases where the award form part of an employee's annual performance remuneration, an additional "retention" award which constitute 20% of the shares given in the main award will be granted. The shares in the retention award will vest four years after the date of grant. The fair value of the shares awarded are computed based on the market price of the ordinary shares at the time of the award and is amortised through the income statement over the vesting period. At each balance sheet date, the Group revises its estimates of the number of shares expected to vest based on non-market vesting conditions and the corresponding adjustments are made to the income statement.

The following table sets out the outstanding awards at the end of each reporting period and the movement during the year:

	The Group	
Number of shares	**2012**	**2011**
Balance at 1 January	**846,050**	575,426
Granted	**639,213**	526,400
Vested	**(171,934)**	(154,009)
Forfeited	**(80,403)**	(101,767)
Balance at 31 December	**1,232,926**	846,050

The weighted average fair value of the shares granted during the year is $14.10 (2011: $14.48).

	Bank	
Number of shares	**2012**	**2011**
Balance at 1 January	**465,400**	299,598
Granted	**332,778**	300,600
Vested	**(77,730)**	(79,404)
Forfeited / Others	**(89,442)**	(55,394)
Balance at 31 December	**631,006**	465,400

The weighted average fair value of the shares granted during the year is $14.10 (2011: $14.48).

Share based expenses are recognised as employee benefits, with the corresponding amount recharged by the ultimate holding company. Therefore, the share based compensation reserve has a nil balance.

41 Related Party Transactions

41.1 Transactions between the Bank and its subsidiaries, including consolidated special purpose entities, which are related parties of the Bank, have been eliminated on consolidation and are disclosed in Notes 41.4 to 41.6.

41.2 During the financial year, the Group had banking transactions with related parties, consisting of associates, joint ventures and key management personnel of the Group. These included the taking of deposits and extension of credit card and other loan facilities. These transactions were made in the ordinary course of business and carried out at arms-length commercial terms, and are not material.

In addition, key management personnel received remuneration for services rendered during the financial year. Non-cash benefits including performance shares were also granted.

41.3 Total compensation and fees to key management personnel[(a)] are as follows:

	The Group		Bank	
In $ millions	**2012**	**2011**	**2012**	**2011**

-Special purpose entities	**-**	112
Total	**7,951**	4,094

\# Amount under $500,000

41.6 Loans and guarantees to related parties

Loans granted to subsidiaries amounted to $1,876 million (2011: $942 million) and will be settled in cash. There were no loans granted by subsidiaries to the Bank.

Guarantees granted to and from subsidiaries amounted to $1,193 million (2011: $542 million) and $13 million (2011: $52 million) respectively.

42 Fair Value of Financial Instruments

42.1 Valuation Process

The valuation processes used by the Group are governed by the Valuation, the Rates and the Reserves frameworks. These frameworks apply to financial assets and liabilities where mark-to-market or model valuation is required. The overall framework is endorsed by Group Market and Liquidity Risk Committee and Risk Executive Committee before approval by the Board Risk Management Committee (BRMC).

The Rates framework governs the daily revaluation of all financial assets and liabilities that are fair value measured, covering both market prices as well as model inputs. Financial assets and liabilities are marked directly using reliable and independent market prices or by using reliable and independent market parameters (as model inputs) in conjunction with a valuation model. Products with a liquid market or those traded via an exchange will fall under the former while most over-the-counter (OTC) exotic products will form the latter.

Valuation models go through an assurance process carried out by the Risk Management Group, independent of the model developers. This assurance process would review the underlying methodology including its logic and conceptual soundness together with the model inputs and outputs. Model assurances are conducted prior to implementation and subject to regular review or when there are significant changes arising from market or portfolio changes. Where necessary, the Group also imposes model reserves and other adjustments in determining fair value. Models are approved by the Group Market and Liquidity Risk Committee.

The majority of OTC derivatives are traded in active markets. Valuations are determined using generally accepted models (discounted cash flows, Black-Scholes model, interpolation techniques) based on quoted market prices for similar instruments or underlyings.

A process of independent price verification (IPV) is in place to establish the accuracy of the market parameters used when the marking is performed by the Front Office. The IPV process entails independent checks to compare traders' marks to independent sources such as broker/dealer sources or market consensus providers. The results of the IPV are reviewed by independent control functions on a monthly basis.

For illiquid complex financial instruments where mark-to-market is not possible, the Group will value these products using an approved valuation model. Prices and parameters used as inputs to the model or to any intermediate technique involving a transformation process must be derived from approved market reliable sources. Where possible, the inputs must be checked against multiple sources for reliability and accuracy. Reliance will be placed on the model assurance framework established by Risk Management Group for assurance of valuation models as fit for purpose.

The Group uses various market accepted benchmark interest rates such as LIBOR and Swap Offer Rates to determine the fair value of the financial instruments.

Where unobservable inputs are used in these models resulting in Level 3 classification, valuation adjustments or reserves will be taken for the purpose of adjusting for uncertainty in valuations. Valuation adjustment or reserve methodologies are used to substantiate the unobservable inputs and attempt to quantify the level of uncertainty in valuations. Such methodologies are governed by the Reserve Framework and require approval by Group Market and Liquidity Risk Committee.

The main valuation adjustments and reserves are described below:

Model and Parameter Uncertainty adjustments
Valuation uncertainties may occur during fair value measurement either due to uncertainties in the required input parameters or uncertainties in the modeling methods used in valuation process. In such situations, adjustments may be necessary to take these factors into account.

For example, where market data such as prices or rates for an instrument are no longer observable after an extended period of time, these inputs used to value the financial instruments may no longer be relevant in the current market conditions. In such situations, adjustments may be necessary to address the pricing uncertainty arising from the use of stale market data inputs.

Credit risk adjustment
Credit risk adjustment is incorporated into derivative valuations to reflect the impact on fair value of counterparty credit risk. Credit risk adjustment is based upon the creditworthiness of the counterparties, magnitude of the current or potential exposure on the underlying transactions, netting arrangements, collateral arrangements, and the maturity of the underlying transactions.

Day 1 Profit & Loss (P&L) reserve
In situations where the market for an instrument is not active and its fair value is established using a valuation model based on significant unobservable market parameters, Day 1 P&L reserve is utilised to defer the P&L arising from the difference between the transaction price and the model value. A market parameter is defined as being significant when its impact on the Day 1 P&L is greater than an internally determined threshold. The Day 1 P&L reserve is released to profit or loss as the parameters become observable or the transaction closed out or amortised over the duration of the transaction. At year end, the unamortised Day 1 P&L is not material.

Bid Offer adjustment
The Group often holds, at varying points in time, both long or short positions in financial instruments which are valued using mid market levels. Bid offer adjustments are then made to adjust net open position valuations to the respective bid or offer levels as appropriate.

42.2 Fair Value Hierarchy

The fair value hierarchy accords the highest level to observable inputs such as unadjusted quoted prices in active markets for identical assets or liabilities and the lowest level to unobservable inputs. The fair value measurement of each financial instrument is categorised in accordance to the same level of the fair value hierarchy as the input with the lowest level that is significant to the entire measurement. If unobservable inputs are deemed as significant, the financial instrument will be categorised as Level 3.

Financial instruments that are valued using quoted prices in active markets are classified as Level 1 of the valuation hierarchy. These would include government and sovereign securities, listed equities and corporate debt securities which are actively traded. Derivatives contracts which are traded in an active exchange market are also classified as Level 1 of the valuation hierarchy.

Where fair value is determined using quoted market prices in less active markets or quoted prices for similar assets and liabilities, such instruments are generally classified as Level 2. In cases where quoted prices are generally not available, the Group will determine the fair value based on valuation techniques that use market parameters as inputs, including but not limited to yield curves, volatilities and foreign exchange rates. The majority of valuation techniques employ only observable market data and so reliability of the fair value measurement is high. These would include corporate debt securities, repurchase, reverse repurchase agreements and most of the Group’s OTC derivatives.

The Group classifies financial instruments as Level 3 when there is reliance on unobservable inputs to the valuation model attributing to a significant contribution to the instrument value. These would include all input parameters which are derived from historical data such as correlation or volatilities as well as unquoted equity securities. The fair value of unquoted equity securities is measured in comparison with recent transactions in the equity of the company in question or comparable companies in similar industries. Level 3 inputs also include all quoted security prices that have not been updated for more than 3 months, quoted proxies in active markets for non-similar asset classes (e.g. bonds marked over credit default swap spreads), as well as prices/valuations that are obtained from counterparties. Valuation reserves or pricing adjustments where applicable will be used to converge to fair value.

The following table presents assets and liabilities measured at fair value, classified by level of the fair value hierarchies:

Negative fair values for financial derivatives	35	(2)	-	-	-	(2)	14	(27)	18

(a) Principally reflects settlement of Level 3 debt securities which were called back / matured during the year
(b) Principal amounts totalling $82 million are included within the fair value figures for structured investments
(c) Principally reflects transfers from Level 1 & 2 within the fair value hierarchy due to reduced transparency for selected bonds
(d) Principally reflects transfers to Level 1 & 2 within the fair value hierarchy due to availability of price quotes on the back of improved liquidity conditions
(e) Principally reflects transfers to Level 2 within the fair value hierarchy for credit derivatives due to availability of in-house pricing model within significant observable inputs
(f) Principally reflects transfers to Level 2 within the fair value hierarchy for interest rate derivatives due to correlation inputs having reduced impact on overall fair value of the instrument

Total fair value losses for the year included in profit or loss for Level 3 assets/(liabilities) held at the end of 2012 is $56 million (2011: $29 million).

Economic hedges entered into for Level 2 exposures may be classified within a different category (i.e. Level 1) and similarly, hedges entered for Level 3 exposures may also be classified within a different category (i.e. Level 1 and/ or Level 2). The effects are presented gross in the table.

The following table presents the changes in Level 3 instruments for the financial year ended 31 December for the Bank.

In $ millions 2012	Opening balance	Fair value gains or losses		Purc-hases	Issues	Settle-ment	Transfer in	Transfer out	Closing balance

Negative fair values for financial derivatives	35	(2)	-	-	-	(2)	14	(27)	18

(a) Principally reflects settlement of Level 3 debt securities which were matured / called back during the year
(b) Principal amounts totalling $82 million are included within the fair value figures for structured investments
(c) Principally reflects transfers to Level 1 & 2 within the fair value hierarchy due to availability of price quotes on the back of improved liquidity conditions
(d) Principally reflects transfers to Level 2 within the fair value hierarchy for interest rate derivatives due to correlation inputs having reduced impact on overall fair value of the instrument

Total fair value losses for the year included in profit or loss for Level 3 assets/(liabilities) held at the end of 2012 is $56 million (2011: $30 million).

Effect of changes in significant unobservable assumptions to reasonably possible alternatives

As at 31 December 2012, financial instruments measured with valuation techniques using significant unobservable inputs (Level 3) mainly include some of the following: private equity investments, corporate debt securities, equity, interest rate and credit derivatives and financial liabilities from structured product issuances.

In estimating significance, the Group performed a sensitivity analysis based on methodologies currently used for fair value adjustments. These adjustments reflect the values that the Group estimates are appropriate to adjust from the valuations produced to reflect for uncertainties in the inputs used. The methodologies used can be a statistical or other relevant approved techniques.

The movement in fair value arising from reasonably possible changes to the valuation assumptions is assessed as not significant.

42.3 Financial assets & liabilities not carried at fair value

For financial assets and liabilities not carried at fair value on the financial statements, the Group has ascertained that their fair values were not materially different from their carrying amounts at year-end.

For cash and balances with central banks, placements with banks, loans and advances to non-bank customers, as well as deposits of bank and non-bank customers, the basis of arriving at fair values is by discounting cash flows using the relevant market interest rates for the respective currency.

For investment debt securities and subordinated term debts issued, fair values are determined based on independent market quotes, where available. Where market prices are not available, fair values are estimated using discounted cash flow method.

For unquoted equities not carried at fair value, fair values have been estimated by reference to the net tangible asset backing of the investee. Unquoted equities of $228 million (2011: $134 million) for the Group, and $214 million (2011: $115 million) for the Bank, were stated at cost less accumulated impairment losses because the fair values cannot be reliably estimated using valuation techniques supported by observable market data. The Group intends to dispose of such instruments through trade sale.

The fair value of variable interest-bearing as well as short term financial instruments accounted for at amortised cost is assumed to be approximated by their carrying amounts.

43 Risk Governance

Under the Group's risk management framework, the Board of Directors, through the BRMC, sets risk appetite, oversees the establishment of robust enterprise-wide risk management policies and processes, and sets risk limits to guide risk-taking within the Group.

The Chief Risk Officer (CRO) has been appointed to oversee the risk management function. The CRO is a member of the Group Executive Committee and has a dual reporting line to the CEO and to the Board which is also responsible for the appointment, remuneration, resignation or dismissal of the CRO. Working closely with the established risk and business committees, the CRO is responsible for the following:

- Management of the risks in the Group including developing and maintaining systems and processes to identify, approve, measure, monitor, control and report risks;
- Engagement of senior management on material matters relating to the various types of risks and development of risk controls and mitigation processes;
- Ensuring the effectiveness of risk management and adherence to the risk appetite established by the Board.

To provide risk oversight, senior management committees are mandated to focus on specific risk areas. These oversight committees are the Risk Executive Committee, the Product Approval Committee, the Group Credit Risk Committee, the Group Credit Policy Committee, the Group Market and Liquidity Risk Committee, and the Group Operational Risk Committee. Other committees include Group Capital Committee as well as the Fair Dealing Committee.

The Risk Executive Committee is responsible for the oversight of various risks (including credit, market, liquidity, operational and reputational risks) and overall risk architecture, direction and priorities of the Group. It is also responsible for approval of core risk policies and allocation of risk limits.

44 Credit Risk

Credit risk is the risk of loss resulting from the failure of borrowers or counterparties to meet their debt or contractual obligations. Exposure to credit risks arises from lending, sales and trading as well as derivative activities. Lending exposures are typically represented by the notional value or principal amount of on-balance sheet financial instruments. Financial guarantees and standby letters of credit, which represent undertakings that the Group will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans even though they are of contingent nature. Documentary and commercial letters of credit, which are undertakings by the Group on behalf of a customer, are usually collateralised by the underlying shipments of goods to which they relate and therefore exhibit different risk characteristics from direct lending. Commitments to extend credit include unused portions of loan commitments, guarantees or letters of credit. The majority of unused commitments are contingent upon customers observing or meeting certain credit terms and conditions.

Credit Risk Governance and Organisation

The oversight committee for credit risk is the Group Credit Risk Committee. This committee serves as an executive forum for discussion on credit trends and all aspects of credit risk management, including the identification, measurement, monitoring, mitigation and control processes. It also provides oversight of credit risk committees that are established in the key markets in which the Group operates. This structure ensures that key credit management decisions are effectively cascaded to the appropriate country, business and functional units.

Credit Risk Management Framework and Credit Policies

The Credit Risk Management Framework, approved by the BRMC, defines credit risk and the scope of its application, establishes the dimensions of credit risk; and provides a consistent Group-wide framework for managing credit risk across the Group.

An enterprise-wide Core Credit Risk Policy sets forth the principles by which the Group conducts its credit risk management activities. The policy ensures consistency in credit risk underwriting across the Group, and provides guidance in the formulation of business-specific and/or location-specific credit policies. The Core Credit Risk Policy is considered and approved by the Risk Executive Committee based on recommendations from Group Credit Policy Committee. The business-specific and/or location-specific credit policies are established to provide greater details on the implementation of the credit principles within the Core Credit Risk Policy and are adapted to reflect different credit environments and portfolio risk profiles.

Senior management sets the overall direction and policy for managing credit risk at the enterprise level. In so doing, it directs the risk appetite and underwriting activities for various countries, industries and counterparties taking into account factors such as prevailing business and economic conditions.

Consumer Credit

Retail exposures comprise mainly residential mortgages, credit cards, auto loans and other unsecured loans. Retail exposures are typically managed on a portfolio basis and assessed based on credit scoring models supplemented by risk acceptance criteria.

Wholesale Credit

Wholesale exposures comprise sovereign, bank, corporate, corporate small business, specialised lending and securitisation exposures. Wholesale exposures are assessed using approved credit models, and reviewed and analysed by experienced credit risk managers taking into consideration the relevant credit risk factors. Credit extensions are proposed by the business unit and are approved by the credit risk function based on the business strategies determined by senior management.

Traded Products and Securities

Counterparty risk that may arise from traded products and securities is viewed similarly to loan exposures and included under the Group's overall lending limits to counterparties. Issuer Default Risk that may arise from traded products and securities are generally measured based on Jump To Default computations.

The Group actively monitors and manages its exposure to counterparties in OTC derivative trades to protect its balance sheet in the event of counterparty default. Counterparty risk exposures which may be materially and adversely affected by market risk events are identified, reviewed and acted upon by management and highlighted to the appropriate risk committees. In addition, the Group takes into account any strong relationship between the creditworthiness of a counterparty and the expected future replacement value of a relevant transaction (so called wrong-way risk) during the risk onboarding process. The current exposure method is used for calculating the Group's net credit exposure and regulatory capital for counterparty exposures, using the mark-to-market exposures with an appropriate add-on factor for potential future exposures.

Credit Monitoring and Control

Day-to-day monitoring of credit exposures, portfolio performance and the external environment that may have an impact on our credit risk profiles is key to our philosophy of effective credit risk management. Risk reporting on credit trends which may include industry analysis, early warning alerts and key weak credits is provided to the various credit committees and key strategies and action plans are formulated and tracked.

Credit control functions ensure that credit risks are being taken and maintained in compliance with Group-wide credit policies and guidelines. These functions ensure proper activation of approved limits, ensure appropriate endorsement of excesses and policy exceptions, and monitor compliance with credit standards and credit covenants established by management and regulators.

An independent credit risk review team conducts regular reviews of credit exposures and judgmental credit risk management processes. It also conducts independent validation of internal credit risk rating processes on an annual basis. These reviews provide senior management with objective and timely assessments of the effectiveness of credit risk management practices and ensure Group-wide policies, internal rating models and guidelines are being adopted consistently across different business units including relevant subsidiaries.

Credit Risk Mitigants

Collateral
Where possible, the Group takes collateral as a secondary recourse to the borrower. Collateral includes cash, marketable securities, properties, trade receivables, inventory and equipment and other physical and financial collateral. The Group may also take fixed and floating charges on assets of borrowers. It has put in place policies to determine the eligibility of collateral for credit risk mitigation which include requiring specific collaterals to meet minimum operational requirements in order to be considered as effective risk mitigants. Collateral taken for financial market operations is marked-to-market on a mutually agreed period with the respective counterparties.

Collateral taken for commercial banking is revalued periodically ranging from daily to annually, depending on the type of collateral. While real estate properties constitute the largest percentage of collateral assets, the Group generally considers the collateral assets to be diversified.

Other Risk Mitigating Factors

The Group also uses guarantees, credit derivatives and credit insurance as credit risk mitigants. While the Group may accept guarantees from any counterparty, it sets internal thresholds for considering guarantors to be eligible for credit risk mitigation. Credit derivatives are used as credit risk mitigating factors mainly in structured transactions and for financial market operations. Credit insurance is used for risk sharing in various products such as factoring. The Group further manages its credit exposure by entering into master netting arrangements with counterparties where it is appropriate and feasible to do so to mitigate counterparty risk. The credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are settled on a net basis.

The Group may also enter into CSA with counterparties for credit risk reduction and increased competitiveness. These are governed by internal guidelines with respect to the eligibility of various collaterals and the frequency of collateral calls.

Credit Concentration

The Group's risk management processes aim to ensure that an acceptable level of risk diversification is maintained across the Group on an ongoing basis. Limits are established and regularly monitored in respect of country exposures and major industry groups, as well as for single counterparty exposures. Control structures are in place to ensure that appropriate limits are in place, exposures are monitored against these limits, and appropriate actions are taken if limits are breached.

Stress Testing

Stress Testing forms an integral part of the Group's risk management process. Stress testing enables the bank to assess the impact of credit losses on capital adequacy and establish mitigation actions for possible significant losses arising from credit portfolios. The Group uses stress testing to identify segments which may come under pressure under specific scenarios for the purpose of managing these segments proactively. Stress Test scenarios are run in part to ensure that the Tier 1 capital level can withstand the impact of diverse and increasingly severe scenarios.

Comprehensive stress tests are conducted to assess the potential impact of various scenarios across a multitude of risk and business dimensions through macro and micro variables. These scenarios vary in impact from mild to severe and are assessed and agreed through formal governance structures. The Stress Testing program is deeply rooted in assessing the sensitivity of the portfolio to various risk parameters associated with the IRB Approach.

Stress testing governance spans across the organisation from the Board of Directors to line personnel who actively participate in the running of stress tests. Stress testing scenarios are derived and agreed across a broad spectrum of management and staff with senior management directing the development of scenarios. The stress testing program utilises internal and external data to generate results – multiple macroeconomic variables are used to assess scenario impact chief among them, real GDP growth, unemployment rate, asset prices and related variables.

Non-Performing Loans and Impairments

The Group classifies its credit facilities in accordance with MAS Notice 612: Credit Files, Grading and Provisioning, issued by the Monetary Authority of Singapore (MAS). These guidelines require the Group to categorise its credit portfolios according to its assessment of a borrower's ability to repay a credit facility from his normal sources of income. There are five categories of assets as follows:

Performing Assets

- Pass grade indicates that the timely repayment of the outstanding credit facilities is not in doubt.
- Special mention grade indicates that the credit facilities exhibit potential weaknesses that, if not corrected in a timely manner, may adversely affect future repayments and warrant close attention by the Group.

Classified or Non-Performing Assets

- Substandard grade indicates that the credit facilities exhibit definable weaknesses either in respect of business, cash flow or financial position of the borrower that may jeopardise repayment on existing terms.
- Doubtful grade indicates that the credit facilities exhibit severe weaknesses such that the prospect of full recovery of the outstanding credit facilities is questionable and the prospect of a loss is high, but the exact amount remains undeterminable.
- Loss grade indicates the amount of recovery is assessed to be insignificant.

The Group may also apply a split classification to any credit facility where appropriate. For instance, when a non-performing loan is partially secured, the portion covered by the amount realisable from a collateral may be classified as substandard while the unsecured portion of the loan is classified as doubtful or loss, as appropriate.

Restructured Non-Performing Assets

Credit facilities are classified as restructured assets when the Group grants concessions to a borrower because of deterioration in the financial position of the borrower or the inability of the borrower to meet the original repayment schedule. A restructured credit facility is classified into the appropriate non-performing grade depending on the assessment of the financial condition of the borrower and the ability of the borrower to repay based on the restructured terms. Such credit facilities are not returned to the performing status until there are reasonable grounds to conclude that the borrower will be able to service all future principal and interest payments on the credit facility in accordance with the restructured terms. The Group does not give forbearance as a policy but any waiver, indulgence or forbearance will be reviewed based on internal credit assessment on the merits of the case.

Repossessed Collateral

When required, the Group will take possession of the collateral it holds as securities and will dispose of them as soon as practicable, with the proceeds used to reduce the outstanding indebtedness. Repossessed collateral is classified in the balance sheet as other assets. The amount of such other assets for 2012 and 2011 were not material.

Transfer Risk

The principles and approach in the management of transfer risk are set out in the Group’s Country Risk Management Framework. The framework includes an internal country (and sovereign) risk rating system where the assessments are made independent of business decisions. Transfer risk limits are set in accordance to the bank’s risk appetite. Limits for non-strategic countries are set using a model-based approach. Limits for strategic countries may be allowed to exceed model generated limits, after examining country-specific strategic business considerations and the extent of potential loss versus the risk appetite. There are active discussions amongst the senior management and credit management in right-sizing cross-border exposures to take into account not only risks and rewards, but also whether such exposures are in line with the strategic intent of the Group.

44.1 Maximum exposure to credit risk

The following table shows the exposure to credit risk of on-balance sheet and off-balance sheet financial instruments, before taking into account any collateral held, other credit enhancements and netting arrangements. For on-balance sheet financial assets, the maximum credit exposure is the carrying amounts. For contingent liabilities, the maximum exposure to credit risk is the amount the Group would have to pay if the instrument is called upon. For undrawn facilities, the maximum exposure to credit risk is the full amount of the undrawn credit facilities granted to customers.

Credit exposure	**342,534**	330,605	**268,379**	262,954
Contingent liabilities and commitments (excluding operating lease and capital commitments)	**156,863**	137,200	**124,539**	104,858
Total credit exposure	**499,397**	467,805	**392,918**	367,812

The Group's exposures to credit risk, measured using the expected gross credit exposures that will arise upon a default of the end obligor are as shown in the annual Basel II Pillar 3 Disclosures in DBSH's annual report. These exposures, which include both on-balance sheet and off-balance sheet financial instruments, are shown without taking into account any collateral held or netting arrangements.

<u>Analysis of Collateral</u>

Whilst the Group's maximum exposure to credit risk is the carrying value of the assets or, in the case of off-balance sheet instruments, the amount guaranteed, committed, accepted or endorsed, the likely exposure may be lower due to offsetting collateral, credit guarantees and other actions taken to mitigate the Group's exposure.

The description of collateral for each class of financial asset is set out below:

Balances with central banks, Singapore Government securities and treasury bills, due from banks, financial assets at fair value through profit or loss and financial investments
Collateral is generally not sought for these assets.

Positive fair values for financial derivatives
The Group maintains collateral agreements and enters into master netting agreements with most of the counterparties for derivative transactions. Please refer to Note 39 for the impact of netting arrangements recognised for the computation of Capital Adequacy Ratio (CAR).

Advances to customers, contingent liabilities and commitments
Certain loans and advances to customers, contingent liabilities and commitments are typically collateralised to a substantial extent. In particular, residential mortgage exposures are generally fully secured by residential properties. Income-producing real estate, which is a sub-set of the Specialised Lending exposure, are fully secured by the underlying assets financed.

The extent to which credit exposures are covered by Basel II-eligible collateral, besides real estate, after the application of the requisite regulatory hair-cuts, is shown in the Group's Basel II Pillar 3 Disclosures. The amounts are a sub-set of the actual collateral arrangements entered into by the Group as Basel II imposes strict legal and operational standards before collateral can be admitted as credit risk mitigants. As a result, certain collateral arrangements which do not meet its criteria will not be included. Certain collateral types which are not permitted as credit risk mitigants for credit exposures under the Standardised Approach are also excluded.
.

44.2 Loans and advances to customers

Loans and advances to customers are summarised as follows:

In $ millions	The Group 2012	The Group 2011	Bank 2012	Bank 2011
Loans and advances to customers				
Performing Loans				
- Neither past due nor impaired (i)	**210,541**	194,594	**160,969**	150,329
- Past due but not impaired (ii)	**745**	633	**240**	158
Non-Performing Loans				
- Impaired (iii)	**2,542**	2,600	**1,934**	2,000
Total gross loans (Note 19)	**213,828**	197,827	**163,143**	152,487

(i) Loans and advances neither past due nor impaired, analysed by loan grading and industry

The credit quality of the portfolio of loans and advances that are neither past due nor impaired can be assessed by reference to the loan gradings in MAS Notice to Banks No. 612, "Credit Files, Grading and Provisioning" are as follows:

45 Market Risk

45.1 Market Risk

Market risk affects the economic values of financial instruments held by the Group, and arises from changes in interest rates, foreign exchange rates, equity prices, commodity prices, credit spreads and changes in the correlations and volatilities of these risk factors.

The Group manages market risk in the course of market-making, structuring and packaging treasury products for investors and other clients, as well as to benefit from market opportunities.

Market Risk Governance and Organisation

The oversight committee for market risk is the Group Market & Liquidity Risk Committee. This Committee oversees the Group's market risk management infrastructure (comprising frameworks, policies, risk methodologies, processes and systems), sets market risk limits and provides enterprise-wide oversight of all market risks and their management. RMG Market & Liquidity Risk, comprising risk control, risk analytics, production and reporting teams, is the independent market risk management function that reports to the CRO and is responsible for day-to-day market risk monitoring, control and analysis.

Market Risk Framework, Policies and Measures

The Group's market risk framework sets out the overall approach towards market risk management and this is supplemented with policies which articulate the standards relating to limit setting, independent valuation model validation, risk monitoring and valuation.

The Group's market risk methodology uses a historical simulation approach to forecast the Group's potential loss distribution arising from market risk in the trading and banking books. The principal market risk appetite measures used by the Group are Tail Value-at-Risk (TVaR) and stress loss. The Group also calculates Value-at-Risk (VaR) at 99% confidence level using the same potential loss distribution and holding period used for TVaR.

TVaR captures losses beyond the chosen confidence interval from the potential loss distribution and hence provides additional information to VaR. TVaR is calculated using a one-day time horizon and a 95% confidence interval. The risk factor scenarios are aligned to parameters and market data that are used for valuation. The scenarios are maintained in the risk system and are used to compute TVaR at Group level, and for each business unit and location. The TVaR is supplemented by risk control measures, such as sensitivities to risk factors as well as loss triggers for management action.

VaR on the other hand facilitates backtesting and comparability at the industry level. Regular backtesting of daily profit and loss against the VaR forecast is carried out for the trading book as a whole and at the subportfolio level.

Although both VaR and TVaR provide valuable insights, no statistical measure can capture all aspects of market risk. Historical simulation VaR and TVaR are based on the assumption that historical rate and price movements will be a good predictor of the future. To supplement VaR and TVaR, regular stress testing is carried out using a combination of historical and hypothetical scenarios, to monitor the Group's vulnerability to unexpected and extreme shocks.

Trading book and Banking book

The trading book definition is based on the firm's investment intent. Issuer risk in the trading book is governed by credit spread sensitivity of one basis point shift (CSPV01) and Jump-to-default measurements.

The Group also manages banking book interest rate risk arising from mismatches in the interest rate profile of assets, liabilities and capital instruments (and associated hedges), including basis risk arising from different interest rate benchmarks, interest rate re-pricing risk, yield curve risks and embedded optionality. Behavioural assumptions are applied in managing the interest rate risk of banking book deposits with indeterminate maturities. To manage its balance sheet and revenues, the Group deploys funds in debt securities, equities and funds or in the interbank money market.

The Group has a comprehensive risk appetite framework for all types of market risk across both the trading and banking books, (including structural foreign exchange risk arising from the Group's strategic investments). The Group level total TVaR associated with this framework is tabulated below, showing the period-end, average, high and low TVaR (at a 95% confidence level over a one-day holding period).

		The Group 1 Jan 2012 to 31 Dec 2012		
In $ millions	**As at 31 Dec 2012**	**Average**	**High**	**Low**
Total	**40**	**52**	**62**	**38**

		The Group 1 Jan 2011 to 31 Dec 2011

Total	44	41	48	35

		Bank 1 Jan 2012 to 31 Dec 2012		
In $ millions	**As at 31 Dec 2012**	**Average**	**High**	**Low**
Total	**35**	**48**	**58**	**32**

		Bank 1 Jan 2011 to 31 Dec 2011		
In $ millions	**As at 31 Dec 2011**	**Average**	**High**	**Low**
Total	41	39	43	33

The Group's interest rate trading business is the major contributor of trading book risk and the significant exposures are in SGD and USD.

The following table shows the period-end, average, high and low VaR (at a 99% confidence level over a one-day holding period) for trading book market risk:

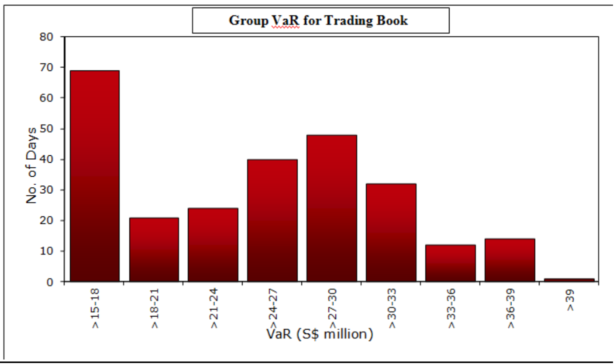
		The Group 1 Jan 2012 to 31 Dec 2012		
In $ millions	**As at 31 Dec 2012**	**Average**	**High**	**Low**
Total	**17**	**25**	**40**	**15**

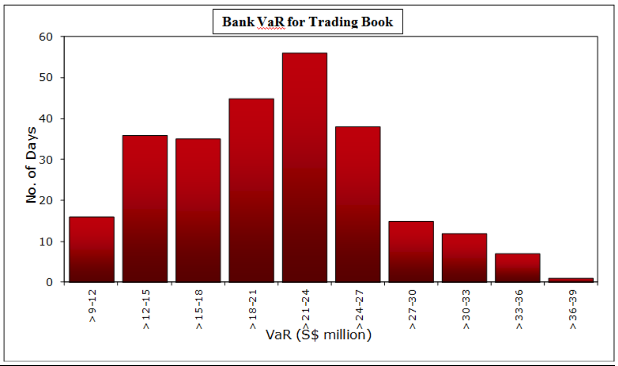
		The Group 1 Jan 2011 to 31 Dec 2011		
In $ millions	**As at 31 Dec 2011**	**Average**	**High**	**Low**
Total	37	27	42	14

		Bank 1 Jan 2012 to 31 Dec 2012		
In $ millions	**As at 31 Dec 2012**	**Average**	**High**	**Low**
Total	**11**	**21**	**36**	**10**

		Bank 1 Jan 2011 to 31 Dec 2011		
In $ millions	**As at 31 Dec 2011**	**Average**	**High**	**Low**
Total	32	24	34	13

The charts below (unaudited) provide the range of VaR for the trading portfolio for the period from 1 January 2012 to 31 December 2012:





Back-testing is a procedure used to verify the predictive power of the VaR model involving comparison of daily profits and losses adjusted with the estimates from the VaR model.

In the back-testing for the period from 1 January 2012 to 31 December 2012, there were no backtesting exceptions (2011: 5 exceptions) for the Group. There were no backtesting exceptions (2011: 4 exceptions) for the Bank.

For the banking book market risk the main risk drivers are SGD and USD interest rate positions. The economic value impact of changes in interest rates is simulated under various assumptions for the banking book.

For the Group, the simulated economic value changes are negative $449 million and $848 million (2011: negative $243 million and $433 million) based on parallel shocks to all yield curves of 100 basis points and 200 basis points respectively.

For the Bank, the simulated economic value changes are negative $433 million and $815 million (2011: negative $219 million and $383 million) based on parallel shocks to all yield curves of 100 basis points and 200 basis points respectively.

The reported figures are based on the worst case of an upward and downward parallel shift in the yield curves.

46 Liquidity Risk

Funding liquidity risk (or liquidity risk) is the risk arising from an inability to meet obligations when they become due. The Group's liquidity obligations arise from withdrawals of deposits, repayments of borrowed funds at maturity, and commitments to extend credit and support working capital needs. The Group seeks to manage its liquidity in a manner that ensures that its liquidity obligations would continue to be honoured under normal as well as adverse circumstances.

Liquidity Risk Governance and Organisation

The oversight committee for liquidity risk is the Group Market & Liquidity Risk Committee. This Committee oversees the Group's liquidity risk management infrastructure (comprising frameworks, policies, risk methodologies, processes and systems), sets liquidity risk limits and provides enterprise-wide oversight of all liquidity risks and their management. RMG Market & Liquidity Risk, comprising risk control, risk analytics, production and reporting teams, is the independent liquidity risk management function that reports to the CRO and is responsible for day-to-day liquidity risk monitoring, control and analysis.

Liquidity Risk Framework, Policies and Measures

In practice, the Group employs a range of strategies to manage its liquidity. These include maintaining an adequate counterbalancing capacity (comprising liquid assets, the capacity to borrow from the money markets as well as forms of managerial interventions that improve liquidity) to address potential cashflow shortfalls, maintaining diversified sources of liquidity, and having robust internal control processes. In the event of a potential or actual crisis, the Group has in place a set of liquidity contingency and recovery plans to ensure that decisive actions are taken to ensure the Group maintain adequate liquidity.

The primary measure used to manage liquidity within the appetite defined by the Board is the maturity mismatch analysis. The analysis is performed on a regular basis under normal and adverse scenarios, and assesses the adequacy of the counterbalancing capacity to fund or mitigate any cashflow shortfalls that may occur as forecasted in the cashflow movements across successive time bands. To ensure that liquidity is managed in line with the appetite statement, core parameters underpinning the performance of the analysis, such as the types of scenarios, the survival period and the minimum level of liquid assets, are pre-specified for monitoring and control at the Group. Any occurrences of forecasted shortfalls that cannot be covered by the counterbalancing capacity would be escalated to the relevant internal risk committees for deliberation and actions.

To complement the maturity mismatch analysis in its objective to manage liquidity within the appetite statement, liquidity risk control measures, such as liquidity-related ratios and balance sheet analysis, are performed for more granular monitoring and control over the liquidity profile of the Group and across locations.

The table below analyses assets and liabilities of the Group at 31 December based on the remaining period as at balance sheet date to the contractual maturity date:

(c) Other liabilities include bills payable, other debt securities in issue, current and deferred tax liabilities, other liabilities and due to holding company, subsidiaries and special purpose entities
(d) Positive indicates inflow and negative indicates outflow of funds

The balances in the above table will not agree with the balances in the balance sheet as the table incorporates all cash flows, on an undiscounted basis, relating to both principal as well as future interest payments.

Customer assets and liabilities (including non-maturing savings/current deposits) are represented on a contractual basis or in a period when it can legally be withdrawn. On a behavioural basis, for liquidity risk analysis the assets and liabilities cash flows may differ from contractual basis.

46.1 Derivatives settled on a gross basis

The table below shows the Group and Bank's derivative financial instruments in the period where they mature based on the remaining period to contractual maturity date as at the balance sheet date. The amounts disclosed in the table are the contractual undiscounted cash flows on a gross settlement basis.

	The Group					
In $ millions	**Less than 7 days**	**1 week to 1 month**	**1 to 3 months**	**3 to 12 months**	**More than 1 year**	**Total**

46.2 Contingent liabilities and commitments

The tables below show the Group and Bank's contingent liabilities and commitments in the period where they expire based on the remaining period to contractual maturity date as at the balance sheet date:

	The Group				
In $ millions	**Less than 1 year**	**1 to 3 years**	**3 to 5 Years**	**Over 5 years**	**Total**
2012					
Guarantees, endorsements and other contingent items	**21,059**	**-**	**-**	**-**	**21,059**
Undrawn loan commitments[(a)] and other facilities	**126,127**	**3,656**	**3,744**	**2,277**	**135,804**
Operating lease commitments	**211**	**301**	**255**	**108**	**875**
Capital commitments	**17**	**2**	**-**	**-**	**19**
Total	**147,414**	**3,959**	**3,999**	**2,385**	**157,757**
2011					
Guarantees, endorsements and other contingent items	20,789	-	-	-	20,789
Undrawn loan commitments[(a)] and other facilities	109,321	3,255	3,333	502	116,411
Operating lease commitments	149	300	241	191	881
Capital commitments	30	3	-	-	33
Total	130,289	3,558	3,574	693	138,114

In $ millions	Less than 1 year	1 to 3 years	Bank 3 to 5 Years	Over 5 years	Total
2012					
Guarantees, endorsements and other contingent items	**17,134**	**-**	**-**	**-**	**17,134**
Undrawn loan commitments[(a)] and other facilities	**99,789**	**3,443**	**3,460**	**713**	**107,405**
Operating lease commitments	**111**	**180**	**166**	**90**	**547**
Capital commitments	**4**	**1**	**-**	**-**	**5**
Total	**117,038**	**3,624**	**3,626**	**803**	**125,091**
2011					
Guarantees, endorsements and other contingent items	15,851	-	-	-	15,851
Undrawn loan commitments[(a)] and other facilities	82,451	3,018	3,152	386	89,007
Operating lease commitments	78	204	207	167	656
Capital commitments	17	3	-	-	20
Total	98,397	3,225	3,359	553	105,534

(a) Undrawn loan commitments are recognised at activation stage and include commitments which are unconditionally cancellable by the Group and Bank

The Group expects that not all of the contingent liabilities and undrawn loan commitments will be drawn before expiry.

46.3 Liquid assets

The table below shows the Group's liquid assets by instrument and counterparty based on the carrying value as at the balance sheet date. The composition of the pool of liquid assets is internally defined under the guiding principle that the assets should be readily available and can be easily monetised to meet liquidity shortfalls under times of stress.

Liquid assets are maintained across key locations to ensure that each location is able to manage liquidity stresses on a standalone basis. The main portion of the Group's liquid assets is centrally maintained under the Bank to support liquidity needs in smaller overseas subsidiaries and branches.

The Group **In $million**	**2012**
Cash and holdings at central banks[(a)]	**2,779**
Deposits in other banks available overnight	**2,428**
Securities issued or guaranteed by sovereigns and central banks[(b)]	**36,370**
Other corporate securities[(b) (c)]	**16,753**
Total Liquid Assets	**58,330**

(a) Holdings at central banks consist only of unrestricted balances available overnight
(b) Securities are based on market value, excluding pledged bonds and including collateral received in reverse repo transactions
(c) Other corporate securities consist of corporate bonds and equities that are internally assessed to be liquid

Bank **In $million**	**2012**
Cash and holdings at central banks[(a)]	**946**
Deposits in other banks available overnight	**1,963**
Securities issued or guaranteed by sovereigns and central banks[(b)]	**30,711**
Other corporate securities[(b) (c)]	**15,008**
Total Liquid Assets	**48,628**

(a) Holdings at central banks consist only of unrestricted balances available overnight
(b) Securities are based on market value, excluding pledged bonds and including collateral received in reverse repo transactions
(c) Other corporate securities consist of corporate bonds and equities that are internally assessed to be liquid

46.4 Behavioural profiling

For the purpose of liquidity risk management, the Group actively monitors and manages its liquidity profile within a 1-year period. A conservative view is adopted in the behavioural profiling of assets, liabilities and off-balance sheet commitments that have exhibited cash flow patterns that differ significantly from the actual contractual maturity profile. Examples where behavioural profiling is applied include the profiling of run-offs on deposits and the rate of draw downs on committed facilities. Assumptions made in behavioural profiling are subject to the governance of the Group internal risk committees.

The table below shows the Group's behavioural net and cumulative maturity mismatch between assets and liabilities over a 1-year period under a normal scenario without incorporating growth projections:

The Group In $ millions[(a)]	Less than 7 days	1 week to 1 month	1 to 3 months	3 to 6 months	6 months to 1 year
2012					
Net liquidity mismatch	**18,190**	**(6,941)**	**2,199**	**8,134**	**2,321**
Cumulative mismatch	**18,190**	**11,249**	**13,448**	**21,582**	**23,903**
2011					
Net liquidity mismatch	15,272	(1,120)	9,694	4,586	2,670
Cumulative mismatch	15,272	14,152	23,846	28,432	31,102

(a) Positive indicates a position of liquidity surplus. Negative indicates a liquidity shortfall that has to be funded

As the behavioural assumptions used to determine the maturity mismatch between assets and liabilities are updated from time to time, the information presented above is not directly comparable across past balance sheet dates.

47 Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events, including legal risk, but does not include strategic or reputational risk which are managed separately under other governance processes. Examples of operational risk include processing errors, fraudulent acts, inappropriate behavior of staff, vendors' misperformance, system failure and natural disasters. Operational risk is inherent in most of the Group's businesses and activities. Unlike credit or market risk, operational risk is normally a consequence of doing business and it is difficult, at times, to fully identify the sources of operational risk and effectively measure this risk.

The goal is to keep operational risk at appropriate levels, taking into account the markets we operate in, the characteristics of our businesses as well as the competitive and regulatory environment we are subject to.

Operational Risk Governance and Organisation

The Group's operational risk governance structure includes the three lines of defence; the business/support management, as first line of defence and supported by their unit operational risk managers, is primarily responsible for managing operational risk. They are challenged and supported by corporate oversight functions (such as Risk Management Group (RMG), Group Compliance) as second line of defence. RMG Operational Risk is responsible for the establishment and maintenance of the operational risk management framework and tools as well as monitoring and reporting of relevant operational risk issues to senior management and Group BRMC. Group Audit, as third line of defence, provides assurance of the effectiveness of the framework including validating and challenging the adequacy and effectiveness of processes and organizational controls.

The Group Operational Risk Committee oversees the Group's operational risk management infrastructure, including the framework, policies, processes, information, methodologies and systems. The members include RMG Operational Risk and representatives from the key business and support units. The Group Operational Risk Committee also performs regular review of the operational risk profiles of the Group, and endorses and recommends corporate operational risk policies to be approved by senior management.

To enhance the level of accountability, consistency and sustainability in business controls, key business units have established their risk and control forums. Providing regional oversight of all key risks arising in the units' activities including end-to-end process, the forums focus on the identification, monitoring and resolution of control issues.

Operational Risk Management Framework, Policies and Tools

The Operational Risk Management Framework (the Framework), approved by the BRMC, has been developed with the objective to ensure that operational risks within the Group are identified, monitored, managed and reported in a structured, systematic and consistent manner.

To manage and control operational risk, the Framework encompasses various tools including control self-assessment, operational risk event management and key risk indicators monitoring. Control self-assessment is used by each business or support unit to identify key operational risk and assess the degree of effectiveness of the internal controls. For those control issues identified, the units are responsible to develop action plans and track the timely resolution of these issues. Operational risk events are classified in accordance with Basel standards; such events, including any significant incidents that may impact the Group's reputation, are required to be reported based on certain established thresholds. Key risk indicators with pre-defined escalation triggers are employed to facilitate risk monitoring in a forward looking manner.

The Group has implemented a system that supports multiple operational risk management processes and tools including operational risk event reporting, control self-assessment, key risk indicators, tracking of issues or action plans and operational risk reporting.

A key component of the Framework is a set of Core Operational Risk Standards which provides guidance on the baseline controls to ensure a controlled and sound operating environment. Each new product or service introduced or outsourcing initiative is subject to a risk review and sign-off process where relevant risks are identified and assessed by departments independent of the risk-taking unit proposing the product or service. Variations of existing products or services and outsourcing initiatives are also subject to a similar process.

Compliance risk is viewed as the risk of impairment to the Group's ability to successfully conduct our business as a result of any failure to comply with or implement any applicable regulatory requirement, industry code or standard of professional conduct. To address compliance risk, the Group strongly believes in the need to inculcate a strong compliance culture in our employees, our mindset and DNA, and in our processes and systems. The Group aims to comply with the letter and spirit of the laws, regulatory standards and environment in which we operate.

The Group has a Fraud Management Policy which establishes minimum standards for our businesses and functional units to prevent, detect, investigate and remediate against fraud and related events. This Policy also establishes the components, key roles and the framework of the Fraud Management Programme through which the standards are to be implemented on a unit and geographical level. These standards aim to provide end-to-end management of fraud and related issues for the Group.

The Group Anti Money Laundering and Countering the Financing of Terrorism Policy establishes minimum standards for our business and functional units to mitigate and manage actual and/or potential exposure of the Group to money laundering, terrorist financing, corruption, or other illicit financial activity. The Policy also establishes accountabilities for the protection of the assets and reputation of the Group and the interests of our customers and shareholders.

Information Technology (IT) risk is managed in accordance to an IT Risk Management Framework (which covers risk governance, communication, monitoring, assessment, mitigation and acceptance), supported by a set of IT Policies & Standards, Control processes and risk mitigation programs.

Major operational risk mitigation programmes include Business Continuity Management and Global Insurance Programme. A robust crisis management and business continuity management program is in place within the Group to oversee the continuity of essential business services during unforeseen events. Types of incidents being managed include technology incidents having enterprise-wide impact on essential banking services, natural disasters with wide geographical area impact, safety-at-risk incidents e.g. terrorism and other events leading to significant business disruption. Senior management provides an attestation to the Group BRMC on an annual basis including the state of business continuity readiness, extent of alignment to regulatory guidelines and disclosure of residual risks.

To mitigate losses from specific unexpected and significant event risks, the Group purchases group-wide insurance policies, under the Global Insurance Programme, from third-party insurers. These policies cover fraud and civil liability, property damage and general liability and directors' and officers' liability.

48 Capital Management

The Group's capital management objectives are to diversify its sources of capital, to allocate capital efficiently, guided by the need to maintain a prudent relationship between available capital and the risks of its underlying businesses, and to meet the expectations of key constituencies, including investors, regulators and rating agencies. The Group has complied with all prescribed regulatory capital adequacy ratios.

The capital management process, which is under the oversight of the Capital Committee, includes periodic reviews of both the demand for and supply of capital across the Group. Overseas subsidiaries and non-banking subsidiaries of the Group may be required to comply with country-specific and industry-specific capital requirements depending on the jurisdiction and industry in which they operate, and are allocated capital accordingly to ensure regulatory compliance. Quarterly updates on the Group's capital position are provided to the Board of Directors.

The Group is subject to the capital adequacy requirements set out in the Monetary Authority of Singapore's Notice to Banks No. 637 (Notice on Risk Based Capital Adequacy Requirements for Banks incorporated in Singapore), which effects the Basel Committee on Banking Supervision's capital adequacy framework in Singapore.

49 Segment Reporting

49.1 Business segment reporting

The business segment results are prepared based on the Group's internal management which reflects the organisation management reporting structure. As the activities of the Group are highly integrated, internal allocation has been made in preparing the segment information. Amounts for each business segment are shown after the allocation of certain centralised costs, funding income and the application of transfer pricing, where appropriate. Transactions between segments are recorded within the segment as if they are third party transactions and are eliminated on consolidation.

The various business segments are described below:

Consumer Banking/Wealth Management
Consumer Banking/Wealth Management provides individual customers with a diverse range of banking and related financial services. The products and services available to customers include current and savings accounts, fixed deposits, loans and home finance, cards, payments, investment and insurance products.

Institutional Banking
Institutional Banking provides financial services and products to institutional clients including bank and non-bank financial institutions, government linked companies, large corporates and small and medium-sized businesses. The business focuses on broadening and deepening customer relationships. Products and services comprise the full range of credit facilities from short term working capital financing to specialised lending. It also provides global transactional services such as cash management, trade finance and securities and fiduciary services; treasury and markets products; corporate finance and advisory banking as well as capital markets solutions. In addition, Institutional Banking includes DBS Vickers Securities, which provides equities and derivatives brokerage services, and Islamic Bank of Asia.

Treasury
Treasury provides treasury services to corporations, institutional and private investors, financial institutions and other market participants. It is primarily involved in sales, structuring, market making, and trading across a broad range of financial products including foreign exchange, interest rate, debt, credit, equity and other structured derivatives. Income from these financial products and services offered to the customer of other business segments, such as Consumer Banking/Wealth Management and Institutional Banking, is reflected in the respective segments. Treasury is also responsible for managing surplus deposits relative to approved benchmarks.

Others
Others encompasses a range of activities from corporate decisions and income and expenses not attributed to the business segments, including capital and balance sheet management, funding and liquidity.

During the year, no one group of related customers as defined under banking regulations accounted for more than 10% of the Group's and Bank's revenues.

The following table analyses the results, total assets and total liabilities of the Group by business segments:

In $ millions	Consumer Banking/Wealth Management	Institutional Banking	Treasury	Others	Total
2012

49.2 Geographical segment reporting

Income and net profit attributable to shareholders (Net profit) are based on the country in which the transactions are booked. Total assets are shown by geographical area in which the assets are booked. It would not be materially different if total assets shown are based on the country in which the counterparty or assets are located. The total assets, income and net profit are stated after elimination of inter-group assets and revenues.

Directors' Report

The Directors are pleased to submit their report to the Member together with the audited consolidated financial statements of DBS Bank Ltd (the Bank) and its subsidiaries (the Group) and the financial statements of the Bank for the financial year ended 31 December 2012, which have been prepared in accordance with the provisions of the Singapore Companies Act and Singapore Financial Reporting Standards, as modified by the requirements of Notice to Banks No. 612 “Credit Files, Grading and Provisioning” issued by the Monetary Authority of Singapore.

Board of Directors

The Directors in office at the date of this report are:

Peter Seah Lim Huat	-	Chairman
Piyush Gupta	-	Chief Executive Officer
Bart Joseph Broadman		
Christopher Cheng Wai Chee		
Euleen Goh Yiu Kiang		
Ho Tian Yee		
Nihal Vijaya Devadas Kaviratne CBE		
Andre Sekulic	-	(Appointed 26 April 2012)
Danny Teoh Leong Kay		
Woo Foong Pheng (Mrs Ow Foong Pheng)	-	(Appointed 26 April 2012)

Dr Christopher Cheng Wai Chee, Ms Euleen Goh Yiu Kiang and Mr Danny Teoh Leong Kay shall retire in accordance with Article 95 of the Bank’s Articles of Association at the forthcoming annual general meeting (AGM). Ms Euleen Goh and Mr Danny Teoh will be offering themselves for re-election. Dr Christopher Cheng shall not be standing for re-election.

Mrs Ow Foong Pheng and Mr Andre Sekulic shall retire in accordance with Article 74 of the Bank's Articles of Association at the forthcoming AGM, and will offer themselves for re-election.

Arrangements to enable Directors to acquire shares or debentures

Neither at the end of nor at any time during the financial year, was the Bank a party to any arrangement, the object of which is to enable the directors to acquire benefits through the acquisition of shares in or debentures of the Bank or any other body corporate, save as disclosed in this report.

Directors' interest in shares or debentures

The following directors, who held office at the end of the financial year, had, according to the register of directors' shareholdings required to be kept under Section 164 of the Companies Act, an interest in shares of the Bank and related corporations as stated below:

	Holdings in which Directors have a direct interest		Holdings in which Directors are deemed to have an interest	
	As at 31 Dec 2012	As at 31 Dec 2011 (or date of appointment if later)	As at 31 Dec 2012	As at 31 Dec 2011 (or date of appointment if later)

Danny Teoh	2,000	2,000	-	-

(1) These non-executive directors received 30% of their directors' fees for acting as directors of DBSH in 2011, in the form of time-based share awards

(2) Mr Gupta's share awards form part of his remuneration. Details of the DBSH Share Plan are set out in Note 40 of Notes to the 2012 Group's financial statements

There was no change in any of the above-mentioned interests between the end of the financial year and 21 January 2013.

Directors' contractual benefits

Since the end of the previous financial year, no director has received or has become entitled to receive a benefit under a contract which is required to be disclosed by Section 201(8) of the Singapore Companies Act save as disclosed in this report or in the financial statements of the Bank and the Group.

DBSH Share Option Plan

Particulars of the share options granted under the Option Plan in 2002, 2003, 2004 and 2005 have been set out in the Directors' Reports for the years ended 31 December 2002, 2003, 2004 and 2005 respectively. No grants have been made under the Option Plan since 2006.

The movements of the unissued ordinary shares of DBSH in outstanding DBSH options granted under the Option Plan were as follows:

DBSH Options	Number of unissued ordinary shares	During the year		Number of unissued ordinary shares	Exercise price per share	Expiry date
	1 January 2012	Exercised	Forfeited/Expired	31 December 2012		
March 2002	1,515,624	1,146,144	369,480	-	$12.53	28 March 2012
August 2002	76,164	76,164	-	-	$10.43	16 August 2012
December 2002	11,763	11,763	-	-	$9.75	18 December 2012
February 2003	1,549,646	430,887	352	1,118,407	$8.84	24 February 2013
March 2004	1,778,668	357,795	17,219	1,403,654	$12.53	02 March 2014
March 2005	838,060	81,423	33,286	723,351	$12.81	01 March 2015
	5,769,925	2,104,176	420,337	3,245,412		

The DBSH Share Option Plan has expired on 19 June 2009 and it was not extended or replaced. The termination of the DBSH Share Option Plan will not affect the rights of holders of any outstanding existing options. Therefore, no further options were granted by DBSH during the financial year.

The persons to whom the DBSH options have been granted do not have any right to participate by virtue of the DBSH options in any share issue of any other company.

DBSH Share Plan

During the financial year, time-based awards in respect of an aggregate of 6,002,356 ordinary shares were granted pursuant to the DBSH Share Plan, to selected employees of the Group. This included 329,040 ordinary shares comprised in awards granted to director Mr Piyush Gupta, which formed part of his remuneration. During the financial year, non-executive directors received an aggregate of 55,181 ordinary shares comprised in time-based awards, which formed part of their directors' fees for acting as directors of DBSH. Details are set out below.

Directors of the Bank	Share awards granted during the financial year under review	Share awards vested during the financial year under review
Peter Seah[2]	22,465	-
Piyush Gupta	329,040[1]	61,020
Bart Broadman[2]	4,841	-
Christopher Cheng[2]	5,568	-
Euleen Goh[2]	8,705	-
Ho Tian Yee[2]	2,960	-
Nihal Kaviratne CBE[2]	4,008	-
Andre Sekulic[3]	-	-
Danny Teoh[2]	6,634	-
Ow Foong Pheng[3]	-	-

(1) Mr Gupta's awards formed part of his remuneration for 2011
(2) The awards of these non-executive directors formed part of their directors' fees for acting as directors of DBSH in 2011
(3) As Mr Sekulic and Mrs Ow were appointed on 26 April 2012, they did not receive directors' fees for 2011

Information on the DBSH Share Plan is as follows:

(i) Awards over DBSH's ordinary shares may be granted to Group executives who hold such rank as may be determined by the Compensation and Management Development Committee of DBSH from time to time. Awards may also be granted to (*inter alia*) executives of associated companies of the Bank who hold such rank as may be determined by the Compensation and Management Development Committee from time to time, and non-executive directors of DBSH.

The participants of the DBSH Share Plan shall not be eligible to participate in the DBSH Employee Share Plan or other equivalent plans.

(ii) Where time-based awards are granted, participants are awarded ordinary shares of DBSH, their equivalent cash value or a combination of both as part of their deferred bonus, at the end of the prescribed vesting periods. Awards are granted under the DBSH Share Plan at the absolute discretion of the Compensation and Management Development Committee.

(iii) The DBSH Share Plan shall continue to be in force at the discretion of the Compensation and Management Development Committee, subject to a maximum period of ten years. At an Extraordinary General Meeting of DBSH held on 8 April 2009, the DBSH Share Plan was extended for another ten years, from 18 September 2009 to 17 September 2019, provided always that the DBSH Share Plan may continue beyond the above stipulated period with the approval of the shareholders of DBSH by ordinary resolution in general meeting and of any relevant authorities which may then be required.

(iv) Awards under the DBSH Share Plan may be granted at any time in the course of a financial year, and may lapse by reason of cessation of service of the participant, or the retirement, redundancy, ill health, injury, disability, death, bankruptcy or misconduct of the participant, or by reason of the participant, being a non-executive director, ceasing to be a director, or in the event of a take-over, winding up or reconstruction of DBSH.

(v) Subject to the prevailing legislation and the rules of the Singapore Exchange, DBSH will have the flexibility to deliver ordinary shares of DBSH to participants upon vesting of their awards by way of an issue of new ordinary shares and/or the transfer of existing ordinary shares (which may include ordinary shares held by DBSH in treasury).

(vi) The class and/or number of ordinary shares of DBSH comprised in an award to the extent not yet vested, and/or which may be granted to participants, are subject to adjustment by reason of any variation in the ordinary share capital of DBSH (whether by way of a capitalisation of profits or reserves or rights issue, reduction, subdivision, consolidation, or distribution) or if DBSH makes a capital distribution or a declaration of a special dividend (whether in cash or in specie), upon the written confirmation of the auditor of DBSH that such adjustment (other than in the case of a capitalisation issue) is fair and reasonable.

Independent Auditor

PricewaterhouseCoopers LLP has expressed its willingness to accept re-appointment as independent external auditor.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF DBS BANK LTD (INCORPORATED IN SINGAPORE)

Report on the Financial Statements

We have audited the accompanying financial statements of DBS Bank Ltd (the "Bank") and its subsidiaries (the "Bank Group") set out on pages 1 to 90, which comprise the consolidated balance sheet of the Bank Group and balance sheet of the Bank as at 31 December 2012, the income statement, the statement of comprehensive income, consolidated statement of changes in equity and consolidated cash flow statement of the Bank Group and the income statement, the statement of comprehensive income and statement of changes in equity of the Bank for the financial year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements
Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Singapore Companies Act (the "Act") and Singapore Financial Reporting Standards, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair profit and loss accounts and balance sheets and to maintain accountability of assets.

Auditor's Responsibility
Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Singapore Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion
In our opinion, the consolidated financial statements of the Bank Group and the balance sheet, the income statement, the statement of comprehensive income and statement of changes in equity of the Bank are properly drawn up in accordance with the provisions of the Act and Singapore Financial Reporting Standards, including the modification of the requirements of FRS 39 Financial Instruments: Recognition and Measurement in respect of loan loss provisioning by Notice to Banks No. 612 "Credit Files, Grading and Provisioning" issued by Monetary Authority of Singapore, so as to give a true and fair view of the state of affairs of the Bank Group and of the Bank as at 31 December 2012, and the results, changes in equity and cash flows of the Bank Group and the results and changes in equity of the Bank for the financial year ended on that date.

Report on other Legal and Regulatory Requirements

In our opinion, the accounting and other records required by the Act to be kept by the Bank and by those subsidiaries incorporated in Singapore of which we are the auditors, have been properly kept in accordance with the provisions of the Act.
