Asian Relationships

At DBS, we take a holistic and long term view to building strong bonds with our customers, staff and the communities we operate in. We nurture and value relationships as only a bank that is born and bred in Asia can, and pride ourselves on standing by our customers, in good times and bad.

Spending time together across generations,
building priceless family ties

Asian Connectivity

DBS has the distinct advantage of having a growing presence in Asia's three key axes of growth – Greater China, South Asia and Southeast Asia. As a bank that is firmly rooted in Asia, our connections in the region enable us to serve our customers seamlessly across multiple markets and make banking easier for them.

Delivering banking the Asian way at
DBS' network of 200-plus branches in Asia

Asian Insights

As a bank that lives and breathes Asia, DBS understands and appreciates diversity. We know the intricacies of doing business in this region and are well-positioned to harness our knowledge of the various markets, trends, languages and cultures in Asia to better inform and guide our customers, as they make the most of opportunities in Asia and around the world.

Embracing Asia's past,
Shaping Asia's future

Asian Innovation

The origins of many modern-day inventions from all around the world can be traced back to Asia. Innovation is part of the Asian DNA and as an Asian bank, all of us in DBS embody the same entrepreneurial spirit. After all, the values that drive Asia, drive us. We constantly leverage technology to develop products and services to better fulfill our customers' evolving financial needs.

DBS logo projected onto water via modern strobe light technology at the DBS Fountain of Treasures, Singapore Pavilion, World Expo, Shanghai.

Asian Service

As an Asian bank, we believe that having “the humility to serve and the confidence to lead” is at the heart of Asian service. DBS staff are respectful of their customers’ needs, and are committed to finding ways to provide solutions and serve them better. As Asia’s Safest and Singapore’s Best*, DBS customers can always be assured that they are dealing with a strong and dependable bank, a bank they can always trust.

* Named “Safest Bank in Asia” by Global Finance in 2009 and 2010. Awarded “Best Bank in Singapore” by Euromoney, FinanceAsia and Global Finance in 2010.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

REPORT OF THE DIRECTORS

The directors of DBS Bank (Hong Kong) Limited (the “Bank”) submit their report together with the audited financial statements of the Bank and its subsidiaries (together the “Group”) for the year ended 31 December 2010.

Principal activities

The principal activity of the Bank is the provision of banking and related financial services. The principal activities of the subsidiaries are shown in Note 24 to the financial statements.

Results and appropriations

The results of the Group for the year ended 31 December 2010 are set out in the consolidated income statement on page 5.

No interim dividend was paid for the year ended 31 December 2010 (2009: Nil).

The directors do not recommend the payment of a final dividend for the year ended 31 December 2010 (2009: Nil).

Reserves

Details of the movements in the reserves of the Bank and the Group during the year are set out in Note 34 to the financial statements.

Share capital

Details of the movements in the share capital of the Bank during the year are set out in Note 33 to the financial statements.

Properties and other fixed assets

Details of the movements in properties and other fixed assets during the year are set out in Note 25 to the financial statements.

Donations

Donations made by the Group during the year amounted to HK\$703,000 (2009: HK\$371,000).

Directors

The directors during the year and up to the date of this report are:

Seah Lim Huat, Peter – Chairman	(appointed on 14 July 2010)
Piyush Gupta – Vice Chairman	(appointed on 14 July 2010)
J. E. Sebastian Paredes Muirragui – Chief Executive	(appointed on 13 September 2010)
Alexander Reid Hamilton	
Dominic Chiu Fai Ho	(appointed on 27 October 2010)
Leung Ting Mow, Kenneth	
Lo Chung Wing, Victor	
Ng Chee Siong, Robert	(appointed on 27 October 2010)
Cheng Wai Chee, Christopher	(resigned on 25 January 2010)
Wong Kai Yuan, Jeanette	(resigned on 14 June 2010)
Kwa Chong Seng	(resigned on 26 July 2010)
Yip Yok Tak, Amy	(resigned on 1 January 2011)

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

REPORT OF THE DIRECTORS (CONTINUED)

Directors (continued)

In accordance with Article 90 of the Bank's Articles of Association, Mr. Seah Lim Huat, Peter, Mr. Piyush Gupta, Mr. J. E. Sebastian Paredes Muirragui, Mr. Dominic Chiu Fai Ho and Mr. Ng Chee Siong, Robert retire from office at the forthcoming Annual General Meeting and, being eligible, offer themselves for re-election.

In accordance with Article 98 of the Bank's Articles of Association, Mr. Lo Chung Wing, Victor retires from office at the forthcoming Annual General Meeting and, being eligible, offer himself for re-election.

Directors' interests in contracts

No contracts of significance in relation to the Bank's business, to which the Bank or any of its subsidiaries or its holding companies or any subsidiary of its holding companies was a party and in which a director of the Bank had a material interest, whether directly or indirectly, subsisted at the end of the year or at any time during the year.

Arrangements to acquire shares

The following were arrangements which subsisted at the end of the year or at any time during the year which enabled certain directors of the Bank to acquire benefits by means of the acquisition of shares of DBS Group Holdings Ltd. ("DBSH"), the ultimate holding company of the Bank, or to be awarded shares of DBSH (or their equivalent cash value).

(a) DBSH Share Option Plan

Under the DBSH Share Option Plan (the "Option Plan"), options to subscribe for DBSH ordinary shares may be granted to DBSH Group executives who hold the rank of Vice President (or equivalent) and above and selected employees below the rank of Vice President (or equivalent). The Option Plan expired on 19 June 2009 and it was not extended or replaced. The termination of the Option Plan will not affect the rights of holders of any outstanding existing options. No further options have been granted under the Option Plan since 2006. The persons to whom the DBSH options have been granted do not have any right to participate by virtue of the DBSH options in any share issue of any other company.

At the beginning of the year, Ms. Wong Kai Yuan, Jeanette had outstanding options granted under the Option Plan.

None of the directors had acquired shares in DBSH by exercising options granted pursuant to the Option Plan.

(b) DBSH Share Plan

Under the DBSH Share Plan (the "Share Plan"), DBSH ordinary shares, their equivalent cash value or a combination of both, may be granted to DBSH Group executives who hold such rank as may be determined by the DBSH Compensation and Management Development Committee appointed to administer the Share Plan from time to time.

Where time-based awards are granted, participants are awarded DBSH ordinary shares, their equivalent cash value or a combination of both as part of their deferred bonus, at the end of the prescribed vesting periods. Awards are granted under the Share Plan at the absolute discretion of the DBSH Compensation and Management Development Committee.

During the year, Ms. Wong Kai Yuan, Jeanette and Ms. Yip Yok Tak, Amy were eligible to receive awards under the Share Plan. A total of 117,745 DBSH shares were vested in Ms. Wong Kai Yuan, Jeanette and Ms. Yip Yok Tak, Amy under the Share Plan during the year.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

REPORT OF THE DIRECTORS (CONTINUED)

Arrangements to acquire shares (continued)

Apart from the above, at no time during the year was the Bank or any of its subsidiaries or its holding companies or any subsidiary of its holding companies a party to any arrangement to enable the directors of the Bank to acquire benefits by means of the acquisition of shares in or debentures of the Bank or any other body corporate.

Management contracts

On 12 November 2002, an Information Technology Outsourcing Agreement (the “IBM Agreement”) was entered into between the Bank and IBM China / Hong Kong Limited (“IBM”) in relation to the provision by IBM of certain information technology and related services to the Bank. The IBM Agreement was in line with the spirit of the Master Agreement (the “IBM Master Agreement”) dated 12 November 2002 entered into between DBS Bank Ltd., the Bank’s holding company, and IBM Singapore Pte. Limited. The IBM Agreement commenced on 12 November 2002 and continues until 23:59 (Singapore Time) on 12 December 2012, unless terminated earlier pursuant to the terms of the IBM Master Agreement.

On 1 May 2009, a Hong Kong Country Agreement was entered into between the Bank and Jones Lang LaSalle Limited (“JLL”) in relation to the provision by JLL of certain property management and related services to the Bank in Hong Kong. Unless terminated earlier under the terms of the Agreement, it will continue until 30 April 2012.

Apart from the foregoing, no contract concerning the management and administration of the whole or any substantial part of the business of the Bank was entered into or existed during the year.

Auditor

The financial statements have been audited by PricewaterhouseCoopers who will retire at the forthcoming annual general meeting and, being eligible, offer themselves for re-appointment.

On behalf of the Board

Seah Lim Huat, Peter
Chairman

Hong Kong, 25 January 2011

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF DBS BANK (HONG KONG) LIMITED

(Incorporated in Hong Kong with limited liability)

We have audited the consolidated financial statements of DBS Bank (Hong Kong) Limited (the "Bank") and its subsidiaries (together, the "Group") set out on pages 5 to 86, which comprise the consolidated and company balance sheets as at 31 December 2010, and the consolidated income statement, the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory information.

Directors' responsibility for the consolidated financial statements

The directors of the Bank are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants, and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit and to report our opinion solely to you, as a body, in accordance with section 141 of the Hong Kong Companies Ordinance and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Bank and of the Group as at 31 December 2010, and of the Group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the Hong Kong Companies Ordinance.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

NOTES TO THE FINANCIAL STATEMENTS

1 General information

The principal activities of DBS Bank (Hong Kong) Limited (the “Bank”) and its subsidiaries (together the “Group”) are the provision of banking and related financial services. The Bank is a limited company incorporated and domiciled in Hong Kong. The address of its registered office is 11th Floor, The Center, 99 Queen’s Road Central, Central, Hong Kong.

The ultimate holding company is DBS Group Holdings Ltd. (“DBSH”) which is listed, incorporated and domiciled in the Republic of Singapore. The address of its registered office is 6 Shenton Way, DBS Building Tower One, Singapore 068809.

The consolidated financial statements were approved for issue by the Board of Directors on 25 January 2011.

2 Summary of significant accounting policies

The following is a summary of the principal accounting policies applied by the Group and, except where noted, are consistent with those applied in the previous financial year.

(a) *Basis of preparation*

The consolidated financial statements have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”) issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”) and the requirements of the Hong Kong Companies Ordinance.

The consolidated financial statements are presented in thousands of units of Hong Kong dollars (HK\$’000), unless otherwise stated. They have been prepared on the historical cost convention, except for derivative financial instruments, available-for-sale financial assets, financial assets and financial liabilities held at fair value through profit or loss and investment properties, which have been measured at fair value. In addition, the carrying amounts of assets and liabilities that are designated as hedged items in a fair value hedge are adjusted for fair value changes attributable to the hedged risks.

The preparation of financial statements in conformity with HKFRSs requires management to exercise judgement, use estimates and make assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. Although these estimates are based on management’s best knowledge of current events and actions, actual results may differ from these estimates. Critical accounting estimates and assumptions used that are significant to the financial statements, and areas involving a higher degree of judgement and complexity, are disclosed in Note 3.

The adoption of new / revised HKFRSs

On 1 January 2010, the Group adopted the following new or revised HKFRSs which are relevant to its operations.

HKAS 17 (Amendment) – Leases deletes specific guidance regarding classification of leases of land, so as to eliminate inconsistency with the general guidance on lease classification. The amendment states that leasehold land is classified as finance lease and stated at cost less accumulated depreciation if substantially all risks and rewards of the leasehold land have been transferred to the lessee. Previously, leasehold land was classified by the Group as operating lease and disclosed as lease premium for land which was stated at cost less accumulated amortisation. The Group has reassessed the classification of unexpired leasehold land as at 1 January 2010 on the basis of information existing at the inception of those leases, and recognised the leasehold land in Hong Kong as finance leases retrospectively. This resulted in a decrease in amortisation of lease premium for land and an increase in depreciation by HK\$44,043,000 respectively for the year ended 31 December 2010 (2009: HK\$45,417,000). On the balance sheet, there were an increase in properties and other fixed assets and a decrease in lease premium for land by HK\$1,716,362,000, HK\$1,769,614,000 and HK\$1,936,861,000 as at 31 December 2010, 31 December 2009 and 1 January 2009 respectively.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(a) Basis of preparation (continued)

HKAS 39 (Amendment) – Financial Instruments provides further guidance for eligible hedged items. It concludes that a purchased option designated in its entirety as the hedging instrument of a one-sided risk will not be perfectly effective as the designated one-sided risk excludes the time value of an option. The designation of inflation as a hedged risk is not permitted unless in particular situations. The amendment also clarifies that reclassification of a hybrid contract out of the fair value through profit or loss category is prohibited if an entity is unable to measure the embedded derivative separately.

HKFRS 2 (Amendment) – Share-Based Payment provides new guidance for group cash-settled awards. In cases where the parent issues a cash-settled award to employees of a subsidiary (subsidiary itself has no obligation to settle the award), the amendment confirms that this will be treated as equity-settled transaction in the subsidiary's financial statements.

The adoption of the new or revised HKFRSs did not have any material impact on the Group's financial statements.

New and revised HKFRSs (which are relevant to the Group's operations) issued but not yet effective

The Group is in the process of making an assessment on the impact of the new / revised HKFRSs and has not early adopted the following new / revised standards:

HKFRS 9	Financial Instruments
HKAS 12 (Amendment)	Income Taxes
HKAS 24 (Revised)	Related Party Disclosures
HKAS 32 (Amendment)	Financial Instruments: Presentation – Classification of Rights Issues
General Amendments*	Improvements to HKFRS (where applicable)

- * The General Amendments contain amendments to a variety of HKFRS which resulted in accounting changes for presentation, recognition, or measurement purposes, as well as terminology or editorial amendments related to a variety of HKFRS. These amendments, if adopted, are not expected to result in significant changes to the Group's accounting policies.

(b) Consolidation

The consolidated financial statements incorporate the financial statements of the Bank, its subsidiaries and its interest in a jointly controlled entity.

Subsidiaries

Subsidiaries are entities that the Group has power to govern the financial and operating policies of, in order to obtain benefits from their activities. It is generally accompanied by a shareholding of more than 50% of voting rights. Subsidiaries are consolidated from the date control is transferred to the Group to the date control ceases.

Investment in jointly controlled entities

A jointly controlled entity is an entity which is jointly controlled by the Group together with one or more parties through contractual arrangements. The Group recognises its interest in jointly controlled entity using the proportionate consolidation method.

Proportionate consolidation involves combining the Group's share of the jointly controlled entity's income, expenses, assets and liabilities on a line-by-line basis with similar items in the Group's financial statements.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(b) Consolidation (continued)

Investment cost at Bank level

Investments in subsidiaries and jointly controlled entities are stated at cost less accumulated impairment losses in the Bank's balance sheet. On disposal of investments in subsidiaries and jointly controlled entities, the difference between the net proceeds and the carrying amounts of the investments is taken to the income statement.

Intra-group transactions

All intra-group transactions, balances, income and expenses are eliminated on consolidation. Profits resulting from transactions between the Group and jointly controlled entities are eliminated to the extent of the Group's interests in these companies. Losses are also eliminated unless the transaction provides evidence of an impairment of an asset transferred.

(c) Foreign currency translation

(i) Functional and presentation currency

Items in the financial statements of the Bank and each of the Group's subsidiaries are translated into their functional currency, being the currency of the primary economic environment in which the entity operates. The financial statements are presented in Hong Kong dollar, which is the functional currency and presentation currency of the Bank and the Group.

(ii) Foreign currency transactions

Transactions in foreign currencies are measured at foreign exchange rates ruling at the date of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated into Hong Kong dollars at the exchange rates ruling at the balance sheet date. Foreign exchange differences arising from these translations are recognised in the income statement. Non-monetary assets and liabilities measured at cost in foreign currencies are translated using the exchange rates at the dates of the transactions. Non-monetary assets and liabilities measured at fair value in foreign currencies are translated to Hong Kong dollars at the exchange rates ruling at the dates the fair value was determined.

(iii) Foreign operations

The results and financial positions of the Group's operations whose functional currency is not Hong Kong dollar are translated into Hong Kong dollars in the following manner:

- Assets and liabilities are translated at the exchange rate ruling at the balance sheet date;
- Income and expenses in the income statement are translated at an average exchange rate approximating the exchange rates at the dates of the transactions; and
- All resulting exchange differences are taken to the translation reserve

(iv) Consolidation adjustments

On consolidation, foreign exchange differences arising from the translation of net investments in foreign entities are taken to the translation reserve. When a foreign operation is disposed of, such currency translation differences are recognised in the income statement as part of the gain or loss on disposal.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(d) Revenue recognition

(i) Net interest income

Net interest income, being interest income less interest expense, is recognised on a time-proportionate basis using the effective interest method. The effective interest rate is the rate that discounts estimated future cash receipts or payments through the expected life of the financial instrument or, when appropriate, a shorter period to its carrying amount. The calculation includes significant fees and transaction costs that are integral to the effective interest rate, as well as premiums or discounts. No interest expense is accrued on the Group's structured investment deposits which are carried at fair value through profit or loss.

When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument. Interest earned on the recoverable amount is recognised as interest income in the income statement.

(ii) Fee and commission income

The Group earns fee and commission income from a diverse range of products and services provided to its customers. Fee and commission income is recognised on the completion of a transaction. For a service that is provided over a period of time, fee and commission income is recognised over the period which the related service is provided or credit risk is undertaken.

(iii) Dividend income

Dividend income is recognised when the right to receive payment is established. Dividend income arising from held for trading financial assets is recognised in "Net trading income", while that arising from available-for-sale financial assets is recognised in "Net income from financial investments".

(iv) Rental income

Rental income from operating leases on properties is recognised on a straight-line basis over the lease term.

(e) Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition including cash, balances with banks, placements with and advances to banks and short-term bills and notes classified as trading securities and available-for-sale financial investments which are readily convertible into cash.

(f) Financial instruments

Financial instruments are classified according to the purpose for which the assets were acquired or the liabilities were incurred. Management determines the classification at initial recognition and re-evaluates the designation at every reporting date, with the exception that the designation of financial assets or financial liabilities at fair value through profit or loss is not revocable.

The classification of financial instruments is as follows:

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(f) Financial instruments (continued)

(i) Financial instruments at fair value through profit or loss

Financial instruments at fair value through profit or loss are financial assets and financial liabilities either acquired or incurred principally for the purpose of short term selling or repurchasing (held for trading) or designated by management on initial recognition (designated under the fair value option).

Derivatives are classified as held for trading unless they are designated as hedging instruments. The specific Group accounting policy on derivatives is detailed in Note 2(l).

Financial instruments designated under the fair value option meet at least one of the following criteria upon designation:

- it eliminates or significantly reduces measurement or recognition inconsistencies that would otherwise arise from measuring financial instruments, or recognising gains or losses on them, using different bases; or
- the financial instruments contain an embedded derivative that would otherwise need to be separately recorded.

(ii) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- those that the Group intends to sell immediately or in the short term, which are classified as held for trading, and those that the Group upon initial recognition designates as at fair value through profit or loss or available-for-sale; or
- those for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration.

(iii) Available-for-sale financial investments

Available-for-sale financial investments are non-derivative financial assets that are either designated in this category or not classified in any other categories. These financial investments are intended to be held for an indefinite period of time, and may be sold in response to the needs for liquidity or changes in interest rates, exchange rates or equity prices.

(iv) Other financial liabilities

Other financial liabilities are recognised initially at fair value net of transaction costs incurred. Other financial liabilities are subsequently stated at amortised cost; any difference between proceeds net of transaction costs and the redemption value is recognised in the income statement over the period of the other financial liabilities using the effective interest method.

Recognition and derecognition

Purchases and sales of financial assets are recognised on the date that the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or where the Group has transferred substantially all risks and rewards of ownership. Financial liabilities are removed or derecognised from the balance sheet when the obligation specified in the contract is discharged, cancelled or expired.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(f) Financial instruments (continued)

Initial measurement

Financial instruments are initially recognised at fair value plus transaction costs that are directly attributable to the acquisition of the financial asset or the issue of the financial liability, except for financial instruments at fair value through profit or loss, for which transaction costs are expensed off immediately.

Subsequent measurement

Financial instruments at fair value through profit or loss and available-for-sale financial investments are subsequently carried at fair value. Loans and receivables are carried at amortised cost using the effective interest method, less impairment allowances. Unquoted investments classified as available-for-sale for which fair value cannot be reliably determined are carried at cost, less impairment losses.

Realised and unrealised gains and losses arising from changes in the fair value of financial instruments at fair value through profit or loss are taken to “net income from financial instruments at fair value through profit or loss” in the income statement in the period in which they arise. Unrealised gains and losses arising from changes in the fair value of financial investments classified as available-for-sale are recognised in the investments revaluation reserve, except for hedged items as mentioned in Note 2(l). When financial investments classified as available-for-sale are sold or impaired, the accumulated fair value adjustments in the investments revaluation reserve are taken to the income statement.

Other financial liabilities, except for hedged items as mentioned in Note 2(l), are subsequently carried at amortised cost using the effective interest method.

Determination of fair value

The fair values of financial instruments traded in active markets (such as exchange-traded and over-the-counter securities and derivatives) are based on quoted market prices at the balance sheet date. The quoted market prices used for financial assets held by the Group are the current bid prices. If the market for a financial asset is not active, the Group establishes the fair value by using valuation techniques. These include the use of recent arm’s length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and option pricing models. Valuation reserves or pricing adjustments are applied to arrive at the fair values where applicable. The fair values of financial liabilities are estimated by discounting the future contractual cash flows at the current market interest rates that are available to the Group for similar financial instruments.

Recognition of day one profit or loss

Where the transaction price is different to the fair value determined using valuation models for which not all inputs are market observable prices or rates, such financial instrument is initially recognised at transaction price, which is the best indicator of fair value. The difference between the transaction price and the model value is not recognised immediately in the income statement. This difference, commonly referred to as “day one profit or loss”, is released to the income statement on the earlier of the following: (i) amortisation over the life of the transaction; (ii) when all the market inputs become observable; or (iii) on derecognition.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(g) *Impairment of financial assets*

Financial assets carried at amortised cost

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset or a group of financial assets is impaired. Impairment allowance is made when there is objective evidence of impairment as a result of the occurrence of loss events that will have an impact on the estimated future cash flows. The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Group determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

The criteria that the Group uses to determine that there is objective evidence of an impairment loss include:

- Significant financial difficulty of the issuer or obligor, including breach of covenants and / or financial conditions;
- A breach of contract, such as a default or delinquency in interest or principal payments;
- Granting of a concession to the borrower, for economic or legal reasons relating to the borrower's financial difficulty, that the entity would not otherwise consider; and
- High probability of bankruptcy or other financial reorganisation of the borrower.

Individual impairment allowances are assessed using the discounted cash flow method. Individual impairment allowances are measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the original effective interest rate. If a financial asset has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

Collective impairment allowances are assessed on the basis of contractual cash flows and historical loss experience adjusted for current conditions.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of the allowance is recognised in the income statement.

If, in a subsequent period, the amount of the impairment decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment allowances are reversed by adjusting the allowance account. The amount of the reversal is recognised in the income statement.

When a loan is uncollectible, it is written off against the related allowances for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off reduce the amount of the allowances for loan impairment in the income statement.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(g) Impairment of financial assets (continued)

Available-for-sale financial investments

The Group assesses at each balance sheet date whether there is objective evidence that an available-for-sale financial investment is impaired. In the case of an equity investment, a significant or prolonged decline in the fair value of security below its cost is considered in determining whether the asset is impaired. When there is objective evidence of an impairment of an available-for-sale financial investment, the cumulative loss – measured as the difference between the amortised cost and the current fair value, less any impairment loss on that financial asset previously recognised in the income statement – is removed from the investments revaluation reserve and recognised in the income statement. Impairment losses recognised in the income statement on the equity investments are not reversed through the income statement, until the equity investments are disposed of. A subsequent recovery in the value of an available-for-sale debt security whose value is impaired is reversed through the income statement if there has been an identifiable event that led to the recovery.

(h) Sale and repurchase agreements

Repurchase agreements (“Repos”) are treated as collateralised borrowing. The amount borrowed is reflected as a liability either as “Deposits from customers”, “Deposits and balances from banks” or “Financial liabilities at fair value through profit or loss”. The securities sold under repos are treated as pledged assets and remain on the balance sheet at amortised cost or fair value depending on their classification.

Reverse repurchase agreements (“Reverse repos”) are treated as collateralised lending. The amount lent is reflected as an asset either as “Advances to customers”, “Placements with and advances to banks” or “Financial assets at fair value through profit or loss”.

Amounts paid and received on the repos and reverse repos are amortised as interest expense and interest income respectively on an effective interest basis.

(i) Properties and other fixed assets

(i) Investment properties

Investment properties are carried at fair value, representing estimated open market value determined by independent qualified valuers. The changes in fair value are recognised in the income statement. Deferred income tax is recognised for the change in fair value of investment properties and charged to the income statement.

Investment properties include land held under finance leases and self-owned buildings.

If a property becomes an investment property because its use has changed, any difference resulting between the carrying amount and the fair value of the property at the date of transfer is recognised in properties revaluation reserve under HKAS 16 Property, Plant and Equipment. On subsequent disposal of the investment property, the properties revaluation reserve is transferred to retained earnings.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(i) Properties and other fixed assets (continued)

(ii) Properties

Properties are stated at cost less accumulated impairment losses and accumulated depreciation. Depreciation is calculated to write off the assets over their estimated useful lives on a straight-line basis as follows:

Freehold land	Not depreciated
Land and buildings	Over the remaining lease period of the land on which it is situated or 50 years, whichever is shorter
Leasehold improvements	Over the lease term of the leased properties or 5 years, whichever is shorter

(iii) Furniture, fixtures and equipment

Furniture, fixtures and equipment are stated at cost less accumulated impairment losses and accumulated depreciation. Depreciation on furniture, fixtures and equipment is calculated to write off the assets on a straight-line basis over their estimated useful lives of between 3 and 8 years.

Subsequent expenditure relating to properties and other fixed assets that has already been recognised is added to the carrying amount of the asset only when it is probable that future economic benefit associated with the item can be measured reliably. Other subsequent expenditure is recognised as hire and maintenance expense in the income statement during the financial year in which it is incurred.

On disposal of an item of properties and other fixed assets, the difference between the net disposal proceeds and its carrying amount is taken to the income statement.

(j) Impairment of non-financial assets

Properties (excluding investment properties) and other fixed assets, and investment in subsidiaries and jointly controlled entities are reviewed for impairment at each balance sheet date to determine if events or changes in circumstances indicate that the carrying value may not be recoverable. If such an indication exists, the carrying value of the asset is written down to its recoverable amount (being the higher of the fair value less cost to sell and the value-in-use). The impairment loss is charged to the income statement.

(k) Provisions and other liabilities

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognised as a provision is the best estimate of the expenditure required to settle the present obligation at the balance sheet date.

(l) Derivative financial instruments and hedge accounting

Derivatives are initially recognised at fair value at the date on which a derivative contract is entered into and are subsequently remeasured at fair value. All derivatives are classified as assets when the fair value is positive ("Positive fair values for derivative financial instruments") and as liabilities when fair value is negative ("Negative fair values for derivative financial instruments").

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(l) *Derivative financial instruments and hedge accounting (continued)*

Changes in the fair value of derivatives other than those designated as fair value hedges, cash flow hedges or net investments in foreign operations hedges are included in "Net trading income".

Certain derivatives embedded in other financial instruments are treated as separate derivatives when their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not carried at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognised in "Net trading income".

For derivatives designated as hedging instruments, each entity within the Group documents, at the inception, the relationship between the hedging instruments and hedged items, including the risk management objective for undertaking various hedge transactions and methods used to assess the effectiveness of the hedge. Each entity within the Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivative is highly effective in offsetting changes in the fair values or cash flows of the hedged item.

For a qualifying fair value hedge, the changes in the fair value of the derivative are recorded in the income statement, together with any changes in the fair value of the hedged item attributable to the hedged risk. Gain or loss arising from hedge ineffectiveness is recognised in the income statement under "Net trading income".

If the hedge no longer meets the criteria for hedge accounting, the adjustment to the carrying amount of a hedged item, is amortised to the income statement over its remaining maturity using the effective interest method.

(m) *Employee benefits*

Employee benefits, which include base pay, cash bonuses, share-based compensation, contribution to defined contribution plans and other staff related allowances, are recognised in the income statement when incurred. For defined contribution plans, contributions are made to publicly or privately administered funds on a mandatory, contractual or voluntary basis. Once the contributions have been paid, the Group has no further payment obligations.

Employee entitlement to annual leave is recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the balance sheet date.

(n) *Share-based compensation*

Employee benefits also include share-based compensation, namely, the DBSH Share Option Plan, the DBSH Share Plan and the DBSH Employee Share Plan run by DBSH, the ultimate holding company of the Bank. The details of the Plans are described in Note 42.

These share-based compensation expenses, which are measured at their fair values at grant date, are cash settled with DBSH, amortised and recognised in the income statement over the relevant vesting periods. Non-market vesting conditions are taken into account in determining the number of shares to be granted or number of options that are expected to become exercisable on vesting dates. The impact of subsequent revision of original estimates, if any, is recognised in the income statement.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(o) *Taxation*

Current income tax for current and prior periods is recognised at the amount expected to be paid or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Deferred income tax is provided, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using taxation rates enacted or substantively enacted by the balance sheet date.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

Deferred income tax assets and liabilities are credited or charged in the income statement, except when they relate to items credited or charged directly to reserves, in which case the deferred income tax assets and liabilities are also dealt with in reserves.

(p) *Financial guarantees*

A financial guarantee is initially recognised in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Group's liability under each guarantee is measured at the higher of the initial measurement less amortisation calculated to recognise the initial measurement in the income statement over the period of the financial guarantee and the best estimate of the expenditure required to settle any financial obligation arising at the balance sheet date. Examples include letter of credit, shipping guarantee, airway guarantee, letter of guarantee, etc.

The exposure to potential losses associated with a financial guarantee is monitored periodically. When there is objective evidence indicating probability of losses occurring, a provision is recognised for the financial guarantee.

(q) *Share capital*

Ordinary shares are classified as equity. Incremental external costs directly attributable to the issuance of new ordinary shares are deducted against the share capital account.

(r) *Dividend payments*

Interim dividends are recorded during the financial year in which they are declared payable. Final dividends are recorded during the financial year in which the dividends are approved by the shareholders at the Annual General Meeting. Dividends for the year that are declared after the balance sheet date are dealt with in the subsequent events note.

(s) *Offsetting financial instruments*

Certain financial assets and liabilities offset each other and the net amount is reported in the balance sheet when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle them on a net basis, or realise the asset and settle the liability simultaneously.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

2 Summary of significant accounting policies (continued)

(f) Leases

(i) Finance leases

Leases where substantially all the risks and rewards of ownership are transferred to the Group are accounted for as finance leases. Finance leases are capitalised at the commencement of the leases at the lower of the fair values of the leased assets and the present values of the minimum lease payments. The Group's interests in leasehold land are accounted for as finance leases.

Where the Group is a lessor under finance leases and hire purchase transactions, the amounts due under the leases, net of unearned finance income, are recognised as receivables and included in "Advances to customers". Finance income implicit in rentals receivable is credited to the income statement over the lease period so as to produce an approximately constant periodic rate of return on the net investments outstanding for each financial period.

(ii) Operating leases

Leases where substantially all the risks and rewards of ownership of assets remain with the lessor are accounted for as operating leases. Operating leases are charged to the income statement on a straight-line basis over the period of the lease. When an operating lease is terminated before the lease period has expired, any payment that has to be made to the lessor is recognised as an expense in the period the termination takes place.

Where the Group is a lessor under operating leases, rentals receivable under operating leases are credited to the income statement on a straight-line basis over the lease term.

(u) Fiduciary activities

Assets and income belonging to customers for whom the Group acts in a fiduciary capacity as nominee, trustee or agent, are excluded from the financial statements.

3 Critical accounting estimates and judgements in applying accounting policies

The Group makes certain assumptions and estimates in the process of applying the Group's accounting policies. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

(a) Impairment allowances

The Group establishes, through charges against profit, impairment allowances in respect of estimated loss in advances to customers. The allowances consist of individual impairment allowances and collective impairment allowances. The overall impairment allowances should represent the aggregate amount by which management considers it necessary to write down its loan portfolio in order to state it in the balance sheet at its estimated ultimate net realisable value.

In determining individual impairment allowances, management considers objective evidence of impairment. When an advance to customer is impaired, an individual impairment allowance is assessed by a discounted cash flow method, measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the effective interest rate. The quantum of the allowance is also impacted by the collateral value and this in turn, may be discounted in certain circumstances to recognise the impact of forced sale or quick liquidation.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

3 Critical accounting estimates and judgements in applying accounting policies (continued)

(a) Impairment allowances (continued)

In determining collective impairment allowances, management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling its future cash flows.

The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed regularly to reduce any differences between loss estimates and actual loss experience.

(b) Fair value of financial instruments

Fair value is defined as the value at which positions can be closed or sold in a transaction with a willing and knowledgeable counterparty. The majority of the Group's financial instruments reported at fair value are based on quoted and observable market prices or on internally developed models that are based on independently sourced market parameters, including interest rate yield curves, option volatilities and currency rates. Valuation reserves or pricing adjustments will be used to converge to fair value where applicable. The determination of fair value is subject to the Valuation Framework approved by the Board Risk Management Committee and the oversight of senior management committees. The Valuation Framework is implemented by the Group through policies and procedures approved by the committees. These policies and procedures facilitate the exercise of judgement in determining the risk characteristics of various financial instruments, discount rates, estimates of future cash flows, future expected loss experience and other factors used in the valuation process. Judgement may also be applied in estimating prices for less readily observable external parameters. Other factors such as model assumptions, market dislocations and unexpected correlations can also materially affect these estimates and the resulting fair value estimates.

(c) Income taxes

There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. In these circumstances, judgement is involved in determining the group-wide provision for income taxes. The Group recognises liabilities for expected tax issues based on reasonable estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

(d) Provisions

Judgement is needed to determine if provision for compensation to certain customers who had bought structured investments from the Group should be recorded in accordance with the requirements in HKAS 37 Provisions, Contingent Liabilities and Contingent Assets. In making this judgement, the Group evaluates the likelihood and estimated amount of outflow of resources which will be required to settle the obligation with reference to factors such as historical settlement experience, arrangement with regulators and advice from legal counsel.

12 Directors' emoluments

The aggregate amounts of emoluments paid or payable to directors of the Bank during the year are as follows:

	2010 HK\$'000	2009 HK\$'000
Fees (Note)	1,576	1,330
Salaries, housing and other allowances and benefits in kind	8,617	7,935
Pensions	366	277
Termination benefits	1,385	—
	<u>11,944</u>	<u>9,542</u>

Note: The Directors' fees are payable in 2011 to eligible persons who acted as Directors of DBS Bank (Hong Kong) Limited during the year ended 31 December 2010. Such fees are subject to the approval of the shareholders of DBS Bank (Hong Kong) Limited.

13 Income tax expense

(a) Income tax expense in the consolidated income statement is comprised of:

	2010 HK\$'000	2009 HK\$'000
Hong Kong profits tax		
– Current year	378,450	418,756
– (Over) / underprovision in prior years	(15,742)	343
Overseas tax		
– Current year	6,732	6,909
– Overprovision in prior years	(24)	(1,032)
Current income tax	<u>369,416</u>	<u>424,976</u>
Deferred income tax (Note 31(b))	<u>(13,218)</u>	<u>49,237</u>
	<u>356,198</u>	<u>474,213</u>

Hong Kong profits tax has been provided at 16.5% (2009: 16.5%) on the estimated assessable profits for the year. Taxation for overseas subsidiaries and branch are charged at the appropriate current rates of taxation ruling in the countries in which they operate.

(b) The deferred income tax (credited) / charged to the consolidated income statement comprises the following temporary differences:

	2010 HK\$'000	2009 HK\$'000
Accelerated depreciation allowances	(1,071)	(9)
Impairment allowances	(21,797)	44,525
Fair value adjustment on investment properties	9,650	4,721
	<u>(13,218)</u>	<u>49,237</u>

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

21 Financial investments (continued)

(b) Loans and receivables (continued)

The ratings refer to Standard & Poor's ratings (or their equivalent) to the respective issues of the securities, while in the absence of such issue ratings, ratings designated for the issuers are reported.

As at 31 December 2010, the fair value of the above debt securities is HK\$2,216,491,000 (2009: HK\$4,954,682,000).

The interest income and exchange gain arising from the above debt securities recognised in the income statement for the year ended 31 December 2010 were HK\$122,965,000 (2009: HK\$261,295,000) and HK\$71,265,000 (2009: HK\$339,179,000) respectively. Exchange gain or loss arising from these debt securities was managed in conjunction with matched funding where the resulting net exchange gain or loss was insignificant to the income statement.

The fair value gain that would have been recognised in the other comprehensive income if the debt securities had not been reclassified would be HK\$32,154,000 (2009: HK\$252,442,000).

The above debt securities are neither past due nor impaired.

The analysis of cost or valuation of the above assets as at 31 December 2010 is as follows:						
At cost	22,967	2,812,844	1,019,680	3,855,491	–	3,855,491
At valuation	–	–	–	–	368,400	368,400
	22,967	2,812,844	1,019,680	3,855,491	368,400	4,223,891

The fair value of the investment properties has been determined based on valuations performed by A.G. Wilkinson & Associates. The fair value represents the estimated amount at which the asset should exchange on the date of valuation between a willing buyer and a willing seller in an arm's length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.

(b) Operating lease arrangements

As at 31 December, the net book values of the investment properties held by the Group and the Bank are analysed as follows:

	Group and Bank	
	2010	2009
	HK\$'000	HK\$'000
In Hong Kong held on:		
– Leases of over 50 years	308,100	631,300
– Leases of between 10 to 50 years	60,300	54,500
	368,400	685,800

The Group leases out investment properties under operating leases. The leases typically run for an initial period of one to five years, and may contain an option to renew the lease after that date at which time all terms will be renegotiated. None of the leases include contingent rentals.

During the year, HK\$15,341,000 (2009: HK\$9,763,000) was recognised as rental income in the income statement in respect of the operating leases.

As at 31 December, the Group and the Bank had future aggregate minimum lease receipts under non-cancellable operating leases as follows:

	Group and Bank	
	2010	2009
	HK\$'000	HK\$'000
Not later than one year	9,694	15,808
Later than one year and not later than five years	14,569	17,497
	24,263	33,305

26 Trading liabilities

	Group and Bank	
	2010	2009
	HK\$'000	HK\$'000
Short positions in securities	5,787,552	3,678,555

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

27 Financial liabilities designated at fair value through profit or loss

	Group and Bank	
	2010	2009
	HK\$'000	HK\$'000
Structured investment deposits (Note 28)	467,272	658,580
Certificates of deposit issued (Note 29)	324,590	—
	791,862	658,580

Changes in fair value arising from changes in credit risk is determined as the amount of change in their fair value that is not attributable to changes in market conditions that give rise to market risk. Changes in market conditions that give rise to market risk include changes in benchmark interest rate, foreign exchange rate or index of prices or rates. Changes in fair value arising from changes in credit risk is considered not significant. Net unrealised loss for the financial liabilities designated at fair value through profit or loss amounted to HK\$9,877,000 as at 31 December 2010 (2009: net unrealised gain of HK\$135,603,000).

28 Deposits from customers

(c) Retained earnings

As at 1 January	10,190,623	7,777,609	10,016,919	7,628,656
Profit attributable to shareholders	2,444,214	2,391,452	2,411,362	2,366,701
Transferred from properties revaluation reserve on sale of investment properties	280,975	21,562	280,975	21,562
As at 31 December	12,915,812	10,190,623	12,709,256	10,016,919
Total reserves	16,181,394	13,677,032	15,848,287	13,376,824

The investments revaluation reserve represents the cumulative net change in the fair value of available-for-sale financial investments.

Properties revaluation reserve represents revaluation surplus arising on transfer of the land and buildings to investment properties.

The general reserve is comprised of transfers from the previous years' retained earnings.

As at 31 December 2010, HK\$757,978,000 (2009: HK\$668,872,000) was earmarked as the regulatory reserve from the retained earnings. The regulatory reserve is maintained to satisfy the provisions of the Banking Ordinance for prudential supervision purposes. Movements in the reserve are made directly through retained earnings and in consultation with the Hong Kong Monetary Authority.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

35 Fair value measurement

(a) Fair value of financial assets and liabilities not carried at fair value

For financial assets and liabilities not carried at fair value on the financial statements, the Group has ascertained that their fair values were not materially different from the carrying amounts at year end as shown below. The bases of arriving at their fair values are as follows:

(i) Placements with and advances to banks

The estimated fair value of placements with and advances to banks is based on the discounted cash flows using the prevailing money market interest rates for placements and advances with similar remaining maturity.

(ii) Advances to customers

The fair value approximates their carrying amount as majority of the advances to customers are on floating rate terms.

(iii) Financial investments – loans and receivables

Their fair value is set out in Note 21(b).

(iv) Deposits from banks and customers

The estimated fair value of deposits with no stated maturity, which includes non-interest-bearing deposits, is the amount repayable on demand. The estimated fair value of deposits and other borrowings with fixed interest rates is based on discounted cash flows using prevailing interest rates with similar remaining maturity.

(v) Certificates of deposit issued

The estimated fair value of certificates of deposit issued is based on discounted cash flows using the prevailing money market interest rates with similar remaining maturity.

(vi) Subordinated liability

The fair value of subordinated liability approximates its carrying amount as it is on floating rate term and bears interest at prevailing market interest rate.

(b) Fair value of financial assets and liabilities carried at fair value

The following table presents assets and liabilities measured at fair value and classified by level of the following fair value measurement hierarchy:

- (i) quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- (ii) inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices) (Level 2); and
- (iii) inputs for the asset or liability that are not based on observable market data (unobservable inputs) (Level 3).

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

35 Fair value measurement (continued)

(b) Fair value of financial assets and liabilities carried at fair value (continued)

Financial instruments that are valued using quoted prices in active markets are classified in Level 1 of the valuation hierarchy. These would include highly liquid government and sovereign securities, listed equities and corporate debt securities which are actively traded. Derivative contracts which are traded in an active exchange market are also classified within Level 1 of the valuation hierarchy.

Where fair value is determined using quoted market prices in less active markets or quoted prices for similar assets and liabilities, such instruments are generally classified as Level 2. In cases where quoted prices are generally not available, the Group then determines fair value based upon valuation techniques that use as inputs, market parameters including but not limited to yield curves, volatilities and foreign exchange rates. The majority of valuation techniques employ only observable market data and so reliability of the fair value measurement is high. These would include corporate debt securities and most of the Group's over-the-counter ("OTC") derivatives.

Financial instruments are considered Level 3 when at least one input to a valuation technique or model is unobservable. Valuation reserves or pricing adjustments where applicable will be used to converge to fair value.

Securities traded over-the-counter are valued using broker, dealer quotes or any other approved sources. The Group may also use valuation models or discounted cash flow technique to determine the fair value.

Most of the OTC derivatives are priced using valuation models. Where derivative products have been established in the markets for some time, the Group uses models that are widely accepted by the industry.

The valuation techniques and inputs used generally depend on the contractual terms and the risks inherent in the instrument as well as the availability of pricing information in the market. Principal techniques used include discounted cash flows, Black Scholes and other appropriate valuation models. OTC derivatives which are valued using unobservable inputs that are supported by little or no market activity that are significant to the fair value of the assets or liabilities are classified under Level 3.

Trading securities	27,212	-	-	-	-	-	-	(27,212)	-
Available-for-sale financial investments									
– Debt securities	3,170,343	-	(20,655)	1,322,092	(1,270,215)	644,637	(1,776,140)		2,070,062
Liabilities									
Financial liabilities designated at fair value through profit or loss	14,072	-	-	-	-	-	-	(14,072)	-

The Group classifies financial instruments in Level 3 when there is reliance on at least one unobservable input to the valuation model attributing to a significant contribution to the instrument value. Economic hedges entered into for Level 2 exposures may be classified within a different category (i.e. Level 1) and similarly, hedges entered for Level 3 exposures may also be classified within a different category (i.e. Level 1 and / or 2) . The effects are presented gross in the table.

In 2010, the Group has refined the classification criteria of the fair value measurement hierarchy to better reflect the observability of prices and valuation parameters under the prevailing market conditions. As a result, comparative figures have been reclassified to conform with current year presentation.

37 Derivative financial instruments and hedging activities

(a) Derivatives

The Group uses financial instruments to hedge the positions of the Group. It also trades in financial instruments where it takes positions in traded and over-the-counter instruments, including derivatives, to take advantage of short term market movements in bond price, currency and interest rate. The Group places trading limits on the level of exposure that can be taken in relation to both overnight and intra-day market positions. With the exception of specific hedging arrangements, foreign exchange and interest rate exposures associated with these derivatives are normally offset by entering into counterbalancing positions, thereby controlling the variability in the net cash amounts required to liquidate market positions.

The following is a summary of each significant type of derivatives:

2010	Group and Bank

The above tables include derivatives and embedded derivatives. The amounts are shown on a gross basis and do not take into account the effect of bilateral netting arrangements. The positive and negative fair values of embedded derivatives included in above amounted to HK\$15,632,000 and HK\$19,520,000 respectively (2009: HK\$138,913,000 and HK\$3,523,000 respectively). The contract or notional amounts of these instruments indicate the volume of transactions outstanding as at the balance sheet date; they do not represent amounts at risk.

The credit risk-weighted amounts as at 31 December 2010 and 2009 are the amounts which have been taken into account the effect of bilateral netting arrangements and have been calculated in accordance with the Banking (Capital) Rules.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

37 Derivative financial instruments and hedging activities (continued)

(b) Hedging activities

As at 31 December 2010, the Group has interest rate swap agreements in place with a notional amount of HK\$6,102,827,000 (2009: HK\$4,580,777,000) to hedge the exposure arising from changes in the fair value as a result of market interest rate fluctuation of certain available-for-sale financial investments and certificates of deposit issued. The hedging derivatives and hedged items have similar critical terms.

The losses on the hedging instruments are HK\$10,152,000 (2009: HK\$48,788,000). The gains on the hedged items attributable to the hedged risk are HK\$6,479,000 (2009: HK\$48,890,000).

38 Contingent liabilities and commitments

The following is a summary of the contractual amounts of each significant class of contingent liabilities and commitments:

	Group and Bank	
	2010	2009
	HK\$'000	HK\$'000
Direct credit substitutes	1,080,119	992,697
Transaction-related contingencies	657,225	675,526
Trade-related contingencies	7,999,192	6,002,650
Forward forward deposits placed	6,398,783	17,099,888
Other commitments with an original maturity of not more than one year	2,086,715	2,762,824
Other commitments with an original maturity of more than one year	1,452,889	29,141
Other commitments which are unconditionally cancellable	102,028,736	93,603,307
	121,703,659	121,166,033
Credit risk-weighted amount	11,254,549	10,499,958

In November 2002, the Group entered into a ten-year outsourcing agreement with IBM with respect to the provision of information technology and related support to the Group's operation in Hong Kong. There are various termination clauses contained within the agreement that under certain circumstances IBM could require the Group to pay a penalty on early termination of the contract. The exact amount of penalty cannot be reliably determined as it is dependent upon business volumes over the period of the contract and on the timing of the termination itself.

The Group has certain contingent liabilities in relation to compensation to certain customers who had bought structured investments from the Group. The Group has applied the requirements under HKAS 37 Provisions, Contingent Liabilities and Contingent Assets. At this stage, it is not practicable to provide an estimate of the financial effect of this contingent liability.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

39 Capital and lease commitments

(a) Capital commitments

Capital commitments outstanding at the balance sheet date but not yet incurred are as follows:

	Group		Bank	
	2010 HK\$'000	2009 HK\$'000	2010 HK\$'000	2009 HK\$'000
Expenditure contracted but not provided for	61,731	58,977	61,731	58,723
Expenditure authorised but not contracted for	45,628	80,238	45,628	80,238
	107,359	139,215	107,359	138,961

There were no capital commitments relating to the jointly controlled entity (2009: HK\$254,000).

(b) Lease commitments

At the balance sheet date, the total future minimum lease payments under non-cancellable operating leases were payable as follows:

	Group and Bank			
	2010		2009	
	Properties HK\$'000	Others HK\$'000	Properties HK\$'000	Others HK\$'000
Not later than one year	176,928	7,538	169,554	9,247

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

40 Assets pledged as security

The Group has liabilities secured by assets deposited with central depositories to facilitate settlement operations. The aggregate amount of secured liabilities and the nature and carrying amounts of the assets pledged as security are as follows:

	Group and Bank	
	2010	2009
	HK\$'000	HK\$'000
Secured liabilities – short positions in securities (Notes 26 and 30)	7,717,269	4,154,535
Assets pledged as security		
– Treasury bills	4,362,975	2,927,987
– Other securities	3,312,910	1,249,337
	7,675,885	4,177,324

41 Financial risk management**Risk governance**

Under the Group's risk governance framework, the Board of Directors, through the Board Risk Management Committee, oversees the establishment of robust enterprise-wide risk management policies and processes. Where necessary, the Group sets risk appetite limits to guide risk-taking.

Management is accountable to the Board for ensuring the effectiveness of risk management and adherence to the risk appetite limits. To provide risk oversight, senior management risk committees are mandated to focus on specific risk areas. These oversight committees are the Hong Kong Risk Executive Committee, the Hong Kong Credit Risk Committee, the Hong Kong Market Risk Committee and the Hong Kong Operational Risk Committee.

On a day-to-day basis, business units have primary responsibility for risk management. In partnership with the business units, independent control functions provide senior management with a timely assessment of key risk exposures and the associated management responses. These units also recommend risk appetite and control limits for approval in line with the Group's risk governance framework.

(a) Credit risk

Credit risk is the potential earnings volatility caused by obligors' inability to fulfill their contractual debt obligations. Senior management sets the overall direction and policy for managing credit risk at the Group level. In so doing, it directs the risk appetite and underwriting activities for various countries, industries and counterparties taking into account factors such as prevailing business and economic conditions. The Core Credit Risk Policy and the accompanying supplemental policies set forth the principles by which the Group conducts its credit risk underwriting activities. The Hong Kong Credit Risk Committee serves as the executive forum for overseeing various aspects of credit risk taking including framework, limits management, policies, processes, methodologies and systems.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(a) Credit risk (continued)

Exposure to credit risk arises from lending, sales and trading as well as derivative activities. Lending exposures are typically represented by the notional value or principal amount of on balance sheet financial instruments. Financial guarantees and standby letters of credit, which represent undertakings that the Group will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans even though they are of contingent nature. Documentary and commercial letters of credit, which are undertakings by the Group on behalf of customers, are usually collateralised by the underlying shipments of goods to which they relate and therefore exhibit different risk characteristics from direct borrowing. Commitments to extend credit include unused portions of loan commitments, guarantees or letters of credit. The majority of unused commitments are contingent upon customers observing or meeting certain credit terms and conditions.

The credit exposure of a derivative transaction is based on the positive mark-to-market value to the Group, which in general is only a fraction of the derivative contract or notional amount used to express the volume of instruments. This credit exposure, together with potential exposures from market movements, is managed as part of the overall lending limits to the counterparties. Credit exposures on these instruments are usually unsecured, except where the Group enters into collateralised margin transactions with counterparties. The Group currently uses the current exposure method for the purpose of providing capital for such counterparty exposures. Internally, the Bank measures counterparty credit exposure using the mark-to-market exposure with an appropriate add-on for future potential exposures.

The risk management of the exposures is conducted through the credit application process which includes the assessment of repayment likelihood and the establishment of appropriate credit limits. The Group uses various internal and external risk rating systems (credit scorecards, customer risk grading and credit bureau scores) to assess the level of credit risk accepted by the Group. Business units and credit approvers have the responsibility to ensure that credits are properly assessed and classified. Business units also assume the responsibility to ensure all crucial information is included in the application process for the purpose of assessment and approval.

The Group adopts a multi-level credit approval process requiring loan approval at successively higher levels and / or committees (as delegated) depending on, amongst other things, the size, nature of the proposed transactions and credit quality. Exposures are monitored against credit limits and other control limits (such as large exposures and concentration limits) by credit management units at the transaction and the portfolio levels, as appropriate.

In addition to the consideration of the primary recourse to the obligor for the credit risk underwritten, the employment of various credit risk mitigation techniques such as appropriate credit structuring, and posting of collateral and / or third party support as well as the use of credit derivatives to hedge or transfer risk to other third parties form an integral part of the credit risk management process. Some specific mitigation measures are outlined below:

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(a) Credit risk (continued)

(i) Collateral

Where possible, the Group takes collateral as a secondary recourse to the borrower. The collateral includes cash, marketable securities, properties, trade receivables, inventory, equipment and other physical and financial collateral. The Group may also take fixed and floating charges on assets of borrowers. It has put in place policies which govern the determination of eligibility of various collateral to be considered for credit risk mitigation which includes the minimum operational requirements that are required for the specific collateral to be considered as effective risk mitigations. For collateral taken in the global financial market operations, the collateral is marked to market on a mutually agreed period with the respective counterparties. For collateral taken for commercial banking, the collateral is revalued periodically ranging from daily to annually, depending on the type of collateral. In general, the Group considers the collateral it has taken as well diversified.

(ii) Master netting arrangements

The Group further manages its credit exposure by entering into master netting arrangements with counterparties where it is appropriate and feasible to do so. Master netting arrangements do not generally result in an offset of balance sheet assets and liabilities as transactions are usually accounted for individually on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are settled on a net basis.

(iii) Other risk mitigating factors

In addition, the Group also uses guarantees, credit derivatives and credit insurance as credit risk mitigating factors. Whilst the Group may accept guarantees from any counterparty, it sets a threshold internally for considering guarantors to be eligible for credit risk mitigation. Credit derivatives are used as credit risk mitigating factors mainly in structured transactions and for global financial market operations.

Maximum exposure to credit risk

The maximum exposure to credit risk is limited to the amounts on the balance sheet as well as commitments to extend credit and contingencies, without taking into account the fair value of any collateral and master netting arrangements. The analysis below shows the maximum exposure to credit risk for the various on- and off-balance sheet items.

	Group

Geographical concentration

Over 90% of the gross advances to customers and the related impaired advances, overdue advances, individual impairment allowances and collective impairment allowances were located in Hong Kong after taking into account the transfer of risk. In general, transfer of risk applies when an advance is guaranteed by a party in a country which is different from that of the counterparty.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(b) Market risk

Market risk affects the values of financial instruments held by the Group, and arises from changes in interest rate yields, foreign exchange rates, equity prices, credit spreads and changes in the correlations and volatilities of these risk factors.

The Group manages market risk in the course of market-making, structuring and packaging products for investors and other clients, as well as to benefit from market opportunities. The Group also manages banking book interest rate risk arising from mismatches in the interest rate profile of assets, liabilities and capital instruments (and associated hedges), including basis risk arising from different interest rate benchmarks, interest rate re-pricing risk, yield curve risks and embedded optionality. To optimise its income and balance sheet management, the Group deploys funds in debt securities or in the interbank market. All types of foreign exchange risk (including unhedged non-trading foreign exchange risk arising from the Group's investment in strategic foreign currency investments) are risk managed as part of the trading book.

The Group's market risk framework identifies the types of market risk to be covered, the risk metrics and methodologies to be used to capture such risk and the standards governing the management of market risk within the Group including limit setting and independent model validation, monitoring and valuation.

The Board Risk Management Committee establishes the Group's risk appetite for market risk in the trading book and the investment book. The Hong Kong Market Risk Committee, which reports to the Hong Kong Risk Executive Committee, oversees the Group's market risk management infrastructure, sets market risk control limits and provides enterprise-wide oversight of all market risks and their management.

The independent market risk management function, which is supported by DBS Bank Ltd. in terms of model analytics and risk architecture, reports to the Senior Risk Executive and is responsible for day-to-day risk monitoring and analysis.

The principal market risk appetite measures for market risk are Value-at-Risk ("VaR") and stress loss. The VaR is supplemented by risk control measures, such as sensitivities to risk factors, including their volatilities, as well as loss triggers for management action.

The Group's general market risk VaR methodology uses a historical simulation approach to forecast the Group's market risk. The methodology is also used to compute average tail loss metrics. The Group computes VaR (in Singaporean Dollars "SG\$") for the trading book daily. VaR risk factor scenarios are aligned to parameters and market data used for valuation. The scenarios are maintained in the risk system. Trading book VaR is back-tested against the corresponding profit and loss to monitor its predictive power.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(b) Market risk (continued)

(i) Daily VaR for trading book market risk

The following table shows the period-end, average, high and low daily VaR (at a 99% confidence level over a one-day holding period) for the trading book market risk:

Group SG\$'million	As at 31 December 2010	1 January 2010 to 31 December 2010*		
		Average	High	Low
Total	<u>1.4</u>	<u>1.0</u>	<u>1.9</u>	<u>0.2</u>
SG\$'million	As at 31 December 2009	1 January 2009 to 31 December 2009*		
		Average	High	Low
Total	<u>0.6</u>	<u>1.0</u>	<u>3.1</u>	<u>0.4</u>

* Using a 2-year historical observation period up to 31 May 2009, and using a 1-year historical observation period from 1 June 2009.

Although VaR provides valuable insights, no single risk measure can capture all aspects of market risk. Therefore, regular stress testing is carried out to monitor the Group's vulnerability to shocks.

(ii) Monthly total VaR for market risk

Since January 2010, the Group has implemented a comprehensive risk appetite framework for all types of market risk, including interest rate risk in the banking book (except immaterial equity risk in the banking book), in line with its internal capital adequacy assessment process. The Group level monthly total VaR associated with this framework is tabulated below, showing the period-end, average, high and low VaR (at a 99% confidence level over a one-day holding period).

Group SG\$'million	As at 31 December 2010	1 January 2010 to 31 December 2010		
		Average	High	Low
Total	<u>9.2</u>	<u>5.8</u>	<u>9.2</u>	<u>4.1</u>

In 2010, the Group has migrated to a sensitivity analysis which fully reflects the interdependence between risk variables. For the financial year ended 31 December 2009, the analyses for non-trading foreign exchange and interest rate risks were disclosed separately using different methods and are therefore not comparable and not shown in this analysis.

The economic value impact of changes in interest rates is simulated under various assumptions for the banking book. Based on a 200 basis point upward parallel shock to all yield curves, the simulated economic value change is negative HK\$954,000,000. The corresponding simulated economic value change for a 200 basis point downward shock is positive HK\$807,000,000.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(b) Market risk (continued)

(ii) Monthly total VaR for market risk (continued)

Equity risk in the banking book

Equity price risk arises from the Group's strategic investments which are overseen by the Hong Kong Management Committee. The Group's equity exposures booked in its non-trading portfolio as at 31 December 2010 and 2009 were not material and were held for long term investment purpose. They were reported as financial investments in Note 21 to the financial statements and are subject to the accounting and valuation policies set out in Notes 2(f) and 2(g) to the financial statements.

(c) Liquidity risk

Funding liquidity risk (or liquidity risk) is the current and prospective risk arising from the inability of the Group to meet its contractual or regulatory obligations when they become due without incurring substantial losses. Liquidity obligations arise from withdrawals of deposits, repayments of purchased funds at maturity, extensions of credit and working capital needs. The Group seeks to project, monitor and manage its liquidity needs under normal as well as adverse circumstances.

The primary tool of monitoring liquidity risk is the maturity mismatch analysis, which presents the profile of future expected cashflows under defined scenarios. This is monitored against available funding and liquid assets over successive time bands and across major currencies under normal and adverse scenarios. In addition, other monitoring metrics (for example, liquidity ratios, deposit concentration ratio, balance sheet analysis) are used as complementary tools to the maturity mismatch analysis.

On a strategic level, the Board Risk Management Committee is responsible for approving the principles and baseline standards under the Group's liquidity risk management framework, as well as defining the Group's tolerance towards liquidity risk. The Hong Kong Risk Executive Committee, which reports to the Board Risk Management Committee, provides oversight of liquidity risk undertaken across the Group and its management. On a tactical level, the Hong Kong Asset and Liability Committee is the primary committee responsible for liquidity management based on the Group's liquidity risk management framework and policies.

To manage liquidity risk within the tolerance defined by the Board, limits and triggers are set on maturity mismatches under normal and adverse scenarios and other monitoring metrics. Such limits seek to ensure that adequate funding and liquid assets are available to meet liquidity needs under both normal and stress scenarios.

As part of its management of liquidity risk inherent in its derivative and non-derivative financial liabilities, the Group employs on a number of strategies. These include maintaining sufficient liquid assets, maintaining diversified sources of liquidity, and having robust internal control processes and contingency plans.

From 2011, the Group will continue to enhance its liquidity risk management infrastructure and processes to ensure compliance with recent standards issued by the Basel Committee of Banking Supervision in accordance with the international implementation timeline.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(c) Liquidity risk (continued)

The balances in the above table will not agree with the balances in the consolidated balance sheet as the table incorporates all cash flows, on an undiscounted basis, related to both principal as well as future interest payments.

Customer assets and liabilities (including non-maturing savings / current deposits) are represented on a contractual basis or in a period when they can legally be withdrawn. On a behavioural basis for liquidity risk analysis, the assets and liabilities cash flows may differ from contractual basis.

For the purpose of liquidity risk management, the Group actively monitors and manages its liquidity positions within a 1-year period. A conservative view is adopted in the behavioural profiling of assets, liabilities and off-balance sheet commitments that have exhibited cash flow patterns that differ significantly from the actual contractual maturity profile.

The table below shows the Group's behavioural net and cumulative maturity mismatch between assets and liabilities over a 1-year period under a normal scenario without incorporating growth projections:

HK\$'million	Less than 7 days	7 days to 1 month	1 to 3 months	3 to 12 months
2010				
Net liquidity mismatch	32,811	7,993	25,101	(7,322)
Cumulative mismatch	32,811	40,804	65,905	58,583
2009				
Net liquidity mismatch	32,944	1,692	22,573	(4,008)
Cumulative mismatch	32,944	34,636	57,209	53,201

* As the behavioural assumptions used to determine the maturity mismatch between assets and liabilities are updated from time to time, the information presented above is not directly comparable across past balance sheet dates.

** 1 month is assumed to have 31 and 30 calendar days in 2009 and 2010 respectively.

*** Positive indicates a position of liquidity surplus. Negative indicates a liquidity shortfall that has to be funded.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(d) Operational risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people or systems, or from external events, including legal risk, but does not include strategic or reputational risk. An Operational Risk Management Framework, approved by the Board Risk Management Committee, has been developed with the objective to ensure that operational risks are properly identified, monitored, managed and reported in a structured, systematic and consistent manner.

To manage and control operational risk, the Framework encompasses various tools including, control self-assessment, risk event management and key risk indicator monitoring. Risk events, including any significant incidents that may impact the Group's reputation, are required to be reported based on certain thresholds established. Key risk indicators with pre-defined escalation triggers are employed to facilitate risk monitoring in a forward looking manner.

A key component of the Framework is a set of Core Operational Risk Standards which provides guidance on the baseline controls to ensure a controlled and sound operating environment. Each new product or service introduced or outsourcing initiative is subject to a risk review and sign-off process where relevant risks are identified and assessed by departments independent of the risk-taking unit proposing the product or service. Variations of existing products or services and outsourcing initiatives, are also subject to a similar process. Major operational risk mitigation programmes include Business Continuity Management and Global Insurance Programme. On an annual basis, the Chief Executive Officer provides an attestation to the Board of Directors on the state of business continuity management, including any residual risks.

The Hong Kong Operational Risk Committee oversees the operational risk management infrastructure, including the Framework, policies, processes, information, methodologies and systems. The Committee also performs regular review of the operational risk profiles and approves corporate operational risk policies.

(e) Capital management

The Bank's capital management policies are to diversify its sources of capital, to allocate capital efficiently, guided by the need to maintain a prudent relationship between available capital and the risks of its underlying businesses and to meet the expectations of key constituencies, including investors and regulators.

The following table sets forth details of capital resources and capital adequacy ratios for the Bank. The Banking Ordinance and the Banking (Capital) Rules set out the current requirements relating to the minimum capital adequacy ratios for an authorized institution incorporated in Hong Kong and the methodology for calculating these ratios. The Bank complied with the capital requirements imposed by the Hong Kong Monetary Authority throughout 2010 and 2009.

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

41 Financial risk management (continued)

(e) Capital management (continued)

The Bank is required to compute its capital adequacy ratio on a combined basis that includes the Bank and its overseas branch. The investments in subsidiaries are deducted from the Bank's core capital and supplementary capital.

The term subordinated liability represents the subordinated loan with principal amount of US\$540,000,000 from its intermediate holding company, DBS Bank Ltd., on 12 December 2006. The subordinated loan forms part of the capital base of the Bank with its terms and conditions set out in Note 32 to the financial statements.

42 Material related party transactions

(a) Holding companies and fellow subsidiaries

The Group's immediate holding company is DHB Limited and the ultimate holding company is DBS Group Holdings Ltd. ("DBSH"). DBS Bank Ltd. is an intermediate holding company of the Group.

As part of the Bank and the Group's normal course of business, it enters into various transactions with holding companies and fellow subsidiaries on normal commercial terms. These transactions include interbank placements, taking of deposits, derivative financial instruments, contingent liabilities and commitments.

The Group has policies on lending to related parties which define related parties, credit and reporting processes, requirements and restrictions on such lending. The lending terms and conditions (including interest rates, commissions, fees, etc.) applying to related parties are at arm's length.

Information relating to income and expenses from these transactions during the year and balances outstanding as at 31 December are set out below:

(i) Income and expenses with holding companies and fellow subsidiaries

	DBS Bank Ltd.		Fellow subsidiaries

(b) Jointly controlled entity

Under the Joint Venture Agreement (the “Agreement”) between the Bank, Whampoa Limited and Hutchison DBS Card Limited (“HDCL”), the Bank issues and services credit cards under the Compass brand. The Compass credit card receivables are included under “Advances to customers” in the Bank’s balance sheet. Under the Agreement, all the income, expenses and loan impairment allowances on the Compass cards are recorded in the books of HDCL. The income and expenses, assets and liabilities of HDCL are recognised by the Group through proportionate consolidation on a line-by-line basis.

As at 31 December 2010, the amount due from the Bank to the jointly controlled entity is HK\$2,322,686,000 (2009: HK\$1,823,465,000), of which HK\$1,550,000,000 (2009: HK\$1,230,000,000) is interest-bearing time deposit and the remaining balance is interest free and repayable on demand. Interest expense on the time deposit for the year ended 31 December 2010 paid and payable to HDCL is HK\$46,424,000 (2009: HK\$40,960,000). Gross service fee income from HDCL to the Bank for the year ended 31 December 2010 is HK\$85,159,000 (2009: HK\$80,291,000).

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

42 Material related party transactions (continued)

(c) Directors and senior management and key personnel

- (i) Transactions and balances with directors and senior management and key personnel

During the year, the Group has banking transactions with directors of the Bank and DBSH Group and senior management and key personnel of the Bank and their close family members. These transactions, including deposit taking, loans and credit card facilities, are made in the ordinary course of business and on commercial terms, and are not material.

- (ii) Compensation of directors and senior management and key personnel

	Group and Bank	
	2010	2009
	HK\$'000	HK\$'000
Directors' fee	1,576	1,330
Fixed remuneration (Note)		
– Salaries and other short term employee benefits	33,781	32,710
– Pension	2,407	2,427
Variable cash bonus (Note)	26,826	19,528
Share-based compensation	11,021	7,519
Termination benefits	1,385	–
	76,996	63,514

Note: The amount included remuneration in respect of 13 (2009: 16) members of senior management and key personnel as disclosed in accordance with the Supervisory Policy Manual entitled "Guideline on a Sound Remuneration System" issued by the Hong Kong Monetary Authority. The variable cash bonus represented cash bonus accrued during the year, to be paid in the following year.

(d) DBSH Share Option Plan

Under the DBSH Share Option Plan (the "Option Plan"), options to subscribe for DBSH ordinary shares may be granted to the Group executives who hold the rank of Vice President (or equivalent) and above and selected employees below the rank of Vice President (or equivalent).

The exercise price of the granted options is equal to the average of the last dealt prices for DBSH shares, as determined by reference to the daily official list published by the Singapore Exchange Securities Trading Ltd, for the three consecutive trading days immediately preceding the date of the grant.

These share options vest over a period in accordance with a vesting schedule determined by the Compensation and Management Development Committee (the "CMDC") of DBSH, and are exercisable after the first anniversary of the date of the grant up to the date of expiration of the options. The fair value of options granted is determined using the Binomial model.

The DBSH Share Option Plan expired on 19 June 2009 and the Option Plan was neither extended nor replaced. The termination of this Option Plan will, however, not affect the rights of holders of any outstanding existing options.

(e) DBSH Share Plan

Under the DBSH Share Plan (the “Share Plan”), DBSH ordinary shares (the “shares”) may be granted to the Group executives who hold such rank as may be determined by the CMDC appointed to administer the Share Plan from time to time. The awards could be performance-based and / or time-based.

Where time-based awards are granted, they will only vest after the satisfactory completion of time-based service conditions. Participants are awarded DBSH shares, their equivalent cash value or a combination of both as part of their deferred bonus (at the discretion of the CMDC).

A time-based award comprises two elements, namely, the main award and the “kicker” award. The shares comprised in the “kicker” award constitute twenty percent of the shares comprised in the main award. Thirty-three percent of the shares comprised in the main award will vest two years after the date of grant. A further thirty-three percent of the shares comprised in the main award will vest three years after the date of grant. The remainder thirty-four percent of the shares comprised in the main award, together with the shares comprised in the “kicker” award, will vest four years after the date of grant. For time-based awards, the fair value of the shares awarded are computed based on the market price of the DBSH ordinary shares at the time of the award and is amortised through the income statement over the vesting period. At each balance sheet date, the Group revises its estimates of the number of shares expected to vest based on non-market vesting conditions and the corresponding adjustments are made to the income statement.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

NOTES TO THE FINANCIAL STATEMENTS (CONTINUED)

42 Material related party transactions (continued)

(e) DBSH Share Plan (continued)

The following table sets out the movements of the time-based awards granted in the current and previous financial years pursuant to the Share Plan and their fair values at grant date.

	Group and Bank	
	2010 grant Number of shares	2009 grant Number of shares
Balance as at 1 January 2010	–	339,951
Granted in 2010	325,498	–
Forfeited in 2010	(9,351)	(15,244)
Transferred in due to staff relocation	–	44,414
Transferred out due to staff relocation	–	(31,787)
Balance as at 31 December 2010	<u>316,147</u>	<u>337,334</u>
	SG\$	SG\$
Weighted average fair value per share at grant date	<u>14.26</u>	<u>8.05</u>

Since the inception of the Share Plan, no awards have been cash-settled under the Share Plan.

(f) DBSH Employee Share Plan

The DBSH Employee Share Plan (the “ESP”) caters to all employees of the Group who are not eligible to participate in the DBSH Share Option Plan, the DBSH Share Plan or other equivalent plans.

Under the ESP, eligible employees are awarded DBSH ordinary shares (the “shares”), their equivalent cash value or a combination of both (at the discretion of the CMDC), when time-based conditions are met. The ESP awards are granted at the absolute discretion of the CMDC.

Time-based awards were granted in the current and previous financial years. The time-based awards will only vest after the satisfactory completion of time-based service conditions. Under such awards, the shares will vest at thirty-three percent two years after the date of grant. A further thirty-three percent will vest three years after the date of grant and the remainder thirty-four percent four years after the date of grant. The fair value of the shares awarded are computed based on the market price of DBSH ordinary shares at the time of the award and is amortised through the income statement over the vesting period. At each balance sheet date, the Group revises its estimates of the number of shares expected to vest based on non-market vesting conditions and the corresponding adjustments are made to the income statement.

Aggregate amount outstanding in respect of principal and interest	<u>–</u>	<u>5,664</u>	<u>5,664</u>	<u>6,089</u>

44 Provision for Lehman Brothers related Constellation Notes

The Bank has agreed with the Hong Kong Monetary Authority and the Securities and Futures Commission, without admitting any liability, to offer a resolution scheme in respect of the Lehman Brothers (“LB”) related Constellation Notes (the “Resolution”). Under the Resolution, the Bank offered to pay in total approximately HK\$651 million to its customers who purchased LB-related Constellation Notes and who were classified, at the time of purchase, as having a low to medium risk profile. The provision in relation to the Resolution has been recognised in the income statement for the year ended 31 December 2010.

45 Comparative figures

Certain comparative figures have been reclassified to conform with the financial statements presentation adopted in the current year.

UNAUDITED SUPPLEMENTARY INFORMATION

1 Capital requirements for different types of risk

The Bank is required to compute its capital adequacy ratio on a combined basis that includes the Bank and its overseas branch. The investments in subsidiaries are deducted from the Bank's core capital and supplementary capital.

The capital adequacy ratios as at 31 December 2010 and 31 December 2009 were compiled in accordance with the Banking (Capital) Rules issued by the Hong Kong Monetary Authority under Section 98A of the Hong Kong Banking Ordinance.

Details of capital resources and capital adequacy ratios for the Bank are set out in Note 41(e) to the financial statements.

The Bank adopts the Foundation Internal Ratings-Based ("IRB") approach for the calculation of the risk-weighted assets for credit risk. The Bank also uses the Standardised approaches for the calculation of risk-weighted assets for market risk and operational risk.

The Bank uses the IRB approach for calculating the credit risks for the majority of its exposures and uses Standardised approach for certain exposures being exempted from the IRB approach for credit risk calculation.

Capital requirements are made by multiplying the Bank's risk-weighted amounts derived from the relevant calculation approach by 8% as defined in the Banking (Disclosure) Rules.

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

2 Credit risk assessed using IRB approach

(a) Internal rating system and process

Nature of exposures within IRB approach

Retail exposures comprise residential mortgages, qualifying revolving retail exposures, small business retail exposures and other retail exposures to individuals. These exposures are categorised into asset classes under the Retail IRB approach.

Wholesale exposures comprise sovereign, bank, corporate, corporate small business (which are assessed under Foundation IRB approach) and specialised lending (which is assessed under the supervisory slotting criteria approach).

Other exposures mainly comprise premises, equipment and other fixed assets and notes and coins, which are assessed under specific risk-weight approach.

Structure and control mechanisms for internal rating systems

The Bank adopts various rating systems for the different asset classes under IRB approach. There is a robust governance process for the development and approval of a credit risk model. Credit risk models developed are validated by an independent risk unit in the Bank to ensure they are fit for purpose. The models are placed through a rigorous review process prior to endorsement by the Hong Kong Credit Risk Committee of the Bank and the Group Credit Risk Committee of DBSH. The models have also been approved by the Board Risk Management Committee of the Bank and the Board Risk Management Committee of DBSH before use.

To ensure the adequacy and robustness of these rating systems on a continual basis, the Bank conducts regular monitoring on these rating systems and reports the results to the Hong Kong Credit Risk Committee and the Board Risk Management Committee of the Bank. This process will highlight any material deterioration in the credit systems for management's attention. In addition, an independent risk unit conducts formal validation annually for each of the rating systems. The validation processes are also subject to an independent review by Internal Audit.

Use of internal estimates

The internal credit risk ratings produced by credit rating models are used to calculate the IRB approach capital requirements. In addition, the ratings from the credit models are used as the basis to support the underwriting of credit, monitoring the performance of the portfolios, reporting, stress testing and risk rating migration.

Definitions of variables

The group-wide credit risk rating framework incorporates Probability of Default ("PD") of a counterparty and loss severity expressed in terms of Exposure-at-Default ("EAD") and Loss Given Default ("LGD").

PD expressed as a percentage, measures the probability that a borrower will default within one year.

LGD expressed as a percentage, is an estimate of the severity of the loss that the Bank will experience per unit of exposure in the event that the borrower defaults.

EAD is the expected amount of the exposure upon the default of the borrower, which is the sum of the on-balance sheet amount and/or credit equivalent of the off-balance sheet amount multiplied by a credit conversion factor determined in accordance with the Banking (Capital) Rules.

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

2 Credit risk assessed using IRB approach (continued)

(a) Internal rating system and process (continued)

Methods and data for estimation and validation of the PD, LGD and EAD

For retail exposures, facilities/borrowers with homogenous nature of facility utilization, payment history, delinquency trend and other transaction characteristics are segmented into homogenous risk pools. PD is estimated by each risk pool based on long run average of historical internal default experience with appropriate adjustment to reflect adverse economic condition to ensure conservatism for capital calculation. The LGD is estimated by dividing the loss by EAD. Loss represents the written-off or specific provision amounts plus collection costs at the end of LGD workout period after netting off recoveries. The LGD is calibrated to reflect adverse economic condition to ensure conservatism for capital calculation. For retail non-revolving exposures, EAD estimation is based on the sum of current outstanding. For retail revolving exposures, EAD estimation is referring to projected further draw down prior to defaults based on historical experience.

For wholesale exposures (including corporate, bank and sovereign exposures), PD generated by models and/or rating templates for individual counterparty is reviewed by credit approvers. An Adjusted Counterparty Risk Rating ("ACRR") is assigned by taking the counterparty's PD and mapping it to the Bank's internal ACRR scale. The Bank applies the LGD determined by reference to the supervisory LGD estimates provided by the Hong Kong Monetary Authority ("HKMA") based on the nature of the collateral for its Foundation IRB portfolios and subordination. These supervisory LGD estimates are used in the computation of risk-weights and regulatory capital calculations for the portfolios. EAD estimation is subject to parameters set by the HKMA.

ACRR is estimated using a 11-grade scale expanded into 19 risk ratings to provide greater rating granularity that corresponds more closely to the Standard & Poor's ("S&P") rating scale. 14 of which are non-default ratings representing varying degrees of strength of financial condition, and 5 are default ratings. These scales are used group-wide for all distinct borrowers.

For specialised lending exposure, rating is assigned based on the borrower and transaction characteristics. The Bank uses supervisory slotting criteria approach in rating its regulatory specialised lending exposure by adopting the specialised lending rating templates. For income-producing real estate specialised lending exposure, the Bank adopts a credit scoring framework to enable a granular assessment of credit risk for the real estate financing activities aligning with the context of Hong Kong real estate market and the DBSH's real estate lending policies.

Model validation process enables the Bank to reaffirm the continuing appropriateness of the models. The model validation process involves quantitative and qualitative assessment of the model, data, systems and governance, which involves: i) quantitative validation to assess a model's discriminatory power, calibration and ratings stability analysis; ii) qualitative validation to address issues on model design, data integrity and internal use of a model. To ensure the models are reliable, an independent validation is conducted by Risk Management Group and an independent review on the validation process is carried out by Internal Audit.

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

2 Credit risk assessed using IRB approach (continued)

(a) Internal rating system and process (continued)

The credit risk ratings for the wholesale exposures have been mapped to likely corresponding external rating equivalents. A description of the risk rating is provided in the following table to give a qualitative explanation of the risk benchmarks:

Credit Risk Rating	Description of Risk Ratings	Internal Classification	Likely Corresponding HKMA Classification	S&P's Likely Ratings
1	Taking into account the impact of relevant economic, social or geopolitical conditions, capacity to meet its financial commitment is exceptional	Exceptional	Pass	AAA
2	Taking into account the impact of the relevant economic, social or geopolitical conditions, capacity to meet its financial commitment is excellent	Excellent	Pass	AA+, AA, AA-
3	More susceptible to adverse economic, social, geopolitical conditions and other circumstances.	Strong	Pass	A+, A, A-
4A/4B	Capacity to meet its financial commitment is strong Adequate protection against adverse economic, social or geopolitical conditions or changing circumstances.	Good	Pass	BBB+/BBB
5	More likely to lead to a weakened capacity of the obligor to meet its financial commitment Relatively worse off than an obligor rated "4B" but exhibits adequate protection parameters	Satisfactory	Pass	BBB-
6A/6B	Satisfactory capacity to meet its financial commitment but capacity may become inadequate due to adverse business, financial, economic, social or geopolitical conditions and changing circumstances	Acceptable	Pass	BB+/BB
7A/7B	Marginal capacity to meet its financial commitment but capacity may become inadequate or uncertain due to adverse business, financial, economic, social or geopolitical conditions and changing circumstances	Marginal	Pass	BB-
8A	Sub-marginal capacity to meet its financial commitment. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment	Sub-Marginal	Pass	B+
8B/8C	Low capacity to meet its financial commitment. Adverse business, financial, or economic condition will likely impair the obligor's capacity or willingness to meet its financial commitment	Special Caution	Special Mention	B/B-
9	Vulnerable to non-payment and is dependent upon favourable business, financial, and economic conditions for the obligor to meet its financial commitment. Likely to have little capacity to meet its financial commitment under adverse conditions	Sub-Performing	Sub-Standard (Non-Defaulting)	CCC – C
10 and Above	An obligor rated "10" and above is in default (as defined under Basel II)	Default	Sub-Standard and Below (Defaulting)	D

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

2 Credit risk assessed using IRB approach (continued)

(b) Summary of credit exposures by IRB calculation approach

The following table summarises the Bank's credit exposures as at 31 December:

	2010 HK\$'000	2009 HK\$'000
Retail exposures:		
Retail IRB approach		
Residential mortgages	46,319,316	44,110,135
Qualifying revolving retail exposures	27,393,031	21,453,310
Small business retail exposures	38,543	—
Other retail exposures to individuals	8,488,064	—
Wholesale exposures:		
Foundation IRB approach		
Sovereign exposures	15,030,844	10,852,734
Bank exposures	67,020,495	84,971,317
Corporate exposures	69,088,296	54,734,609
Supervisory slotting criteria approach		
Specialised lending	16,784,106	15,226,366
Other exposures:		
Specific risk-weight approach	5,814,714	7,155,792
	255,977,409	238,504,263

(c) Retail exposures

Retail portfolios are categorised into asset classes under the Retail IRB approach, namely residential mortgages, qualifying revolving retail exposures, small business retail exposures and other retail exposures to individuals.

Within each asset class, exposures are managed on a portfolio basis. Each account is assigned to a risk pool, taking into consideration factors such as borrower characteristics and collateral type. Loss estimates are based on historical default and realised losses within a defined period. Business-specific credit risk policies and procedures including underwriting criteria, scoring models, approving authorities, frequency of asset quality and business strategy reviews; as well as systems, processes and techniques to monitor portfolio performance against benchmarks are in place. Risk models are being used for associated retail exposures to update risk level of each loan on a monthly basis, reflecting the broad usage of risk models in portfolio quality reviews in accordance with Basel II principles.

Up to 5%	25,492,560	19,871,432
> 5%	1,845,414	1,537,423
Default	55,057	44,455
	<u>27,393,031</u>	<u>21,453,310</u>

Small business retail exposures

EL% range	2010 Exposure amount HK\$'000
Up to 0.3%	<u>38,543</u>

Other retail exposures to individuals

EL% range	2010 Exposure amount HK\$'000
Up to 0.3%	5,764,593
> 0.3%	2,690,973
Default	32,498
	<u>8,488,064</u>

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

2 Credit risk assessed using IRB approach (continued)

(c) Retail exposures (continued)

Comparative figures of exposures by EL% range are not applicable for small business retail exposures and other retail exposures to individuals as the credit risk of these exposures were not assessed using IRB approach prior to 2010.

(d) Wholesale exposures

Wholesale exposures comprise sovereign, bank, corporate, corporate small business (which are assessed under Foundation IRB approach) and specialised lending (which is assessed under the supervisory slotting criteria approach).

Sovereign exposures are risk rated using internal risk rating models and guidelines in line with Foundation IRB portfolios. Country specific macro-economic risk factors, political risk factors, social risk factors and liquidity risk factors are reviewed objectively in the sovereign rating models to assess the sovereign credit risk in a disciplined and systematic approach.

Bank exposures are assessed using a bank rating model covering various credit risk factors such as capital levels and liquidity, asset quality, earnings, management and market sensitivity. The risk ratings derived are benchmarked against external credit risk ratings, ensuring the internal rating systems are well aligned and appropriately calibrated.

Individual corporate credit is assessed using approved credit models, and reviewed and analysed by experienced credit approvers taking into consideration the relevant credit risk factors. Large corporate credits are assessed using approved models as well as reviews by designated credit approvers. Credit factors considered in the risk assessment process include the obligor's financial standing and outlook, industry and economic conditions, market position, access to capital and management strength. The Counterparty Risk Rating assigned to smaller business borrowers is primarily based on the borrower's financial position and strength, which are assessed via the use of a validated quantitative tool. This is supplemented by expert judgement of qualitative factors such as management strength by credit officers.

Credit ratings under the Foundation IRB portfolios are reviewed on an annual basis at a minimum unless credit conditions require more frequent assessment. The Counterparty Risk Rating process is reinforced by the Facility Risk Rating Framework which considers other exposure risk mitigations, such as collateral, third party guarantees and transfer risks.

A default is considered to have occurred with regard to a particular obligor when either or both of the two following events have taken place.

- Subjective default: Obligor is unlikely to pay its credit obligations in full, without recourse by the Bank to actions such as realising security (if held).
- Technical default: Obligor is past due more than 90 days on any credit obligation to the Bank.

Specialised lending

Specialised lending IRB portfolios represented real estate finance adopting the supervisory slotting criteria specified under the Banking (Capital) Rules. The supervisory slotting criteria guidelines under the supervisory rating categories are used to determine the risk-weights to calculate the credit risk-weighted exposures.

(e) Policies for establishing provisions

The policies are set out in Note 2(g) to the financial statements, which describe the Group's accounting policies on the assessment of individual and collective impairment allowances on the financial assets.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

2 Credit risk assessed using IRB approach (continued)

(f) Comparison of rating estimates against actual outcome

Comparison of actual loss against expected loss

Actual loss refers to impairment allowances made in the Bank's income statement during the year.

Exposure classes	Actual loss for the year ended 31 December 2010 HK\$'000	Expected loss as at 31 December 2009 HK\$'000
Residential mortgages	—	22,887
Qualifying revolving retail exposures	69,148	413,630
Sovereign exposures	—	7,742
Bank exposures	—	26,492
Corporate exposures	79,981	836,176
	<u>149,129</u>	<u>1,306,927</u>

Exposure classes	Actual loss for the year ended 31 December 2009 HK\$'000	Expected loss as at 31 December 2008 HK\$'000
Residential mortgages	889	26,999
Qualifying revolving retail exposures	116,259	294,898
Sovereign exposures	—	2,900
Bank exposures	—	27,126
Corporate exposures	483,401	820,812
	<u>600,549</u>	<u>1,172,735</u>

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

2 Credit risk assessed using IRB approach (continued)

(f) Comparison of rating estimates against actual outcome (continued)

Comparison of actual default rate against estimated probability of default

Exposure classes	Actual percentage of default for the year ended 31 December 2010 %	Estimated 1-year probability of default as at 31 December 2009 %
Residential mortgages	0.03	0.20
Qualifying revolving retail exposures	0.64	1.14
Sovereign exposures	—	0.02
Bank exposures	—	0.85
Corporate exposures	0.62	3.67

Exposure classes	Actual percentage of default for the year ended 31 December 2009 %	Estimated 1-year probability of default as at 31 December 2008 %
Residential mortgages	0.12	0.26
Qualifying revolving retail exposures	0.87	1.04
Sovereign exposures	—	0.02
Bank exposures	—	0.67
Corporate exposures	2.12	3.00

The actual default rate is measured by using the number of obligors or number of accounts defaulted, depending on the exposure class for the annual reporting period whereas the estimated probability of default is the long run average default rate estimated for 2010 and 2009.

Expected loss is a Basel II measure of expected future losses based on IRB models where PDs are more through-the-cycle and LGDs are on a downturn basis, floored by regulatory minimums. Actual loss is an accounting construct which includes impairment allowances and charge-offs for loans originated in prior years which defaulted in 2010 and 2009 respectively. The two measures of loss are therefore not directly comparable.

Comparison of rating estimates against actual outcome is not applicable for small business retail exposures and other retail exposures to individuals as the credit risk of these exposures were not assessed using IRB approach prior to 2010.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

3 Credit risk assessed using Standardised approach

The following table indicates the exposure amounts and risk-weighted amounts for each class of exposure under the Standardised approach as at 31 December:

2010

	Total exposures HK\$'000	Total exposures after credit risk mitigation HK\$'000	Risk-weighted amount after credit risk mitigation HK\$'000
On-balance sheet

2009

	Total exposures HK\$'000	Total exposures after credit risk mitigation HK\$'000	Risk-weighted amount after credit risk mitigation HK\$'000
On-balance sheet			
Sovereign exposures	—	168,554	—
Public sector entity exposures	—	1,303,642	260,728
Bank exposures	5,188	5,188	5,188
Corporate exposures	6,625,268	6,146,818	6,146,818
Regulatory retail exposures	1,220,709	700,160	525,121
Other exposures which are not past due exposures	15,988,175	13,724,835	13,724,835
Past due exposures	414,777	414,777	529,539
	<u>24,254,117</u>	<u>22,463,974</u>	<u>21,192,229</u>
Off-balance sheet			
Off-balance sheet exposures other than over-the-counter derivative transactions	508,631	455,216	455,311
Over-the-counter derivative transactions	298,145	34,844	34,803
	<u>806,776</u>	<u>490,060</u>	<u>490,114</u>

Total exposures in the above table refer to principal amounts or credit equivalent amounts, as applicable, net of individual impairment allowances.

The exposure amounts and risk-weighted amounts in the above table do not take into account the credit assessment ratings assigned by the External Credit Assessment Institutions.

4 Credit risk mitigation

Credit risk mitigation techniques are taken into account when analysing credit risk-weighted asset amounts. Amounts are adjusted for recognised collateral or recognised guarantees allowed under the Banking (Capital) Rules.

Recognised collateral includes both financial and physical assets. Financial collateral consists of mainly cash deposits, debt securities and shares, while physical collateral includes land and buildings.

Eligible credit protection is also used to abate credit losses in the event that the exposure defaults. The policies and procedures on credit risk mitigation techniques are set out in Note 41(a) to the financial statements. The Bank adopts the comprehensive approach for credit risk mitigation and the impact on PD or LGD is based on the same guidelines for Foundation IRB portfolios.

As at 31 December 2009 and 2010, the credit and market risks concentrations within the credit risk mitigation used by the Bank are under a minimal level.

5 Counterparty credit risk-related exposures

The analysis of the gross total positive fair values, credit equivalent amounts after taking into account the recognised collateral and effect of valid bilateral netting agreements and the risk-weighted amounts for over-the-counter derivative contracts as at 31 December is as follows:

	2010 HK\$'000	2009 HK\$'000
Exposures under IRB approach		
Gross total positive fair values	3,900,728	3,048,358
Credit equivalent amounts		
– Bank exposures	6,413,768	2,920,293
– Corporate exposures	7,354,553	2,231,502
Gross credit equivalent amount	13,768,321	5,151,795
Less: Effects of netting arrangement	(5,342,149)	–
Credit equivalent amount after netting	8,426,172	5,151,795
Less: Collateral amount		
– Recognised financial collateral	(459,111)	(323,255)
– Other eligible collateral	(534,615)	(233,699)
	7,432,446	4,594,841
Exposures under Standardised approach		
Gross total positive fair values	71,128	173,655
Credit equivalent amounts		
– Exchange rate contracts	119,274	77,435
– Interest rate contracts	28,510	1,575
– Equity contracts	26,987	219,135
	174,771	298,145
Less: Recognised financial collateral	(89,042)	(263,301)
	85,729	34,844

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

5 Counterparty credit risk-related exposures (continued)

	2010 HK\$'000	2009 HK\$'000
Exposures under IRB approach		
Risk weighted amount		
– Bank exposures	170,927	462,100
– Corporate exposures	9,227,431	2,354,515
	<u>9,398,358</u>	<u>2,816,615</u>
Exposures under Standardised approach		
Risk weighted amount		
– Exchange rate contracts	80,188	32,646
– Equity contracts	5,367	2,157
	<u>85,555</u>	<u>34,803</u>
	<u>9,483,913</u>	<u>2,851,418</u>

There are no outstanding repo-style transactions and credit derivative contracts which create exposures to counterparty credit risk as at 31 December 2010 (2009: Nil).

The current exposure method is used for calculating the Bank's net credit exposure and regulatory capital for counterparty exposures, using the mark-to-market exposures with an appropriate add-on factor for potential future exposures.

6 Liquidity ratio

The average liquidity ratio for the year, calculated in accordance with the Fourth Schedule of the Banking Ordinance, is as follows:

	2010	2009
Average liquidity ratio	<u>32.1%</u>	<u>33.3%</u>

The average liquidity ratio is the simple average of each calendar month's average liquidity ratio for the twelve months of the financial year of the Hong Kong office of the Bank.

Commercial and retail banking business mainly comprises deposit account services, residential mortgage and other consumer lending, credit card services, corporate lending, trade finance and international banking.

Treasury activities are mainly the provision of foreign exchange services and centralised cash management for deposit taking and lending, trading activities and management of investment securities and the overall funding of the Banking Group.

(b) Segmental information by booking location

Over 90% of the Group's total income, profit before income tax, total assets, total liabilities, contingent liabilities and commitments are booked in Hong Kong.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

UNAUDITED SUPPLEMENTARY INFORMATION (CONTINUED)

7 Segmental information (continued)

(c) Cross-border claims

Analysis of cross-border claims by location and type of counterparty is as follows:

HK\$' million	Group			Total
	Banks	Public sector entities	Others	
2010				
Asia Pacific excluding Hong Kong	47,793	1,801	9,128	58,722
North and South America	2,862	3,354	577	6,793
Europe	2,774	7	445	3,226
Others	17	161	1,750	1,928
	53,446	5,323	11,900	70,669
2009				
Asia Pacific excluding Hong Kong	55,523	161	5,031	60,715
North and South America	5,799	1,454	542	7,795
Europe	6,930	4	428	7,362
Others	10	160	711	881
	68,262	1,779	6,712	76,753

The above analysis by geographical area is based on the location of the counterparty after taking into account the transfer of risk. In general, transfer of risk applies if the claim is guaranteed by a party in a country which is different from that of the counterparty.

2009								
Hong Kong dollar equivalents								
Spot assets	45,545	755	1,363	1,435	8,546	2,101	4,592	64,337
Spot liabilities	(51,280)	(1,863)	(714)	(1,435)	(10,819)	(2,766)	(7,748)	(76,625)
Forward purchases	52,220	1,635	774	9,794	3,005	781	4,487	72,696
Forward sales	(45,630)	(542)	(1,383)	(9,503)	(564)	(173)	(1,159)	(58,954)
Net options position	<u>(24)</u>	<u>8</u>	<u>16</u>	<u>–</u>	<u>(71)</u>	<u>43</u>	<u>(46)</u>	<u>(74)</u>
Net long / (short) non-structural position	<u>831</u>	<u>(7)</u>	<u>56</u>	<u>291</u>	<u>97</u>	<u>(14)</u>	<u>126</u>	<u>1,380</u>
Net structural position	<u>–</u>	<u>–</u>	<u>–</u>	<u>28</u>	<u>–</u>	<u>–</u>	<u>(44)</u>	<u>(16)</u>

The net structural position as at 31 December 2010 comprised the Group's unremitted earnings of HK\$47,000,000 equivalent (2009: HK\$44,000,000) from a Macau Pataca investment in Macau, and Renminbi investments of HK\$29,000,000 equivalent (2009: HK\$28,000,000) in the Mainland China.

The net options position is calculated based on the delta-weighted position as set out in the prudential return "Foreign Currency Position" issued by the Hong Kong Monetary Authority.

CORPORATE GOVERNANCE REPORT

The following information is disclosed as part of the accompanying information to the financial statements and does not form part of the audited financial statements.

1 Board and Management Committees

Under the corporate governance structure of DBS Bank (Hong Kong) Limited (the “Bank”), the role of the Board of Directors is to provide high-level guidance and effective oversight over management. To assist the Board of Directors in fulfilling its responsibilities and in accordance with the best corporate governance practice, the Board Audit Committee and Board Risk Management Committee were established and a number of specialised committees were formed to effectively contribute to the strategic and operational development of the Bank.

The roles, functions and composition of these committees are listed below:

(a) Board Audit Committee

The Board Audit Committee is authorised by the Board of Directors to investigate any activity within its terms of reference. Its main duties include, inter alia, the review of the Bank’s financial statements before submission to the Board of Directors, the nomination and appointment of the external auditor, the audit fee, the questions on resignation or dismissal of external auditor, the internal audit programme and consideration of any major findings of internal investigations and management’s response. The Board Audit Committee comprises independent non-executive directors of the Bank.

(b) Board Risk Management Committee

The Board Risk Management Committee provides comprehensive and bank-wide oversight of all risks and their management. It sets the overall and specific risk governance framework and obtains assurance that risk management activities are effective and that risk management activities have sufficient independence, status and visibility. It sets risk appetite on capital and limits for delegation to the relevant risk committees and units, reviews risk reporting on significant risks and risk capital adequacy and reviews and endorses the Internal Capital Adequacy Assessment Process statement. It is also responsible for obtaining assurance that the Bank is on track in meeting the Basel Capital Accord requirements according to approved plans. The Board Risk Management Committee comprises the Chairman of the Bank, the Chief Executive Officer and other directors.

(c) Hong Kong Management Committee

The Hong Kong Management Committee is responsible for formulating and implementing DBS’s strategy for Hong Kong, as well as the financial and non-financial results of DBS’s activities in this geographic segment. Key to its mandate is to provide leadership to the various business and support units in Hong Kong, with a view toward ensuring sound and effective governance, and achieving the targeted financial returns. Toward this end, the Hong Kong Management Committee is responsible for prioritising business development initiatives (as well as the support infrastructure projects necessary to underpin robust growth), and capital allocation, within the context of DBS’s strategy. It is also responsible for ensuring that policies and practices are in place to maintain high corporate governance, risk management and compliance standards in Hong Kong. Members of the Hong Kong Management Committee are senior management in Hong Kong.

CORPORATE GOVERNANCE REPORT (CONTINUED)

1 Board and Management Committees (continued)

(d) Hong Kong Risk Executive Committee

The Hong Kong Risk Executive Committee provides oversight of all risk types (including those not covered by any committee for a specific risk) and their interactions across all business / support units of the Hong Kong entities, and establishes the overall local risk architecture direction and priorities in line with those established by DBS Group Holdings Ltd. (“DBSH”). It reviews existing and new business mandates, all matters involving Special Purpose Vehicles and transactions presenting heightened or complex risk impact and significant events. The Hong Kong Risk Executive Committee approves local liquidity risk limits, and Hong Kong-country specific risk policies and local adoption of Group Liquidity and Reputational Risks related policies. The Hong Kong Risk Executive Committee comprises the Chief Executive Officer of the Bank, the Senior Risk Executive of Hong Kong and representatives from key business units and support units and others nominated by the Chairman of the Hong Kong Risk Executive Committee.

(e) Hong Kong Asset and Liability Committee

The Hong Kong Asset and Liability Committee supervises the asset and liability management including the management of liquidity, structural interest rate risk and structural foreign exchange risk activities in Hong Kong and Macau. It manages the net interest income and margin of the region against changing interest and the currency rate conditions, and maturities / duration. It oversees the structure and composition of the balance sheets in the region, as well as the significant off-balance-sheet assets and liabilities. The Hong Kong Asset and Liability Committee comprises the Chief Executive Officer of the Bank and representatives from the relevant business units and support units and others nominated by the Chairman of the Hong Kong Asset and Liability Committee.

(f) Hong Kong Credit Risk Committee

The Hong Kong Credit Risk Committee serves as an executive forum for discussion and decisions on all aspects of credit risk and its management. It assesses credit risk taking and risk-return tradeoffs. The Hong Kong Credit Risk Committee identifies, measures and monitors credit risk portfolio and specific loan and asset review situations and identifies specific credit concentrations and credit trends affecting the portfolio. It approves local credit policies and/or endorses core credit-related policies in accordance with the Group Risk Governance Framework. In respect of continually determining the suitability of DBS Hong Kong’s credit risk management strategy and framework as well as Internal Ratings-Based (“IRB”) systems in meeting the standards under Basel Capital Accord, the Hong Kong Credit Risk Committee exercises active oversight to ensure the continuing appropriateness of the rating systems, the parameterization process and the stress testing process. The members of the Hong Kong Credit Risk Committee are the Chief Credit Officer of Greater China, representatives from relevant business units, support units and other members nominated by the Chairman of the Hong Kong Credit Risk Committee.

CORPORATE GOVERNANCE REPORT (CONTINUED)

1 Board and Management Committees (continued)

(g) Hong Kong Market Risk Committee

The Hong Kong Market Risk Committee provides comprehensive and location-wide oversight, direction and counsel relating to the management of market risk. It serves as an executive forum for discussion and decisions on all aspects of market risks and its management. It maintains oversight on effectiveness of market risk management infrastructure, including framework, policies, people, processes, information, methodologies and systems on market risk. The Hong Kong Market Risk Committee comprises senior management from Risk Management, representatives from relevant business units and support units and others nominated by the Chairman of the Hong Kong Market Risk Committee.

(h) Hong Kong Operational Risk Committee

The Hong Kong Operational Risk Committee provides comprehensive and location-wide oversight, direction and counsel relating to the management of operational risks. It monitors and reviews the effectiveness of operational risk management framework, policies, processes, methodologies and infrastructures. It performs top-down assessment and monitors critical operational risk exposures and provides direction for resolution of critical operational risk issues and monitors issue resolution. The Hong Kong Operational Risk Committee comprises the senior management from Risk Management, representatives from the relevant support units and others nominated by the Chairman of the Hong Kong Operational Risk Committee.

During the year, the Bank has complied with, in all material aspects, the guidelines set out in the Supervisory Policy Manual entitled "Corporate Governance of Locally Incorporated Authorized Institutions" issued by the Hong Kong Monetary Authority.

2 Remuneration Matters

DBS Bank (Hong Kong) Limited adopts the remuneration policy and practices formulated by DBS Group Holdings Ltd ("DBSH").

The objective of DBS' remuneration policy is to define a Reward framework that can attract, retain, and motivate employees, and create incentives for delivering long-term performance within the risk parameters of DBSH. This policy is built on a system of meritocracy and follows a Total Reward framework that supports a 'one-bank' performance and rewards culture across DBSH.

DBS' remuneration policy aims to be consistent with the principles/standards set out by the Financial Stability Board (FSB) and the relevant local regulators.

(a) Remuneration structures

In line with the above-mentioned objectives, DBS deploys remuneration structures that have four key features.

- **Focus on total compensation:** The employees' total compensation consists of fixed pay (salary and allowances) and discretionary variable remuneration. It is determined on the basis of their role and responsibilities, performance and contributions, and market dynamics. DBS benchmarks total remuneration against other organisations of similar size, type and standing, which it competes with in the principal markets. This set of organisations can differ across DBS' business units (BUs) and markets.

CORPORATE GOVERNANCE REPORT (CONTINUED)

2 Remuneration Matters (continued)

(a) Remuneration structures (continued)

- **Differentiation of variable / fixed remuneration across employee groups:** DBS aims to differentiate the ratio of variable / fixed remuneration ratios across employees based on performance, seniority, and their functions (e.g. the front office vs. control staff). This is done to ensure that employee incentives remain focused on prudent risk taking and/or effective control, depending on the employee's role.
- **Payout structures focused on incentive alignment:** The payout structures are designed to incentivise appropriate risk taking among employees who can have a material impact on DBSH's risk profile. This includes the senior management, key risk takers at the Business Unit (BU) level, and senior control staff. DBS defines this group of staff based on their role, the quantum of variable remuneration, and its ratio to fixed pay.

DBS defers the variable remuneration of employees in this group based on a tiered deferral rate that ranges from 20%-60% of incremental variable remuneration. All deferred remuneration is paid in the form of restricted shares under DBSH's Long Term Share Incentive Scheme. The restricted shares have a vesting period of four years, and comprise two elements, namely, the main award (the part of variable remuneration paid in shares) and a 'kicker' award. The 'kicker' acts as a retention tool and is also designed to compensate the staff for the time value of deferral. It vests at the end of 4 years from the grant date.

Starting with 2011 payouts (for the 2010 performance year), DBS will also subject the unvested, deferred remuneration to performance linked clawbacks. The clawbacks will be triggered by events like the material violation of risk limits, material DBSH losses due to negligent risk taking or inappropriate individual behaviour, a material restatement of DBSH's financials due to inaccurate performance measures, and misconduct / fraud.

- **No special payouts:** DBS does not practice accelerated payment of deferred remuneration for departing employees other than in exceptional cases, such as death in service. There is also no provision for special executive retirement plans, golden parachutes or special severance packages for executives. Finally, DBS does not provide any guaranteed bonuses with duration longer than one year.

(b) Governance

The governance of remuneration policies involves the design, implementation, and the ongoing review of remuneration practices. The main bodies involved in these roles are outlined below.

The Compensation and Management Development Committee (CMDC) is a DBSH Board level committee that reviews and approves DBSH's remuneration policy and the annual variable remuneration pool. It also provides oversight on the remuneration of senior executives, executive directors and control functions, and reviews cases where total remuneration exceeds a pre-defined threshold, or where a clawback is being implemented. Non-executives comprise the majority of the CMDC membership. This provides the platform for the Committee to make decisions in an independent manner.

CORPORATE GOVERNANCE REPORT (CONTINUED)

2 Remuneration Matters (continued)

(b) Governance (continued)

The CMDC has direct access to senior management, and works closely with the **DBSH Board Risk Management Committee (BRMC)**, and the **Audit Committee** when performing its role. The BRMC and the Audit Committee work with **HR, Finance, and Risk** functions to validate the financial results used in the sizing and allocation of the variable remuneration pool. For instance, they review the revenue amortisation and cost allocation policies used, and also determine the extent to which key risk exposures (credit, market, liquidity, operational, reputational) are reflected in the variable remuneration sizing process.

(c) Variable remuneration pool sizing and allocation

DBSH's variable remuneration pool is expressed as a percentage of Net Profit before Tax (NPBT), adjusted for any DBSH level cost allocations. The percentage is determined based on DBSH performance, the quantum / nature of the risk exposures, and the market conditions. The results are modulated by DBS' performance measurement against a balanced scorecard, which comprises metrics related to shareholder / client / employee performance, and the realisation of medium to long term strategic objectives.

DBS recognises the limitations associated with the use of management judgement to adjust for risks in the NPBT approach, particularly the opaque 'tail risks'. To address this limitation, DBS has started triangulating the NPBT calculations with an Economic Profit (EP) based approach starting 2010. Given the medium term challenges around the calibration of EP model and the build out of supporting infrastructure, DBS plans to continue using the EP approach as a checkpoint for NPBT approach in the near term.

After the variable remuneration pool has been endorsed by CMDC, DBSH management works with Finance, HR and Risk to allocate it across BUs based on their financial and non-financial performance. The BU heads follow a similar approach when allocating the bonus to teams/individuals. Where relevant, they also liaise with the country heads to ensure that business needs are adequately reflected in the allocations.

The final bonus pool is approved at the Board level.

(d) Performance measurement

DBS uses a comprehensive performance measurement framework that incorporates both financial and non financial performance in the sizing and allocation of variable remuneration. The financial metrics link the variable remuneration to DBSH and BU level financial results, while the non-financial metrics capture the performance on qualitative aspects like adherence to risk policies and client satisfaction.

For DBSH level management, performance measures are designed to incentivise the ownership of prudent strategy design and execution. This is done by measuring their performance based on a scorecard similar to the one used at DBSH level, with appropriate modifications to the metrics and their weightings. For the BU level management (including the heads of BUs and teams), the scorecards also focus on maximising synergies across BUs.

CORPORATE GOVERNANCE REPORT (CONTINUED)

2 Remuneration Matters (continued)

(d) Performance measurement (continued)

DBS also places due emphasis on the incentives of sales staff to promote the development of long term client relationships. The majority of the sales staff is located in the Institutional Banking Group (IBG) and the Consumer Banking Group (CBG) including Private Banking. The performance of sales staff is assessed based on profitability and risk characteristics of origination, rather than on volume. The non financial metrics focus on incentivising customer satisfaction, compliance with DBSH's legal and risk policies, and contribution to DBSH objectives.

The performance of Control functions (Risk, Finance, Legal, Compliance and Audit) is measured independently from the BUs that they support to avoid any conflicts of interest. Employee performance is assessed based on the achievement of their respective operational KPIs. The measurement of these KPIs is driven by the Control function management, and is done independent of the performance or inputs of the BU which they support.

(e) Deferred Remuneration of Senior Management and Key Personnel

During the year ended 31 December 2010, the senior management and key personnel received the following amount of deferred remuneration:

	<u>Number of shares</u>
Aggregate amount of deferred variable remuneration awarded in 2010 (Note 1)	
- Unvested shares	183,720
- Vested shares	Nil
Aggregate amount of shares awarded prior to 2010 and vested and paid out in 2010 (Note 2)	
- Granted in 2007	36,466
- Granted in 2008	50,720

Note:

(1) The fair value per share at grant date is SG\$14.48.

(2) The above includes shares awarded in 2007 and 2008 and the weighted average fair value per share at grant date is SG\$19.56 and SG\$15.26 respectively.

CORPORATE GOVERNANCE REPORT (CONTINUED)

3 Internal Audit

Internal Audit is an independent function that reports functionally to the Board Audit Committee and administratively to the Bank Chief Executive Officer. The functional reporting includes matters relating to Audit Charter, risk assessment and related audit plans, results of internal audit activities and other matters that the Head of Internal Audit deems necessary. The Board Audit Committee approves the hiring of Head of Internal Audit including appointment, removal, evaluation, annual compensation and salary adjustment. Administratively, the Bank Chief Executive Officer facilitates the day-to-day operations of the internal audit function, including budgeting, management accounting and human resource administration. Internal Audit has unfettered access to any and all of the Bank's documents, records, properties and personnel including the Chairman of the Bank's Board of Directors and Board Audit Committee.

The primary role of Internal Audit is to assist the Board and Executive Management to meet the agreed strategic and operational objectives of the Bank and its subsidiaries. This is achieved by providing an independent appraisal of the adequacy and effectiveness of the risk management, control and governance processes in operation throughout the Bank.

Internal Audit also maintains a quality assurance and improvement programme that covers all aspects of the internal audit activity. The programme includes ongoing monitoring and external and internal assessments of internal audit activity, which conforms to the Institute of Internal Auditor's ("IIA") International Standards for the Professional Practice of Internal Auditing. External Quality Assessment Reviews are carried out at least once in every five years by qualified professionals from an external organisation.

The professional competence of the Bank's internal auditors is maintained or upgraded through training programmes, conferences and seminars that provide updates on auditing techniques, regulations and banking products and services.

An annual audit plan is developed under a structured risk assessment approach that examines all of the Bank's activities and entities, their level of inherent risk and control effectiveness against the various risk types. Audit projects are identified and scoped based on this approach and audit resources are focused on the activities deemed to carry higher risks.

The scope of Internal Audit encompasses the examination and evaluation of the reliability, adequacy and effectiveness of the Bank's system of internal controls, risk management procedures, governance processes and the quality of performance in carrying out assigned responsibilities. This includes reviewing the timeliness and accuracy of recording transactions and proper safeguarding of assets. Internal Audit may also conduct consulting services only at the request of management in accordance with Group Internal Audit's Consulting Framework.

Audit work is substantially paperless with the in-house developed computerised audit work paper and resource management system.

The progress of corrective actions on outstanding audit issues is monitored monthly through a centralised Group-wide issue management system. Information on outstanding issues is categorised according to severity and monthly reports are sent to the senior management. All audit reports are copied to the Board Audit Committee, the external auditor and senior management. The regulators are also apprised of all relevant audit matters and may request for further information on audit matters at any time. Internal Audit works closely with the external auditor and meets them regularly to discuss matters of mutual interest, to strengthen working relationships and to co-ordinate audit efforts. The external auditor reviews the effectiveness of the Bank's internal controls and risk management during an annual statutory audit. Material non-compliance with established practices and procedures and regulations, as well as internal control weaknesses noted during the audit, together with recommendations, are reported to the Board Audit Committee, which ensures that high-risk outstanding issues are dealt with in a timely manner.
