REGULATORY DISCLOSURES

A. Regulatory capital (continued)

Appendix 2: Capital Disclosures (continued)

Note to the template

Row No.	Description	Hong Kong basis	Basel III basis
	Deferred tax assets net of deferred tax liabilities	HK\$32m	nil
10	<p>Explanation</p> <p>As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), deferred tax assets (“DTAs”) that rely on future profitability of the bank to be realised are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition of CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III.</p> <p>The amount reported under the column “Basel III basis” in this box represents the amount reported in row 10 (i.e. the amount reported under the “Hong Kong basis”) adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for Mortgage Servicing Rights (“MSRs”), DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities and other credit exposures to connected companies) under Basel III.</p>

REGULATORY DISCLOSURES

B. Leverage Ratio

Leverage Ratio Common Disclosure Template

	Item	Leverage ratio framework As at 31 December 2015 HK\$'M
On-balance sheet exposures		
1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	300,951
2	Less: Asset amounts deducted in determining Basel III Tier 1 capital (reported as negative amounts)	(2,052)
3	Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)	298,899
Derivative exposures		
4	Replacement cost associated with all derivatives transactions (i.e. net of eligible cash variation margin)	5,929
5	Add-on amounts for PFE associated with all derivatives transactions	4,638
6	Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework	–
7	Less: Deductions of receivables assets for cash variation margin provided in derivatives transactions (reported as negative amounts)	–
8	Less: Exempted CCP leg of client-cleared trade exposures (reported as negative amounts)	–
9	Adjusted effective notional amount of written credit derivatives	–
10	Less: Adjusted effective notional offsets and add-on deductions for written credit derivatives (reported as negative amounts)	–
11	Total derivative exposures (sum of lines 4 to 10)	10,567
Securities financing transaction exposures		
12	Gross SFT assets (with no recognition of netting), after adjusting for sales accounting transactions	–
13	Less: Netted amounts of cash payables and cash receivables of gross SFT assets (reported as negative amounts)	–
14	CCR exposure for SFT assets	–
15	Agent transaction exposures	–
16	Total securities financing transaction exposures (sum of lines 12 to 15)	–
Other off-balance sheet exposures		
17	Off-balance sheet exposure at gross notional amount	162,376
18	Less: Adjustments for conversion to credit equivalent amounts (reported as negative amounts)	(143,559)
19	Off-balance sheet items (sum of lines 17 and 18)	18,817
Capital and total exposures		
20	Tier 1 capital	31,149
21	Total exposures (sum of lines 3, 11, 16 and 19)	328,283
Leverage ratio		
22	Basel III leverage ratio	9.5%

The leverage ratio is the ratio of Tier 1 capital to total exposures (comprising on-balance sheet exposures, derivative exposures and off-balance sheet exposures). The Bank's leverage ratio as at 31 December 2015 was 9.5% (2014: 9.0%). The increase in leverage ratio was mainly attributed to decrease in the total exposures.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES**REGULATORY DISCLOSURES****B. Leverage Ratio (continued)****Summary Comparison Table**

	Item	Leverage ratio framework As at 31 December 2015 HK\$'M
1	Total consolidated assets as per published financial statements	307,812
2	Adjustment for investments in banking, financial, insurance or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	45
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the operative accounting framework but excluded from the leverage ratio exposure measure	–
4	Adjustments for derivative financial instruments	3,204
5	Adjustment for securities financing transactions (i.e. repos and similar secured lending)	–
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)	18,817
7	Other adjustments	(1,595)
8	Leverage ratio exposure	328,283

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

REGULATORY DISCLOSURES

C. Liquidity Coverage Ratio (continued)

The Bank has maintained a healthy liquidity position in 2015. The LCR remained stable and well above the regulatory requirement throughout the year of 2015. Surplus funds were redeployed from high quality liquid assets to money market lending, leading to a slight drop in high quality liquid assets in second half of 2015, associated with an increase in cash inflow.

(i) Composition of High Quality Liquid Assets (“HQLA”)

The Bank holds a pool of high quality unencumbered liquid assets that is readily available to meet cash flow obligations under stress scenarios, as defined in the LCR rules. These liquid assets consist predominantly of Level 1 HQLA, including mainly Hong Kong exchange fund bills and notes, as well as other government debt securities. This is supplemented by bonds issued by public sector entities in Hong Kong and highly rated corporate issuers, as well as covered bonds issued by reputable financial institutions.

(ii) Concentration of funding sources

The Bank strives to develop a diversified funding base with access to funding sources across retail and wholesale channels. Customer deposits form a sound funding base and serve as the main source of funding for the Bank. It is complemented by a well-diversified book of wholesale funding, including but not limited to interbank money market borrowing and the issuance of certificates of deposit.

The Bank has continued to make inroads into growing, deepening and diversifying its deposit base, spanning retail, wealth management, corporate and institutional customers across the markets that it operates in.

Concurrently, the Bank maintains access to wholesale funding channels so as to grow its investor base, as well as to develop a source of short term funding that it may quickly access in times of need. A sustainable source of wholesale funding allows the Bank to manage funding costs under challenging liquidity environments and maintain funding nimbleness to capture business opportunities.

(iii) Derivative Exposures

The Bank actively manages its over-the-counter (“OTC”) and exchange-traded derivative contracts, which comprise mainly of currency, interest rate and bond futures, foreign exchange forwards, interest rate and cross currency swaps, and foreign exchange options. Collateral may be required to be posted to counterparties and/or the exchanges, depending on the daily mark-to-market of these derivative positions. The Bank’s largest counterparty for OTC derivatives is the Bank’s parent company, DBS Bank Ltd.

(iv) Currency mismatch

Customer deposit in Hong Kong, largely denominated in HKD, is a major funding source for the Bank. The Bank swaps surplus HKD funding into United States Dollars (“USD”) and other foreign currencies to meet customer demand for loans.

As the supply of HKD denominated HQLA in the market is relatively limited, the Bank covers its HKD mismatch mainly by holding high quality USD liquid assets. This is in line with the LCR alternative liquidity approach option elected by the HKMA. The Bank has continued to maintain its ratio of HKD Level 1 HQLA to HKD net cash outflows within 30 days well above the HKMA minimum requirement of 20%.

(v) Centralisation of liquidity management

The Bank seeks to manage its liquidity in a prudent manner to ensure that its liquidity obligations would always be honored under normal and adverse circumstances. The Bank centrally manages its liquidity position and provides funding support to its overseas branch for the lending growth.

DBS BANK (HONG KONG) LIMITED AND ITS SUBSIDIARIES

REGULATORY DISCLOSURES

C. Liquidity Coverage Ratio (continued)

Approach to liquidity risk management

The Bank's approach to liquidity risk management is based on the building blocks of governance by risk committees' oversight, policies that define overarching principles and specific risk methodologies, and standards that establish the detailed requirements. Processes and systems are in place to measure, limit and control exposures based on the risk methodologies defined. Please refer to the annual report and financial statements for the year ended 31 December 2015 for more detailed information.
