13. Contingent liabilities and commitments (Continued)

The above table shows the contractual amounts of the Branch's off balance sheet exposures that commit it to extend credit to customers. The above amounts represent a worse case scenario of credit risk exposure arising from these instruments, without taking into account any collateral held or other credit enhancements attached. The amounts do not represent amounts at risk at the balance sheet date.

14. Liquidity

The Branch complies with the minimum requirement of Liquidity Maintenance Ratio ("LMR") on a daily basis, in accordance with the Banking (Liquidity) Rules issued by the Hong Kong Monetary Authority ("HKMA").

	For the six months ended		
	30 June 2017		
Average LMR for the period	34.0%	32.6%	

The average LMR is calculated as the simple average of each month's average liquidity maintenance ratio for the first six months of the financial year.

SUPPLEMENTARY FINANCIAL INFORMATION (unaudited)

14. Liquidity (Continued)

Approach to liquidity risk management

The Branch's approach to liquidity risk management comprises the building blocks of governance by policies, oversight by risk committees, and well-defined risk methodologies.

The Group Liquidity Risk Management Policy sets out the Branch's overall approach towards liquidity risk management and describes the range of strategies employed by the Branch to manage its liquidity. These include maintaining an adequate counterbalancing capacity to address potential cashflow shortfalls and maintaining diversified sources of liquidity. Counterbalancing capacity includes liquid assets and the capacity to borrow from the money markets as well as forms of managerial interventions that improve liquidity. In the event of a potential or actual crisis, the Branch has in place a set of liquidity contingency and recovery plans to ensure that decisive actions are taken to ensure the Branch maintains adequate liquidity.

The primary measure used to manage liquidity within the tolerance is the cashflow maturity mismatch analysis. The analysis is performed on a regular basis under normal and adverse scenarios. It assesses the adequacy of the counterbalancing capacity to fund or mitigate any cashflow shortfalls that may occur as forecasted in the cashflow movements across successive time bands. Processes and systems are in place to measure, limit and control exposures based on the risk methodologies defined.

The Branch seeks to manage its liquidity in a manner that ensures that its liquidity obligations would continue to be honoured under normal as well as adverse circumstances. Oversight relating to the management of liquidity risk is provided by the Hong Kong Risk Executive Committee ("Risk Exco") and the Hong Kong Market and Liquidity Risk Committee ("MLRC"). The HK Risk Exco comprises the HK Chief Executive Officer, the Senior Risk Executive and representatives from relevant business and support units. The HK MLRC reports to the HK Risk Exco and comprises representatives from Risk Management Group and relevant business and supports units. The Hong Kong Assets and Liabilities Committee ("ALCO") regularly reviews the balance sheet composition, trends in loans and deposits, utilization of wholesale funding, momentum in business activities, market competition, economic outlooks, market conditions and other factors that may affect liquidity in the continual refinement of the Branch's funding strategy.

The Branch also follows the guidance set forth by the HKMA in Supervisory Policy Manual LM-2, Sound Systems and Controls for Liquidity Risk Management.

16. Loans and advances to customers by loan usage

The Branch employs a range of policies and practices to mitigate credit risk, one of which is the taking of collateral. The collateral includes cash, marketable securities, properties, trade receivables, inventory, equipment and other physical and financial collateral. Balances of advances analysed by loan usage and the corresponding balances covered by collateral are as follows:

19. Non-performing loans and advances

There is no non-performing loan and advance as at 30 June 2017 and 31 December 2016.

Non-performing loans and advances are advances with objective evidence of impairment and are assessed using discounted cash flow method. Specific allowances of such advances are measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the original effective interest rate.

The specific allowances were made after taking into account the value of collateral in respect of the above advances.

20. Overdue and rescheduled loans and advances

There is no overdue, rescheduled loan and advance and no repossessed asset as at 30 June 2017 and 31 December 2016.
