## Qualitative Analysis

As of 30 June 2026, the Bank's Capital Adequacy Ratio (CAR) stood at 17.93%, well above the minimum regulatory capital requirement. CAR decreased by 2.84% compared to the previous quarter, primarily due to an increase in Credit Risk-Weighted Assets (Credit RWA) driven by higher credit exposures, with RWA growth outpacing capital growth.

In terms of the liquidity ratios, the Liquidity Coverage Ratio (LCR) and the Net Stable Funding Ratio (NSFR) were very adequate during the above periods, far above OJK minimum requirement of 100%.
