Qualitative Analysis			
As of 31 March 2026, the Bank’s leverage ratio stood at 8.76%, remaining well above the regulatory minimum requirement. The 0.89% decline quarter-on-quarter was primarily driven by an increase in total exposure of Rp18.9 trillion, mainly attributable to higher Loans, Placements with Bank Indonesia, Derivatives, and Reverse Repo transactions. This impact was partially offset by a Rp 245 billion increase in Capital compared to the previous quarter.
