*as at 31 March 2022*

(Currency: Indian rupees in million)

**1. Scope of application**
***Qualitative Disclosures***

DBS Bank India Limited ('DBIL' / 'the Bank'), operates in India as a Wholly Owned Subsidiary ("WOS") of DBS Bank Ltd., Singapore, a banking entity incorporated in Singapore with limited liability. The Bank does not have any subsidiaries in India nor any interest in Insurance Entities. Thus, the disclosures contained herein only pertain to the Bank. These disclosures are inclusive of the business of erstwhile Lakshmi Vilas Bank (eLVB), i.e. the disclosures represent the position for the amalgamated entity. For eLVB's reporting positions, the industry wise classification as per existing records has been used. The Bank is in the process of harmonizing the industry wise classification methodology for the amalgamated entity.

***a. List of group entities considered for consolidation***

| Name of the entity / Country of incorporation | Whether the entity is included under accounting scope of consolidation (yes / no) | Explain the method of consolidation | Whether the entity is included under regulatory scope of consolidation (yes / no) | Explain the method of consolidation | Explain the reasons for difference in the method of consolidation |

##### *f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group:*

There are no restrictions or impediments on transfer of funds or regulatory capital within the banking group.

**Basel III: Pillar 3 Disclosures (Continued)**

as at 31 March 2022

(Currency: Indian rupees in million)

**2. Capital Adequacy**
***Qualitative disclosures***

The CRAR of the Bank is 16.29% as computed under Basel III norms, which is higher than the minimum regulatory CRAR requirement (including CCB) of 11.50%.

The Bank's capital management framework is guided by the existing capital position, proposed growth and strategic direction. Growth opportunities have resulted in an increasing and continuing need to focus on the effective management of risk, and commensurate capital to bear that risk. The Bank carefully assesses its growth opportunities relative to the capital available to support them, particularly in the light of the economic environment and capital requirements under Basel III. The Bank maintains a strong discipline over capital allocation and ensuring that returns on investment cover capital costs.

COVID-19 pandemic has had an extraordinary impact on macroeconomic conditions in India and around the world during the financial years 2020-21 and 2021-22. The impact of COVID-19, including changes in customer behaviour and pandemic fears, as well as restrictions on business and individual activities, has led to volatility in global and Indian financial markets and a decrease in global and local economic activities. The revival of economic activity has since improved, supported by relaxation of restrictions due to administration of the COVID vaccines to a large population in the country. The extent to which any new wave of COVID-19 pandemic will impact the Bank results will depend on future developments, including, among other things, any new information concerning the severity of the COVID-19 pandemic, and any action to contain its spread or mitigate its impact whether government-mandated or elected by us.

**3. General Disclosures**

As part of overall corporate governance, the Bank has set up a framework which defines authority levels, oversight responsibilities, policy structures and risk appetite limits to manage the risks that arise in connection with the use of financial instruments. On a day-to-day basis, business units have primary responsibility for managing specific risk exposures while Risk Management Group (“RMG”) exercises independent risk oversight on the Bank as a whole. RMG is the central resource for quantifying and managing the portfolio of risks taken by the Bank.

Under the DBS India risk governance structure, the India Risk Exco (‘Risk EXCO’) serves as the Bank’s Risk Committee for governance over Credit, Market & Liquidity, Operational Risk and other risks under the supervision of Board Risk Management Committee (BRMC). The BRMC oversees the risk governance, risk approaches and limits of DBS India and ensures that these risks are effectively managed within the bank’s overall risk governance framework

The responsibilities of the committees are summarized below:

**India Board Risk Management Committee (BRMC)**

- Oversees the risk governance, risk approaches and limits of DBS India and ensures that these risks are effectively managed within the Bank’s overall risk governance framework.
- Approves the Bank’s overall and specific risk governance approach including risk appetite approach, risk authority limits, major risk policies and significant changes thereto.
- Discuss risk reporting requirements and monitor the types of risk exposures and profile against risk thresholds.
- Approves risk models which are used for capital computation and monitor the performance of previously approved models.
- Reviews (in parallel with the Board Audit Committee) the adequacy and effectiveness of the Bank’s internal control approach.
- Approve the annual Business Continuity Management (BCM) attestation

**India Risk Exco (“Risk EXCO”)**

- Serves as the Bank’s Committee for governance over credit, market, operational (including financial crime, cybersecurity, information security, fair dealing, and regulatory), liquidity as well as reputational risk.
- Monitors and discusses the Bank’s risk profiles, as well as market and regulatory developments.
- Oversees the Internal Capital Adequacy Assessment Process (ICAAP) including scenarios used and approve risk assessments results.
- Serves as a discussion forum for any matter escalated by the underlying risk committees and endorse India specific risk policies and local adoption of Group policies as required, before recommendation to India Board for approval.

**3. General Disclosures (*Continued*)**

## India Credit Risk Committee (CRC)

- Assess credit risk taking, including decision criteria, Credit risk framework, Credit risk mitigation and limit management practices.
- To review, measure and monitor DBIL's credit risk portfolio including special loan and asset review situations e.g. review of non-performing loans and credits showing weaknesses.
- Review and monitor the adequacy, accuracy, and effectiveness of credit systems for credit risk management and credit risk control.
- Assess and monitor specific credit concentrations at business or sector level and credit trends affecting the portfolio; implementing necessary policies or procedures to manage identified risks.
- Assess and monitor key policy deviations e.g. overdue credit reviews, Target Market and Risk Acceptance Criteria (TMRAC) deviations and / or regulatory allowances specific to the bank.
- Endorse local credit policies for approvals.
- Exercise active oversight to ensure continuing appropriateness of stress testing in accordance with the responsibilities delegated from time to time and as documented in the Credit Stress Testing Policy.

**A) General Disclosures for Credit Risk*****Qualitative Disclosures*****Credit Risk Management Policy**

The management of Credit Risk including concentration credit risk requires active oversight by India Credit Risk Committee (CRC), India Risk Executive Committee (India Risk Exco) and India Board Risk Management Committee (India BRMC). The India Risk Exco and CRC have adequate understanding of inherent credit risks in specific activities of the Bank, particularly those that may significantly affect the financial condition of the Bank. The India Risk Exco and CRC are responsible to formulate/review credit risk policy, credit risk strategy and risk exposure of the Bank. The credit risk policy is endorsed by the CRC and Board Risk Management Committee (India BRMC) and approved by the Board.

The credit policies and basic procedures of the Bank relating to its lending activities are contained in the India Local Credit / Loan Policy of the Bank as well as Group Core Credit Policies and other standards followed across all DBS group entities. These are based on the general credit principles, directives / guidelines issued by the RBI from time to time as well as instructions and guidelines of DBS Bank Ltd, Singapore (hereinafter referred to as "the Parent"). In the unlikely event of any conflict amongst the RBI guidelines and Parent's Guidelines, the more conservative policy / guideline is followed.

The Group Core Credit Policies and the India Credit / Loan policy outlines the Bank's approach to Credit Risk Management and sets out the rules and guidelines under which the Bank would develop and grow its lending business. These policies provide guidance to the Bank's Corporate Banking, SME Banking, Financial Institutions Group and Consumer Banking to manage the growth of their portfolio of customer assets in line with the Bank's credit culture and profitability objectives, taking into account the capital needed to support the growth.

# DBS Bank India Limited

## Basel III: Pillar 3 Disclosures (*Continued*)

as at 31 March 2022

(Currency: Indian rupees in million)

### 3. General Disclosures (*Continued*)

#### *General Disclosures for Credit Risk (Continued)*

##### *Qualitative Disclosures (Continued)*

Supplementary policies to the main Group Core Credit Policy and the India Credit / Loan policies have also been laid out, for certain types of lending and credit-related operations. These include subject specific policies relating to risk ratings, Default policy, Specialized Lending etc., as well as guidelines for Real Estate lending, NBFC lending, hedging of FX exposures, credit risk mitigation, sectoral and individual / group borrower limits, bridge loans, bill discounting, collateral valuation, collection management, policies for certain specific products, etc.

The India Credit Risk Committee, comprising Chief Executive Officer, Chief Risk Officer, Heads of business segments, Head of Special Assets Management and other senior representatives from business and credit meet on a monthly basis. The committee has oversight of credit risk related strategy planning, implementing necessary guidelines, procedures to manage identified risks, credit portfolio movements and other relevant trends in the portfolio pertaining to credit risk. The summary of discussions and outcome are shared with DBS Group, as required.

Responsibility for monitoring post-approval conditions for institutional borrowers resides with the Credit Control Unit (“CCU”), which reports to the Chief Risk Officer (“CRO”) in India. The responsibility for risk reporting is with the Credit Risk – Chief Operating Office team which reports to the CRO in India. The Risk Based Supervision (RBS) submission to RBI contains further details on the same.

#### **Credit Approval and Risk Rating process**

The Bank adopts a risk-based credit approval structure whereby Credit Approving Authority levels are tied to the Group and borrower’s credit risk rating, and total credit facility limits extended across the Bank. The Business team prepares a credit memo and proposes the credit risk and facility risk ratings, which is then submitted to Credit Risk Managers (CRM), who are responsible for evaluation of the proposition based on the policies and guidelines and approve the limits as well as credit risk and facility risk ratings. To avoid conflict of interest, the credit approving team functions as a separate department and do not have any business targets. Larger Credit Limits may require approval from Credit Approval Committee (CAC) and Board Credit Approval Committee (BCAC). The roles & responsibilities for accounts in eLVB have been aligned with the one followed in DBIL.

Advances are classified into performing and non-performing advances (NPAs) as per RBI guidelines. NPA’s are further classified into sub-standard, doubtful and loss assets based on the criteria stipulated by RBI.

For eLVB’s reporting positions, the industry wise classification as per existing records has been used. The Bank is in the process of harmonizing the industry wise classification methodology for the amalgamated entity.

**4. Disclosures for Credit Risk: Portfolios subject to Standardised approach**
***Qualitative Disclosures***

Currently based on our clientele, ratings of the following agencies have been used i.e. CARE, CRISIL, India Ratings and Research Private Ltd., ICRA, Brickwork, SME Rating Agency Pvt Ltd (SMERA), Infomeric, Standards & Poors, Moody's and Fitch for all exposures. The Bank assigns Long term credit ratings accorded by the chosen credit rating agencies for assets which have a contractual maturity of more than one year. However, in accordance with RBI guidelines, the Bank classifies all cash credit exposures as long term exposures and accordingly the long term ratings accorded by the chosen credit rating agencies are assigned. The Bank uses both issue specific and issuer ratings. For the mortgage loans portfolio, risk weight is derived as per LTV ratio. RBI guidelines are followed for risk rating of other portfolios.

***Quantitative Disclosures***

Categorization of Credit Exposures (Fund and Non Fund based) \* classified on the basis of Risk Weightage is provided below:

| Particulars         | 31 Mar 22      |
|---------------------|----------------|
| < 100 % Risk Weight | 544,612        |
| 100 % Risk Weight   | 273,205        |
| > 100 % Risk Weight | 31,953         |
| <b>Total</b>        | <b>849,770</b> |

\* Credit Exposures are reported net of NPA provisions and provision for diminution in fair value of restructured advances classified as Standard.

**5. Disclosures for Credit Risk Mitigation on Standardised approach**
***Qualitative Disclosures***

This is detailed in our policy on Credit Risk Mitigation techniques and Collateral Management.

***Quantitative Disclosures***

The Bank uses various collateral, both financial and non-financial guarantees and credit insurance as credit risk mitigants. However, capital benefit can be taken only on eligible financial collaterals including bank deposits, NSC/KVP/Life Insurance Policy, gold etc. subject to Pillar I eligibility criteria. Currently, eligible financial collateral in the form of fixed deposits under lien, amount accepted under Parallel Deposit and guarantees issued by eligible guarantor as specified in RBI guidelines have been used as credit risk mitigants. In the case of fixed deposits under lien, the Bank reduces its credit exposure to counterparty by the value of the fixed deposits.

The details of exposures (after application of haircut) wherein the bank has used credit risk mitigants (CRM) are as under:

| Product                 | Amount of CRM |
|-------------------------|---------------|
| Fund based exposure     | 65,056        |
| Non Fund based exposure | 6,121         |
| <b>Total</b>            | <b>71,177</b> |

**Basel III: Pillar 3 Disclosures (*Continued*)**

*as at 31 March 2022*

(Currency: Indian rupees in million)

**6. Disclosure on Securitisation for Standardised approach**

The Bank has not undertaken any securitisation and hence this disclosure is not applicable.

**7. Disclosure on Market Risk in Trading book*****Qualitative disclosures***

Market Risk arises from changes in value from changes in interest rates yields, foreign exchange rates, equity prices, commodity prices, credit spreads and the impact of changes in the correlations and volatilities of these risk factors. The Bank's market risk appetite is determined by the Board of Directors through the Board Risk Management Committee, with detailed limit frameworks recommended by the appropriate risk committees. The Market & Liquidity Risk Committee and the Risk Executive Committee, oversees the market risk management infrastructure, sets market risk control limits and provides enterprise-wide oversight of all market risks and their management.

The Bank's market risk framework identifies the types of the market risk to be covered, the risk metrics and methodologies to be used to capture such risk and the standards governing the management of market risk within the Bank including the limit setting and independent model validation, monitoring and valuation.

The principal market risk appetite measure is Expected Shortfall. The Expected Shortfall is supplemented by risk control measures, such as sensitivities to risk factors, including their volatilities, as well as P&L loss triggers (Management Action Triggers) for management action.

Expected Shortfall estimates the potential loss on the current portfolio assuming a specified time horizon and level of confidence. The Expected Shortfall methodology uses a historical simulation approach to forecast the market risk. Expected Shortfall risk factor scenarios are aligned to parameters and market data used for valuation. The Expected Shortfall is calculated for the Combined T&M Book, the T&M trading, the T&M banking.

The Bank computes combined, Trading and Banking Expected Shortfall daily. The trading Expected Shortfall forecasts are back tested against the profit and loss of the trading book to monitor its predictive power.

To complement the Expected Shortfall framework, regular stress testing is carried out to monitor the Bank's vulnerability to shocks. Also, monthly and annual P/L stop loss limits are monitored daily for the Trading book.

**Basel III: Pillar 3 Disclosures (Continued)**

as at 31 March 2022

(Currency: Indian rupees in million)

**7. Disclosure on Market Risk in Trading book (Continued)*****Qualitative Disclosures***

The risk control measures such as Interest rate PV01 (IRPV01), FX Delta & FX Vega measure the interest rate and FX rate risk to the current portfolio. The IR PV01 measures the change in the Net present value (NPV) due to an increase of 1 basis point in interest rates. The FX delta measures the change in the NPV due to an increase of 1 unit in FX rates, while the FX Vega measures the change in the NPV due to an increase of 1 unit in FX volatilities. The currency wise IRPV01 and FX Delta is calculated daily for T&M trading, T&M banking and Central Operations book, while the FX Vega is calculated daily for the T&M trading book.

The other risk control measures such as Credit spread PV01 (CSPV01) and Jump to Zero (JTZ) measures the change in the NPV due to an increase of 1 basis point in credit spreads and the expected loss due to immediate default respectively. The CSPV01 and JTZ are calculated daily for T&M trading book.

***Quantitative Disclosures*****Capital Requirement for Market Risk \***

| Particulars                            | 31 Mar 22 |
|--|-----------|
| Interest rate risk                     | 6,528     |
| Foreign exchange risk (including gold) | 540       |
| Equity position risk                   | 284       |

\* Capital required for Market Risk is calculated at 8% of Risk Weighted Assets.

**8. Operational Risk*****Qualitative Disclosures*****Strategy and Process**

DBIL Operational Risk Management (ORM) policy:

- Defines operational risk and the scope of its application;
- Establishes the dimensions of operational risk;
- Provides a consistent country wide approach for managing operational risk in a structured, systematic and consistent manner.

Operational risk arises from inadequate or failed internal processes, people, systems or from external events. It includes legal risk but excludes strategic or reputation risk.

**Basel III: Pillar 3 Disclosures (Continued)**

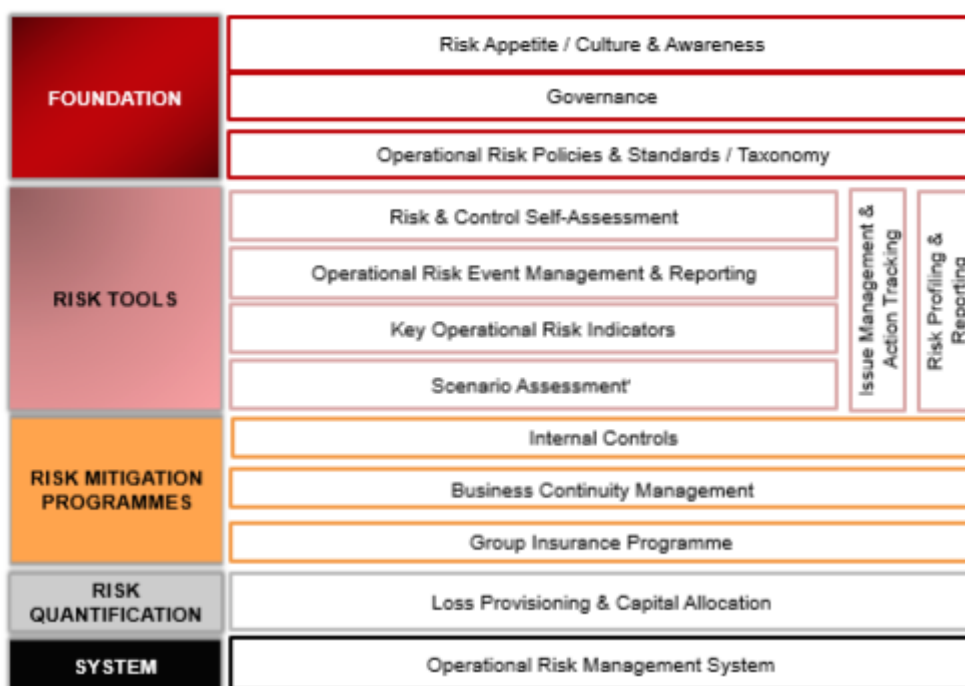

as at 31 March 2022

(Currency: Indian rupees in million)

DBIL adopts the following risk management approach to manage operational risk:

The operational risk management (ORM) approach adopted by DBIL comprises several elements as follows:

DBIL’s Operational Risk Appetite Statement is:

“DBIL adopts a zero-tolerance mindset for operational risk that can endanger our franchise.”

# DBS Bank India Limited

## Basel III: Pillar 3 Disclosures (*Continued*)

as at 31 March 2022

(Currency: Indian rupees in million)

The ORM policy includes inter-alia:

- a) Key responsibilities (Board of Directors, Senior Management, BU/SU, Unit Operational Risk Managers (UORM), Control functions, Risk Management Group – Operational Risks and Internal Audit).
- b) ORM guiding principles
- c) ORM policies draws reference to the following policies:
  - Core Operational Risk Standard
  - Risk & Control Self-Assessment Standard & Guide
  - Operational Risk Event Management & Reporting Standard & Guide
  - Key Operational Risk Indicators Standard
  - Scenario Assessment Standard & Guide
  - Operational Risk Profiling & Reporting Standard & Guide
  - Group Insurance Programme Standard

### Structure and Organisation

The Bank has in place an India Operational Risk Committee (IORC) which meets on a monthly basis to discuss Operational Risk issues / related matters. The committee is chaired by the Chief Risk Officer (CRO) and is administered by the Head - Operational Risk, India. The committee reports to the Risk Exco. This ensures appropriate management and oversight of the prevailing operational risks in the Bank.

From March 2021 onwards, A monthly Operational Risk Management Committee (ORMC) meeting is held for eLVB and key items from this meeting are tabled to IORC for discussion.

As part of the Bank's ORM structure, an independent Operational Risk function is in place led by the local Head of Operational Risk, who reports to the CRO, India and functionally to the Group Head of Operational Risk at the Head Office in Singapore.

Coverage includes providing guidance, objective review and challenge to the BUs/SUs, assessing and monitoring operational risk and the effectiveness of ORM on a location wide basis.

DBIL adopts the three lines of defence (LOD) model for the management of operational risk. First LOD, own and manage risks in strategy, business planning and execution. The unit identify and manage/mitigate risks arising from:

- a. origination and booking of business
- b. provision of systems and processes to support (a)
- c. management of capital and balance sheet, financial & regulatory reporting

To ensure risks are effectively managed, first LOD may develop policies and standards for use within the unit or Bank-wide.

Second LOD, provides independent risk oversight, monitoring and reporting:

- a. Provides objective review and challenge on the activities undertaken by business and support units,
- b. Develop and maintain risk management policies and processes.

In addition to the independent second line of defence by Risk Management Group - Operational Risk, Unit Operational Risk Managers (UORM) are appointed within the first LOD to reinforce accountability and ownership of risk and control, assist in implementing corporate operational risk policies and driving the overall risk and control agenda and programmes. Periodic training / orientations / discussions are held to keep UORM updated with key developments. As third LOD Audit provide independent assurance, provide independent appraisal of adequacy and effectiveness of risk management, control and governance processes

### **Risk Mitigation Programs**

#### ***Internal Controls***

The day-to-day management of Operational Risk within the Bank is through maintenance of a comprehensive system of internal controls. An effective internal control system is a combination of a strong control environment and appropriate internal control procedures. These internal controls comprise of preventive, detective, directive and corrective controls.

#### ***Group Insurance Programme (GIP)***

GIP helps to mitigate operational risk losses from significant risk events.

The key objective of GIP is to reduce low frequency high impact financial losses via transfer of loss to external funding sources (insurers). In line with DBIL ORM philosophy, high frequency low impact operational losses are managed through establishment of strong internal controls.

***Business Continuity Management (BCM)*** is a key Operational Risk programme of DBIL to minimize the impact of a business disruption, irrespective of cause, and to provide an acceptable level of business until normal business operations are resumed.

BU/SUs are to comply with the BCM Policies and Standards established by Group Business Continuity Management (GBCM).

BCM includes the following:

- Establishment of ownership, roles and responsibilities
- Risk analysis
- Business impact analysis
- Recovery strategies
- Familiarisation of emergency response and crisis management plans
- Regular review and maintenance
- Regular, complete and meaningful testing

### **Risk Reporting and Measurement**

Operational Risk related MIS is reported through the central ORM system (GRC – Governance, Risk and Control), as follows:

- Incident Management (INC) Module in GRC - for reporting of Risk Events (including near miss and timing error, etc.)
- Issue and Action Management (I&A) Module in GRC - for tracking of issues and actions emanating from Risk Events, Audit Issues, Regulatory Issues and other risk related issues
- Key Indicator (KI) Module in GRC - for reporting and monitoring of Key Risk Indicators (KRI)

**Basel III: Pillar 3 Disclosures (*Continued*)**

as at 31 March 2022

(Currency: Indian rupees in million)

– Risk and Control Self-Assessment (RCSA) Module in GRC- to facilitate and record the assessment of the Risk and Control Self-Assessment process. RCSA review and assessment is performed as per risk-based frequency approach.

The Operational Risk Profile including relevant MIS relating to the above is placed at the monthly India Operational Risk Committee (IORC).

**Approach for operational risk capital assessment**

– The Bank currently adopts the Basic Indicator Approach to calculate capital requirements for operational risk.

**9. Interest rate risk in the banking book (IRRBB)**
***Qualitative Disclosures***

The Asset and Liability Committee (“ALCO”) oversees the structural interest rate risk and funding liquidity risk in the Bank. The Market & Liquidity Risk Committee (MLRC) ensures that the exposures are within prudent levels. Structural interest rate risk arises from mismatches in the interest rate profile of customer loans and deposits. This interest rate risk has several aspects: basis risk arising from different interest rate benchmarks, interest rate re-pricing risk, yield curve risks and embedded optionality. To monitor the structural interest rate risk, the tools used by DBIL include re-pricing gap reports based on traditional as well as duration gap approach, sensitivity analysis and income simulations under various scenarios.

***Quantitative Disclosures***

The Bank uses the Duration Gap approach to measure the impact of Market Value of Equity (MVE) for upward and downward rate shocks. This measures the potential change in MVE of the Bank for a 200 bps change in interest rates. The change in MVE due to a 200 bps change in interest rates are (for banking and trading book):-

| Change in MVE due to a 200 bps change in interest rates | INR Million |
|---|-------------|
| 31 <sup>st</sup> March, 2022                            | 871         |

Earnings-at-Risk (EaR) measures the interest rate risk from the earnings perspective. It is computed as an impact (over a 1-year horizon) of a 1% parallel shift in the yield curve on the Bank’s earning. This is computed using the net IRS gaps for each bucket up to 1 year. The aggregate of these approximates the net interest income impact of a 1% parallel shift (increase in interest rates) in the yield curve over a 1-year horizon and acts as a useful tool in the hands of the MLRC to monitor and assess the impact of Interest rate risk exposure of the Bank on its NII.

**10. General Disclosure for Exposures Related to Counterparty Credit Risk*****Qualitative Disclosures******USE OF ECONOMIC CAPITAL (EC) FOR CONCENTRATION RISK MANAGEMENT***

While the Bank firmly complies with regulatory capital requirements at all times, we recognize the need to have more robust methodologies to measure capital usage. Currently, Economic Capital (EC) model is not used in DBS India, but the Bank has adopted other qualitative and quantitative measures to address credit concentration risk. In addition to the regulatory limits, there are internally developed risk limits on the amount of exposure, as a percentage of the total exposure, that can be taken on any single industry, to avoid any sector concentration. Additionally, the Bank has developed maximum exposure limit norms which stipulates the amount of exposure that may be taken on a borrower considering its turnover and credit risk rating. In order to address the geographic concentration risk, the bank has implemented a policy on the maximum amount of advance, as a percentage of the total advances, which can be booked in some of the larger branches. The quantitative measurement of concentration risk, both for name and sector concentration and allocation of additional capital is one of the components of our ICAAP.

***CREDIT RISK MITIGANTS******Collateral***

Where possible, the Bank takes collateral as a secondary recourse to the borrower. Collateral includes cash, marketable securities, properties, gold, trade receivables, inventory and equipment and other physical and financial collateral. The Bank may also take fixed and floating charges on the assets of borrowers. It has put in place policies to determine the eligibility of collateral for credit risk mitigation, which include requiring specific collaterals to meet minimum operational requirements in order to be considered as effective risk mitigants.

When a collateral arrangement is in place for financial market counterparties covered under market standard documentation (such as Master Repurchase Agreements and International Swaps and Derivatives Association (ISDA) agreements), collateral received is marked to market on a frequency mutually agreed with the counterparties.

***Other Risk Mitigants***

The Bank manages its credit exposure from derivatives, repo and other repo-style transactions by entering into netting and collateral arrangements with counterparties where it is appropriate and feasible to do so. The credit risk associated with outstanding contracts with positive mark to market is reduced by master netting arrangements to the extent that if an event of default occurs, all amounts with a single counterparty in a netting-eligible jurisdiction are settled on a net basis.

The Bank may also enter into agreements which govern the posting of collateral with derivative counterparties for credit risk mitigation (e.g. Credit Support Annexes under ISDA master agreements). These are governed by internal guidelines with respect to the eligibility of collateral types and the frequency of collateral calls.

**Basel III: Pillar 3 Disclosures (*Continued*)**

*as at 31 March 2022*

(Currency: Indian rupees in million)

***COUNTER PARTY RISK MANAGEMENT***

Counterparty risk that may arise from traded products and securities is measured on a loan equivalent basis and included under the Bank's overall credit limits to counterparties. Issuer Default Risk that may arise from traded products and securities are generally measured based on jump-to-default computations.

The Bank actively monitors and manages its exposure to counterparties in over-the-counter (OTC) derivative trades to protect its balance sheet in the event of counterparty default. Counterparty risk exposures which may be materially and adversely affected by market risk events are identified, reviewed and acted upon by management and highlighted to the appropriate risk committees. In addition, the Bank's risk measurement methodology takes into account the higher risks associated with transactions that exhibit a strong relationship between the creditworthiness of a counterparty and the expected future replacement value of a relevant transaction (so called wrong-way risk) as identified during the trade booking process. The current exposure method is used for calculating the Bank's net credit exposure and regulatory capital for counterparty exposures, using the mark-to-market exposures with an appropriate add-on factor for potential future exposures.

**Basel III: Pillar 3 Disclosures (*Continued*)**

*as at 31 March 2022*

(Currency: Indian rupees in million)

**14. Disclosure for Banking Book Positions**

In accordance with the RBI guidelines on investment classification and valuation, Investments are classified on the date of purchase into “Held for Trading” (‘HFT’), “Available for Sale” (‘AFS’) and “Held to Maturity” (‘HTM’) categories (hereinafter called “categories”). Investments which the Bank intends to hold till maturity are classified as HTM securities.

As per the RBI guidelines, investments classified under HTM category are carried at their acquisition cost and not marked to market. Any diminution, other than temporary, in the value of equity investments is provided for. Any loss on sale of investments in HTM category is recognised in the Statement of Profit and Loss. Any gain from sale of investments under HTM category is recognised in the Statement of Profit and Loss and is appropriated, net of taxes and statutory reserve, to “Capital Reserve” in accordance with the RBI Guidelines. The book value of Bank’s investment HTM portfolio was Rs. 93,100 million as at March 31, 2022. Further, the Bank has investment in shares/Optionally Convertible Debentures which are received on conversion of debt which are classified under AFS category in accordance with RBI guidelines.

**15. LEVERAGE RATIO**

The Basel III leverage ratio is defined as the capital measure (Tier-1 capital of the risk based capital framework) divided by the exposure measure, with this ratio expressed as a percentage.

As per RBI guidelines, disclosures required for leverage ratio for the Bank at March 31, 2022 are as follows:

|   |  |                  |
|---|--|------------------|
| <b>On-balance sheet exposures</b>                 |  |                  |
| 1   | On-balance sheet items (excluding derivatives and SFTs, but including collateral)  | 780,576          |
| 2   | (Asset amounts deducted in determining Basel III Tier 1 capital)   | (11,038)         |
| 3   | <b>Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of lines 1 and 2)</b>  | <b>769,539</b>   |
| <b>Derivative exposures</b>                       |  |                  |
| 4   | Replacement cost associated with all <i>derivatives</i> transactions (i.e. net of eligible cash variation margin)                        | 23,306           |
| 5   | Add-on amounts for PFE associated with <i>all</i> derivatives transactions   | 117,756          |
| 6   | Gross-up for derivatives collateral provided where deducted from the balance sheet assets pursuant to the operative accounting framework | -                |
| 7   | (Deductions of receivables assets for cash variation margin provided in derivatives transactions)  | -                |
